Now that these Boards are in full working order, and that almost every member takes an active and independent interest in the business to be discharged, one must be struck with the greatness of the interests entrusted to them, and with one of the points in which they most differ from municipal corporations. This is, that in no District Board have all the members anything like an intimate knowledge of the whole jurisdiction or of the circumstances of all the local interests with which they have to deal. The Chittagong District Board is the only one on which there is a member besides the Chairman who is acquainted with the whole district, and to almost all the other members of it the southern half is foreign country. So are the extensive Noakhali islands to the members of the Noakhali District Board. Tippera is a more homogeneous district, but except the Chairman no member of its District Board has seen it all. Another great point of difference is that while the District Boards administer funds entrusted to them, the Municipalities assess and collect the bulk of their revenues. So the former are aristocratic, the latter comparatively humble bodies.

238. The Noakhali and Tippera District Boards certainly appreciate the comprehensive nature of their functions. Two instances in which the latter refused or omitted to co-operate with Noakhali are noticed in the section about communications. I find that one case, that of the Nadona Canal, occurred several years ago, and would probably be reconsidered now. The best way of negociating for aid of this sort is probably through the Commissioner of the Division. On the other hand, the parochial tendencies of the Chittagong District Board were noticed in 1892 when the members refused to complete or maintain one of their roads because its objects were strategical. They warmly repudiated the imputation then, and acceded to my representations of what their duty in the matter was, but have recently given a still more striking and unexpected instance in resolving that the construction of approach roads to the railway was a work devolving on Government, not on them. This, too, was almost immediately reconsidered and superseded. As before, I attribute this tendency to the numerous English members on the Board who are accustomed to the working of vestries.

239. On this District Board also a question involving the position of one of its standing committees recently arose. In this Division these committees have been constituted by rules having the force of law. Their position to the Board and their constitution is much the same as that of the chairman and vice-chairman, and the bulk of the work is done by them. From the reference made by the Chittagong District Board on the subject, it appeared to regard them merely as sub-committees of reference appointed *ad hoc*, and it styled them sub-committees, though their legal designation is committees. A question exciting much local interest and divided feeling, which was in the province of a certain committee, was suddenly brought before the Board without reference to the committee, and carried by a snap vote without receiving anything like due consideration. The committee concerned afterwards asserted itself and complained, and the matter has been reconsidered. The action of the Board was, I think, legal, but could not be called regular, and the consequences of its treating its chairman, vice-chairman, or committees

in this way would be disastrous, while the incident showed how useful the intervention of a committee is in any burning question of the sort.

240. Local Boards exist only in Tippera. The Magistrate writes that their work was satisfactory. Their powers were increased by the delegation to them of the control of the primary education allotment in their jurisdictions.

241. Of the five municipalities there is nothing fresh to say. Their weak points are as obvious as ever, and no one complains more loudly of their inefficiency than some of the members of these corporations. But equally obvious is their popularity in contrast to a more despotic system and their less direct usefulness. I made a minute inpection of the Comilla Municipality last year, and while noticing many defects had to acknowledge the great amount of time and trouble freely given to its working by the Chairman and Vice-Chairman, both hard-worked professional men. The same, of course, applied to Chittagong, where it is the tradition to invariably elect a European as Chairman. Last year a small faction was formed against him by another public servant who had rather strangely gained admission to the Board, and there was a stormy period which ended by Mr. Good's offering his resignation, and his colleagues declining it with an almost unanimous vote of confidence. The Noakhali and Cox's Bazar Municipalities are too small for much notice. The Magistrate reports the former, which I did not inspect, to be particularly inefficient. The latter is conducted in the old-fashioned way. The Brahmanbaria Commissioners have the second largest municipal area and population in the Division, but refuse to raise any adequate revenue, or to release from their control and taxes outlying hamlets for which they do little or nothing. They still manifest the idea that the foremost object for municipal expenditure is higher education, and their leading spirits are school-masters. This Municipality has repeatedly shown, as regards its outlying area, that while the people prefer the present to the former form of municipal government, they still more prefer exclusion from either.

242. The burning question in the town of Chittagong for many years has been the latrine system. Nineteen years ago it excited a popular commotion which was again threatened three years ago, and in the interval sanitary and other authorities have not ceased to gird at and condemn it. The system is to place the latrines over the natural drains and creeks which intersect the town, and to leave them to be flushed by the ordinary or spring tides or the rainfall, according to their situation. After over four years' observation of this system and all the condemnations and futile attempts at alteration that it has evoked, I record my deliberate conviction that, as long as the creeks and drains are kept free from obstruction and fairly free from overgrowth, it is better than any so far proposed to be substituted for it, and Mr. Good, the Chairman, who in 1891 was ardent for reform, now agrees, I believe, in these views.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

243. The details of the distribution of Muhammadan officers and menials in the different offices are given in the prescribed statement.

In Tippera there was no change in the number of ministerial officers employed. The menials increased from 198 to 211. Several Muhammadans have been registered as apprentices, and their claims are considered when vacancies occur.

In Noakhali the number of ministerial officers did not vary. The number of menials decreased by five, owing to the reduction of some process-servers under the amalgamated system.

In Chittagong the number of officers increased by 13 and the menials by 16. In this district I have had to interfere lately in a few instances on behalf of Muhammadans, and to remind the Collector that *cæteris paribus* they must have the preference. But speaking generally, the proportion of appointments given to Muhammadans is fully up to the proportion of Muhammadan candidates, eligible and ineligible, and is above the proportion of eligible Muhammadan candidates, although it is so far below the proportion of the Muhammadan population.

XXXII.—POST OFFICE AND TELEGRAPH.

244. Tippera is the only district of late years in which scandals and offences in the Postal Department have continued to occur. Last year there was a case of abstraction of Rs. 230-2 from the mail bag. A clerk was suspected and dismissed. There are some bad traditions in the postal runner service. Quite a number of these men, on different stages, have, at different times, laid false charges of having been waylaid and robbed of their bags. The department is much appreciated by the public: 73,910 money-orders, covering Rs. 17,76,795, were issued against 56,647 for Rs. 15,65,278 the year before. The amount of money paid on money-orders was Rs. 8,97,088 against Rs. 8,45,115 in 1893-94. Rupees 1,70,018 were deposited by the public in the postal savings bank.

245. The sale of quinine by the post office is beginning to find favour with the public. 23,266 packets, worth Rs. 363, were sold last year, and the system is likely to increase. Its spread in this Division has been remarkably slow so far.

246. In Noakhali the number of money-orders issued rose from 40,309 for Rs. 11,52,301 in 1893-94 to 41,121 covering Rs. 11,92,606 last year, and Rs. 4,55,163 were paid on these orders against Rs. 3,79,250 in the year before. Rupees 96,285 were deposited in the savings bank—an increase of Rs. 16,754 over the deposits of 1893-94. There were two cases of offences of the kind. which for some years had been peculiar to Tippera. A village postman misappropriated Rs. 15-8 covered by these money-orders, and was sentenced to seven years' rigorous imprisonment. A runner abstracted Rs. 200 from the mail bag. He got six months' rigorous imprisonment and was fined Rs. 150 in addition.

247. In Chittagong no details like the above have been given. No offences were reported.

248. The only extension of the Government telegraph was by the construction and opening of a line from Chandpur to Comilla. In Chittagong, where so many offices on the existing line have been recently opened, more are still asked for. The people say they want to use the line for communication with their friends in Arakan during the season of migration thither. The telegraphic system has been greatly developed by the private one which the railway have all along their line.

XXXIII.—ZAMINDARI DÂK.

249. So far as District Officers are concerned with the administration of the zamindari dâk, it has been transferred to the collectorate side of their offices, and there has been no other change. The results so far justify the rates of assessment fixed for five years in 1892-93, and they are not likely to change for a long time.

A short length of zamindari dâk line, following the re-arrangement of police posts, was given up, and not replaced elsewhere in the Chittagong district.

Fairs.

250. There are no great fairs. The only one of any importance in Tippera is held in October or November at Panchpukuria, and generally lasts for ten days. About 6,000 people attended last year's fair. There was no outbreak of disease.

The small annual fairs in Noakhali were held at Dalal Bazar in August and at Dud Mukha in February. Some 7,000 people are said to have assembled at the former and 5,000 at the latter, but these estimates seem to be excessive, since the fairs are attended by no perceptible movements of the people, such as the little fairs in Chittagong produce.

In Chittagong about 4,000 pilgrims came to the Sitakund méla in February last, and it passed without incident, except that there was one death said to be from cholera. The other fair is a Hill Tracts gathering and institution, though its site is in the Chittagong district. It belongs, so to speak, to the Mong Raja. While he was a minor, the Hill Tracts' officers made a point of having it held with *éclat*, but now it seems declining.

251. The table below gives some details for pounds:—

Pounds.

District.	Number of pounds.		Income.		Expenditure.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera	119	124	9,810	7,754	738	717
Noakhali	80	81	7,485	6,079	84	298
Chittagong	76	90	5,801	6,000	445	...

In Tippera the receipts fell from Rs. 9,810 to Rs. 7,754, mainly because of the losses incurred during the floods of 1893. The Magistrate observes that pounds are the weakest point in the District Board's administration, and till a pound Inspector is re-appointed no great improvement can be expected. He appears to be under some misapprehension about this. It was explained by Government that there was no bar to a District Board's appointing an Inspector, and he will be referred to those orders.

In Noakhali the percentage of collection of pound rents dropped from 98·5 to 81·43. Shortly after the pounds had been settled for three years in 1893, a large number of cattle from the chars were swept away by the cyclone floods. The pound-keepers continued to suffer loss, as they could not surrender their pounds under the provisions of the Cattle Trespass Act. The charges on account of the appointment of an Inspector of pounds and ferries caused an increased expenditure of Rs. 259.

In Chittagong the number of pounds increased from 76 to 96 and the receipts from Rs. 5,410 to Rs. 6,000. The charges have not been reported.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

252. In Tippera there is no organized institution of a representative character.

In Noakhali there are two institutions, the People's Association and the Islamia Association; neither of them show any signs of life.

Chittagong has the Islam, the Chittagong, the Buddhists', and the Purity Association, and a Rate-payers' Association and an Arya Sabha came into existence in the year. The Oldham Institute is a social club.

The Chittagong Association holds meetings occasionally and takes up matters which concern the general welfare of the district. It memorialised the authorities with success in two cases last year. The Board of Revenue exempted the Chittagong district from the separate process fees levied under sections 7 and 10 of Act XI of 1859. The other memorial was directed against a rule which the Port Commissioners wished to pass, and gained the support of the other local authorities, and finally of a majority in the Port Trust itself. Mr. Slack and Mr. Stevenson-Moore established in 1893 at Chittagong a united schools' athletic association, which has proved a great success. The foot-ball match excited much interest, and the final ties will be played after the holidays. The Madrasa is left in for this final tie, quite a new feature for its absorbed and studious pupils, who, with the bearing of young acolytes, have hitherto held aloof from athleticism and all pursuits not in keeping with the aims of future maulvis. The Rate-payers' Association came into existence with the faction which arose among the Municipal Commissioners against their Chairman and his supporters. It will probably disappear till there is a fresh exciting cause. The Arya Sabha is a religious institution. It is said to have five branches where religious books are read and interpreted five days a week.

STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

253. There was no general manifestation of public feeling on any topic, and that which excited the widest interest was, as hitherto, vaccination. The

people of this Division show more anxiety to protect themselves from small-pox than I have seen elsewhere in India, but, almost from highest to lowest, they believe in inoculation as the proper safeguard, and they practice it when they can do so. Last year Noakhali was the area in which the subject attracted most attention. The Magistrate is opposed to the Sanitary Commissioner's proposal to make vaccination compulsory, and wherever he and his higher subordinates have spoken to the people the opposition has given way, and it has been conceded that the objections urged by the Ferazi Muhammadans on religious grounds are neither tenable nor seriously insisted on.

254. The working of trains on the railway, seen for the first time last year in this part of the world, has excited the greatest interest, and the people of both sexes, young and old, show the greatest eagerness to travel by the trains and to climb into the trucks, and this, with their ignorance, has resulted in several accidents, some of which were fatal. Each time that I have travelled on the line there were numbers of people along it imploring for a lift.

255. The tenantry affected by the great land settlements in progress in Chittagong and Tippera are manifestly satisfied with the results known to them. The part of the Chittagong settlement covering the large area known as Old Thana Ramu is now in efficient working order, with results as good as the best which could be expected anywhere. The tenure-holders and the zamindars repeat their old complaints that the plots and boundaries, not mapped but described on paper, in the settlement of 1837 have not been adhered to, or have not been the basis of the present proceedings. In no case in which this complaint has been made to me did the objector even seriously profess to be able himself to identify on the ground these paper descriptions. In a great many instances into which I have enquired casually and from curiosity, and to acquaint myself with the proceedings the direct working of which is not under me, the holders of large landed interests had no precise idea of where the lands for which they got their rents lay.

256. In the great private settlement of the Maharaja of Hill Tippera's zamindari, the class of middlemen called talukdars are the chief objectors because the preposterous shares claimed by them in the rents are not allowed. In a great number of cases these claims, if granted, would leave His Highness to pay an annual loss on his estates, besides shutting him out from any margin of the proceeds.

257. The educated classes, particularly in Tippera, express much apprehension at the impending transfer of the Division to Assam. They admit that their objections are chiefly sentimental, since they will retain the Calcutta High Court. The prospect of losing the Board of Revenue (to which appeals and references from this Division are very few and still more rarely successful) and the Bengal Departments does not affect them, but they object to losing Calcutta as their metropolis, to going under a Chief Commissioner instead of a Lieutenant-Governor with a Council, and to being liable to be called Assamese. As a more substantial ground they complain that the transfer will disenfranchise them as regards the representation they enjoy in the Bengal Council, though their turn for this will not come round again till the next century.

258. It is only from educated Hindus that I have heard any references to the bad relations between Hindus and Muhammadans which have begun to exist elsewhere, and any sensitiveness on the subject felt in this Division is confined to this class. The actual relations are, and always have been, good.

Thus, the very numerous Muhammadan tenantry of the Maharaja of Hill Tippera manifest, whenever they have the opportunity, the warmest attachment to His Highness, who is a strict observer of religious ceremonial. Again, it is as general a practice for the real Hindus in this Division to dedicate bulls and leave them to wander as it is in Hindustan. It can be readily understood that a Moslem peasantry would not tolerate these animals among their crops, but these sacred bulls are always removed by them with a studied avoidance of offence to their Hindu neighbours.

I have heard Hindus more than once—the last occasion being last month at a school prize-giving—refer in public to, and at the same time take credit for, these good relations. That they exist is very creditable to the Muhammadans, who are in such a great majority. By these and the foregoing remarks, I do not intend to imply that the good relations would not exist were

the proportions in the numbers of the two religions reversed. Such a suggestion would be purely speculative.

The Muhammadan majority is greater than appears from the census, because the aboriginal Tripura and others who wish to adhere to Hinduism, but are not acknowledged by real Hindus to be Hindu, have been counted as Hindus.

259. The local newspapers are the weekly *Sansodhini* or Reviver in Chittagong, and the fortnightly *Tripura Prakash* published at Comilla, which first appeared in April 1894. The *Usha* and the *Hira*, which first appeared in February and June 1894, are published at Brahmanbaria, but confine their matter to social and religious subjects.

By the courtesy of their editors I am supplied with copies of the *Sansodhini* and *Tripura Prakash*. The former I would describe as a poor but honest little paper. I read it whenever the state of its print allows me. Latterly it has appeared in faded pink ink. Its local articles and news refer to the town of Chittagong only, and I am told that it has little influence and a very small circulation, but I have often been obliged to it for bringing to notice matters which have subsequently received attention. Last year it warmly criticised the action of the local authorities, but, as far as its information was correct, no exception could be taken to its tone. It charged me with setting my foot on the neck of Local Self-Government; but in one instance of supposed interference on my part with the District Board's relations to their lady doctor, this was due to misapprehension. The subject was one on which I would not have thought it proper to offer even advice to the District Board, but their procedure in the case appeared to contravene the law and their own rules having the force of law, and this was noticed. The other case throws some light on the very satisfactory relations existing between the people of Chittagong and the officers of Government, which have often been noticed. A clerk under my control, without any reference to his superiors in office, accepted the post of municipal commissioner in Chittagong, for which he had offered himself for election, and then set himself in opposition to another public servant who, with the full approval of Government, was the elected Chairman. The result was a series of scenes and disputes and the intervention of the Magistrate, the whole mass of complaints, protests, appeals and reports eventually coming to Government or to me. In the Municipality the matter ended by a vote of confidence in the Chairman, passed by a majority of 9 to 2. In the mass of written matter which I had to deal with, that contributed by this clerk was the largest portion, and as it must have interfered seriously with his official duties, which are heavy, I had him informed that he must choose between them and his municipal work, and between his post under us and his elected office. He promised to vacate the latter by abstaining from attendance at six successive meetings. So far the *Sansodhini's* appeal to the rate-payers to protest against this action has had no response. I remember once reporting that the people of Chittagong always remembered that they had not been conquered, and that the transfer of their government to the British in 1760 was a purely civil act. From this incident they would appear to claim a greater amount of freedom than would be allowed in England. But either some memories of the efficacy of despotism must linger, or the full effect and force of the Local Self-Government introduced by us is not fully realized, since the commissioners out-voted at meeting in this instance straightway addressed memorials at inordinate length to Government or to me, though there was nothing in either document which gave a ground for legal interference.

260. The *Tripura Prakash* is neatly got up and printed. I doubt if it can maintain existence without a supply of sensation, and its tone cannot be commended. The accidental collision between Mr. Beatson-Bell and Babu Rasik Lal Sen, in which the latter was unfortunately hurt, supplied it with material for some time. Its account of the matter was distorted and was corrected by other Indian papers. Since then the *pièce de resistance* has been the state of Hill Tippera. I have read these articles, and they seem to me to be actuated by deep spite, besides having features to which more serious objection could be taken. At all events, though they professed to be written in the

interests of the State, they contained nothing which could be of use to the Political Agent or to the Commissioner in their connection with the administration, while they must have given much annoyance to His Highness the Maharaja.

261. Notwithstanding that the Muhammadans so greatly preponderate, the *Bangabasi* and *Sanjibani* are the Calcutta papers most in vogue. The *Sudhakar* and *Mihir* have, compared with these two journals, a very limited circulation.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

262. The information has been given in the prescribed statement.

In Tippera the present Subdivisional Officer of Brahmanbaria kept a boat as well as a pony during his incumbency. The Subdivisional Officer of Chandpur kept a boat.

In Noakhali the Sub-divisional Officer of Fenny kept a pony. Among the officers at head-quarters, Babu Suresh Chundra Sinha, in charge of income-tax and excise, kept a pony. So also did Babu Ambika Prosad Sen, the officer in charge of settlement. Among the Sub-Deputies, Maulvi Faizulla Khan, stationed at Sandwip, kept a pony.

The Sub-divisional Officer of Cox's Bazar has a pony.

The officers of the Forest Department who served in this Division in 1894-95 were below the rank of Deputy Conservators of the first three grades. Their names accordingly have not been included in the statement of officers attached.

XXXVI.—CONDUCT OF ZAMINDARS.

263. His Highness the Maharaja of Hill Tippera is the greatest zamindar, and his conduct in this capacity is noticed in the political section. Pargana Sarail is still under the Court of Wards. The next largest landed interest is that represented in several estates by the Nawab of Dacca, who maintains his character as a beneficent land-holder. He purchased a taluk, in taking possession of which last year a fatal riot occurred, and the Nawab, on hearing of it, at once withdrew and restored the estate to its former proprietor. This was the only case of serious rioting in Tippera, in which the servants of important zamindars were implicated. The action of the Nawab's agents in this case is reported to have been very blameworthy and such as must have received his strong disapproval.

264. There are several resident zamindars of standing in Tippera, some of whom in times past or recently, like the Nawab Sahiba Faizunnissa, have shown great liberality and public spirit. The Magistrate says that this class have given little trouble to the local authorities. They generally treat their tenantry fairly, and their conduct was on the whole satisfactory. They are nearly all Musulmans.

Pargana Ganga Mandal, belonging to Raja Binay Krishna Deb of Sobha Bazar in Calcutta, who has earned commendation for his liberality and public spirit in previous years, is mainly in the hands of farmers for short terms—a very unsatisfactory mode of management.

No improvement is reported in the conduct or relations to their tenantry of the Nag family of Baradihi in Dacca. The tenants' quarrel appears to have been taken up by Khaja Yusuf Jan of Dacca, and both punitive and special police were, as hitherto, quartered on the estate, which is close to the Dacca district. The completion of its survey and settlement now in progress will either end this state of things or make it easy to deal with. The only other disturbed area is the little Palpara estate, which is being similarly dealt with. Its owner and his tenants last year merely kept at arms' length apart.

265. In Noakhali the three great zamindars after the Maharaja of Hill Tippera are absentees and take no interest in their people. With a prosperous tenantry like that of Noakhali, absenteeism is not the evil which it can be in other circumstances, and it certainly favours the growth of tenant rights.

The Magistrate writes very unfavourably of the petty resident zamindars as a class; but there are some public-spirited individuals. They are Babu Rai Kumar Dutt of Chamrakhola, the *Rays* of Dalal Bazar, and the Chaudhari family of Mahamadpur in Begumganj. There was no trouble between landlords and tenants last year in Noakhali.

266. In Chittagong zamindars are a class of relatively small importance. It is as true of them now as it was in Sir Henry Ricketts' time, that their chief object in life is to get the better of Government. For many years none of them have been distinguished by any public act, good or evil.

XXXVII.—GENERAL REMARKS.

267. The historic events of the year were the visit of a Lieutenant-Governor to Noakhali, the resort for the first time to systematic relief measures to meet the scarcity of food which was felt for a short while in Tippera, and the migration of several families of settlers from the west into the country which had lain for so many years depopulated under the fear of Lushai raids and invasions. The features of the year were comparative healthiness and seasonable rainfall, followed by the bountiful harvests which make administration easy. There was nothing perceptible to retard, while there was much to help progress. If difficulties, arising chiefly from the increasing pressure of the population and the character and habits of part of it, threatened in Tippera, there is no more hopeful remedy for them than the railway which is so near completion. Therefore, except when they refer to special incidents of the year like the great revival of trade, my remarks, which have been given at unusual length, are rather a review of my experiences for the last four years and a half than a recital of the history of 1894-95.

Mr. Carlyle's report for the Tippera district was as concise as usual, but omitted no subject which had to be touched on. Mr. Agasti's report for Noakhali was also complete. It was long, and nearly all the subjects were discussed, and the whole of these discussions as coming from an officer with such intimate knowledge of the country, who was fresh to his charge, are very interesting.

XXXVIII.—POLITICAL.

268. The territories politically administered are the Hill Tippera State, the South Lushai Hills, and the Chittagong Hill Tracts. The latter charge began its separate existence as an ordinary non-regulation district in 1860; but in 1889, by Government order of the 24th June of that year, it was brought under the sole control of the Political Department. In 1891, with the establishment of the South Lushai Hills as our new frontier district, it was further deregulationized and reduced from a district to a subdivision under the direct control of the Commissioner. The country covered by these territories is physically and ethnically homogeneous. In the east its mountains are higher, bolder and more rocky, its rivers larger and its people wilder and less connected with the civilization and the traditions of India. But the type of race is the same throughout, as is the economic and social system. By far the largest section of the population is the Tripura tribe, which claims relationship with the Mech on the north and west, and has an evident connection with the head-hunting Kukis to the east. The foreigners are the plainsmen from India and the Mags from Arakan, and the only peculiar and isolated people are the Chakma, who lie surrounded by the Tripura, with Rangamati as their centre. The Chakma and Mag are Buddhists. The great bulk of the Tripura, like their congeners the Kuki, of whom the Lushai are the largest section in our territory, are animistic in belief, but with a tendency to Hinduism, to which their Chiefs are attached with rigid ceremonial. These Tripura are an interesting race. They are singularly free from crime, and are most industrious cultivators, with excellent physique. They are admirable boatmen, and the few who have been prevailed on to enlist in our police showed themselves in 1892 to be smart and courageous soldiers. But they dislike discipline. With all their docility they are shy, and their only wish is to be left alone. So their prospects of advancement are remote. With the pushing litigious Chakmas and the sturdy self-asserting Mags so much in evidence, it is hard

to realize that the Tripura, who are so little seen and seldom heard, form the great majority of the population. The west of the political area is cultivated wherever practicable by plough and joom, and the east is comparatively open country, from either the rockiness of the mountains or the prevalence of Lushai cultivation. Down the centre, from Sylhet and Cachar to Arakan, runs a wide strip of dense forest, which serves to separate the populations on either side of it and to make the differences between them appear greater than they really are.

II.—CHITTAGONG HILL TRACTS.

278. Mr. C. S. Murray, C.I.E., the Assistant Commissioner, was on leave from the 15th June to the 15th December 1894, and Mr. R. Sneyd Hutchinson, the senior Assistant Commandant of the Lushai Battalion Military Police, acted for him. Mr. Cave-Browne was in charge of the Bohmong's Circle, but was on leave from 31st August to 21st October 1894, and Mr. Hutchinson took his duties in addition to his own. Babu Brajanath Saha, the Assistant Surgeon, who was also Bazar Magistrate and Treasury Officer, left the Hill Tracts in November 1894 after a continuous service of 17 years there. His successor has taken up his civil duties. The two Sub-Deputy Collectors who completed the staff are old Hill Tracts' officers.

279. Mr. Murray was on tour for 52 days, and Mr. Hutchinson, who wished to see every part of his new charge, for 57 days, all in the rains. Mr. Cave-Browne was on tour for only 89 days, several of which were not spent in his own circle. The officer of the Bohmong's Circle has now 36 widely scattered mauzas to visit, the rent-rolls of which he has to adjust each year. He has still many more to form, and the period of tour which he will be required to spend within his own circle is 100 days. There is no work requiring his presence at Bandarban for more than a day or two at a time. Mr. Murray's tours were well planned, and Mr. Hutchinson succeeded in visiting every part of his charge.

State of crops, public health and material condition.

280. The weather was generally favourable both for health and agriculture, and the main crops were better than they have been for the last two years. Complaints were made that foot-and-mouth disease in cattle interfered much with cultivation, a fact which indicates how greatly the use of the plough has spread. Cholera appeared in the Bohmong's circle at the end of the year, and caused much alarm and considerable mortality. There was no outbreak or prevalence of small-pox. 14,024 vaccine operations are reported. In the year before they were just short of 17,000. Over 98 per cent. of last year's operations are returned as successful, which is an improvement. The fewer operations are attributed to work having been carried on in the far interior.

281. Small-pox is the most dreaded scourge in these hills, but the people are better protected than might be supposed. For instance, both the minor Chakma Chiefs have been inoculated in infancy, but that was not very long ago for the younger.

282. I find that in May last the Assistant Commissioner and the Manager of the Chakma estate, finding that they had a surplus of Rs. 12,000 lying idle, thought it would be a good political move to advance Rs. 5,000 on interest to the Chakma tribesmen, who were feeling uncomfortable under the high prices then prevailing in Chittagong, while their cotton crop had been so poor that they were short of cash. The idea was a good one, and the sanction of Government was obtained to the grant of the loan; but I see that when the case passed through the office here, it turned into one of scarcity and distress, and is so alluded to in paragraph 131 of the report for last year. The people had not so great a surplus of means as usual at the time, but their material condition was, as always, excellent. The proofs are that though almost no occupation is too menial for the Chakmas, and though they compel their women

to work in the fields, they themselves will not work for us as boatmen and carriers for Rs. 12 a month and rations. Their supply of money may vary according to the produce of the crops which they sell, but any general want of food among them is, as far as experience shows, impossible. They still show the restlessness which has always distinguished them. Last year 128 families from the Chakma Circle migrated to the South Lushai Hills, a historic and most satisfactory incident. In the broad valley of the Thega some 200 square miles await the plough. On the other hand 534 "houses," which may be interpreted as families, are reported to have returned to the Hill Tracts from Hill Tippera, the Chittagong district, or Arakan, whither for some temporary disgust they had betaken themselves. The internal, that is, inter-circle movements were on the same scale.

Manufactures and trade.

283. The only articles manufactured in the Chittagong Hill Tracts are homespun cloth of excellent quality for home consumption, made by the women, tea, *gur*, and coffee. There is only one tea garden, the property of Rai Abhay Charan Mitra, Bahadur, under native management, and it is the coffee plantation, the only one in this Division. This fact is apparently unaccountable, as the coffee is of fine quality and commands a high price. The *gur* is manufactured at Rangamati from the produce grown on an abandoned tea estate now held by an agricultural association composed of the local officials.

284. We have very fairly accurate statistics for the water-borne trade of the Karnaphuli, but none for the Fenny, Sungu, and Matamori. The boats that go up the Fenny are far larger than any I have ever seen at Rangamati, so we can give no figures for the volume of the trade; but the Karnaphuli statistics show its character.

285. By far the most important export is the beautifully fine but short stapled hill cotton grown throughout the territory under political administration. It, too, comes down the Fenny, and the Gumti in Tippera, in large quantities. It has hitherto been purchased for export by Marwaris, but this year the great firm of Messrs. Ralli Brothers is taking up the trade. They estimate the total produce of the whole country-side in a bumper season like that of 1891 to be two lakhs of maunds, and the average about 120 lakhs. The results so far are not nearly reaching this estimate, though Mr. Murray returns the quantity carried down the Karnaphuli last year at 4,711,132 pounds. The plan of registering in pounds instead of maunds must lead to error and will be discontinued.

This cotton is packed in bamboo baskets, for a weight of about a maund. The ends are open, and it is pitiable to see the damage done to the cotton by weather and water, as it is generally carried on bamboo rafts. I have said elsewhere that the agricultural improvement most needed in the Division is a handy economical mode of pressing and packing this cotton.

286. Next to cotton in importance comes jungle produce, chiefly bamboos and thatching-grass, shown in the accounts of the Forest Department Next are the oil-seeds, mustard and sesamum or ginjelly.

The distinctive exports, rubber and garjan-oil, have almost ceased. Only 250 pounds of garjan oil are returned last year, and no rubber. Another distinctive export, not returned because always illicit, was ivory. Last year we were startled by finding that over Rs. 12,000 worth had passed the Chittagong Custom House the year before, and special attention is being paid to this surreptitious trade and to the preservation of elephants.

287. Rice was exported and imported in nearly equal quantities, but a large part of the imports is the annual supply for the Lushai garrisons. Nearly two lakhs of pounds of tobacco were imported against 27,481 pounds exported. These imports are similarly affected. The other chief imports are piece-goods, salt, and dried-fish. Kerosine oil is not yet returned. Its use is increasing rapidly.

288. The trade figures for the Karnaphuli show considerable expansion all round, and it is satisfactory to find the Assistant Commissioner reporting that the abolition of the senseless trade pass system which used to be followed has had a good effect.

Bazars are springing up. There are now 15 of them, and applications to found others are coming in. Here I find the want in the Chittagong Hill

Tracts of any local fund like the improvement funds elsewhere. I am about to address Government separately about this, and to ask for the rent of these bazars for the purpose. At present they are nearly Rs. 1,000 annually.

Administrative Changes.

289. In 1891, when the charge was reduced from a district under a Deputy Commissioner to a subdivision in charge of a police officer, and was at the same time further deregulationized, attention was drawn to the growing abuse of plainsmen getting *ex parte* decrees in the regulation courts against hillmen, and then having them enforced by the armed Hill Police with the utmost rigour, and local measures to safeguard this practice were taken. Under the orders of the Government of India they have been embodied in a Code of six rules passed by Government under Act XXII of 1860, which was promulgated last year. The attention of the Full Bench of the Calcutta High Court had been given to this matter. These foreign decrees and processes are now cases exclusively triable by the Hill Tracts' officers, not by the Chiefs. So also are all civil cases arising in the bazars or other non-agricultural areas.

290. The question of pounds arose more than once. They are frequently applied for as protection against plainsmen's cattle, but those experimentally started always failed to support themselves. They are now allowed whenever a whole year's cost is deposited in advance, and are otherwise conducted on the regulation system. The people have protested against their being farmed, no doubt because in that case they would, directly or indirectly, get into the hands of plainsmen.

291. Till last year there was no officer of the grade or status of peon, chaprasi or messenger in the Hill Tracts. The police performed such duties, and this proved inconvenient. Three chaprasis have now been appointed in substitution for three posts of lowest grade constable.

292. The extent of the illicit trade in ivory, and the destruction of elephants which it involved, referred to above, drew attention to the system of issuing Government guns which was first adopted many years ago to help the people to protect themselves against the Lushais. These guns have been recalled, and the sale of ammunition during the idle time of year has been placed under restriction. After watching the effects it is probable that the guns will be finally returned to the Arsenal. The system of selling ammunition was resorted to in 1875 as the best means of stopping smuggling. For this object it has been quite successful and must be maintained, but one outlying depôt has now been closed.

293. Considering how large the powers of the Commissioner and Assistant Commissioner are, a change of officers in the Hill Tracts is an administrative change, and Mr. Murray and I were equally interested in seeing how the system started in 1892, so much of which was our own handiwork, fared in entirely new hands. Mr. Hutchinson quickly mastered it, and worked it as carefully as Mr. Murray could have done. Mr. Waller dissented from my views in two respects, but before he left, modified his opinion on one point, and was engaged in reviewing the action which he had taken on it. By January last, the effect of any changes so made had passed, and the system as initiated had settled down into its original groove.

294. Subletting had always been prohibited in the Hill Tracts, except in the case of three large reclaiming grants, in which, for special reasons, the grantees were given express permission to settle tenants. There were no rights in the soil at large but those of Government, because the people and their cultivation were nomad. In the land leased for plough cultivation there were no rights but those of Government and the cultivator, who could not be ejected, unless for land acquisition purposes, as long as he behaved himself and paid the rent to which he was assessed. Transfers by these lease-holders, unless with the permission of the authorities, were prohibited, and an unauthorized transfer was a breach of the lease conditions which made the lease liable to cancellation. The reiteration of the prohibition against subletting was the first of the Government rules passed in 1892. In our setlements of that year we recognized the actual cultivators and set aside all those leases the holders of which had sublet to them without permission. My predecessor, when he wrote last year's report in June 1894, was of opinion that this subletting was not transfer, and has recorded this in his 143rd paragraph.

295. The point does not seem to require much discussion. The lease-holder was placed by Government orders in a position carrying certain privileges which for a consideration he made over to another or others. The technical or abstract question of whether this is a transfer under the terms of any enacted law is immaterial. The substantial point is that in ordinary language it was a transfer which involved a breach of rules and created a class of mere rent receivers, middle-men and land-jobbers, the growth or existence of which it was a particular object to prevent.

296. Mr. Waller began by restoring the leases which had been cancelled for subletting. He recognized that the sub-lessees could not be ousted, so he declared the restored lease-holders to be *sadar malguzars*, terms unknown in the Hill Tracts and denoting a position which we conceived to be prohibited. This, however, was in the first days of his administration. After visiting the hills he modified his views and reviewed as many of these orders as he could, and made the new *sadar malguzars* with their sub-lessees jointly or severally liable for the rent of the holding. In the case of families or near relatives this may last. In other cases it will settle down into a practicable arrangement under the headmen who collect the rent. Some of the *sadar malguzars* were left unchanged, and Mr. Murray, on his return, asked what was to be done with them. I decided that they were to be left alone. The *sadar malguzars* are answerable for the rents specified in the leases restored to them. They may not eject their sub-tenants and may not have the help of the officers in collecting rents from them, and there is no likelihood of their being willing to continue to pay for the empty honour of their new title.

297. My predecessor's remarks in the same paragraph, about the confiscation of improvements, and the application of the rules with retrospective effect to grants made to Bengalis of the plains, refer to the case of Babu Gopi Mohan Sen, late Superintendent of the Deputy Commissioner's office; and as it has given much trouble and been the cause of much misapprehension, it is worth while to record a notice of it here. It was reported by Mr. Waller to Government.

298. Babu Gopi Mohan Sen, who was the chief ministerial officer at Rangamati, obtained three plough leases. This was an irregularity to begin with which, though pointed out at the time, was persisted in at Rangamati. He was to clear the lands by hired labour. He clubbed them, a proceeding expressly prohibited by his leases, and leased out the area so formed for six years at the rate of one rupee an acre, and he made no attempt to demarcate the holdings, though failure to do so within three months after issue of the lease rendered it liable to cancellation. He took part in the conferences which preceded the framing of the rules of 1892. His trafficking in land was well known, and his was one of the chief cases which the emphatic and precise wording of the rule reiterating the prohibition against subletting was meant to meet. The sanction of Government was given to the rules in January 1892, and they were formally promulgated in July 1892. In April 1892, the term of the farming lease which Babu Gopi Mohan Sen had given expired, and he could have resumed his land and made some attempt to fulfil the conditions under which he held it. He took no such steps, and the Assistant Commissioner cancelled his leases in July 1892, and engaged with the actual cultivators. No appeal was preferred till April 1894, when I was on furlough. The case was reported to Government as one of inequitable action. The full facts were not elicited till I heard the appeal in December 1894. As it appeared that Babu Gopi Mohan Sen had expended Rs. 302 in the reclamation of the lands, I suspended the Assistant Commissioner's order till the 1st April 1896 to allow him to dispose of his interests in a legitimate way in the meantime, but insisted on his fulfilling the ninth clause of his leases and putting up the permanent boundary marks therein stipulated for. He has meanwhile asked the Hill Tracts' officers to serve notices that he will sell his interests in these lands for Rs. 50 an acre, which comes in aggregate to Rs. 12,450. He got them in the most irregular way for nothing, has spent Rs. 302 on their reclamation, and has recovered over Rs. 500 in rent for them. He had not seen them or been near them for many years before the leases were issued.

Land revenue.

299. I pass to the subject of land revenue, with which the foregoing is connected. The first mauza was formed in the Hill Tracts in 1892. There are now 160 mauzas

completely formed, demarcated, and constituted, except for the appointment of the police functionaries, the service lands provided for them still remaining in charge of the headmen. The successive annual maps showing these divisions are an interesting series. The subdivision of the Mong Raja's or northern circle into mauzas, of which it contains 68, is nearly complete.

300. The Assistant Commissioner continues to register the holdings though they are now grouped under headmen. There are 2,441 of them, or about 18 to each mauza. But to the mauzas are also attached the unregistered *jum* lands and the tracts of thatching-grass. Some of the holdings are very large. Twenty-four of them are special grants; 566 of them are the leaseholds under the rules of 1881 and 1884 which still survive. The rest, 2,051, are those recognized or admitted under the rules of 1892. The rent-rolls have to be annually examined on the spot or from the vicinity, and this is the proper system of administration for the Hill Tracts, and the strength and leisure of touring officers is sufficient for it. The total area under plough is now 10,555 acres, and the rent for it has risen to Rs. 11,015, punctually collected. The other land revenue is the *jum* rent, contracted for with the Chiefs, which stood at Rs. 6,337-4-4 (it has been considerably enhanced by the revision of the jama of the Chakma Circle with effect from the 1st April last), and the proceeds of auction sales of thatching-grass tracts paid in advance. These last year reached Rs. 10,094. The percentages returned under rule X of the rules of 1892 to Chiefs and headmen for collecting amounted last year to Rs. 1,448-6. These were the dues of 1893-94. The whole balance of land revenue on the 31st March 1895 was Rs. 185-10 out of a total demand of Rs. 27,438, and over Rs. 6,000 had been paid in advance.

301. The forest revenue of the Hill Tracts is collected in the Chittagong district. The Forest Officer has moved to Chittagong, and his administration, which the Deputy Commissioner used to control, is now wholly under the Collector. It is sufficient to say that the Hill Tracts yield a net forest revenue which is always over Rs. 50,000 a year, and generally much more. Owing to the system of collecting it by toll stations on the rivers in the Chittagong district, it will be hard to distinguish it from the revenue from the Chittagong forests, which are growing in importance.

302. There were no *khedda* operations last year. The department remains a distinct one under the Government of India, and we do not know what share of profits it derives from the Hill Tracts.

303. Before leaving the subject of land revenue, I notice the statement often made by Mr. Murray that the *jum* land is rapidly becoming exhausted. Last year's report (paragraph 143) stated that the "development of plough cultivation seems to portend the cessation of *juming* in the near future." This is the greatest mistake, and that it is so is shown by the example of the Rajmahal hills, where a *juming* area, little more than a tenth of that of the Hill Tracts, under far less favourable conditions of climate, is still supporting a *juming* population of over 50,000 souls. The *juming* land of these hills is, for any period that we can look forward to, inexhaustible. That the people have taken so much to the plough shows their tendency towards civilization and their anxiety to make larger profits.

The Chiefs.

304. By the orders of Government, Kumar Bhuban Mohan Ray, minor Chief of the Chakmas, joined the Presidency College in January last. In March he was joined in Calcutta by his little half-brother, Ramani Mohan, who attends the Hare School. The elder Kumar, who is now a young man, was married to the daughter of Chandra Kanta Dewan in March 1895. The bride was adult. This marriage was concluded rather against the wishes of the Dewans, and with no great inclination for it by the Kumar, solely out of deference to his mother and step-mother, who had been urgent for it for many years, and wished even to have a child marriage contracted, contrary to the custom of the tribe. These ladies live together, and the reason given for their urgency was that they wished to enjoy the society of the bride, whom they could not, under Chakma etiquette, allow to reside with them till she was married. Latterly, there was no daughter in the house. Both the minors are clever and very amiable. The elder is more robust than he was, and Calcutta seems to suit him. The younger is a very delicate child.

305. The chief event for their circle in the year was the final discovery, under our settlement operations, of the permanent assignments at privileged rates granted by the Rani Kalindi between 1865 and 1871 and their extinction. There was naturally considerable demur on the part of the settlement holders to the levy of the standard rates, but eventually they engaged to pay them without objection from the date from which the enhancement of their Chief's *jama* was to have effect, that is, the 1st April 1895, and I was glad to accept this compromise and to remit the arrears. The behaviour of the Dewans concerned has, on the whole, been very loyal and praiseworthy during these negociations, and, as far as I am aware, Government has not been troubled in the matter.

306. Another event was the restoration of the ancestral residences at Rajanagar on the border of the hills. They had become dilapidated and were almost abandoned. They were satisfactorily restored by Rai Kailas Chandra Das Bahadur, the Manager of the plains property, for a little over Rs. 5,000.

307. Next in local rank comes the Bohmong or Phru Tsanes Chaudhari, with the title of Kyet Thaye Zaung Shewe Salwa Yamin conferred on him in 1891. The complaints by his raiyats made against him, which were noticed in the report for 1892-93, have not been repeated, and the answer given to them then seems to have been effectual. He is really popular, but the people under his rule are very various, and the majority not of his own race. This old Chief's idea of intercourse with us is to keep asking for favours and privileges.

308. The young Mong Chief, locally called Raja Nephru Sain, was released from leading-strings last year. He has shown the greatest anxiety to perform his duties as a Chief, and to please the authorities, who, since his childhood, have always had much liking for him personally. He has no strong natural capacity, but shows ability to recognize good advisers.

Administration of justice.

309. There was nothing to note about the administration of justice, either by officers or Chiefs, though the civil work of the former is increasing. There was still less crime than in the year before, and the most important case was the arrest and conviction by Mr. Waller of one of the perpetrators of the savage robbery and murder at the Tintilla forest station in 1890, which had all the features of a Lushai raid. The most serious crime in the Hill Tracts is committed by plainsmen, but the plainsmen who venture into the hills are not the law-abiding and respectable representatives of their districts. The extent of ordinary crime in a prosperous population of over 110,000 can be judged from the fact that the judicial fines imposed in the year amounted to Rs. 610, the whole of which was paid.

Education.

310. It seems there were five private Koran schools in addition to the 48 institutions of all kinds shown by him, and he claims a total of 958 scholars, of whom 49 are girls. The analysis is interesting. Four hundred and forty-three were Chakmas, 224 Mags (not Barua Mags, of whom there was only one), 137 Tripuras of different tribes, and 31 Kukis of different tribes. There were also 47 Gurkhas and 5 Assamese, the children of sepoys or sepoy pensioners.

311. The demands for admission as boarders to the Rangamati High School are double the number which can be provided for. These boarders are all hill boys, sons of parents with small means. The number provided for is 44. By savings it can be 50. These admissions are practically scholarships, and a certain number of them will now be reserved for competition. The education these boys receive at this school includes surveying, and will fit them for duties as rural officials or as assistants to taluk dewans and the headmen of mauzas.

312. The number of schools returned for 1893-94 was 30 with 548 pupils, so the increase has been great. The Sub-Inspector of Schools, who is highly commended, is said to have been on tour for 230 days. He went as far as Lungleh.

313. The dispensaries are only the Government institutions at Rangamati and Bandarban, and that started at the Mong Raja's residence when he was a minor. I prophesied its speedy extinction, but it still survives, though the

average attendance is less than four persons in three days. The cost of this is about Rs. 600, and I doubt if it will be maintained, and have no reason to urge its maintenance. In the transport season peripatetic and temporary hospitals follow the cooly gangs.

Miscellaneous.

314. The forms of returns and registers framed for the Hill Tracts in 1893 have proved very successful, and those referring to the sale of arms and ammunition have been adopted by the Accountant-General in preference to those of his own devising. These transactions were in that year brought under his control. The forms are now being gradually printed, locally or by the Superintendent of Stationery, according as the estimates furnished are cheaper. In some cases his are much cheaper than those of the local presses.

The feature in the history of the Chittagong Hill Tracts last year was the extension of cultivation eastward and the migrations into Captain Shakespear's dominions. The chief public work is the section of the road from Chittagong to Fort Haka in the Chin Hills, which passes by Rangamati and Lungleh. Hitherto it has solely been maintained for administrative—I might say, military objects. But settlements are now being fast formed along its length in the Hill Tracts, and because of them it has become an object to have the three principal streams which intersect it bridged, and this has been separately represented. The materials are available at Demagri. Hitherto the obstructions caused by these rivers in the rains have not been thought worth overcoming, as the road was only used in the cold weather. Now the bridges are wanted for local convenience. That over the Thega river would put the newly-settled country in communication with Demagri, and restore the importance of that market, which since 1888 has so much declined.

THE SOUTH LUSHAI HILLS.

315. The separate detailed report for last year was submitted early in May, and was a record of a peaceful uneventful year with the tribute punctually collected, the disarming completed, and considerable progress made in almost every direction for the attainment of settled conditions. The expenditure is being gradually reduced, though the chief savings effected have been by reductions of staff, while those which were most to be hoped for in the extension of the local food-supply are still remote. Intercourse with the plains or at least the lower hills increased, as did trade, which is still miserably small and far below the possibilities. The chief feature to be noticed was the spread of cultivation and population, both from the east and from the west, into the great forest desert which lies between the chain of Lushai settlements and the populated country of the Chittagong Hill Tracts.

316. Captain Shakespear has just furnished me, for the first time, with a denominational return. I see he estimates the Lushai or Kuki population of his charge at only 21,000, and the whole population, including the garrison and establishments, at under 23,000.

AMALGAMATION OF THE PATNA SURVEY SCHOOL WITH THE BIHAR INDUSTRIAL SCHOOL.

GENERAL DEPARTMENT—EDUCATION—No. 289T.G.

Darjeeling, the 25th September 1895.

RESOLUTION.

READ—

Resolution No. 1696, dated the 18th June 1892, regarding the establishment of an Industrial School at Patna.

Read also—

The following papers regarding the proposed amalgamation of the Patna Survey School with the Bihar Industrial School:—

Letter from the Commissioner of the Patna Division, No. 19, dated the 10th May 1895, and enclosures.

Letter from the Director of Public Instruction, Bengal, No. 4161, dated the 26th August 1895.

In the Resolution referred to in the preamble, the Lieutenant-Governor recorded his general approval to a scheme for the re-establishment of the Industrial School at Patna to commemorate the visit of His Royal Highness the Prince of Wales to Bankipore, the funds for which were raised by subscriptions, and suggested the amalgamation of the Patna Survey School with it.

2. The Industrial School, which was re-opened on the 1st November 1892, has now been in existence for nearly three years; but the results have been far from satisfactory in consequence of the school having to compete with the Patna Survey School as a rival in technical instruction. In the Survey School there is no course of instruction in manual labour, from which Biharis are generally averse, and the period of study is shorter by a year than at the Industrial School, where it is three years. It is therefore now proposed to work them as a combined Government institution. The Director of Public Instruction, who was consulted, considers it both feasible and desirable to carry out the amalgamation on the lines proposed by the Committee of the Industrial School, as modified by him, on condition that the existing Government grant to the Survey School is continued to the combined school.

3. The general scope of the proposed scheme for the working of the amalgamated school as a Government institution, which has the Lieutenant-Governor's approval, is indicated below:—

(*a*) The amalgamated school will be located in the buildings and compound now occupied by the Survey School and the Industrial School, and will be styled "The Bihar School of Engineering."

(*b*) The courses taught in the Patna Survey School and the Bihar Industrial School, which have very much in common, will be amalgamated, theodolite surveying by Gales' Traverse system and the laying out of curves being added, and will be distributed over a period of three years.

(*c*) At present the students of the Industrial School are required to have read up to the second class of a High School, while those of the Survey School need only bring the Middle Vernacular Examination certificate. Henceforward no student will be admitted who has not passed the Middle English Examination or is otherwise equally qualified in English. There are now in the Survey School 132 students—73 in the first year and 59 in the second. In the Industrial School there are, exclusive of the artizan class, 37 students, nearly evenly distributed over the three years. The second-year students

of the Survey School will continue their course unaltered during the current year, at the end of which they will leave the school with the usual certificates on passing the final examination in surveying, to be held in April 1896. The first-year students will likewise continue their survey course during the present year without change; but their course of instruction will in the second year be partially, and in the third year wholly, assimilated to that now sanctioned for the amalgamated school; that is to say, in the second year they will be required to go through six months' work in the carpenters and six months in the blacksmith's shop, in addition to a portion of their class work, corresponding to the new second-year course; and in the third year they will go through the final year's class work, and will also spend the full 12 months in the fitter's shop. Thus, after the present batch of second-year students have left the school, all the other students of the school will go through the full course of three years in class and in workshops, with the exception that the present first-year students will go through their course in carpentry and blacksmith's work in one year instead of two. The amalgamation will therefore come into practical effect at once.

(*d*) The boys who obtain stipends offered by the District Boards in Bihar will be allowed to read free, just as Government scholarship-holders are allowed; but for the other pupils a monthly fee of one rupee a head will now be charged for tuition, and it may hereafter be raised.

(*e*) The 12 stipends now awarded annually for the artizan class from the funds of the Industrial School, in addition to those given by the District Boards, will be awarded by competition in future.

(*f*) At present there are three teachers in the Survey School, costing Rs. 350 a month, and three in the Industrial School, costing Rs. 180 a month. The three teachers of the Survey School, whose services are pensionable, will be retained and two others appointed The total cost will therefore be—

	Per mensem.	Per annum.
	Rs.	Rs.
Head-master	200	
Second master	100	
Third ditto	50	
Fourth ditto	50	
Workshop Instructor	150	
Total ...	550	6,600
Carpenter on Rs. 25 and Rs. 15 respectively per mensem ...		480
1 Blacksmith on Rs. 30 per mensem		360
1 Fitter on Rs. 30 per mensem		360
Materials for 150 boys at Rs. 20 each		3,000
Petty establishment		500
Stipends to 36 artizans		1,296
Field work		630
Taxes and ground rent		85
Contingencies		500
Total ...		13,811

The interest on the invested funds of the Bihar Industrial School amounts to Rs. 8,825 a year. This, with the Government grant of Rs. 5,920 to the Survey School, which is to be continued, will give a total annual income to the amalgamated school of Rs. 14,745. There will thus be a surplus of nearly Rs. 1,000 a year, which will be spent for some years to come on the purchase of

new tools and plant. The proceeds of the sales will be credited as a provincial receipt, from which grants will also be made for the same purpose if required. The fee-receipts will also be credited to Provincial Revenues.

4. The present General Committee of the Bihar Industrial School will appoint a special Committee for the management of the amalgamated school, which will include, as *ex-officio* members, the Commissioner of the Patna Division, the Principal of the Patna College, the Inspector of Works, Patna Division, and the Honorary Secretary to the General Committee. The Commissioner will act as trustee for the funds at the disposal of the amalgamated school; the Principal of the Patna College will exercise general control over the staff, and the Inspector of Works will be the scientific adviser to direct the practical working of the school and to control the expenditure on purchase of materials and appliances.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of the Patna Division and the Director of Public Instruction, for information, and also to the Financial Department for information and for communication to the Accountant-General, Bengal.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE STATIONERY DEPARTMENT FOR 1894-95.

FINANCIAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 24th September 1895.

RESOLUTION No. 536T.—F.

READ—

Letter No. 678B., dated the 31st July 1895, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1894-95.

The following statement compares the value of the stocks, receipts, and issues of the Stationery Office for the past two years:—

	1893-94.	1894-95.
	Rs.	Rs.
Value of stores at the beginning of the year ...	5,60,515	6,87,473
Gain (+) or loss (—) by revaluing the opening balance at the issue rate of the year ...	(+)52,546	(—)24,019
Corrected value of stores	6,13,061	6,63,454
Value of stores received during the year ...	24,49,671	23,57,947
Total ...	30,62,732	30,21,401
Value of stores issued during the year ...	23,75,259	22,81,561
Value of the balance in stock at the close of the year	6,87,473	7,39,840

2. The value of stores received and issued during 1894-95, exclusive of the stock balance at the beginning and end of the year, but inclusive of deficiencies in stock-taking and miscellaneous adjustments, shows a decrease of Rs. 91,724 and Rs. 93,698, respectively, as compared with the previous year, but that of stores in stock at the close of the year rose by Rs. 52,367. The decrease in receipts occurred mainly in the value of country-made paper, which fell off by Rs. 88,142 owing to a reduction in the supplies to the printing presses in Bengal, the North-Western Provinces and Oudh, and the Central Provinces. There was also a decrease of Rs. 10,352 in English articles obtained from India Office, and of Rs. 3,589 in English stores purchased locally. On the other hand, there was an increase of Rs. 7,982 in country-made miscellaneous articles owing to large indents by the Military Department for writing and binding materials in connexion with mobilization, and by the Superintendent Government Printing, Bengal, for binding tauzi registers. The value of imported stores has been calculated by the Superintendent at 2 shillings per rupee on their invoiced prices, to which has been added a percentage of 78 for 1893-94 and 72 for 1894-95 to cover exchange and freight charges, &c. Under article 1287, Civil Account Code, Volume II, the value of these imported stores should have been calculated on their invoice value at the official rate of exchange for the year, *plus* 15 per cent. for freight, packing and other incidental charges on the converted value as laid down in the orders of the Government of India, Financial Department, No. 1014, dated the 28th February 1887. The official rate of exchange for 1893-94 was 1s $2\frac{3}{4}d.$, and the average rate for 1894-95, 1s. $1\frac{1}{10}d.$, giving a percentage of nearly 63 and 75 respectively. The Indian value of the imported goods would thus amount to Rs. 2,48,037 + 1,56,263 = 4,04,300 for 1893-94, and Rs. 2,50,671 + 1,88,003 = 4,38,674 for 1894-95. Adding to these sums 15 per cent. for freight, incidental charges, &c., the total would come to Rs. 4,64,945 and Rs. 5,04,475, respectively, showing an increase of Rs. 39,530. The issues to Local Governments, including vernacular departments show a net decrease of Rs. 1,38,546. The largest reduction, viz., Rs. 1,12,444, took place in Bengal, and was mainly due to a considerable decrease in the consumption of paper by the printing presses. The other Local Governments, except the

Punjab, Assam, and Lower and Upper Burma, also contributed to the decrease. The value of stationery consumed by the officers and departments of the Government of India exceeded that of the previous year by Rs. 44,168.

3. The increase in the value of the closing balance of the year is attributed partly to the inability of the managers of the presses, who are the principal consumers of stationery, to frame accurate estimates of their requirements, and partly to the late receipt of many English articles which prevented their issue before the close of the stock accounts. The progressive increase in the surplus stock is ascribed to the practice of the local mills of delivering 10 per cent. in excess on all orders sent to them. The Lieutenant-Governor is of opinion that where, from the nature of the manufacture, it is impossible to make the exact quantity required, or where by the custom of the trade the millowners want to deliver 10 per cent. in excess on each order, contracts should be given only for 90 per cent. of the actual requirements.

4. The quantity of water-marked paper used with court-fee stamps issued during the year fell off by 627 reams, and its value by Rs. 2,038, as compared with the year before. The decrease occurred in Bengal, the Punjab, and the Central Provinces, and is due to reduced sales to the general public. It means that fewer petitions were filed during the past year, and many causes must have operated to bring about this result. It is noticeable that this paper is not used in the North-Western Provinces and Oudh. The Board consider it desirable that the same description of paper should be used throughout the provinces supplied by the Stationery Office as far as possible, and the Government of India have recently been requested to suggest its introduction into those provinces.

5. The income and expenditure of the Stationery Department amounted, during the year under review, to Rs. 94,262 and Rs. 1,05,136, respectively, against Rs. 97,833 and Rs. 1,01,998 in 1893-94. The decrease in the receipts was chiefly due to a falling off in the amount realized on account of commission on locally purchased articles, owing to a decrease in the local purchases. The increase in expenditure occurred mainly under "Establishment" (Rs. 1,742), "Freight" (Rs. 3,072), "Landing and shipping charges" (Rs. 1,779), and "Miscellaneous" (Rs. 1,980). The advance in the cost of establishment was due to increase of pay, to periodical increments in the salaries of clerks, to privilege leave allowances, and to allowances paid to apprentices. The baling charges for sending papers to the Punjab and the Aligarh Postal Presses, and the freight and baling charges for sending papers to Assam and Burma, where a number of new offices was opened during the year, contributed to the increase in the expenditure under the head of freight. The payment of municipal rates and taxes for the new Stationery building, and the purchase of a "dandy roll" for the Titaghar Paper Mills for water-marked paper, in accordance with the terms of the contract made with them, account for the increase in miscellaneous charges. The dandy roll belongs to Government, and is to be returned by the mills if they should cease to make water-marked paper. It seems to the Lieutenant-Governor absurd to give a mill a contract for paper worth about a lakh and-a-half, and yet to buy them the machines (costing apparently about Rs. 2,000) required for making it. This should be avoided in future contracts.

6. The chief item of receipt is the 5 per cent. commission added to the prime cost of locally purchased articles to cover incidental expenses. This charge is made under the orders of the Government of India, both on articles obtained through the India Office and on those purchased locally. The charge on imported articles is included in the 15 per cent. which is added to the cost price of stores when the valuation is made, but is not shown separately as a receipt of the Stationery Department. As such commission is a mere paper charge, the Lieutenant-Governor is of opinion that it should not be mixed up with cash transactions. The Government of India will be addressed on the subject, and with their sanction it will be excluded from the accounts in future.

7. The total value of the different articles of stationery issued during the year, exclusive of deficiencies in stock-taking and miscellaneous adjustments, amounting to Rs. 2,199 for 1893-94 and Rs. 3,103 for 1894-95, was Rs. 22,78,458 in the latter against Rs. 23,73,060 in the former, showing a decrease of Rs. 94,602. The principal decreases occurred under "drawing paper"

(Rs. 5,590), "writing paper" (Rs. 37,611), "printing paper" (Rs. 46,715), "lithograph paper" (Rs. 12,193); "tracing cloth" (Rs. 8,680), "long and nainsook cloth" (Rs. 11,622), and "paste, mill and straw boards" (Rs. 6,465). The decrease in drawing paper and tracing cloth was due to reduced supplies to the Survey, Settlement and Public Works Departments, the Quartermaster-General in India, and the State Railways and for thakbust maps in Bengal, while that in writing and printing paper was due to smaller supplies to the Government Presses. On the other hand, the principal increases noticeable are "leathers" (Rs. 17,686), due to larger supply of country calf skins to the Superintendent, Government Printing, India, and to the supply of country sheep skins to the Superintendent of Government Printing, Bengal, for binding the new tauzi registers; and "other articles" (Rs. 12,587), due mainly to the supply of Chubb's locks under the recent orders of the Government of India.

8. Appendix E, which shows the value of country-made paper purchased locally during the years 1893-94 and 1894-95, is identical with the last two columns of Tabular Statement II, and is superfluous. The Lieutenant-Governor desires that it may be omitted from future reports.

9. The substitution of country-made for imported articles is stated to have resulted in a saving of Rs. 3,27,956 in papers and of Rs. 9,564 in other articles calculated at the current rate of exchange. This does not, however, seem to the Lieutenant-Governor to be the proper mode of calculation, and His Honour considers that for the purpose of ascertaining the saving effected by the local purchase of country stores in substitution for stores obtained from England, the calculation should be made according to the official rate of exchange at which all financial transactions between the British and Indian Governments are made. The average of the official rate for the year was 1*s.* $1\frac{1}{8}$*d.* for the rupee, and calculated at this rate, and adding for tin line cases $\frac{5}{8}$ths of a penny per lb and for baled packages $\frac{5}{16}$ths of a penny per lb, which is considered to be a fair allowance for freight and packing charges, the substitution of Indian for English-made papers would show a saving of Rs. 2,74,994. All the descriptions of country-made paper used during the year show a saving, except white cartridge and coloured mottled grey, the use of which resulted in a loss of Rs. 5,260, and unless the local mills are prepared to reduce the rates for these two kinds of papers, they should in future be procured by indent on the India Office.

10. The system of supplying newspapers and periodicals through the Stationery Office continued to work satisfactorily during the year. The number of officers supplied with books, periodicals, and newspapers was 1,394, against 1,384 in the previous year. The number of periodicals supplied rose from 3,348 in 1893-94 to 3,587 in 1894-95, but that of newspapers and books supplied fell from 2,612 and 26,017 to 2,483 and 18,461, respectively. The total payment for the newspapers, &c., amounted to Rs. 90,366, against Rs. 99,415 in 1893-94. The cost of supplying these publications to officers under the Government of Bengal amounted to Rs. 11,024, against Rs. 12,979 in 1893-94. The table subjoined to paragraph 33 should be simplified by eliminating columns 3 and 4 as columns 2 and 5 furnish all the information required.

11. The following statement shows the total receipts and issues of standard and special forms during the past two years:—

	Forms.	
	Received.	Issued.
1893-94	103,381,754	110,065,830
1894-95	88,038,419	99,827,347
Decrease in 1894-95	15,343,335	10,238,483

These figures are exclusive of the number of forms printed and supplied by the Superintendent of Government Printing, Bengal, direct to the Settlement and Survey officers, which will be dealt with in the report on the Provincial expenditure of the Stationery Department.

12. There was a marked decrease in the number of forms both received and issued during the year. The issues fell off by over ten millions, notwithstanding that over $55\frac{1}{2}$ lakhs of newly prescribed forms were distributed to the

district officers during the year. This satisfactory result is due to the operation the rule directing that no form should be revised nor any new form introduced, except at or before the time of the annual indent, save with the sanction of Government. The Lieutenant-Governor observes that this rule has not been carried out in the case of forms prescribed by the High Court or the Accountant-General, Bengal, and Comptroller, Assam; and he desires that in future the Superintendent will be careful to carry out its spirit by representing to those authorities the loss which will ensue from a sudden supersession of the old forms in stock, and asking for special orders if that loss is to be incurred.

13. The total cost of printing the forms amounted to Rs. 4,79,289 in the year under review, against Rs. 6,28,016 in 1893-94.

14. The number of new forms introduced and of old forms revised during the year was 504 and 441, against 196 and 693 in 1893-94. This information is furnished in Appendix K to the report. The headings of columns 2 and 3 of this appendix are, as observed by the Board, misleading; and the Lieutenant-Governor agrees with them that the form of this appendix should be revised, and that it should in future show (1) departments; (2) number of items in each section at the beginning of the year; (3) number of items abolished during the year; (4) number of items added during the year; (5) number of items at the close of the year; and (6) number of items revised during the year. The report does not at present furnish information as to the number of forms abolished during the year. This defect will be remedied by the introduction of this revised form. His Honour learns that no register or set of registers is at present kept up in the Stationery Office showing the headings of each form under a proper classification. He considers it absolutely necessary that this system should be introduced, in order to avoid the waste which so often arises from the order to add a new form or substitute it for an old one, whenever some small change or addition is required, which might often be provided. The headings of forms appertaining to a section should be pasted against their respective numbers in the register relating to that section, and when a requisition for a new form is received, the register should be referred to, and it should be seen whether the information required could be obtained by adding or subdividing a column in an existing form. When this appears to be feasible, it should be pointed out to the officer indenting for the new form, and the change should not be effected unless that officer on further consideration deems it necessary.

15. The absence of correct information regarding the reserve stock of forms was a great defect in the administration of the Stationery Office. This was remedied during the year under review, and the entire stock was examined. The number of different kinds of forms in hand on the 31st March 1895 was stated to be 28,831,907. These figures are said to be not absolutely correct, but the Lieutenant-Governor agrees with the Board that more accurate stock-taking will not be possible till the new building for the Form Department is ready.

16. In paragraph 53 of the Superintendent's report, a statement is given, showing the quantity of form work remaining to be taken in hand by the Press at the end of each month of the year. This statement seems to the Lieutenant-Governor to be of no value, inasmuch as there must always be work standing over on any given day, and it should be abolished in future. When there is any such delay in the Press as to require special notice, a statement should be attached, giving the following particulars :—

1. Name of press;
2. Quantity of any form ordered during the year;
3. Quantity supplied within the first month after the issue of the order;
4. Ditto ditto second ditto ditto;
5. Ditto ditto third ditto ditto,

and so on.

17. The receipts and charges of the Form Branch of the Stationery Department amounted to Rs. 34,957 and Rs. 48,109, against Rs. 38,609 and Rs. 63,583, respectively, in the previous year. The decrease in the receipts is attributed to a decline in the number of forms sold to Local Funds in Bengal and Assam. The decline in expenditure, which occurred wholly under contingent charges, is a necessary consequence of the despatch of a smaller number of forms and of diminished supplies received from the Press.

18. In paragraph 70 of his report, the Superintendent of Stationery refers to the waste of printing involved in the manner in which forms of depositions are used by Judicial officers. He writes :—

"Several representations have been made to me from time to time, regarding the waste caused in forms of depositions of witnesses by the Judicial officer having to use a fresh printed form every time he requires a fresh sheet to record the deposition on; and it has been suggested to me that a saving in printing might be effected, if instead of using a fresh form, a plain sheet of paper could be used for the second and succeeding pages of the deposition."

The attention of the Judicial Department of this Government will be invited to this matter.

19. The Lieutenant-Governor's thanks are due to Mr. Beames, the Superintendent of Stationery, for his economical administration of the Department in the past year. Much, however, still remains to be done, and His Honour is of opinion that where country paper is really cheaper, the Superintendent should challenge all proposals to use English paper, and should not agree to indent for it unless it is shown that the country paper will not meet the want.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Board of Revenue for information and necessary action on points noticed.

Ordered also that a copy of this Resolution, with a copy of the Report, be submitted to the Government of India, in the Department of Finance and Commerce, for information.

Ordered also that a copy of this Resolution be forwarded to the Judicial Department for such action as may be considered necessary with reference to paragraph 18.

Orderd also that a copy of this Resolution be forwarded to the Superintendent of Government Printing, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 30th September, 1895.

Burdwan.—Rainfall at Sadar nil. Weather hot Prospects of *aman* rice continue bad. Condition of cattle generally good. Fodder and water sufficient. Common rice sells at an average price of 16 seers a rupee.

Midnapore.—Rainfall at Sadar 0·13, and some rain throughout the district, but more urgently wanted everywhere, especially for rice on high lands. Prices of common rice:—

	Srs.	
Sadar	17	per rupee.
Tamluk	16	
Ghatal	15	
Contai	26	

24-Parganas.—Rainfall at Sadar 0·74. Weather hot and cloudy. Prospects of *aman* fair. Harvesting of *aus* completed and of jute going on. Ploughing for sowing *rabi* crops going on in the Barasat subdivision. No cattle-disease. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	17	10	

Murshidabad.—Rainfall 3·70. Weather hot and cloudy. Sowing of *kalai* going on. Jute still being cut. Transplantation of *aman* nearly finished. Sugarcane and mulberry doing well. Fodder sufficient. Price of common rice 15 seers per rupee.

Khulna.—Rainfall at Khulna ·04, Bagerhat ·53, Satkhira ·52. Weather hot and cloudy. Harvesting of *aus* and jute continues in Satkhira. The grain in the ear of *aus* is not full. Transplantation of *aman* is still going on. Fodder and water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	c.	
Sadar	20 to 22	0	per rupee.
Bagerhat	22	2	
Satkhira	15	0	

Dinajpur.—Average rainfall ·16. Weather seasonable. Standing crops good. Price of common rice 15 to 16 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall ·98. Weather hot and cloudy. Prospects generally favourable. Transplantation of *aman* and steeping of jute still going on. Rice selling from 12 to 14 seers per rupee. Fodder sufficient. Cattle-disease prevailing still in some parts of the Nilphamari subdivision.

Pabna.—Rainfall 0·11. Weather hot and cloudy. Rivers falling rapidly. Prospects of *aman* paddy good. Common rice selling at Sadar 16 seers and Sirajganj 15 seers per rupee. Fodder sufficient.

Dacca.—Rainfall 1·42. Weather hot and cloudy at intervals. Harvesting of jute nearly completed. Prospects of *aman* favourable. Common rice sells at 18 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall 4·24. Weather hot. Transplantation of *aman* nearly finished; prospects fair. Fodder and water sufficient. Common rice selling at 16 seers per rupee.

Patna.—Rainfall at Sadar nil. Prospects of paddy generally fair. Harvesting of *sathi* rice commenced. Condition of cattle good. Supply of fodder and water for cattle plentiful. Common rice selling from 18 to 21 seers per rupee.

Gaya.—Rainfall at Sadar nil. Crop prospects fair, but depend entirely on rain during next ten days. Price of common rice 17 seers per rupee.

Champaran.—Rainfall at Motihari 0·02. *Bhadoi* crops are being harvested. Prospects of *aghani* rice good.

Darbhanga.—Weather hot and occasionally cloudy. *Bhadoi* crops are being harvested with good results. Lands are being prepared for *rabi* crops. Prices stationary. Fodder and water sufficient.

Bhagalpur.—Weather generally hot. Mornings cool. Rain at head-quarters 0·07, Banka 0·96, Madhipura 4·60, Supaul 3·58. There has been sufficient rain for the present all over the district, except in Banka, where it is badly wanted. Prospects on the whole good. Harvesting of autumn paddy continues. Fodder and drinking water sufficient. Coarse rice sells at 18 seers 15 chitaks per rupee. No cattle-disease.

Purnea.—Rainfall 0·02. Rain is still needed. Harvesting of *bhadoi* paddy and jute-steeping still going on with fair outturn. Prospects of *aghani* paddy and other crops good. Cattle-disease at Sadar and Gondwara outpost. Fodder and water sufficient. Common rice selling at 21 seers a rupee.

Cuttack.—Rainfall nil. Weather hot with winds. *Beali* rice being harvested. *Sarad* rice doing well. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	21	0	per rupee.
Jajpur	23	5	
Kendrapara	26	4	
Banki	25	0	

Hazaribagh.—Rainfall at Sadar 0·57, Giridi nil. Harvesting of *bhadoi* crops practically completed with generally good results. Paddy crops generally fair, the recent rain having greatly improved the prospects. *Rabi* sowings in progress in parts of the district. Fodder plentiful. Common rice selling at 15 to 18 seers per rupee in the district.

General Summary.—In the Bihar districts, in Cuttack, and in the Burdwan Division there was practically no rain during the week. In the other reporting districts the rainfall was usually light, except in Murshidabad and Chittagong districts, where fairly heavy rain fell. Prospects of the winter rice crop continue generally good, except, as previously reported, in parts of the Burdwan and Presidency Divisions. *Aus* rice and jute are still being harvested in some districts, and the *bhadoi* crops in Bihar. Preparation of lands for the *rabi* crops is in progress. Cattle-disease is still prevalent in parts of Rangpur and Purnea. The price of common rice continues almost stationary.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 1*st October*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

The total fall from 1st January to 28th September 1895	36·09
The average fall of the corresponding period for 24 years, Surveyor-General's Office	58·36

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast; t, thunder; <, lightning; d, drizzling rain; p, passing temporary showers.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ... The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical ... average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question ... station in the district ... dividing by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 28th of September 1895.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th May 1895. Mean for district.	Since 16th May 1895. Normal mean.	Since 16th May 1895. Variation.	DISTRICT.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen

CALCUTTA, *the 1st October* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 28TH OF SEPTEMBER 1895.

FINE settled weather has prevailed during the greater part of the week just past, the chief features having been the absence of rainfall and the high temperature till towards the end of the week, when local storms began in the eastern districts and gradually spread over a considerable part of the province.

The high pressure which followed the disturbance in the previous week still obtained at the beginning of the week in the western districts, but on the 22nd, the first day of the present week, there was a moderate to brisk fall. This fall continued slowly and somewhat irregularly for several days, so that the distribution was tending towards the normal everywhere. Westerly winds prevailed during the early part of the week as far east as Dhubri; and the consequence was fine and almost cloudless weather and steadily increasing temperature. As pressure became more normal, winds again blew from the east in Assam and parts of East and North Bengal, bringing moister air over these parts and occasional showers where thunderstorms occurred. These showers were confined chiefly to the Noakhali, Chittagong, and Darjeeling districts in the early part of the week. On the 24th the pressure distribution was practically normal, and light variable winds prevailed over the province.

In the extreme south of the Bay, a change had commenced which slowly led up to a renewal of monsoon conditions over the Bay and the province. This development was not established in the north of the Bay till near the time of writing, and an account of it will be given in the report for the following week. A wide diffused depression gradually formed over the south of the Bay, and as it drifted slowly westward and deepened slowly, it appeared, even at the end of the present week, to be likely to cross the Madras coast. It was causing stronger winds at Diamond Island and at Pambam, and the general circulation was cyclonic not only in the south of the Bay, but even in the extreme north of Bengal.

The northerly winds in Bengal were caused by a rise of pressure which, beginning briskly in Assam, North Bengal, and Bihar on the 26th, give higher readings in these parts than over the Bay. The difference, however, was small, and the winds remained light and irregular. Small irregular changes of pressure followed on the 27th, and on the 28th a moderate fall in the north of Bihar gave again almost normal readings. It was on this day, the last of the week, that weather began to be somewhat unsettled over a great part of the province, and local thunderstorms with usually light rain occurred in most districts.

Pressure changes have generally been small, and have never been greater than ·08 inch. The distribution has been more uniform than is usually the case at the end of September, and for the Bengal stations above the normal. Means for the week are in excess everywhere, but by small amounts, the greatest being ·05 inch in Orissa and Chota Nagpur.

Temperature has been uniformly high owing to the sky having been but lightly clouded from day to day. Towards the end of the week the local thunderstorms gave somewhat cooler weather in parts of Lower Bengal, but in the north of the province there was still excess of between 4° and 6°. The means for the week in the larger divisions are all much higher than usual; in Assam and Bihar by rather less than 2°, in East Bengal by 2°·1, Orissa by 2°·4, Chota Nagpur 2°·6, South-West Bengal 2°·7 and North Bengal 3°.

Rainfall.—Very little rain has fallen as compared with the quantity usually received at this time of the year. A few scattered showers fell at the beginning of the week and again at the end, and they were of somewhat more frequent occurrence in the Chittagong, Noakhali, and Darjeeling districts. Bihar and Chota Nagpur have received only ·16 inch on an average for the whole week, about 10 per cent of the normal. In the other districts the average fall varies from ·3 inch to ·9 inch, the corresponding normal amounts being between 1·84 and 3·17 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 28th of September 1895 :—

Meteorological Divisions	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 7th October 1895.

RESOLUTION—No. 327T.—G.

THE Lieutenant-Governor directs the publication, for general information, of the Commissioner's Report on the General Administration of the Patna Division for the year 1894-95.

2. The Lieutenant-Governor considers the following items in the Report to be of special interest :—

Paragraphs 97-111.—The railway statistics of traffic are well compiled and ably dealt with. The difference between the total amount of the downward traffic in food-grains from Patna and the quantity imported into Calcutta from Patna is no doubt absorbed by the districts which lie between.

Paragraphs 163-71.—Mr. Forbes states the arguments against the territorial distribution of criminal work to Deputy Magistrates at head-quarters In this respect he holds views diametrically opposed to those expressed by Mr. Luttman-Johnson in paragraph 16 of the Dacca Report. The Lieutenant-Governor, while inclining to agree with the Commissioner of Dacca, has left the decision of the question in the hands of District Magistrates.

Paragraph 291.—The account given here of the expenditure on roadside wells is useful, and all Commissioners of Divisions should record the expenditure of this class on water-supply, whether in the form of wells or tanks.

Paragraphs 355-56, 371 and 405-6.—Mr. Forbes' remarks on the shortcomings of the Patna and Chapra Municipalities, and of the municipal administration in general, are of great importance, and the Lieutenant-Governor hopes that they will be carefully read and will lead to improvement.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR 1894-95.

No. 393G., dated Bankipore, the 9th July 1895.

From—A. Forbes, Esq., c.s.i., Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, General Department.

I have the honour to submit the following Report on the General Administration of the Patna Division for the year 1894-95.

2. The following statement shows the names of the officers submitting the reports and the dates on which they were submitted and received in this office:—

District.	Name of officer submitting the report.	Date of last section of report.	Date of receipt of same in the Commissioner's office.
1	2	3	4
Patna ...	Mr. T. Inglis ...	30th May ...	31st May.
Gaya ...	„ D. J. Macpherson ...	6th June ...	7th June.
Shahabad ...	„ C. R. Marindin ...	30th May ...	1st „
Saran ...	„ F. A. Slack ...	26th June ...	28th „
Champaran ...	„ E. G. Colvin ...	1st „ ...	3rd „
Muzaffarpur ...	„ L. Hare ...	30th May ...	31st May.
Darbhanga ...	„ A. C. Tute ...	30th „ ...	31st „

I.—CHARGE.

(a) Division.

3. I held charge of the Division throughout the year, except for three months, from 7th August to 5th November 1894, when I was on privilege leave, and Mr. Luttman-Johnson officiated for me.

(b) Districts
(c) Subdivisions.

4. The following officers held charge of the several districts and subdivisions during the year:—

Patna ...	Mr. C. J. O'Donnell ...	From 1st April 1894 to 17th March 1895.
	„ C. W. Bolton ...	From 18th March to the end of the year (in addition to his own duties as Additional Commissioner of Patna).
Patna City (subdivision)	Mr. N. D. Beatson-Bell ...	From 1st April to 25th May 1894.
	Maulvi Dilawar Hossein Ahmed.	From 26th to 30th May 1894 (in addition to his own duties as Deputy Magistrate and Deputy Collector at head-quarters).
	Mr. R. B. Hughes ...	From 31st May 1894 to end of the year.
Barh subdivision ...	Mr. J. T. Babonau	From 1st April 1894 to 14th March 1895.
	„ B. Foley	From 15th March to end of the year.
Bihar subdivision ...	Babu Mohendra Nath Gupta	Throughout the year.
Dinapore subdivision ...	Major C. J. Robarts ...	From 1st April to 13th August 1894, and again from 12th October 1894 to end of the year.
	Mr. B. Foley	From 14th August to 11th October 1894.
Gaya	Mr. D. J. Macpherson ...	From 1st April to 19th June 1894, and again from 19th September 1894 to end of the year.
	„ E. G. Drake-Brockman	From 20th June to 18th September 1894.
Nawada subdivision ...	Maulvi Majibur Rahman ..	From 1st April to 15th July 1894, and on 16th October 1894.
	Babu Trailokya Nath Bhattacharjee, Sub-Deputy Collector.	From 17th July to 3rd August, from 31st October to 9th November, and on 15th and 19th November 1894.
	Maulvi Syed Mohiuddin Ahmed.	From 4th August to 15th October, from 17th to 30th October and again from 10th to 17th November.
	Babu Hari Pada Bhattacharjee.	From 20th November to end of the year.
Aurangabad subdivision	Mr. J. D. Cargill	From 1st April to 16th December 1894.
	Maulvi Syed Wasid Hossein	From 17th December to end of the year.

Jahanabad subdivision ...	Mr. W. H. W. Mackenzie ...	Throughout the year.
Shahabad	Mr. C. R. Marindin	From 1st April to 3rd August, and again from 1st October to end of the year.
	„ C. E. A. W. Oldham ...	From 4th August to 30th September 1894.
Buxar subdivision ...	Mr. C. E. A. W. Oldham ...	From 1st April to 2nd August 1894, and from 2nd October 1894 to 19th March 1895.
	Maulvi Syed Wazid Hussain	From 3rd August to 2nd October 1894.
	Mr. J. T. Rankin ...	From 20th March 1895 to end of the year.
Sasaram subdivision ...	Mr. E. G. Drake-Brockman	From 1st April to 16th June 1894.
	„ C. P. Beachcroft ...	From 17th June to end of the year.
Bhabua subdivision ...	Maulvi Sheikh Abdulla ..	Throughout the year.
Saran	Mr. F. A. Slack	Ditto.
Siwan subdivision ...	Mr. J. H. Lea	From 1st April to 18th August, and again from 24th October to end of the year.
	„ W. B. Thomson ...	From 19th August to 23rd October 1894.
Gopalganj subdivision ...	Mr. W. B. Thomson ..	Throughout the year.
Champaran	„ W. D. Blyth	Ditto.
Bettiah	Mr. C. Fisher	From 1st April to 31st May 1894, and again from 1st September to end of the year.
	„ H. D. Carey	From 1st June to 31st August 1894.
Muzaffarpur	Mr. L. Hare	From 1st April to 23rd August, and again from 22nd October to end of the year.
	„ J. H. Lea	From 24th August to 21st October 1894.

	Babu Sheonandan Lal Roy...	From 24th July to 2nd September 1894.
	„ Haripado Bhattacharjee.	From 3rd September to 12th November 1894.
	Mr. F. Lyall	From 13th November to 19th November 1894.
	„ J. F. Gruning	From 14th March to 31st March 1895.
Sitamarhi subdivision ...	Mr. W. Egerton	From 1st April to 6th August 1894, and again from 11th November to end of the year.
	„ J. H. Kerr	From 7th August to 10th November 1894.
Darbhanga	Mr. H. C. Williams	From 1st April to 23rd April 1894.
	„ H. C. Streatfeild ...	From 24th April to 10th December 1894.
	„ A. C. Tute	From 11th December to end of the year.
Samastipur subdivision	Mr. J. E. Phillimore ...	From 1st April to 26th December 1894.
	„ J. D. Cargill	From 27th December to end of the year.
Madhubani subdivision ...	Mr. H. A. Boyd	From 1st April to 12th November 1894.
	„ J. H. Kerr	From 13th November 1894 to end of the year.

II.—TOURS AND INSPECTION OF OFFICES.

(*a*) Tour of Commissioner.

5. On the 23rd April I accompanied His Honour the Lieutenant-Governor for two days to Arrah to attend the ceremony of the opening of the municipal water-works. In May, after a short visit to Dumraon in connection with the death of the late Maharaja Sir Radha Prosad Singh, K.C.I.E., I went on inspection tour to the district of Darbhanga, from the 8th to the 25th, inspecting the Sadar offices, the subdivisions of Madhubani, Samastipur, and Sitamarhi (in Muzaffarpur), and making a flying visit of two days to Muzaffarpur to consult with the Collector on various matters. During June and July I was detained at head-quarters, writing my annual reports, &c. From the 7th August until the 5th November I was absent on privilege leave.

6. During my absence, Mr. Luttman-Johnson, my *locum tenens*, spent ten days in August and nine days in September in visiting Muzaffarpur and Motihari, at both of which places he made partial inspections, and the subdivision of Bettiah which he inspected. Returning to head-quarters on the 9th September, he went on tour again into the Gaya district, where he inspected the subdivisions of Jahanabad, Nawada, and Aurangabad, and made a partial inspection of the Sadar office. On the 30th he reached Sasaram, which he inspected, returning *viâ* Buxar (partial inspection) to head-quarters on the 2nd October. From the 6th to the 9th October Mr. Luttman-Johnson was in tour in Saran, visiting Chapra, Siwan, and Hutwa. From the 10th to the 15th he was absent (during the Durga Puja holidays) in the North-Western Provinces, and from the 25th until the 31st he was on tour in Shahabad, inspecting Buxar subdivisional office and several departments of the Sadar office at Arrah.

7. After my return from leave I spent three days in November at the Sonepur meet, and subsequently accompanied His Honour the Lieutenant-Governor on tour for a few days to Gaya. On the 2nd December I rejoined His Honour in camp at Bihar, returning to head-quarters, after inspecting the subdivisional office, on the 4th. From the 6th until the 20th I was on tour in Saran, during which I inspected the Sadar offices at Chapra and the Siwan and Gopalganj subdivisions. From the 4th January until the 5th

February I was on tour in the Shahabad district, during which I inspected the Sadar offices at Arrah and the subdivisional offices at Bhabua and Sasaram (partially), and spent 12 days in camp with the Collector in the southern part of the district. From the 12th February until the 2nd March I was on tour at Gaya, where I inspected all departments, and I returned there for the last three days of the month in attendance on His Excellency the Viceroy.

8. Thus the Sadar offices at Darbhanga, Chapra, Arrah, and Gaya were inspected by me in all departments, and at Gaya, Muzaffarpur, and Motihari, in some one or more departments, by Mr. Luttman-Johnson. Mr. Luttman-Johnson also inspected most of the departments of the Patna Sadar office. All the subdivisions, except Hajipur, Barh, and Dinapore, were also inspected. Mr. Luttman-Johnson was on tour in the Division for 47 days, and I was on tour for 102 days—total 149.

PATNA.

(b) Tours of Collectors and (c) tours of Subdivisional Officers.

9. The Collector, Mr. O'Donnell, was on tour for 85 days. He was unable to complete the full programme owing to serious ill-health which obliged him to take long leave from the 18th March 1895. All of the subdivisional offices, besides police-stations, registration offices, roads, pounds, &c., were duly inspected.

Subdivisions.

10. Mr. Babonau, the Subdivisional Officer of Barh, and Babu Mohendra Nath Gupta, the Subdivisional Officer of Bihar, were in camp for 97 and 102 days, respectively. All the usual inspection duties were duly performed by each officer, and a number of bad-livelihood cases were locally enquired into by the Subdivisional Officer of Bihar. Major Robarts, the Cantonment Magistrate of Dinapore, did not go into camp, having been exempted from the duty by Government order No. 268T.G., dated 6th October 1892.

GAYA.

11. Mr. Macpherson, the Collector, was absent on privilege leave for three months, from 20th June to 18th September 1894. During his absence the Acting Collector, Mr. Drake-Brockman, was on tour during August and September for 26 days, Mr. Macpherson being on tour during the rest of the year for 97 days, or 123 days in all. Mr. Drake-Brockman during his tour inspected all of the three subdivisional offices. Mr. Macpherson did so again during the cold weather, besides making an extended tour practically through the whole district, in the course of which, besides ordinary inspection duties, he inspected the offices of the Deo Encumbered and Chandargarh Wards' estates, a large number of Government estates, including all of those in the Nawada subdivision, the Daudnagar and Tikari municipalities, and made visits to the survey camps in the Sadar subdivision. Mr. Macpherson's tour was a very complete one, and the diaries he submitted to this office were particularly full and useful.

12. Mr. Herron, the Joint-Magistrate was in camp for ten days on local enquiries, and Mr. Russell, the Assistant Magistrate, was on tour for a great part of the cold weather, visiting Government estates and watching survey and attestation work.

Subdivisions.

13. The tours of the Subdivisional Officers were in Aurangabad 102 days, in Nawada 100 days, and in Jahanabad 92 days. The tours were all fairly well distributed througout the year, except in Jahanabad, where the Subdivisional Officer, Mr. Mackenzie's tour was almost confined to the cold weather. Besides ordinary inspection duties and enquiries into criminal cases, particular attention was paid in each subdivision to chaukidari matters. The Collector speaks with approbation of the tour of Babu Hari Pada Bhattacharjee, the Subdivisional Officer of Nawada, during which he visited almost all of the numerous Government estates in that subdivision.

SHAHABAD.

14. The Collector, Mr. Marindin, and Mr. Oldham, who acted as Collector from 4th August to 30th September 1894, spent on the whole 121 days in camp, which were well distributed throughout the year. Mr. Oldham's time on tour was chiefly spent in trying bad-livelihood cases and in inspecting the Bhabua subdivisional office. Mr. Marindin's tour was a very complete one,

taking in practically the whole district, with the exception of the Kymore range of hills, through which he had camped in the previous year. During his tour, besides inspecting the different subdivisional offices and making the usual inquiries into crime, roads, material state of the people, &c., he paid useful inspection visits to the Nasriganj Government estate and to parts of the Sabar and Deo Kumar and Dharm Kumar Wards' estates, and inspected the rural municipalities of Dumraon and Jagdispur. Some 12 days were occupied in camping with myself along the northern base of the Kymore hills, making the acquaintance of the inhabitants and fauna of that remote part of the Division.

Subdivisions.

14. (*a*) In Buxar Mr. Oldham's movements were hampered by the Sub-Deputy Collector attached to the Subdivision being deputed to settlement work from the 16th October, which necessitated the Subdivisional Officer's having to constantly return to head quarters for the despatch of treasury business. He was, however, on tour for 97 days, which were usefully employed in the usual inquiries, part of the time being spent in supervising the arrangements at the two important Barahpur fairs. In Sasaram the Subdivisional Officer's tour extended only to 80 days, owing to Mr. Beachcroft being laid up with rheumatism for over two months during the cold weather, viz., from the middle of November until nearly the end of January. He did what he could to make up for this in February and March, and although the time spent in camp fell short of the prescribed period, he managed to get through nearly the full tale of inspection duties. In Bhabua the Subdivisional Officer, Maulvi Syed Abdullah, visited every part of the subdivision, getting through a good deal of useful work, notably inspection of *khas mahals*. He was in camp in all for 125 days.

SARAN.

15. Mr. Slack was in camp for 90 days in the cold season and for 42 days during other times in the year, during which, in a succession of useful tours, he visited every part of the district, doing much useful inspection work. His movements were, however, somewhat interfered with by his having to see to the arrangements in connection with the marching of the reliefs through his district, and he was in particular very much handicapped by having personally to take up the hearing of a very heavy criminal case (Empress *versus* Rai Ishree Pershad, under section 110, Criminal Procedure Code), which had been transferred to his file from that of the Assistant Magistrate of Patna by the High Court.

Subdivisions.

16. Mr. Lea, Subdivisional Officer of Siwan, spent 90 days on tour, and Mr. Thomson, of Gopalgunge, 107. The tour of the former officer was not carried out so completely as the Collector had wished, owing to interruptions caused by the marching of the reliefs through the Siwan subdivision But under such circumstances Mr. Lea should have spent more than the prescribed minimum of 90 days in camp, and the Collector will be requested to see that this is not advanced as a reason for any departure from a full programme in future. Mr. Thomson's tour was a full and useful one, though he was a good deal handicapped by having constantly to return to his head-quarters for treasury work, owing to his Sub-Deputy Collector having been deputed for cadastral survey duties.

CHAMPARAN.

17. Mr. Blyth was on tour for 74 days during the cold season and for 22 days during the hot-weather months. Besides the usual enquiries and inspections, he inspected the two Dome settlements and made enquiries into the affairs of the Ramnagar Raj.

Subdivision.

18. Mr. C. Fisher, the Subdivisional Officer of Bettiah, spent 131 days in camp, and Mr. Carey, whilst temporarily in charge, was on tour for 13 days. The Collector has not given any details, but I believe that the time on tour of both of these officers was usefully spent.

MUZAFFARPUR.

19. Some days in each month of the year were spent by the Collector on tour, aggregating 84 days by Mr. Hare and 12 days by Mr. Lea, who acted for

him (in September and October) while on privilege leave. All the usual inspections and enquiries were fully made, and questions of drainage, fouling river-water, &c., formed special subjects of enquiry.

Subdivisions.

20. The Subdivisional Officers of Sitamarhi and Hajipur were on tour for 123 and 94 days, respectively. Both tours were useful ones, all the requisite inspections and enquiries being duly made. In both subdivisions chaukidari matters received particular attention, and in the Sitamarhi subdivision the traffic registration offices were inspected.

DARBHANGA.

21. Mr. Streatfeild was on tour for 34 days, and Mr. Tute, who only took charge on 10th December, for 74 days—total 108 days. The deficiency of 12 days, the prescribed time for this district being 120 days, was due to unforeseen circumstances in Mr. Streatfeild's time, which have been explained by the present Collector. Mr. Streatfeild's tour, though thus unavoidably cut short, was well spent in inspecting the two subdivisions, the Jogearah Trust estate, the Rosera municipality and other offices. Mr. Tute's tour was also well laid out. During the first part of it he made a complete circuit of the southern portion of the district, in the course of which he inspected the Samastipur subdivisional office, the Narhan Ward's estate office and tahsil offices, and the Government estate of Bakhtiarpur. His next tour was to the Madhubani subdivision, most of which he visited, besides inspecting the subdivisional office, outstills, police-stations, &c., and personally making arrangements for the passing through of the military reliefs. I am inclined to think that the prescribed tour of 120 days for this district is unnecessarily long, especially as it is a district where closer supervision by the head of the district at head-quarters is much needed.

Subdivisions.

22. The late Mr. Boyd and the present Subdivisional Officer, Mr. Kerr, spent 12 and 91 days on tour in Madhubani; and Messrs. Phillimore and Cargill 93 days between them in Samastipur. All the usual tour duties were duly performed by these officers. Mr. Kerr's tour diaries were particularly good ones, full of useful and interesting information.

(*d.*)—INSPECTION OF DISTRICT OFFICES AND TREASURIES BY—

I.—COMMISSIONER.

23. The following inspections were made in 1894-95:—

INSPECTION MADE BY MR. A. FORBES.			INSPECTION MADE BY MR. LUTTMAN-JOHNSON.		
Months.	District head-quarters.	Subdivisions.	Months.	District head-quarters.	Subdivisions.
1	2	3	4	5	6
May 1894	Darbhanga ... All departments.	Madhubani. Samastipur. Sitamarhi.	September 1894	Patna ... ... Magistrate's office. Nizarat. Land registration. Cess office. Certificate. Record-room. Zamindari dák.	
December "	......	Bihar.	" "	Muzaffarpur ... Magistrate's office. Land registration. Record-room. General remarks.	
" "	Saran ... ... All departments.	Siwan. Gopalganj.	" "	Champaran ... Magistrate's office Nizarat ... Cess office ... Zamindari dák ...	Bettiah.
January 1895	Shahabad ... Ditto ...	Bhabhua. Sassaram (partially).	October "	Shahabad ... Butwara ...	Buxar. Sasaram.
February "	Gaya ... Ditto ...	......	" "	Gaya ... ... Magistrate's office Nizarat ... Munshi khana ... Land registration Cess office ... Zamindari dák ... Khas Mahal ...	Jahanabad. Aurangabad. Nawada.

24. The jails and dispensaries were also inspected at each of the above places, besides such of the registration offices as time permitted. Municipal matters were also looked into and the municipal offices inspected. I also made thorough inspections of the offices of the Managers of the Paigumberpur Ward's estate in Darbhanga, the Deo Kumar and Dharm Kumar Ward's estate in Shahabad, and of the Tikari 9-annas Ward's estate at Gaya.

II.—COLLECTORS.

25. *Patna.*—The Collector, Mr. O'Donnell, inspected his office during the half-year ending 30th September 1894, but the second half-yearly inspection could not be made owing to his sudden and serious illness.

26. The Barh and Bihar subdivisional offices were each inspected by the Collector twice, viz., once in September and June, respectively, and again in December 1894. The Dinapore Cantonment Magistrate's office was inspected in July 1894, and again in January 1895.

27. *Gaya.*—Mr. Macpherson inspected the office at head-quarters twice during the year, viz., once in April and May, and again in October and November 1894. He says that, properly speaking, the former inspection belonged to the previous year, but that he could not arrange a further inspection after the close of the touring season, as he was too busy with matters connected with His Excellency's visit to Gaya, and with the usual pressure of work after the touring season. He adds that any inspection would, moreover, have been quite superfluous, as the Commissioner thoroughly inspected every branch of the office in February. In this I agree, especially as another partial inspection of the office had been made by the Officiating Commissioner, Mr. Luttman-Johnson, in September.

28. The several subdivisional offices were inspected as follows:—

	By Mr. Drake-Brockman.	By Mr. Macpherson.
Aurangabad ...	In August 1894.	In December 1894.
Nawada ...	Ditto „	In January 1895.
Jahanabad ...	Ditto „	In February „

The Jahanabad office was only partially inspected at the second time in February 1895, as Mr. Macpherson was called in by me to Gaya for work on the Maintenance of Records' Bill, and also for arrangements for the visit of His Excellency the Viceroy.

29. *Shahabad.*—The head-quarters offices at Arrah were inspected by Officiating Collector, Mr. Oldham, in September 1894, and again by Mr. Marindin in March 1895.

30. The several subdivisional offices were thus inspected during the year:—

	By Mr. Oldham.	By Mr. Marindin.
Buxar ...	... ...	28th July 1894. 5th March 1895.
Sasaram ...	... ...	23rd July 1894. „ January 1895.
Bhabua ...	... 17th September 1894.	7th February 1895.

31. *Saran.*—Mr. Slack held his first inspection of the offices at head-quarters in September 1894, and his second inspection in March 1895.

32. He also inspected the subdivisional offices of his district, viz., Siwan in December 1894 and January 1895, and Gopalganj in April 1894 and April 1895, which latter inspection, however, belongs, strictly speaking, to the current year.

33. *Champaran.*—The offices at head-quarters were twice inspected by Mr. Blyth in September and March 1894.

34. The subdivisional office at Bettiah was also twice inspected by the same officer in the same months.

35. *Muzaffarpur.*—The Sadar offices were inspected by Mr. Lea in September 1894 and by Mr. Hare in April 1895.

36. The subdivisional offices at Hajipur and Sitamarhi were also twice inspected during the year, viz., once in September 1894 by Mr. Lea, and again in March 1895 by Mr. Hare.

37. *Darbhanga.*—The half-yearly inspections of the district offices were made by Mr. Streatfeild in September 1894 and by Mr. Tute in February and March 1895.

38. The Madhubani and Samastipur subdivisional offices were also inspected twice during the year, viz., the former by Mr. Streatfeild in May 1894 and by Mr. Tute in February 1895, and the latter by the same officers in September and December 1894, respectively.

III.—WEATHER AND CROPS.

39. In order to explain the general character of the weather and the effect on the crops, I have had the following statement prepared from the monthly figures given in the *Calcutta Gazette*, showing the actual as compared with the normal rainfall, month by month, in each district:—

Statement showing actual rainfall, month by month, in each district as compared with normal rainfall.

Month.		Patna.		Gaya.		Shahabad.		Saran.		Champaran.		Muzaffarpur.		Darbhanga.		Average f Patna Division

It will be seen that in the three South Gangetic districts the rainfall was considerably over the average, especially in Shahabad, where some 20 inches above the normal quantity fell. To the north of the Ganges also there was an excess of some 10 inches in Saran, and from 4 to 6 inches in the Muzaffarpur, Darbhanga, and Champaran districts.

40. From the beginning of the calendar year 1894 up to the end of May the season was characterised by a deficient rainfall, and the preparation of lands for the *bhadoi* sowings was in consequence somewhat retarded. In June, however, the monsoon broke favourably everywhere, though the fall was somewhat short in Muzaffarpur and Darbhanga. But the following month of July presented unusual features, the rainfall in the districts south of the Ganges being excessive, while over a considerable portion of North Bihar, including the northern half of Muzaffarpur and the greater part of Darbhanga, there was a severe drought until nearly the end of the month, and a general failure of both the *bhadoi* and winter rice over a large tract of country was at one time imminent. Fortunately the rain at the last moment came, and was followed by good rain in August, and in the end the northern districts fared better than the others. For, while in the three South Gangetic districts the Indian-corn was considerably damaged by the unusually heavy rainfall, and the general outturn of the *bhadoi* harvest was reduced to about 9 annas, in the three northernmost districts, where, owing to the drought, the sowings were very backward and the area cropped was somewhat contracted, the yield was, in the end, a 12 to 13 annas one. In the remaining district, Saran, which suffered with the southern districts from too much rain, though not to the same

The *bhadoi* crop.

extent, the *bhadoi* crop was estimated at about 14 annas. For the whole Division the average of the *bhadoi* harvest may be taken at from 11 to 12 annas.

The winter-rice crop.

41. The rainfall in August was a heavy one in all the districts, the mean for the Division being about 15 inches as compared with a normal average of about 11 inches. This was favourable to the winter rice, and a bumper crop was everywhere expected. Unfortunately, however, there was a heavy and unseasonable fall at the very end of October and in the first days of November, which damaged the rice in ear; and though the outturn was an unusually good one, averaging for the Division something over 15 annas, it was some 2 annas less than had at one time been hoped for. Saran here again did best with an outturn of about 17 annas, Muzaffarpur worst with a 12 to 13 annas crop, while in Patna, Gaya, and Darbhanga the yield was estimated at 16 annas.

The *rabi* crop.

42. But this untimely rain was more injurious to the *rabi* than to the rice. Sowings were everywhere delayed for some weeks both to the north and south of the Ganges, and the germination of the seed damaged, while the lower lands, which in ordinary years grow heavy crops, could be made of little or no use, owing to excessive moisture.

Fortunately, however, the weather during the subsequent months was all that could be desired. There were beneficial showers in January and February, which brought the plants on well, and a marked absence of the high west winds in March, which so often dry up the grain. The result in the end was a yield of nearly 15 annas in the four districts to the north of the Ganges, and of 10 to 12 annas in the three districts to the south.

43. On the whole, the past year has been a decidedly prosperous one for agriculturists to the north of the Ganges, and a good average one for those to the south, except in Shahabad, where it was somewhat below the average.

44. The year was an unfortunate one for opium. The unusually heavy and late rains in October and the subsequent unsettled weather in November retarded sowings; and although the seed germinated well, yet the excessive moisture in the soil afterwards brought on blight. The strong plants in well-manured homestead lands were as a rule able to resist the disease; but among the backward plants and those in weak soil it committed serious mischief. Fortunately, however, the increase in the Government price from Rs. 5 to Rs. 6 per seer saved the cultivators from an equally heavy loss as that of the preceding year. The following statement shows the estimated and actual outturn and the amounts paid to the cultivators in each of the three last years:—

Season.	Estimated produce.	Actual outturn.	Payments to cultivators— On account of opium.	On account of leaves.	On account of trash.	Total.	Remarks.
1	2	3	4	5	6	7	8
	Mds.	Mds. s. ch.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
1892-93	43,638	40,338 36 12¾	80,67,783 15 9	67,702 9 9	6,657 9 2	81,42,144 2 8	
1893-94	33,660	26,115 32 12¼	52,05,013 15 6	70,947 3 10	5,976 15 3	52,81,938 2 7	
1894-95	35,231	30,134 14 5½*	81,60,000 0 0	56,000 0 0	6,375 0 0	82,22,375 0 0	Approximate amounts calculated on 34,000 maunds; damdetta leaves on 8,000 maunds, and trash on 17,000 maunds.

* Gross produce ascertained at weighments.

45. For indigo the year was an exceptionally good one. There was rain in all the northern (indigo) districts in February, rather over normal, which gave strong moisture for the sowings Subsequently the monsoon broke favourably and brought the plant on well for the first cuttings, the bright days of sunshine (during the drought) securing good produce and colour. Later on, the heavy rain at the end of July and during August gave unusually good second cuttings, with a final result that the season was a record one. A statement showing the outturn and value of the crop during the past two years will be found in paragraph 80 of this report.

IV.—PUBLIC HEALTH.

46. The following statement compares the number of deaths and the death-rate per mille in the different districts during the last two calendar years:—

Statement showing the number of deaths and the death-rate per mille in the different districts during the 1893 *and* 1894.

(a) The figures for 1893 are for the calendar year, and do not tally with those shown in previous year's report, which were for the official year 189.

There was a very heavy increase in mortality throughout the Division. In fact the past year has been the most unhealthy on record. It almost seems as if nature had endeavoured to compensate itself for the unusual healthiness of the year immediately preceding. The chief features were the appalling ravages from fever and cholera, the latter of which was comparatively innocuous during the previous year, and the general immunity from small-pox.

47. It is deserving of notice that the increase in general mortality has been about equally shared by the South Gangetic and by the North Gangetic districts, the average increase being 60 per cent. in the former as compared with 61 per cent. in the latter. This points to climatic causes, rather than physical features, being the chief factor in bringing about the late widespread mortality. We hear a great deal now-a-days about intercepted drainage and the country being water-logged, and this is often advanced as the chief reason to account for epidemics of fever, &c. This is to a certain extent sound enough, but it is not the whole truth; and it is not fair that our roads and railways should be called upon to bear more than their proper share of blame. The Collector of Saran, I observe, gives this, viz. the deterioration of drainage, as the chief reason of the large increase of fever in his district. But this physical cause equally existed in the preceding year, when Saran was the healthiest district in Bihar. Take again Gaya. It is certainly not a "water-logged" district. Yet the mortality there from fever was during the past year considerably heavier than in Saran. The fact is that the state of the public health from year to year depends upon the "seasonableness" or otherwise of the weather in a far greater degree than upon any local causes. If the rains are delayed, there is inevitably an epidemic of cholera; if they are prolonged, fever takes its place. During the past year both conditions obtained. First the prolonged drought from October 1893 until June 1894, culminating in a month of unusual heat, produced a state of things exceptionally favourable to the spread of cholera. Next the copiousness of the rainfall and the abnormal prolongation of the rains into November intensified the annual ravages of malaria to a degree hitherto unknown in Bihar.

48. *Patna.*—The causes above-mentioned led to the general increase in the death-rate. The sanitary condition of the city of Patna is still as unsatisfactory as ever. The drainage scheme has, it is true, been carried out; but this, in the absence of any means of flushing the new drains, accentuates rather than mitigates the existing evils. The question of forming a fund for the carrying out of a water-works scheme is now occupying the attention of the Municipal Commissioners, and I trust that some definite steps will shortly be taken to accomplish this object. The Civil Surgeon remarks that the health of the town of Barh is steadily deteriorating owing to the secession of the river Ganges and the formation of an insalubrious chur opposite the town.

49. *Gaya.*—Cholera seems to have been first imported in February by persons returning from the Kumbh *méla* at Allahabad, but it did not break

out in an epidemic form until after the Deokund *méla* in the west of the district. The unusual drought and heat which followed, seconded by long and trying breaks in the rains, gave the disease full play from the end of April until September, the greatest mortality occurring in July and August. The disease was imported into the Gaya jail in July by an under-trial prisoner, and experiments carried out there by the Civil Surgeon, Surgeon-Major Macrae, showed that it was undoubtedly spread by the agency of flies. These experiments, and the results of inoculation of a number of the prisoners against cholera by Professor Haffkine, formed the subject of special reports to Government and of articles in the *Indian Medical Gazette*. The Collector speaks with approbation of the efforts made by the Deputy Sanitary Commissioner, Surgeon-Captain Deare, to encourage vaccination, and gives figures to show that in the municipalities where vaccination is compulsory the number of operations exceeded the number of births. Regarding the high mortality from fever, Mr. Macpherson observes that the disease was equally prevalent in the rest of the district as in the canal-irrigated tracts, the excessive rainfall having equalised the conditions throughout the district. The death-rate from this cause was heaviest from July to November, inclusive, the prolongation of the rains enabling it to retain its foothold until late in the latter month.

50. *Shahabad.*—This was, as in the previous year, the most unhealthy of all the districts in the Division. The first appearance of cholera is here again traced to the Kumbh *mêla* at Allahabad. It first broke out in the Sadar subdivision, and then in a village near to Sasaram, and during the heat of May and June in an epidemic form throughout the district. Everything was done by the local officers and District and Local Boards that could be done in the way of affording medical aid, disinfecting, and introducing sanitary reforms, but with little visible effect. The disease tenaciously held its ground, as in Gaya, until September, committing greater ravages than in any other district in the Division. It is at first sight disappointing to find that in the town of Arrah, notwithstanding the introduction of a filtered water-supply, there was an unsually severe outbreak. This is explained by the fact that, owing to the use of coarse sand in the filter-beds, the water for the first few months was much discoloured, and the people on this account objected to take it. This, however, was subsequently remedied, and the purity of the water is now undisputed. The Collector adds that enquiries showed that in parts of the town where the people overcame their prejudices and used the filtered water, cholera was less prevalent than elsewhere. On the subject of the prevalence of cholera throughout the district, the Civil Surgeon remarks as follows:—

"There can be no doubt that the great spread of cholera was due in great part to the defective water-supply of the district and from the pollution of drinking water. The corpses of those who die from cholera are very often not properly burnt, and in many instances are thrown into rivers and irrigation reservoirs without any attempt at cremation whatever. Such occurrences were brought to my notice at Dehri, and were by me reported to the Magistrate, with a request that such practices should, if possible, be put a stop to."

The heavy mortality from fever is ascribed to the same causes as in Gaya and elsewhere, viz., the unusual character of the season. The improvement in vaccination operations is also favourably noticed by the Collector.

51. *Saran* would appear to have suffered less in proportion to population, both from cholera and fever, than most of the other districts. At the same time I note that there is an inordinately large mortality shown under the head of "other causes," and I doubt very much if the statistics have been prepared on the same basis as elsewhere. The contrast is certainly very striking and needs explanation, and I am inviting the attention of the Sanitary Commissioner to the matter.

52. *Champaran.*—The year was as abnormally unhealthy as elsewhere. Such preventive measures as were possible were taken, and six Civil Hospital Assistants were specially employed on cholera duty. The four new dispensaries which are being opened in the north of the district will supply a long-felt want.

53. *Muzaffarpur.*—Here again cholera is thought to have been imported originally from the Kumbh *mêla* in February. It established itself as an

epidemic during the intensity of the heat in May and June, and did not abate until the rains had well set in. Regarding the mortality from fever, which was heavier here than in any other district, the Collector says that the long spell of dry weather caused the lands which are ordinarily covered with water to become exposed to the sun's rays, and thus helped to increase malarial vapours. Possibly also the heavy floods of the preceding year had something to do with this.

54. *Darbhanga.*—The story is the same as in Muzaffarpur, the mortality from fever being second only to that in the sister district. Here, as there and elsewhere, whatever could be done to afford aid was done, but without apparent avail. Only with change of season was the grip of either disease, cholera or fever, relaxed. From this district, as from all the other three North Gangetic districts, small-pox was practically absent.

55. The following table gives the number of deaths and the death-rate in the different municipalities. The most healthy municipalities were Dinapore and Chapra, as in the previous year, and the most unhealthy Jagdispur and Buxar:—

Statement showing the total number of deaths and the death-rate in the different municipalities during the years 1893 *and* 1894.

56. It will be remembered that the statistics in municipalities are collected by the municipal police and those for the rural areas from the reports of the chaukidars. The similarity in total results speaks much for the general improvement that has taken place of late years in this department of the work of the rural police.

V.—MATERIAL CONDITION OF THE PEOPLE.

57. As remarked last year, the material condition of the people in an agricultural country like Bihar depends from year to year upon the results of the harvests. In section 3 of this report it has been noticed that during the year under report the conditions in respect to weather and the outturn of the *bhadoi* and *rabi* crops varied considerably in the districts to the north and in those to the south of the Ganges. The rice crop, which is the chief crop of the year, was everywhere a good one; but while in the North Gangetic districts the *bhadoi* and *rabi* may be described as average crops, in the South Gangetic districts they were decidedly below the average, and in certain areas so much below it as almost to rank as failures. Although, therefore, the people were everywhere saved, by the good rice crop, from anything approaching want, their prosperity beyond this point varied considerably in degree between one district and another. I will therefore take the seven districts of the Division separately, noticing the condition of the people in each as described by the District Officers.

58. *Patna.*—The Officiating Collector, Mr. Inglis, observes that although the *bhadoi* crop suffered from excessive rain, the other two crops,* especially the rice, were good, and the general condition of the people was prosperous; and he adduces as proof of this the numerous weddings during the late marriage season and the fact that no applications were made for advances under the Land Improvement or Agricultural Loans Acts, although notices inviting them were duly published. Regarding the state of the lower orders in the City of Patna and its immediate neighbourhood, Mr. Inglis remarks as follows:—

* I think myself that Mr. Inglis takes a too favourable general view of the *rabi* crop in his district. In some places it suffered as badly as in Gaya and Shahabad.

"In the Patna City the demand for labour is sufficient, and cases of acute poverty are rarely met with among the labouring classes.

"Many of their boys find work in the opium factory. They are, moreover, frugal to a degree, choosing, it is said, to eat only one meal of suttoo in the middle of the day, in order to be able to invest their savings in jewels and ornaments. A large cultivating class live on the outskirts of the city and make a comfortable living by raising garden produce, including large quantities of potatoes, onions, garlic, cauliflowers, and other vegetables, much of which are exported to Calcutta and other parts of Lower and Western Bengal. This class are generally well-to-do, as this has little fear of loss either from drought or inundation."

59. *Gaya.*—The Collector, Mr. D. J. Macpherson, writes—"The prosperity of the mass of the people generally depends on the character of the harvests. The preceding year was on the whole a prosperous one, owing to the abundant yield of the principal harvest of the year, the winter rice. This was followed, however, by a disappointing *rabi* harvest (1893-94) and one particularly disastrous to the most industrious class in the community, on account of the failure of the poppy crop. Succeeding this, again, came a poor *bhadoi* harvest (1894), but the principal crop of the year, the winter rice, was fully up to the average; and although the subsequent *rabi* harvest (1894-95) has again been a very disappointing one, the condition of the people may, on the whole, be described as fairly prosperous and as at least up to the normal. A pretty good indication of this is the fact that marriages have been celebrated on quite as good a scale as usual."

60. *Shahabad.*—Mr. C. R. Marindin, after reviewing the state of the different crops and noticing the fact that trade, especially in food-grains, has been heavily against the district, that mahajans have shown some backwardness in lending money on mortgages of raiyats' holdings, and that the marriage season has been slacker than usual, goes on to say.—"It would appear from these indications that the purchasing power of the district was at a low ebb, and that the cultivators could not afford to spend so much money on comforts, and that while a good deal of money went out of the district to bring in food-grains, very little came in, and that the raiyats made very little money from the paying crops, such as linseed, mustard and sugarcane, on which their financial condition so much depends. It would also appear from the action of the mahajans that the raiyat's credit and the value of land were to some extent depreciated. There can be little doubt, I think, that the year has been one of difficulty to the cultivating class, and that they have only been saved from a crisis by the excellence of the winter rice crop. It is probable, too, that, apart from the bad agricultural season, all descriptions of business were injuriously affected by the very serious epidemic of fever and cholera which visited the district and caused widespread sickness and mortality among all classes, and that much of the general depression should be attributed to this cause as well as to deficient crops.

"The condition of the petty proprietors in the district seems to be steadily deteriorating. Mr. Beachcroft, in whose subdivision of Sasaram as well as Bhabhua there are large numbers of petty zamindars, points out that the steady rise in prices, accompanied as it has been for many years by only a slight rise in rent, is gradually exterminating this class. 'Marriage expenses,' he says, 'have in no way decreased, and foreclosure on mortgages for money advanced at exorbitant rates of interest are tending to bring about the same result.'

"These remarks are very true. Everything points to the gradual disappearance of the old class of petty zamindar and the transfer of their estates

to the mahajans or their absorption in the properties of the larger proprietors. That they will die hard, however, and cling to the land as long as possible, there is no doubt, and the records of the registration office show that they will mortgage their properties up to the hilt rather than sell any portion of them. Legislation on the lines recently proposed by Mr. Mohini Mohan Roy, curtailing the amount of interest on loans that can be decreed by the Courts, seems to offer them some chance of salvation, but I am afraid that unless their habit of indebtedness, and especially the custom of spending money extravagantly upon marriage ceremonies, can be reformed, it will be a very slender chance, and that for many of them reforms will have come too late."

Mr. Marindin adds that the wages of labour and the price of food-grains remaining much the same as last year, the condition of the labouring classes may be taken as normal.

61. *Saran.*—The Collector, Mr. F. A. Slack, observes: "The material condition of the people as compared with that of last year remained unchanged.

"The heavy rice crop of the preceding year saved the people from experiencing hardship owing to the poor *rabi* crop of 1893-94 and the partial loss of the maize crop during the year under report. Though the price of coarse rice was at one time very close to the famine-warning rate noted by Sir W. Hunter in the Statistical Gazetteer of this district, yet so much has the condition of the people changed for the better since that work was written that no anxiety was experienced with regard to any tract.

"The labouring classes had ample work in agricultural operations, and the numerous indigo factories, the year being a good one, to a great extent supplied them with labour."

* * * * * * *

"The Postal Department took from the treasury the following amounts in the last two years, and used the sums in discharging money orders received:—

				Rs.
April 1893 to March 1894	...	...	...	13,33,450
April 1894 to March 1895	...	...	...	16,42,900

"The people on the whole seemed for Bihar fairly well off during the year under report, but very far removed from the extremely prosperous condition of the peasantry in Eastern Bengal."

As I have often before remarked, the distinguishing economic feature of the Saran district, of all other districts in Bihar, is the extent to which the balance of trade is annually against it. The large remittances through the post office noticed by Mr. Slack are not payments for exports, but they represent a vast number of small remittances to their homes by persons in service in the army, as durwans in Calcutta, and in other more or less menial appointments in Lower Bengal and elsewhere. It is to the money brought into the district in this way, as well as to the large payments by Government to the opium cultivators and the very considerable local outlay by the numerous indigo factories, that the lower classes in Saran owe their safety from being in a chronic state of want. Mr. Slack also remarks on the large number of petty cultivators and able-bodied labourers who, as is the custom throughout North Bihar, migrate annually to the eastern districts after the rains in search of work. Roughly speaking, Mr. Slack thinks that these persons yearly bring back to their homes something like 30 lakhs of rupees. The amount thus brought into the district is, I know, very considerable, but I can scarcely believe that it can be so large as this.

62. *Champaran.*—Mr. E. G. Colvin, the Acting Collector, writes: "The material condition of the people on the whole was satisfactory. The good outturn of the successive crops, *bhadoi*, *aghani* and *rabi*, secured the people generally against deeper indebtedness, and caused a noticeable improvement in their condition at the close of the year, in spite of the suffering caused almost throughout the district by the severe cholera epidemic."

63. *Muzaffarpur.*—The Collector, Mr. Hare, observes as follows:—"The material condition of the people in this district is principally dependent upon the result of the harvests. These, as noticed in the preceding section of 'Weather and crops,' have been, taking one crop with another, favourable. On the whole the district is in a much better condition than what it was at the end of

the year 1893-94. As the Subdivisional Officer of Sitamarhi reports, the large crowds which flocked to Sitamarhi *mela* this year are a fair indication that the condition of the people is good, and they appear for the most part to be prosperous and contented. The fact that there was no illness or epidemic among such crowds of people also points to their general prosperity and healthy state. I agree with the remarks of the Subdivisional Officer. The people, so far as I have seen, seem well fed and in good condition.

"Collections of cesses have not, however, been very good, and I have heard some complaints of difficulty in collecting rents, though not universally. The fact is that the people are largely indebted, and a good season is very much discounted by the payments which have to be made to mahajans on account of former loans. Where the mahajans are first in the field, the rent collections are often not much more satisfactory in a good year than in a bad year."

64. *Darbhanga.*—Mr. Tute, the Officiating Collector, writes: "It follows that the condition of the people was on the whole better because they enjoyed better crops and were better fed than last year.

"The year was equally favourable for the landless labouring classes. They found sufficient work under the agriculturists, who being high-caste people (Brahmins, Rajputs, Kaisths, &c.), as a rule, do not cultivate their own lands, and require their services for the purpose. Ample work was also available for them on the railways and in the indigo factories.

"I agree with Mr. Williams that in spite of the pressure on the new land, and the fact that in Darbhanga the population has almost doubled itself in the last 20 years, there is no doubt that the people generally are much better off, and that, judging from their appearances, they as a rule seem in easier circumstances than they were 20 years ago. I have not seen anything like distress or poverty during my travels, and I consider the people in any ordinary year to be fairly well off, * * * * * *
and the half-starved peasantry that I knew in these parts some 20 or 22 years ago has its condition very sensibly improved. This year the people were exceptionally prosperous."

65. On the whole it may be said that in the northern districts the year has been, for the mass of the people, a more than usually prosperous one; in Patna and the greater part of Gaya, it has been at least up to the average; while in Shahabad, especially to the south and west, the people have not been so well off as usual. Saran seems, on the whole, both as regards harvests and health, to have come off best, and Shahabad worst. It will be remembered that this was also the case in the preceding year.

VI.—EMIGRATION AND IMMIGRATION.

66. The following table shows the number of emigrants registered during the last two years in the several districts of this Division:—

Name of District.	For Colonies.		Tea Districts.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
Patna ...	740	955	57	......
Gaya ...	......	......	300	409
Shahabad ...	1,072	1,917	806	820
Saran ...	209	417	......	......
Champaran ...	......	163	......	......
Muzaffarpur ...	......	......	......	......
Darbhanga ...	132	127	......	......
Total ...	2,153	3,579	1,163	1,229

There was a considerable increase in emigration to the Colonies. It was most marked in Shahabad, and is attributed to a greater demand from Natal and British Guiana than in the previous year. The increase in Saran is chiefly due to a greater influx of emigrants from the North-West Provinces and Nepal, of whom the number registered in this district was 239 against 92 only in the previous year.

67. As remarked in my last year's report, the number of registered emigrants for the tea districts does not represent the number of actual emigrants, for many persons go there under the "free emigration" system. Between 700 and 800 coolies are reported to have emigrated under this system from the district of Shahabad alone; but there is no means, as the Collector observes, of ascertaining the correct figures. There is also a system of free emigration from the Jagdispur estates, belonging to Messrs. Mylne and Company, to the grant in Burma belonging to these gentlemen, a notice of which will be found in paragraph 465 of this report.

68. The classes that principally emigrate to the Colonies are Babhans, Chamars, Dusadhs, Kahars, Kurmis, Koeris, Rajputs and Muhammadans. The Collector of Shahabad remarks :—"The increase in colonial emigration noticed above, and the free emigration which goes on among the cultivating classes, is evidence of the increasing difficulty which cultivators experience in getting enough land for their wants."

69. The Collector of Muzaffarpur, from which district there was no registered emigration during the last two years, writes:—"There is a considerable movement of the people who go out to seek work in the districts to the east and in Calcutta and elsewhere. * * They return again as soon as they have earned a sufficient sum to carry on their own cultivation. It is difficult to estimate the extent of this movement, but no less than Rs. 10,25,339-12-2 are sent in money orders to this district, and a large part of this is the proceeds of such labour."

70. The movement described by Mr. Hare is common to all of the districts of the Division, especially to those lying to the north of the Ganges, as has already been noticed in former reports.

71. There is practically no immigration into the Division. Mr. Tute writes :—"Of the immigrants into the district (Darbhanga), Marwaris and Bengalis form the most noticeable features. The former as a rule take to trade and the latter to service. The people of the district are peculiarly conservative and generally averse to trading speculations."

72. Two cases of abuse in connection with free emigration came to light during the year, in which the offenders were brought to justice. In one case, which occurred in the Patna district, a woman was persuaded to enter into a depôt at Mithapore, and was there kept for three days, besides being criminally assaulted. She managed to escape, and laid her complaint, with the result that the offender (the recruiter) was convicted and sentenced to three months' rigorous imprisonment under sections 343 and 354, Indian Penal Code, and Rs. 10 fine. In the other case, which occurred in Shahabad, a woman was brought down from Sasaram on pretence of employment by a free recruiter. When she reached Arrah she refused to go to the depôt, and on the recruiter's endeavouring to take her there forcibly, she appealed for aid to a constable, with the result that the recruiter was prosecuted and sentenced under section 341 to a month's imprisonment, which, however, was reduced on appeal to a fine of Rs. 5.

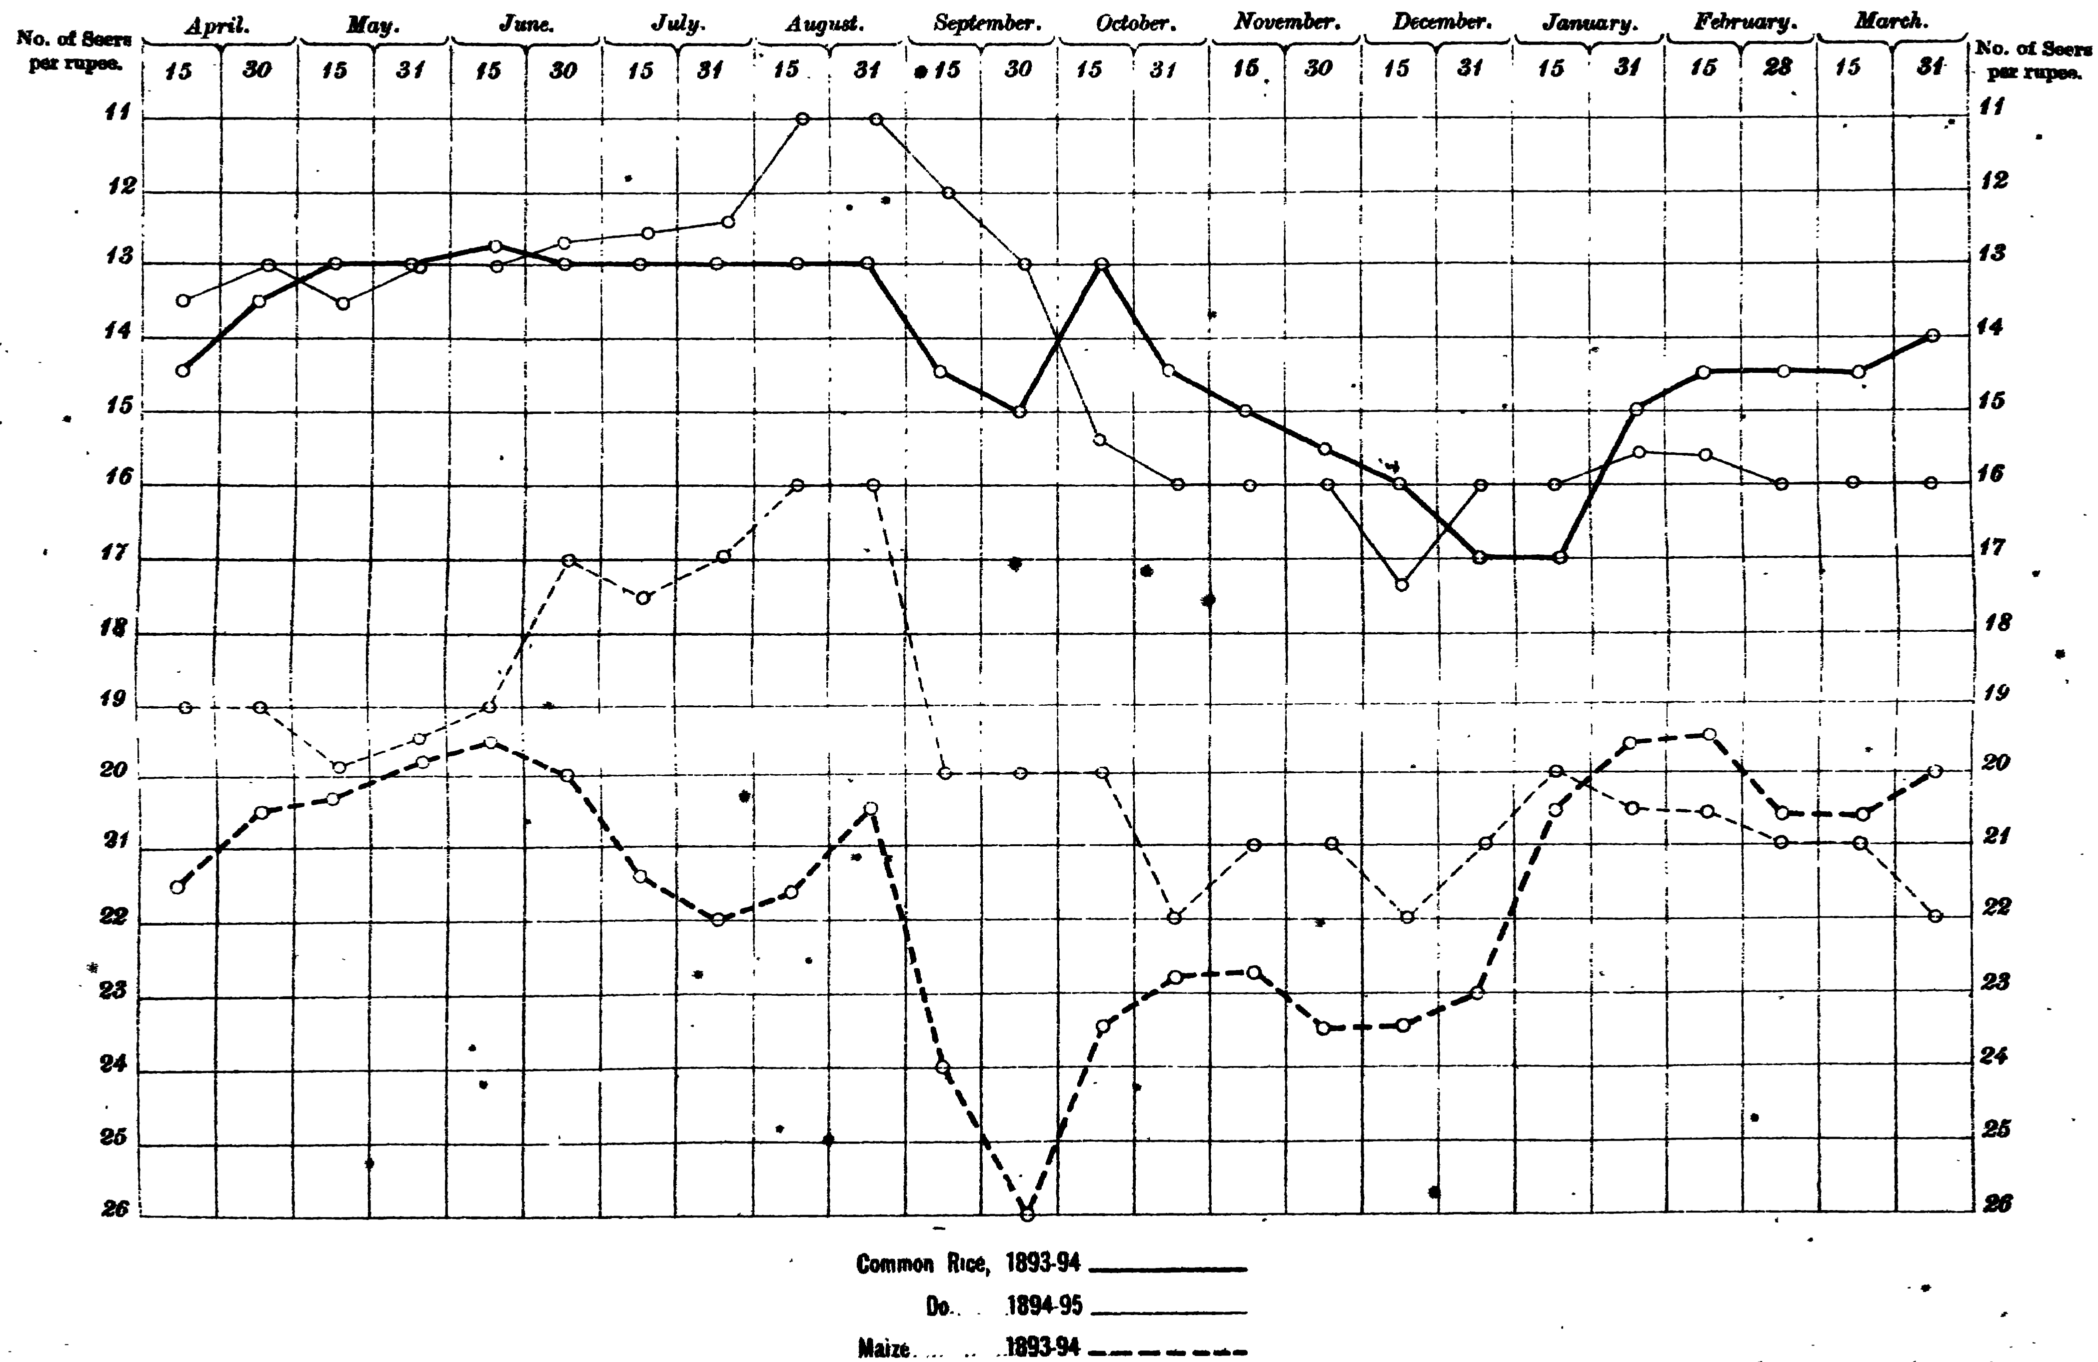
73. The coolie depôts were duly inspected by the Magistrates and other inspecting officers, and defects found were promptly removed. There was no outbreak of disease except in Shahabad, where in a sub-depôt close to Arrah four coolies were attacked with cholera, of whom two died.

VII.—PRICES OF FOOD AND LABOUR.

74. I find from an examination of the prices of the three principal food-grains at the principal marts during the last fortnight of each of the two last years that common rice rules on the average $1\frac{1}{2}$ seers per rupee cheaper than last year, while gram is about $2\frac{1}{2}$ seers dearer and wheat is about the same.

All three articles are also cheaper now than they were two and three years ago. I also find, as was noticed to be the case last year, that the prices of rice in most of the outlying marts, such as Bihar in Patna, Nawada and Aurangabad in Gaya, and Madhubani in Darbhanga, rule somewhat lower than at the nearest grain centres on the railway, thus indicating the sufficiency of the local supplies in the interior. This is not, however, the case at Bhabhua or Sasaram in the Shahabad district, where the rates for both rice and makai are at present somewhat higher than at the district head-quarters. The explanation seems to be that the effects of the excessive rain in July and August were particularly felt in the southern and western portions of the Shahabad district, and affected the outturn of the *bhadoi* and of the late *rabi* crop there more than elsewhere. This remark would equally apply to the subdivision of Buxar, but the prices there are kept on a better level by the fact of its being both on the river Ganges as well as on the line of rail.

75. The Collector of Saran has sent me a chart, which I reproduce below, showing the rise and fall in the prices of common rice and maize during the different months of the past and previous years. It may be taken as showing approximately the state of the market from month to month in the principal trade centres of Bihar. It will be seen from this chart that maize ruled higher almost throughout the year than it did in 1893-94, while in August, owing no doubt to the phenominal weather in July and August mentioned in paragraph 40 of this report, rice ran up to the price noted in the Gazette as the famine warning. Mr. Slack reports, however, that this rise caused no apprehension whatever among the people. The general improvement in their resources of late years enables them to bear a temporary tightening of the market without showing the marked anxiety of former days. The extension of the railway has also, no doubt, much to do with maintaining public confidence in this respect.



Prices of labour.

76. There has been but little variation in the rates paid for labour during the last three years.

77. *Skilled labour.*—But there is, no doubt, a tendency for skilled labour, in towns, to command a somewhat higher price than formerly. I find that in my report for 1891-92, three years ago, I noticed this, and I observe from the figures now given by some of the Collectors that among masons, carpenters, and blacksmiths the daily wage still shows the same upward tendency. The rise, no doubt, is small and gradual, ¼ anna to ½ anna (per diem) in three or four years, but it is observable all the same. This however is only what might be expected from a combination of circumstances. There is an ever-increasing demand, with our improved roads, for vehicles of a better description than formerly; the use of machinery for soorkee mills, ice machines, and in indigo factories is everywhere coming into use, and hands are required to look after it; while at every district head-quarters and at those subdivisions which have been opened out by the railway, the number of well-to-do residents is steadily increasing, and new houses of more or less architectural pretensions are quickly springing up. There is also a general and marked advance in the standard of domestic comfort among natives of the better class, and cabinet-makers are in greater request than formerly. Add to all this the fall in the purchasing power of the rupee, and the wonder is that the price of skilled labour has increased so slowly as it has done.

78. *Unskilled labour.*—The wages of unskilled labour, on the other hand, maintain from year to year much the same level, their measure usually being the minimum amount required to afford means of subsistence. As noticed before, outside of the towns, labour is usually paid in grain. Even skilled labour, that of the village artizan, is paid wholly or partly in kind, while the field labourer gets the whole of his wage—usually 3 seers a day for a man, 2¼ for a woman, and 1½ for a non-adult—in one or other of the inferior kinds of grain, such as millets or coarse unhusked rice. As before remarked, this system is particularly suited to an agricultural country like Bihar, and has the advantage of not being affected by any rise or fall in the price of food-grains. Whatever the fluctuations in the price for these in the market, the labourer's wage remains the same.

Prices of Common Rice and Maize at Chapra.

VIII.—MANUFACTURES AND MINES.

79. Besides opium and other exciseable articles, indigo and saltpetre are the principal manufactures of this division.

80. *Indigo.*—Indigo is grown in the North Gangetic districts, viz. Saran, Champaran, Muzaffarpur, and Darbhanga. The following table compares the total outturn and its estimated value during the last two years:—

Name of District.	1893-94.		1894-95.	
	Outturn in maunds.	Value.	Outturn in maunds.	Value.
1	2	3	4	5
		Rs.		Rs.
Saran	6,941	19,01,450	14,105	25,26,250
Champaran	8,841	25,26,401	26,180	65,45,000
Muzaffarpur	8,921	25,97,005	25,065	62,66,250
Darbhanga	7,513	19,45,146	19,830	49,57,500
Total ...	32,216	89,70,002	85,180	2,02,95,000

It will be seen that the outturn of indigo was specially good during the year. There was a fall in average price from Rs. 280 to Rs. 238 per maund, but the enormous increase in outturn much more than counterbalanced this. Indeed, it is a matter for congratulation that prices kept up as they did. I notice that in the last year (1892) when there was an unusually large outturn (maunds 83,600), prices fell to Rs. 181 per maund.

81. The Jagdispur concern in Shahabad manufactured 244 maunds of indigo of the value of Rs. 55,275 during the year.

82. *Saltpetre.*—Saltpetre is principally manufactured in the North Gangetic districts of Saran, Champaran, Muzaffarpur, and Darbhanga. The manufacture is under the control of the Northern India Salt Department.

83. The quantity produced in each of the above districts is given below:—

Name of District.	Saltpetre.		Salt.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Mds.	Mds.	Mds.	Mds.
Saran	41,629	49,836	5,158	5,670
Champaran	72,299	39,901	4,231	3,405
Muzaffarpur	95,711	70,329	5,061	5,611
Darbhanga	49,071	51,794	2,131	2,178
Total ...	2,58,710	2,11,860	16,576	16,864

84. No explanation of the decrease has been furnished by the Collectors of Champaran and Muzaffarpur. The Collector of Darbhanga states that the increase in his district under the head of saltpetre is explained by the Salt Superintendent to be due to the very favourable weather experienced before and after the rains, and to the greater activity displayed by refiners in consequence of exceptionally high prices. A similar explanation is given for the increase in Saran.

85. The manufacture of saltpetre is only carried on to a small extent in Gaya, where there are but three refineries. The quantity manufactured in these refineries was 4,173 maunds against 3,219 maunds in the preceding year.

86. In Shahaad there are some saltpetre refineries in the Bhabua subdivision, the outturn of which during the year under report was 4,000 maunds against 3,700 maunds in the previous year, the increase being due to favourable weather.

87. *Other manufactures.*—In last year's report I gave an account of the following principal manufactures of this Division, viz., tobacco-curing, sugar-refining, durries and blankets, brassware, bell-metal and stoneware, paper, lac and oil. In the present report, in order to avoid repetition, I will take the Division district by district, and for this purpose I cannot do better than to give the following extracts from the reports of the different Collectors:—

88. *Patna.*—Mr. Inglis writes as follows:—"The local industries carried on in the Patna City, which deserve mention, are carpet, brass utensils, lac ornaments, bangles tiklis, wooden toys, wooden combs, tin foil, silver foil, silver and gold thread, rough pottery, ornaments, palanquins and ekkas. Native embroidery is also manufactured in the city to the value of Rs. 28,000 a year.

"Soap is manufactured in Bihar. During the year under report 1,150 maunds of soap were manufactured to the value of Rs. 6,900. It is consumed locally and exported to Patna.

"Tasar or silk cloth is manufactured to a limited extent within the jurisdiction of the Futwa thana in the Barh subdivision. The business is rapidly declining, although 12 or 14 years back a large trade was carried on with Calcutta and the North-Western Provinces, and the dealers did a very lucrative business. The decline of the industry is said to be due to the competition with imported machine-made articles.

"Chamali oil of the best quality is manufactured at Barh, but it has no commercial value. Only an insignificant quantity is exported."

89. *Gaya.*—Of the different manufactures in Gaya, Mr. D. J. Macpherson gives the following interesting account:—

"The chief industries of the district of Gaya, besides the manufacture of exciseable articles, are lac, sugar-refining, tobacco-curing, cotton cloth, tasar silk, blankets, carpets, brassware, saltpetre, stoneware and mica.

"The lac industry was in a very prosperous condition during the year. There were 23 factories at work, which turned out 48,200 maunds of shell-lac valued at Rs. 29,40,200 as against 19 factories with an outturn of 15,500 maunds valued at Rs. 8,83,500 in the preceding year. The price rose to about Rs. 61 per maund from Rs. 57 in 1893 and Rs. 45 in 1892. The factories are all situated in and near Imanganj in the south of the district, bordering on the jungles of Chota Nagpur.

"Sugar-refining is a gradually declining industry, and is now carried on only on a small scale, not even sufficient for local consumption. The production of crude sugar is, however, an important industry, and large quantities of this article are exported to Bombay and up-country, but the traffic statistics show a large falling off during the year under report as compared with the two preceding years, which must be due to good produce elsewhere, as the crop in Gaya was on the whole about as good as last year.

"Tobacco-curing forms an important industry in this district, although the leaf itself has all to be imported, chiefly from Tirhut. The principal centres of manufacture are Gaya, Gurna, and Paibigha, the brand manufactured in the last-named place being held in much esteem by native connoisseurs all over India. I have seen in the town of Muzaffarpur in the heart of the district, from which the leaf mostly comes, a signboard over a shop, advertising 'Real Gaya tobacco.' The export of tobacco from the district by rail and canal was about the same as last year; and, although the importation of the raw material was much less, a large quantity has been brought in since the close of the year.

"The weaving by hand of coarse cotton cloths is still carried on to some extent, as the lower classes prefer it to imported machine-made stuff on account of its greater durability, particularly for winter clothing. The weavers have, however, largely taken to using machine-spun yarn; but the industry is in a languishing condition on account of the cheapness of imported piece-goods.

"Tasar silk is woven to some extent at Buniyadganj near Gaya, at Kadirganj near Nawada, and at Daudnagar in Aurangabad, the cocoons being got from

Chota Nagpur. The quality is poor, but pilgrims like to take some away with them. The industry is not in a flourishing condition, as it is unable to stand the competition of machine-made stuff.

"Blankets are manufactured in large quantities in this district, chiefly at Rampur and Bhadeya in the Sadar subdivision and at Amba and Chilki in Aurangabad. The industry is a thriving one, and there is a large export to Chatra in Hazaribagh and to Bengal, in addition to the local consumption. The manufacture is, however, carried on by a poor class of people, the Gareries or shepherds, who get advances from middlemen.

"Carpets and rugs of superior quality are made at Obra and Daudnagar in the Aurangabad subdivision, and command good prices, though the weavers are poor people. The industry did not thrive so well as usual during the year under report.

"Brassware and bell-metal continue to be extensively manufactured in the district, chiefly at Daudnagar and Nabinagar in Aurangabad, and Manpur near Gaya. About one-fourth is believed to be exported. Figures of Hindu deities in brass, manufactured in Gaya, are taken away in considerable quantities by pilgrims.

"Stoneware of superior durability is manufactured at the Pathalkatti hill, about 18 miles north-east of Gaya, by a colony of stone-cutters whose ancestors were brought into the district from Jaipur in Rajputana to build the Vishnupad Temple in Gaya. Though not an important industry, the articles manufactured are taken by pilgrims to all parts of India, and seem much prized."

90. *Shahabad.*—Mr. Marindin also gives a full account of the industries in his district as follows:—

"The chief manufactures of the district are sugar, paper, blanket, grindstones, pottery, brass work and country cloth.

"The manufacture of sugar is confined to the villages of Hariharganj, Nasriganj, Dumraon, Dubauli, Mahuar, Chandanpura, Nai Bazar, and Jagdispur, situated in Sasaram, Buxar, and the Arrah subdivisions.

"The total outturn of sugar during the year was 31,850 maunds against 50,310 maunds of the preceding year. The decrease is due to a partial failure of the sugarcane. The sugar refineries in Nasriganj have yielded a large profit to the refineries. It is being exported in large quantities to distant parts of the country. The value is estimated at Rs. 1,57,000 against Rs. 1,54,500 in the previous year.

"Paper was at one time made in large quantities in Hariharganj. This industry has now almost died away, as the local product cannot compete with the paper of Serampore mill. The paper made here is called Basha paper, and is exported to Benares and North-Western Provinces, and is used largely by bankers on account of its durability.

"Carpets are manufactured in the Bhabhua and Sasaram subdivisions. The industry is reported to be thriving. The carpets made at Sasaram are of superior quality and command a good sale. They are made both of cotton and wool.

"The manufacture of coarse country cloth is on the decline, due to the competition of English piece-goods. Country cloth is, however, still preferred, by those who can afford to buy it, for its durability and warmth in the cold season.

"Country blankets are woven by the shepherd caste, those made in Bhabhua being of superior texture. Wooden vessels and toys made in Sasaram and Arrah are taken to large fairs held in the district, where they command good prices.

"Lacquered pottery made at Sasaram is chiefly bought by Europeans. It consists of ordinary earthen pots and vases of various shapes painted over with lac. This industry is confined to a few individuals, and though the trade is not extensive, the small cost of production and the high prices often successfully demanded leave a good margin of profit to the producers.

"Stone-mills are made in the Sasaram subdivision, the stone being taken from quarries in the Kymore hills. A large quantity is sent annually to Patna.

"Metalling for roads is also brought in large quantities from the quarries of the Kymore range. The Public Works Department has a line of tracks running from Dhandar quarry to Dehri, a distance of 7 miles.

"Brass, copper, and bell-metal are worked by Thatheris and Kaseras into various ornaments for the feet and arms. Brassware is generally brought from Mirzapur and Benares.

"Mustard and linseed continue to be pressed in the old-fashioned Koolhoos. The model machine invented in the Alipore Jail is so far only used for jail labour. The manufacture of vegetable oils is everywhere suffering much from the competition of mineral oil."

91. *Saran.*—Besides giving an account of the indigo and saltpetre industries and of the opium crop of the year, the particulars of which have been noticed elsewhere in this report, Mr. Slack merely states that the other principal manufactures in his district are utensils of bell-metal and Siwan pottery, unrefined sugar and castor-oil. No reliable statistics appear to be available, though as regards sugar the Collector states that the cultivation is steadily increasing, as the raiyats find that the plant is not injured by temporary floods, as is the case with maize which it replaces. The Siwan castor-oil mill, which was established in 1890 and is worked by steam-power under European supervision, is still at work, but the Company are reported to be unwilling to give any information as to the extent of their transactions.

92. *Champaran.*—The Officiating Collector reports that there are no handicrafts deserving special notice in his district, the only articles of manufacture worth mentioning, besides exciseable articles, indigo and saltpetre, being sugar, the outturn of which is roughly estimated at maunds 2,500, as in the preceding year.

93. *Muzaffarpur.*—Cloth-weaving is still carried on by the Jolahas in the Hajipur subdivision. The cloth is coarse, but cheap and durable. Coarse blankets are also made, but inferior to those of Gaya and Shahabad. At Sursand, in the Sitamarhi subdivision, the manufacture of carpets is still carried on, but the industry is, it is believed, declining.

94. *Darbhanga.*—After noticing the results during the past year in regard to indigo and saltpetre, Mr. Tute writes:—

"The other manufactures carried on in this district are as follows:—

(1) Tobacco-curing.
(2) Sugar-refining.
(3) Kukti cloth.

"Tobacco is manufactured after the European method at Poosa by Messrs. Begg, Dunlop and Company. The factory turned out 746 maunds of manufactured tobacco against 530 maunds in the preceding year, and 1,628,347 cigars and cigarettes against 2,321,594 in the previous year. The decrease under the head of cigarettes and cigars is due to the manufacture of cigarettes having been discontinued during the year under review. It is reported that the industry is not a very paying one owing to shrinkage of the market.

"The manufacture of sugar is confined chiefly to the Madhubani subdivision. A refinery on the European method, opened since November 1893, noticed in the last year's report, is now in full working order with all the modern appliances of machinery. In course of my inspection of the refinery, I noticed that the sugar turned out was equal to any one could get in Calcutta, and the establishment of this factory should prove a great convenience to people living in Bihar, and also give a great incentive to the local sugar cultivation.

"The total quantity of sugar manufactured in the subdivision and its value are estimated at 44,096 maunds and Rs. 4,40,960 against 1,95,000 maunds and Rs. 19,50,000 in the preceding year. The falling off in the outturn is explained to be due to the dull state of the market. The figures are, however, considered unreliable. Fear of income-tax assessments probably prevents the dealers from giving accurate figures.

"The manufacture of kukti cloth is carried on to some extent in the Madhubani subdivision. It is made from a cotton of that name of a naturally brown colour, indigenous to the subdivision. The cloth very much resembles tasar silk both in colour and texture. The use of it is confined chiefly to the higher classes of people, especially Brahmans. The industry is, however, failing, owing to the competition of European piece-goods."

95. It will be observed from the above accounts of the manufactures in the different districts that native handicrafts have not found the same

home in the districts to the north as in those to the south of the Ganges. The reason of this, as I learn from one of the oldest and best-informed residents,* seems to be that after the murder of Alamgir II and the fall of Delhi in 1759 A.D., the members of the Muhammadan nobility attached to the Mogul Court retired to the jagirs that had been given them in the Patna, Gaya, and Shahabad districts, bringing in their train large numbers of artificers and traders of all kinds who settled down in the above three districts; while the four districts to the north of the Ganges were still in an unsettled state, sparsely populated, and only partially cultivated.

* Nawab Wilayet Ali, Khan Bahadur, C.I.E.

96. *Mines.*—The only mines in the Division are the mica mines of Singar and Supahi in the Nawada subdivision of Gaya. There is nothing to add on the subject of these mines to the information given in last year's report, except that the output appears still to be decreasing, the figures for the three last years being for 1892 maunds 800, for 1893 maunds 640, and for 1894 maunds 547.

IX.—TRADE AND COMMERCE.

97. The subjoined statement has been compiled from the statistics furnished to the District Officers by the Railway authorities, in accordance with the instructions contained in Government order No. 2Cir., dated 16th April last. It shows the "up" and "down" import and export traffic in the 22 chief articles of trade, noted in the margin, of the several districts of this Division carried by the East Indian and Bengal and North-Western Railways during the year under review.

Rail-borne trade.

1. Rice.
2. Paddy.
3. Wheat.
4. Gram and pulse.
5. Other food-grains.
6. Jute, raw.
7. Gunny-bags.

99. *Food-grains.*—It will be seen that the balance of rail-borne trade in food-grains has during the past year been very heavily against the Division as a whole. Taking all food-grains together, the imports amounted to 8,541 thousands of maunds against exports aggregating 3,789 thousands of maunds, showing a balance against the Division of 4,752 thousands of maunds. The only districts which show a balance in their favour are Gaya and Champaran to the extent of 75 thousands and 223 thousands of maunds respectively. The balance against the others is:—

Patna	...	...	608	thousands of maunds.	
Shahabad	...	...	1,118	"	"
Saran	...	...	2,725	"	"
Muzaffarpur	...	...	259	"	"
Darbhanga	...	...	340	"	"

The above unfavourable balances will be further increased by taking into account the trade with Nepal, which shows imports of food-grains during the year of over 1,613 thousands of maunds into the three northern districts, as will be seen by reference to paragraph 113 below.

100. *Oilseeds, Sugar, Tobacco.*—On the other hand, the balance of the rail-borne trade was in favour of the Division in oilseeds by 2,072 thousands of maunds, Darbhanga, Patna, Muzaffarpur being the chief exporters; in unrefined sugar by 485 thousands of maunds, chiefly from Shahabad, Gaya, Darbhanga, and Patna; and in unmanufactured tobacco to the extent of 561 thousands of maunds, most of which came from the Darbhanga, Patna, and Muzaffarpur districts.

101. *Salt, Piece-goods, Kerosine oil.*—The net importations by rail of salt into the Division were 1,537 thousands of maunds (approximately 4 seers per head of population); of cotton piece-goods 383 thousands of maunds, of which 320 were of European and 63 thousands of Indian manufacture; and of kerosine oil 232 thousands of maunds. It will be noticed that a larger quantity of salt went to Champaran than to any other district, besides practically the whole of the cotton piece-goods of Indian manufacture. This was for re-export to Nepal.

River-borne trade.

102. But it is to be remembered that besides the above rail-borne traffic, there is a heavy river-borne trade to and from the different districts by the Ganges, Gogra, Gandak, and other smaller rivers, of which we have no statistics. On this subject the following remarks by the Collector of the Patna district may be quoted:—

"A glance at the statements prepared by the East Indian Railway authorities, showing the rail-borne trade of this district, will at once discover certain marked characteristics. At the same time it must be remembered that the rail-borne trade represents but a very small part of the trade of the whole district. In the case of certain articles only can the figures be looked on as representing the total imports or exports, and these are exceedingly few in number. The reason of this is to be found in the fact that the main stream of the Ganges traverses the northern boundary of the district with the large marts of Dinapore, Bankipore, and Patna situated upon it, and the greater part of the merchandise of the district is borne upon its waters in a weekly service of steamers to and from Calcutta (there is a bi-weekly service during the busy season), and in a large number of country boats.

"To indicate the very large amount of river-borne traffic, I may note that Messrs. Ralli Brothers' Agent informs me that nearly the whole of the grain and oilseeds purchased by that firm in this city is sent to Calcutta by steamer. Thus I estimate that, while about two hundred and fifty thousands maunds of linseed are exported yearly from Patna City by rail, at least twice that quantity is exported by boat and steamer. The same remarks apply with equal truth to the export of all food-grains and oilseeds."

103. *River-borne trade between Bihar and the Nadia rivers system.*—The portion of this trade which finds its way into the returns of the Nadia rivers system is shown in the following abstract statement:—

Statement showing the exports and imports from and to the Patna Division as shown in the traffic returns of the Nadia rivers.

Total ...	56,903	2,79,956	4,212	33,021	20,471	34,820	66,331

Some figures have also been sent to me by the Collectors of Patna and Saran, taken from the returns of the Calcutta and Eastern Canals, of the trade from this Division which finds its way into those canals. The whole quantity shown is only 1,475 maunds, of which 1,100 maunds consisted of exports of unmanufactured tobacco.

104. As directed in paragraph 3 of Government order, Miscellaneous No. 3250, dated 12th September 1894, I give the following statement of the imports into Calcutta of some of the principal trade staples from the different districts of the Patna Division. The figures have been compiled from the monthly statements published in the *Calcutta Gazette* :—

Imports from the Patna Division into Calcutta from 1st April 1894 to 31st March 1895.

ENCE IMPORTED.	FOOD-GRAINS.							OILSEEDS.		SUGAR.		TOBACCO.	
	Rice and paddy.			Wheat.	Gram and pulse.	Other food-grains.	Total.	Linseed.	Mustard seed.	Refined.	Un-refined.	Un-manu-factured.	Manu-factured.
	Rice.	Paddy.	Total in rice.

tal for 1893-94 ...	1,53,831	2,093	1,55,139	76,198	5,18,963	1,90,583	9,49,820	32,86,191	6,00,616	8,718	1,46,197	12,600	20,568

It will be seen that there has been a very heavy falling off from 9½ lakhs of maunds to 3¾ lakhs of maunds in the aggregate quantity of food-grains received in Calcutta from the Patna Division as compared with the results of the previous year. In the exports of oilseeds from here to Calcutta there has also been a decrease from about 39 lakhs of maunds to about 24 lakhs; while the exports of sugar and tobacco have slightly increased. But I am not aware from where the figures in the returns published in the *Calcutta Gazette* are obtained, and I find it difficult to reconcile them with those given in paragraph 98 above. For instance, the down exports under the head of rice are shown in column 6 of the abstract in paragraph 98 to have aggregated 445 thousands of maunds, of wheat 43 thousands, of gram 312 thousands, and of other food-grains 559 thousands; while according to the present statement the imports from this Division into Calcutta were, of rice only 12½ thousands of

maunds of wheat 12 thousands, of gram $262\frac{1}{2}$ thousands, and of other food-grains 87 thousands. I do not know how to explain these large differences, except on the supposition that the bulk of the down exports shown in the abstract in paragraph 98 represent merely inter-district transactions between the districts of Bihar itself and between Bihar and other districts on the way from here to Calcutta.

105. Taking the districts individually, I note as follows:—

Patna.—The City of Patna, the Collector observes, besides being the distributing mart of the Patna district, is an important emporium of trade for the neighbouring districts of Bihar as well as for Ghazipur, Goruckpur, and Fyzabad in the North-West Provinces. The products of these districts, consisting chiefly of grains of all kinds, are brought to Patna by boat, while salt, piece-goods, kerosine oil and miscellaneous manufactured goods are exported in return. It is reported that 250 maunds of bar silver, valued at seven lakhs of rupees, were imported into Patna during the past year. a somewhat remarkable fact which points to the prosperity of the place.

The city of Patna is no doubt, as the Collector says, a very considerable centre of trade; yet it will be seen that the total trade of the district by railway is less than that of either Darbhanga, Muzaffarpur, or Saran.

106. *Gaya.*—The total rail-borne trade of Gaya is less than that of any district in the Division, excepting Champaran, though its export trade is better than that of Shahabad or Saran. As in the previous year, the principal trade routes in this district are the Patna-Gaya Railway and the Patna (Eastern Sone) canal, which serve the centre and west of the district, and also Palamau and part of Lohardaga and Hazaribagh. The trade of the east of the district goes *viâ* Bihar through Bakhtiarpur and *viâ* Shaikhpura through Lakhisarai on the East Indian Railway, and a considerable portion of the trade of the south goes by the Grand Trunk Road.

The Collector observes that the figures show a considerable increase in the importation of food-grains which is explained by the poor *bhadoi* harvest. At the same time there was also a large export of food-grains, especially of rice, which is always exported even though cheaper food-grains have to be imported. There is a large increase in the imports of sugar which the Collector thinks due to unrefined sugar or *gur* not having been included in the railway returns furnished to him last year. The tobacco imports fell off considerably, but the Collector says that a large quantity has come in since the close of the year. The importation of piece-goods was about the same as in the previous year. Salt shows an increase which is attributed to the prosperous condition of the people. The exportations of oilseeds and unrefined sugar both show a falling off due principally to poor crops.

107. *Shahabad.*—The East Indian Railway, which traverses the district, continues to afford facilities for both imports and exports, and the Grand Trunk Road, canals and other feeder roads afford easy communication with the railway. As reported last year, there is a great inter-district trade in grain, oilseed, cotton and *ghee* carried by pack-bullocks from the large mart of Garhwa in Palamau to Sasaram, whence it finds its way by canal steamer or cart to the nearest railway station.

The following figures furnished by the Collector compare the general state of trade of some of the principal articles during the past two years:—

Articles.	1893-94. Maunds.	1894-95. Maunds.
IMPORT.		
Rice ...	... 5,26,244	... 6,53,369
Piece-goods ...	... 78,235	... 58,366
Salt ...	... 226,123	... 2,24,621
Tobacco ...	... 60.585	... 35,466
Other grains ...	... 70,392	... 1,91,196
EXPORT.		
Wheat ...	... 35,094	... 11,658
Linseed ...	... 2,39,059	... 1,98,272
Sugar ...	... 2,72,208	... 3,028
Mustard ...	... 23,652	... 2,517

Among imports, rice and other grains show an increase of about $1\frac{1}{4}$ lakhs maunds

each, which contrasts significantly with the reduced exports of wheat. The slight decrease in salt is mainly due to the rise in price which is said to deter the poorer classes and the bulk of cultivators from the free use of that commodity for their cattle. The decrease in tobacco is not explained, but may possibly be due to a better local outturn, while that under the head of piece-goods is attributed to the general depression resulting from sickness and poor crops and comparatively fewer marriages.

The decrease in the exports of wheat, linseed, sugar, and mustard is due to unfavourable harvests.

Mr. Marindin reports that rice is largely imported into this district from Birbhum, Darbhanga, and Purnea, wheat and grain from Delhi, Ludhiana, and other parts of the Punjab, *ghee*, and linseed are exported to Calcutta, tobacco is imported from Muzaffarpur and Darbhanga, while sugar is exported to Agra and Cawnpore.

A considerable trade in bamboos and wood is carried on at Sasaram with Patna, Benares, and Allahabad. The value of this trade during the year is reported at Rs. 1,39,204 against Rs. 1,02,495 of the previous year.

The subjoined figures show the total canal-borne traffic of the Arrah-Dehri and Buxar-Sasaram Canals during the past two years:—

	Quantity. Maunds.	Value. Rs.
1893-94 ...	... 39,437	... 35,79,986
1894-95 ...	... 36,120	... 31,45,322

On the whole the year was not a prosperous one, from a trade point of view, to this district. It has been noticed in paragraph 98 above how seriously the balance of trade in food-grains was against it. On the other hand, it was the largest exporter of sugar of all the districts, and its exports of linseed, though less than in the previous year, were still very considerable.

108. *Saran.*—This district is, and has for many years past been, the one of all in Bihar against which we find the balance of trade heaviest. Of the 47½ lakhs of maunds deficit in the rail-borne traffic in food-grains of the Division, Saran was alone responsible for 27¼ lakhs. It imported by rail 11¾ lakhs of maunds of rice over 4 lakhs of wheat and grain, and nearly 11½ lakhs of other food-grains in excess of its exports. In other articles of country produce it also compares very badly with the other districts. It will be observed that under the heads of oilseeds, sugar, and tobacco, in each of which the balance was in favour of the Division as a whole, it was against Saran.

Looking at the trade figures, the population ought to perish offhand. Why they do not, has been explained in paragraph 61 of this report.

As already mentioned, besides the rail-borne traffic there is also a large river-borne trade at Chapra, Revelganj, and other smaller posts on the Ganges and Gogra, of which we have no statistics. The Collector roughly estimates this traffic at about one-half of that carried by the railway, and he also appears to think that it is, as regards food-grains and other country produce, chiefly export traffic.

109. *Champaran.*—The total trade by railway of this district is lowest of any in the Division. At the same time it is the only district which shows a considerable balance to the good in the matter of transactions in food-grains.* It is also, as already remarked, the largest importer of salt and of Indian cotton goods. While the other six districts imported between them 14,000 maunds of Indian piece-goods and exported 21,000 maunds, Champaran alone imported some 70,000 maunds and exported (by rail) only between 500 and 600 maunds. The Collector observes that among imports there is a noticeable increase in tobacco, which is ascribed to the fact of the local mahajans profiting by the low price in other districts to lay in larger supplies.

* This, however, is more than counterbalanced by the heavy importations from Nepal (see paragraph 113 below). Taking these into account, there is a balance against the district of about 2,18,000 maunds.

110. *Muzaffarpur.*—There was a considerable rail-borne trade, both export and import, of food-grains, resulting, as already noticed, in a net balance against the district of 2,59,000 maunds.† There was also a large export of oilseeds, the balance in favour of the district being 4,06,000 maunds, as well as of unmanufactured tobacco, with a balance to the good of 1,65,000 maunds.

† By taking into account the imports from Nepal, this will be raised to 10,67,000 maunds.

111. *Darbhanga.*—The railway returns show a considerably heavier total export trade in the case of this district than in that of any other, and an import trade only exceeded by Saran. One reason of this appears to be a mistake of the Railway authorities in including the eight marginally-noted stations on the Bengal and North-Western Railway in the Darbhanga district, whereas the first five lie, I believe, in Monghyr and the last three in Muzaffarpur. This mistake has been brought to my notice too late for me to be able to have the figures of the Darbhanga returns corrected.

1. Simuria ghat.
2. Garhara.
3. Toghra.
4. Begum Serai.
5. Barowni.
6. Dhuli.
7. Silout.
8. Janakpur road.

112. The subjoined statement prescribed by Government orders No. 2 Circular, dated 16th April 1895, shows the trade with Nepal registered at the different registering stations in the three northern districts during the year under review.

Statement showing the trade of Bengal with Nepal registered at each registering station in the districts of Champaran, Muzaffarpur, and Darbhanga, in respect of 22 articles during the year 1894-95.

113. The principal articles of import from Nepal are rice, paddy, gram, pulses, and oilseeds, while the chief articles of export to that country are cotton piece-goods, salt and sugar, besides considerable quantities of tobacco and kerosine oil. The fluctuations in the chief articles of trade will be seen from the following abstract:—

Districts.	Imports from Nepal.				Exports to Nepal.											
	Food-grains.		Oilseeds.		Cotton piece-goods.		Salt.		Sugar.		Cotton twist.		Tobacco.		Kerosine oil.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
	Mds.	Mds.	Mds.	Mds.	Rs.	Rs.	Mds.	Mds.	Mds.	Mds.		Mds.		Mds.	Mds.	Mds.
Champaran ...	3,49,158	4,41,520	66,871	80,207	12,26,446	13,87,018	6[illegible],943	77,131	15,053	19,781	Figures not available.	4,789	Figures not available.	16,327	21,926	26,403
Muzaffarpur ...	4,60,726	7,97,889	1,21,243	1,28,214	2,12,498	2,1[illegible],578	31,117	32,3[illegible]5	5,377	7,84[illegible]		1,014		8,071	1,807	3,006
Darbhanga ...	3,39,999	3,74,129	32,287	38,691	1,67,334	1,50,958	13,977	21,808	5,516	5,88[illegible]		2[illegible]0		12	1,696	1,825
Total ...	11,55,883	16,13,497	2,20,401	2,47,112	16,06,278	17,58,554	1,15,037	1,31,314	25,946	33,504		6,003		24,410	25,429	31,2[illegible]4

It will be seen that the bulk of the trade in valuable commodities, such as salt, piece-goods, kerosine oil, &c., passes through Champaran, which is on the high road to Khatmandu, while the products and the requirements of the Terai

are more equally distributed among and met from all the three districts. There has been a satisfactory increase in the export trade with Nepal during the past year in all the principal articles of commerce, notably salt and kerosine oil.* The import trade in food-grains and oilseeds also shows an increase, but this, as before observed, only makes the balance of trade against the northern districts of this Division more serious than it otherwise would have been. We can only hope that the unregistered export river-borne traffic counterbalances this.

* The value of piece-goods exported to Nepal in 1893-94 was shown in last year's report as over 80 lakhs of rupees. This was a mistake arising from the submission to this office of incorrect returns from Champaran. The figures now given are correct.

X.—ADMINISTRATIVE CHANGES.

114. The following police outposts in the several districts of this Division were abolished during the year according to the recommendations of the Police Redistribution Committee:—

DISTRICT.	Outposts abolished.
Shahabad ...	1. Neazipur. 2. Chausa. 3. Khira. 4. Dhansoi. 5. Koilwar. 6. Telanthie. 7. Noan. 8. Bhagwanpur. 9. Durguati.
Champaran ...	1. Jagapati. 2. Siswa. 3. Jalgawan.
Muzaffarpur ...	1. Geddha. 2. Janauth.
Darbhanga ...	1. Rohar.

The following outposts were converted into mere reporting centres in Gaya and Darbhanga:—

Gaya ...	1. Bodh-Gaya. 2. Gurna 3. Gobindpur. 4. Hulasganj.
Darbhanga ...	1. Harlakhi, 2. Lankehi (on the Nepal Frontier). 3. Rohar.

115. Thana Manair, in the Patna district, which was formerly within the jurisdiction of the Dinapore subdivision, was transferred to the Sadar subdivision during the year. One independent outpost was established at Rajpur in the Buxar subdivision of the Shahabad district. The independent outpost at Madhuban in Champaran was converted into a police-station. An outpost was established at Tajpur in Darbhanga. The site of the thana at Nagarbasti in the same district was removed to Warrisnagar.

116. The Gaya, Darbhanga, and Madhubani Municipal Benches were amalgamated with the Regular Bench under Government orders No. 1821J.D., dated the 9th October 1894, and No. 3992J., dated 18th September 1894.

117. A joint sub-registry office was opened at Koilwar in Shahabad from the 1st July 1894 for one year as an experimental measure.

118. As to the effect of the changes noticed in paragraph 114 above, Mr. Marindin writes:—"The immediate result of these changes, which involved alteration in thana jurisdiction and a good deal of shifting of officers, was to give some impetus to crime, and partially accounts for the increase of burglary in parts of the district." Mr. Tute writes:—"The abolition of the frontier outposts does not seem to have been a wise policy; cases of dacoity of more or less daring character not unfrequently occur in those parts."

I will ask the above two Magistrates to submit a further special report on the subject after another year's experience of the effect of the changes in question.

XI.—STATISTICAL ENQUIRIES.

119. The following are the principal subjects in connection with which statistical enquiries were made during the year:—

(1) Trade and commerce
(2) Price-lists.
(3) Crop forecasts.
(4) Births and deaths.

Trade and commerce.

There are registering stations on the trade routes leading to Nepal from the three frontier districts, Champaran, Muzaffarpur, and Darbhanga, for registration of the traffic between Nepal and these districts. The muharrirs in charge of these stations supply figures which are regularly submitted to Government by District Officers. It has been found, however, on enquiry that a considerable portion of the frontier trade in the Darbhanga district has been passing by routes not commanded by the existing traffic registoring stations, and the sanction of Government has therefore lately been obtained to the readjustment of their positions.

Price-lists.

Price lists are prepared by Deputy Collectors, assisted by Sub-Deputy Collectors and kanungos, and are published regularly in the *Calcutta Gazette*. No objection has been made to any of them.

Crop forecasts.

Forecasts of crops are prepared under detailed instructions from the Director of Agriculture, and submitted to him by District Officers. They are based on information supplied by patwaries and jeth raiyats.

Registration of births and deaths.

The registration of births and deaths is conducted by the police both in municipal and rural areas. In the municipal areas information is supplied by house-holders and residents. In rural areas the village chaukidars report to the officers in charge of police-stations the births and deaths which occur in their respective jurisdictions. The subject received proper attention during the year, and the mortality figures may, I think, be taken to be approximately correct. Mr. Slack writes—"The District and Assistant District Superintendents of Police during their periodical visits, and the Inspectors of Police when on duty in the interior, and station police officers both at the weekly chaukidari parades and in the mufassal, carefully examined and tested the reports made from time to time. As the result of the tests made, 29 chaukidars were found to be negligent of their duties in this respect. Of these, 17 were prosecuted under section 176, Indian Penal Code, and 12 warned. Of the 17 prosecuted, 16 were convicted, and the trial of one was pending at the close of the year. The total amount of fines inflicted on the 16 chaukidars amounted to Rs. 60-8, or an average of Rs. 3-12-6 per head."

Chaukidars found guilty of negligence in this respect are also similarly called to account in the other districts.

XII.—CIVIL JUSTICE.

120. There was no change in the number or description of the Civil Courts during the year.

121. The total number of original civil suits disposed of by District Judges and Subordinate Judges, including the Small Cause Court, presided over by the Subdivisional Officer of Dinapore, was 2,929 against 3,133 in 1893, there being a decrease of 204 cases in the year under report. The suits are classed below—

	1894.	1893.
Money suits	1,503	1,936
Rent suits	284	298
Title suits	1,142	899
Total ...	2,929	3,133

Of the total number, 1,305 cases were contested and 1,624 were otherwise disposed of. As in the previous year, there is a remarkable increase in title suits,

while there is a marked falling off in money suits, the reason apparently being that mortgage suits are now classified as title suits, instead of, as formerly, as money suits

122. The following figures show the variations in the different districts under each class :—

	Money suits disposed of.		Rent suits disposed of.		Title suits disposed of.	
	1894.	1893.	1894.	1893.	1894.	1893.

Saran .. Champaran ...	381	461	10	16	182	165
Muzaffarpur ... Darbhanga ...	137	168	58	142	394	231
Total ..	1,503	1,936	284	298	1,142	899

I note that in most cases no explanations have been given by the Collectors of the variations, such as they are, in the different districts, the reason apparently being that they have not been favoured with any remarks on the subject by the District Judges. On this subject the Collector of Gaya makes the following suggestion:—"I think that Government might issue instructions that Judges should furnish Collectors with statistics showing the number and aggregate value of money suits, rent suits and title suits filed, and the extent to which rent is deposited in Court, and with an explanatory note mentioning briefly the reasons for fluctuations and any points of interest affecting the administration of the district that may have come to the notice of the Civil Courts, such as disputes between particular zamindars and their tenant, extent to which rent receipts are given that fulfil the requirements of the law, and the displacement of the landed classes by money-lenders." I agree in these remarks. Statistics and notes that throw light upon the various matters referred to by Mr. Macpherson would always be of interest and useful to the District Officers.

123. The number of witnesses examined in the above cases was 9,225, of whom 1,685, or 18·2 per cent., were detained more than two days, against 21·7 per cent. in the previous year. The number of cases pending at the close of the year was 996, or 34·004 per cent., of the cases disposed of, against 1,219, or 38·9 per cent., in 1893.

124. The number of suits of each class disposed of by Munsifs during the last two years was as follows:—

	Money.	Rent.	Title.	Total.
1894 ...	9,277	21,079	6,127	36,483
1893 ...	10,274	17,907	5,613	33,794
Difference ...	— 997	+ 3,172	+ 514	+ 2,689

I regret that I can find no explanation of the large increase in rent suits in the papers before me, and I have not time now to invite explanations from the District Judges. If the suggestion made in paragraph 122 above is approved, the omission will not occur again in next year's report.

125. The subjoined statement shows the number of suits of each kind and the unit number disposed of by each Munsif in the Division—

Name of Court.	Number of cases disposed of.			Number of unit cases disposed of.
	Money suits.	Ordinary rent suits.	Title suits.

Total courts, except that of Deputy Collector=30; average per court 1,491 unit cases.

N.B.—Unit cases are got by calculating one title suit equal to three money or rent suits and to nine Small Cause Court suits.

126. On the subject of the increase in rent suits the Collector of Muzaffarpur quotes the following remarks of the Judge of Tirhut:—

"Some Munsifs for want of a better reason attribute the increase to the survey and settlement operations now in progress throughout the district of Muzaffarpur; but as suits were instituted in larger numbers in places where these had not begun, I am not disposed to think this opinion correct. Very few appeals have been preferred against decisions of the settlement authorities, a fact which appears to me to show that as a rule they recorded the actual state of affairs and in no way caused any increase in the institution of cases."

To this Mr. Hare adds:—"No doubt many disputes have been brought to a head by the survey and record of rights, but it will be invaluable in the future in settling disputes and by standing in the way of the claims which uncertainty always gives rise to."

127. The number of witnesses examined by all Munsifs' courts was 37,416, of whom 6,945, or 18·5 per cent. were detained over two days. The percentage in 1893 was 20·7. There was thus an improvement in the year under report in this respect.

128. The number of cases pending before Munsifs of all courts in the Division on the 31st December 1894 was 7,510, or 20·5 per cent., of the cases dipsosed of, against 8,380, or 24·8 per cent. on the corresponding date of the previous year.

129. The details of appeal cases for each district are given below:—

DISTRICT.	Money.	Rent.	Title.	Total of all classes.	Decisions of Lower Court confirmed.	Ratio per cent. of appeals confirmed to the number disposed of.
1	2	3	4	5	6	7
Patna	74	298	186	558	284	50·89
Gaya	31	105	167	303	183	60·39
Shahabad... ...	45	465	347	857	537	62·66
Saran	99	266	220	585	338	57 7
Tirhut, Muzaffarpur and Darbhanga.	375	1,398	779	2,552	1,413	55·36
Total ...	624	2,532	1,699	4,855	2,755	56·7
Total for 1893 ...	618	2,092	1,334	4,044	2,180	53·9

It is satisfactory to note that although there was a considerable increase in the number of appeals, there was also a substantial improvement in results, the percentage of orders confirmed having risen from 53·9 to 56·7.

130. In original civil work disposed of by District Judges, Sub-Judges and Small Cause Court Judges, Patna, as in the previous year, stands first with 810 cases. Tirhut (Muzaffarpur-*cum*-Darbhanga) comes next with 589 cases; the dual districts of Saran and Champaran stand third with 573 cases; Gaya stands fourth with 545 cases; while Shahabad stands last with only 412 cases. As regards civil cases disposed of by Munsifs, Tirhut, as in the last year, shows the largest outturn (12,073 cases). Next in order comes Saran (with Champaran) with 10,196 cases; Shahabad comes next with 7,515 cases; then Patna with 4,997 cases; while the last place is occupied by Gaya with only 1,702 cases.

In appeal cases Tirhut stands first with 2,552 cases and Shahabad stands second with 857 cases. Next comes Saran (with Champarun) with 585 cases; then comes Patna with 558 cases; while Gaya stands last with only 303 cases.

131. The Collector of Shahabad makes the following remarks under this head:—

"The deposit of rent in Court is comparatively little resorted to in this district, where raiyats who quarrel with their landlords prefer to keep their money in hand and to plead payment. The District Judge says that since the introduction of Act VIII of 1885, section 150, there has been an enormous increase in the false plea of payment."

The Acting Collector of Champaran, Mr. Fisher, makes the following remarks:—

"The number of cases of surrender increased greatly during the year. The matter was enquired into by my predecessor, who came to the conclusion this was due to the damage done to the crops by wild pigs which infest the adjoining swamps on the margin of the Dhanouti river. The Munsif, however, attributes the rise to bad feeling between Messrs. Cockell and Broncke and their tenants in the Bettiah subdivision. I think strained feelings between ticcadars and tenants may afford a more probable explanation than an increase of pigs."

I agree with Mr. Fisher in rejecting the pig theory.

132. The Collector of Darbhanga recommends the location of a Sub-Judge's Court there. I am inclined to agree with Mr. Tute. The establishment of a Sub-Judge's Court at Darbhanga would certainly be a great convenience to the public.

XIII.—CRIME.

133. The total number of offences reported in the Division was—

	1893.	1894.	Decrease.
Cognizable offences ...	34,450	33,685	—765
Non-cognizable offences ...	16,921	16,827	—94
Total ...	51,371	50,512	—859

Excluding offences against sanitary laws, the figures stand thus:—

	1893.	1894.	Variation.
Cognizable	21,756	23,214	+1,458
Non-cognizable	16,921	16,827	—94
Total ...	38,677	40,041	+1,364

The increase in the non-sanitary offences occurs in all the districts, except Patna, and is no doubt partly due to cases being better reported than formerly. But there can also be no doubt that the drought caused by the unusual holding off of the rains and the consequent prolonged lack of field-work in the middle of the year had much to do with leading the lower classes into crime.

134. The fluctuations of cognizable crime are shown in the following table:—

Class of crime.	1893. Cases reported	1893. True cases.	1894. Cases reported.	1894. True cases.	Increase or decrease of true cases.
1	2	3	4	5	6
Class I (Offences against the State, &c.) ..	655	556	535	441	—115
" II (Serious offences against the person)	896	779	955	842	+63
" III (Serious offences against person and property)	9,412	9,161	10,710	10,427	+1,266
" IV (Minor offences against the person)	230	179	237	191	+12
" V (Minor offences against the property)	7,895	6,886	8,286	7,082	+196
" VI (Other offences not specified above)	15,362	15,327	12,962	12,941	—2,386
Total ...	34,450	32,888	33,685	31,924	—964

The decrease under class I occurred in all the districts except Muzaffarpur. There was a marked decrease of rioting cases in Gaya and Shahabad, due no doubt in part to the cessation of the anti-kine-killing agitation in those districts, and especially to preventive action being freely taken under sections 106 and 107, Criminal Procedure Code.

The decrease under class II occurred principally in Gaya and Shahabad under the heads of Grievous hurt and Murder.

Burglaries.

135. There is a marked increase under class III. It occurred in the districts of Shahabad, Saran, Muzaffarpur, and Darbhanga, and was principally under the head of Burglary.

Mr. Marindin offers the following remarks in connection with the increase of this offence in his district:—"The policy of non-enquiry into burglary cases during the past few years has, I believe, had a bad effect, as it affords some encouragement to the criminal classes to hope they may commit the crime with

an increased chance of impunity, while the police, by abstaining from enquiry, lose some of their hold over the local budmashes." The increase in Saran is believed by the Magistrate to be due to better reporting—a belief in which I do not share; that in Muzaffarpur is attributed to the fact that the unusually low figures of the previous year were due to the easier prices of food; while the present Magistrate of Darbhanga thinks that the supervision over bad characters is not what it ought to be. I agree myself with the Magistrates of Muzaffarpur and Shahabad. Easier prices had much to do with the low figures in respect of burglary cases during the previous year, while I have no doubt whatever but that the system of refusing enquiry under section 157, Criminal Procedure Code, has generally been carried too far, and has had the mischievous effect pointed out by Mr. Marindin. I noticed this matter in paragraph 172 of last year's report, and I still hold to the opinion I there ventured to express. During the past year 45 per cent. of house-breaking cases were refused enquiry in Gaya, 33 per cent. in Patna, and 29 per cent. in Darbhanga. The divisional average of refusals in these cases was 31 per cent. as against 41 per cent. in 1893, but the number of such refusals is still, I think, much too high. I have gone into this matter fully in the Divisional crime report, so it is unnecessary for me to say more on the subject here.

136. The result of trials in burglary cases is especially satisfactory as compared with that of the previous year, as the following figures of persons show:—

YEAR.	Brought to trial.	Acquitted.	Convicted.	Percentage of convictions.
1	2	3	4	5
1893 ...	145	111	28	20·1
1894 ...	141	46	76	62·2

The results obtained were particularly satisfactory in Muzaffarpur, Champaran, and Gaya.

Dacoities.

137. The number of dacoity cases increased from 42 in 1893 to 52 in 1894. The increase occurs in all the districts, except Patna, Saran, and Champaran. The increase in Muzaffarpur is attributed by the Magistrate to the Maghia domes of Motihari (and Saran?) eluding the surveillance of the local police and making inroads into his district. I concur in this view. Recent enquiries by the Magistrate and District Superintendent of Saran have unearthed several large gangs of professional burglars, residents of his and of the Champaran districts, who make it their practice to commit their depredations in other districts, as far away as possible from their own homes.

Robberies.

138. There has been a marked increase in robberies, or what may more properly be called highway robberies, the true cases having risen from 33 in 1893 to 63 in 1894. The increase is shared by all the districts, except Patna, the largest increase having occurred in Shahabad. In several of the cases, especially in Gaya and Shahabad, great violence, amounting sometimes to murder, was used. I regret to say that such cases still continue, particularly in Gaya, where they are evidently the work of individual roving gangs. So also in Shahabad, where the late acquittal in appeal by the High Court of a very notorious criminal of this class was shortly followed by another robbery with outrage, evidently committed by the same man and his gang, apparently from sheer bravado. The only remedy for the executive to have recourse to under such circumstances is by taking action under section 110, Criminal Procedure Code, and this has been done in several cases in Shahabad with satisfactory results. The results in Gaya have not as yet been so successful. The outrage is generally committed on the high road by night, and the perpetrators make off in the darkness, none knows where.

139. Bad-livelihood cases decreased from 896 to 768 during the year. Saran shows the highest number and Muzaffarpur the lowest. One hundred and forty-nine, or 19·2 per cent., of the cases were tried in the village of the accused.

Bad-livelihood cases.

The average duration of these cases was highest in Patna, viz. 31 days, and lowest in Muzaffarpur, viz. 14·4.

140. There was a considerable decrease in offences against sanitation, viz. from 12,691 in 1893 to 10,469 in 1894. This is due to the action of the police in dealing with petty cases of committing nuisance having been kept within proper bounds, in accordance with the wish of His Honour the Lieutenant-Governor, as noticed in paragraph 167 of last year's report. The judicial results in prosecutions of offences against the sanitary laws were satisfactory, 94·3 per cent. of the cases returned as true having ended in convictions.

Sanitary offences.

141. The percentage of convictions in true cases enquired into by the police was 53·7 against 59·5 in 1893. The standard attained in the previous year has not therefore been maintained, but still the results were better than in any of the three years, 1890, 1891, or 1892.

142. The results in sessions cases were satisfactory, the percentage of convictions throughout the Division having been 72·6 in respect of persons and 76·9 in respect of cases, as compared with percentages of 52·9 and 71·4 respectively in the previous year. The improvement in Gaya (from 56·5 to 72·4), in Muzaffarpur (from 65·6 to 81·2), and in Darbhanga (from 55·0 to 76·4) is very marked.

Sessions cases.

143. The percentage of cases declared false to cases instituted during 1894 was 5·2 against 4·5 in 1893.

False cases.

The number of prosecutions for institution of false cases was 155 against 138 in 1893; 47 or 30·3 per cent. of the cases ended in conviction. Compensation was awarded under section 560, Criminal Procedure Code, in 145 cases against 149 in the preceding year. There can be no doubt that sufficient advantage is not yet taken by Magistrates generally of this very useful section.

144. The number of cases not enquired into by the police was 3,679 against 4,205 in 1893, of which 283 were subsequently enquired into by order of the Magistrate, leaving the net number of cases not enquired into at 3,396 against 4,042 in the previous year.

145. The subject of the Magheya Domes of Saran and Champaran was noticed in paragraph 166 of last year's report. The proper surveillance over these people presents as great difficulties as ever. In Champaran the matter was taken in hand some 12 years ago by the then Magistrate, Mr. Henry, and the people—there practically members of a wandering tribe—were brought together into three or four large settlements. Land was given them and a small special police force sanctioned to keep watch over them.* Some two years later the reclamation of the Magheya Domes of Saran was undertaken by Major Skinner, the then District Superintendent of Police, who gave much attention to the subject. It was found that in Saran—owing no doubt to the more settled and thickly populated character of the district—these Domes were not the gipsy wanderers they were in Champaran, but that in most cases they had settled down in small family groups, each of which had attached itself to some particular village. It was deemed impracticable, or at least highly undesirable, to attempt to break up these scattered groups and to bring them together into large central settlements, as had been done in Champaran; and the decision, I think, was a proper one. In the first place there were no sites available as there were in Champaran, and these would have had to be acquired at a very heavy cost to Government; in the next place, the object in view was to induce the Dome to take to a settled life, and this he had already half done for us by squatting down with his family, sometimes for several generations, in some village which he had come to regard as his "home." It was therefore considered best to recognise

The Magheya Domes in Champaran and Saran.

* There are now three of these settlements in Champaran with a total population of 218 persons and 77 bighas of land.

and perpetuate these small scattered settlements, some 60 in number; to obtain small grants of land, on payment of rent in kind, at each place from the local zamindars, for cultivation by the Domes; and to appoint a special force of police to keep watch over the settlements and to see that the Domes paid proper attention to the cultivation of their lands. These proposals were approved by Government, and, thanks to the energy of Major Skinner, this programme was carried out and it is still the system in force in Saran.*

* There are now 62 of these settlements in Saran, containing a population of 1,080 persons including women and children. They have in all 450½ bighas of land. A special police force of 2 head constables and 22 constables looks after them.

146. The endeavours thus made to wean these people from their predatory habits and to induce them to take to cultivation have not hitherto met with much success, but I think that we may still have hopes of influencing the next generation. All that has been done is, at any rate, so much to the good, and there can be no doubt but that the condition of these people and the control exercised over them are a great improvement on the state of things that formerly prevailed. The Government has lately, at my request, sanctioned the employment of a special 4th grade Inspector to supervise this particular branch of the police work in Saran, and also the annual grant of Rs. 1,000 for the up-keep of the Domes' houses, purchase of cattle, &c., and rewards to the best cultivators.

XIV.—POLICE.

RURAL POLICE.

147. The following statement shows the number of villages and chaukidars (*a*) under the old Regulations and (*b*) under Act VI of 1870 on the 1st January in each of the two last years in each district:—

Name of District.	On 1st January 1894.				On 1st January 1895.			
	Under the old Regulations.		Under Act VI.		Under the old Regulations.		Under Act VI.	
	Number of villages.	Number of chaukidars.	Number of villages.	Number of chaukidars.	Number of villages.	Number of chaukidars.	Number of villages.	Number of chaukidars.
1	2	3	4	5	6	7	8	9
Patna	1,338	860	1,791	2,324	1,180	747	1,889	2,419
Gaya	4,066	3,613	2,883	2,860	3,708	3,161	3,362	3,242
Shahabad	362	309	5,137	3,703	352	295	5,284	3,727
Saran	544	565	3,600	4,188	30	34	4,204	4,487
Champaran ...	491	397	1,554	2,059	427	354	1,618	2,111
Muzaffarpur ...	752	789	3,348	3,894	681	649	3,419	4,023
Darbhanga ...	313	309	2,528	3,719	245	241	2,571	4,014
Total ...	7,866	6,782	20,931	22,737	6,623	5,481	2,2347	24,033

There has thus been an advance made in all the districts, especially in Saran, in introducing the new system. Generally, where this has not yet been done, there is some obstacle in the way, such as the smallness of the village concerned and its inability to pay a money wage in place of the *jagir* which its chaukidar at present holds as the recompense for his services.

148. I may here say that I regard the provision of the Act by which these transformed chaukidars are deprived of their *jagirs* as a very unwise piece of modern legislation. Theoretically, the village panchayat should assess

the landlord, to whom the *jagir* is transferred, with one-half of its letting value. In practice nothing of the sort is done, the provisions for the recovery of the amount being much too complicated; and the ultimate resort, viz. the village panchayat putting the zamindar into the Civil Court for its recovery, is a spectacle which I think has never yet been witnessed. In effect, the landlord grabs the holding, and the villagers and chaukidar are left out in the cold. There seems to me no reason why such a transfer should ever have been required to be made. The theory seems to have been that the zamindar was entitled of old to a share in the services of the chaukidar. It is to be regretted that public interests were allowed to be sacrificed to a sentimental theory of the kind.

149. It will be observed that Gaya is the only district where the number of old Regulation chaukidars is still at all formidable. The reason of this, as explained in last year's report, is the prevalence there of the *bhaoli* system of rent, one of the incidents of which is the payment to the chaukidar of certain harvest allowances in lieu of salary. Care should be taken in that district not to push the change of system too far.

Payment of salaries.

150. In most of the districts, the exceptions being Gaya and Shahabad, there has been some improvement in the matter of the punctual payment of the chaukidars. I hope that the system in force in the 24-Parganas and Saran, which has now been introduced in its entirety into most of the districts, will materially improve matters in this respect in future. I am unable to give figures here showing the number of defaults at the end of last year, as they have not been supplied to me from all the districts.

Reward system.

151. In paragraph 182 of last year's report the attention of District Officers was called to the desirability of making freer use of the Reward Fund as a means of encouraging good work among the chaukidars.

The following statement compares the results of the two past years:—

Statement showing rewards granted to Chaukidars during 1893 and 1894.

	1893.				1894.				1893.		1894.	
	Judicially.		Departmentally.		Judicially.		Departmentally.		Total.		Total.	
	Number of chaukidars.	Amount.	No.	Amount.	No.	Amount.	No.	Amount.	No.	Amount.	No.	Amount.
1	2	3	4	5	6	7	8	9	10	11	12	13
		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.
Patna	6	*	33	*	6	*	62	*	39	259 0 0	68	186 8 0
Gaya	*	*	*	*	*	*	*	*	54	234 8 0	75	229 0 0
Shahabad	6	31 0 0	20	106 0 0	3	16 0 0	20	116 0 0	26	137 0 0	23	132 0 0
Saran	14	*	59	*	10	*	67	*	53	233 0 0	67	251 8 0
Champaran	46	222 10 0	48	217 0 0	22	93 0 0	115	340 0 0	94	439 10 0	137	433 0 0
Muzaffarpur ...	16	96 0 0	63	100 0 0	1	5 0 0	51	211 8 0	49	186 0 0	52	216 8 0
Darbhanga	12	*	2	*	15	138 8 0	25	170 0 9	14	115 8 0	40	299 8 0
Total ...	*	*	*	*	*	*	*	*	329	1,614 10 0	462	1,748 0 0

* Separate figures not supplied.

It will be seen that in Champaran better use has been made of the Reward Fund during both of the two last years than in any other district. In all the others there is much room for improvement in this respect, especially in Shahabad.

TOWN POLICE.

152. In Patna City the Erskine's round system has continued to work well, and was introduced with success by Mr. Godfrey Faussett in a portion of the town of Gaya. It was also introduced in the town of Darbhanga from 1st April 1894, but does not appear to have been very efficiently supervised there. It is also in force in Muzaffarpur, but the Magistrate has not mentioned how it has worked.

The Erskine patrol system.

153. The distribution of the duties of town police between the constabulary and chaukidars in the different districts was noticed in paragraphs 184 to 190 of last year's report. The only change since made has been the addition of 17 chaukidars to the force in Champaran. It is the general opinion among the Magistrates, in which I concur, that the substitution of chaukidars for constables in the towns where the latter are still employed should not be carried further. In the end there is not very much difference in cost, and the saving, such as it is, does not, I think, make up for the difference in the quality of the work.

154. The seven bodies of additional police mentioned in paragraph 496 of last year's report as having been quartered in various places in the district of Gaya on account of the anti-kine-killing disturbances there in 1893, and the large body of such police appointed for the same reason in the neighbourhood of Koath in the Shahabad district, were all removed after the *Bakr-Id* of 1894 had passed quietly.

Additional Police.

But another small force of four constables and one head constable had to be quartered for three months on three villages called Bilahi, Balia and Chagwa, in the subdivision of Siwan, zilla Saran, owing to a dispute there of a similar nature. It is satisfactory to find that in the part of each district where resort has been had to this measure, there have been no further disturbances.

155. The provisions of section 17 of the Police Act were made use of in most of the districts during the *Bakr-Id* of 1894 and again during the current year to appoint persons of local influence as special constables in places where feeling ran high. Care was always taken that the persons selected should not be subjected to any unnecessary harassment or called upon to perform unnecessary and irksome duties; and they were made thoroughly to understand the object of the measure, viz., (1) to impose upon them direct responsibility in the matter of preserving peace and order, and (2) to strengthen their hands in doing so. Made use of in this way in a judicious and considerate manner, this provision of law is often of very effective value.

Special constables.

156. As regards the conduct of the police force generally, the opinions of District Officers vary. Much fault is found by some Magistrates with the low standard of detective ability amongst investigating officers, with the want of industry and honesty of most of them, and with the general corruption and inefficiency amongst the lower grades; and the public and the press are always ready to join in the cry. There is no doubt much truth in these complaints, but at the same time allowance must be made for the materials we have to work with. The police are taken from the people and are what the people make them, and our efforts to improve them are always being countermined by the low morality of the mass of the people themselves, amongst whom they live and move. But there can be no question but that by discipline and strict and constant supervision we have done a great deal of late years to improve generally the work and *morale* of our police; and nobody can deny that a great advance has been made in both these respects since the old "Darogah" days. I often think it a significant fact, when I hear the police abused, that any proposal to abolish a police-station or outpost is invariably strongly objected to by the inhabitants of the locality; while numerously-signed petitions for the establishment of new posts are probably within the experience of every District Officer.

General conduct of the police.

157. In respect of court duties and investigation into and suppression of ordinary crime, the work of the police during the past year appears to have been fully up to its usual standard Indeed, the results in sessions cases, noticed in paragraph 142 of this report, give indication of an improvement in this department of the work. At the same time their executive duties in connection with the passage of reliefs through the Division and the tension of feeling

between Hindus and Muhammadans have been performed in a thoroughly satisfactory manner, and I see no reason to modify the opinion in this respect that I recorded in last year's report.

XV.—CRIMINAL JUSTICE.

(i) WORKING OF THE STIPENDIARY MAGISTRATES AND SESSIONS COURTS.

158. The following table shows the number of cases disposed of by Stipendiary Magistrates, witnesses examined and detained over two days, and remands of six times and more in Police A form cases:—

Cases before Stipendiary Magistrates (excluding cases under class VI) during the calendar year 1894.

DISTRICT.	Subdivision.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeal to total appeals.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 11 to column 10.

	GRAND TOTAL FOR 1894 INCLUDING CLASS VI CASES.	73½	18,433	27,499	60·5	75,173	3·7	80·7	5,485	218	251·6	4·07	3·9
	GRAND TOTAL FOR 1893.	73½	18,949	28,774	58·9	76,285	4·1	78·7	5,819	245	254·3	4·02	4·2

The above statement is in the same form as that given in paragraph 194 of last year's report, but while that statement included class VI cases, the present one does not do so in accordance with the orders in Government order No. 3250, dated 12th September 1894. For purposes of comparison, however, with last year's results, as well as with the results in cases before the Honorary Magistrates and Benches (see paragraph 174 below), I have had entered at the foot of the statement the total figures inclusive of class VI. cases, and on these latter figures the following remarks are based.

159. Thus 73 Stipendiary Magistrates disposed of 18,433 cases, or an average of 251 cases against 254 in 1893.

As in previous years, the Dinapore Court shows the largest average per officer, viz. 1,162 cases. From the fact that only 686 witnesses were examined,

it is evident that most of the cases were petty nuisance cases in which no formal evidence was taken. The smallest number of cases decided was, as in the previous year, at Patna Sadar (Bankipore).

160. The average number of witnesses examined in each case was four, and only in three places more than 10 per cent. of the witnesses were detained for over two days, viz., Nawada (32·8), Darbhanga Sadar (11·07), and Samastipur (12·9). The high ratio at Nawada is explained to be due to the illness of the Subdivisional Officer, and to cases having to be reheard on his taking leave. No explanation has been given of the bad results at Darbhanga and Samastipur, but I observe from paragraph 8 of the Government Resolution on the Jail Administration for the past year that Darbhanga also shows particularly badly in the matter of long detentions in *hajat*. I have asked the present Magistrate to look into this matter and to favour me with a special report. It is very evident that supervision in criminal matters has been unusually lax there, owing no doubt in a great measure to frequent changes in the post of District Officer.

161. The largest number of remands for six times or more in A form cases also occurred at Darbhanga Sadar, where this happened in 30 out of 188 cases, or in nearly 16 per cent. of cases tried. Next comes Patna Sadar with 17 cases out of 167, or in 10 per cent. of cases tried; Dinapore, 8 cases out of 79; Buxar, Jahanabad, and Madhubani, with 13, 10, and 13 out of 170, 133, and 176, or in 7 per cent. of cases tried. The smallest percentages of such remands were at Bettiah, Motihari, Gopalganj, Siwan, Sasaram, Gaya, Patna City; also at Bhabhua, where, as in last year, there was not a single instance of the kind.

162. It will be observed that the total figures for the two last years do not present any striking variations. The number of Magistrates was the same in each year, with a slight falling off—some 3 per cent.—in the number of cases and persons tried. In results, however, there was, on the whole, a distinct all-round improvement. Thus the increase in the percentage of convictions (from 58·9 to 60·3) indicates greater care in conducting the preliminary examinations of complaints under section 200, Criminal Procedure Code, and in not allowing frivolous charges to be brought to trial. The percentage of witnesses detained over two days also fell from 4·1 to 3·7, while the percentage of orders upheld in appeal rose from 78·7 to 80·7. Again, in trials of Police A forms the percentage of cases which were remanded six times or more fell from 4·2 to 3·9. These results, though, as remarked above, they present no very striking contrasts, are yet all in the right direction.

163. I have been often struck, during inspections and whilst examining returns, with the very unequal results in different districts, and especially before different Magistrates, in the matter of convictions. In regard to cases which, under the law, are compoundable or dismissable in default, a Magistrate's hands are tied, and he cannot be held responsible if, in cases of the kind, his returns show a somewhat heavy percentage of acquittals or discharges. But in other cases, where the accused is acquitted or discharged only *after hearing evidence*, a heavy percentage of acquittals may usually be taken as an indication that complaints have, in the first instance, been too readily admitted, and without a sufficiently strict examination of the complainants under section 200, Criminal Procedure Code.

164. It also not unfrequently happens that one Deputy Magistrate's file becomes congested, and the entry "no time" finds frequent place on the order sheet; while the Magistrate sitting in the next Court has, for the time being, little to do.

165. I think that the above results are generally traceable to a lazy system frequently in vogue, under which the Magistrate who receives complaints distributes them to subordinate courts without more ado, without regard to the state of the different files, and leaving the subordinate officers to examine the complainants themselves and to decide whether the cases should be taken up, or summarily thrown out, under section 203.

166. But however well the first examination under section 200 may be conducted, still it may, and often does, happen that out of a batch of cases made over to a particular Magistrate or Bench, several of them turn out, on the day fixed for hearing, to be cases of a heavy nature, and remands are necessi-

tated; or they may all be compromised or dismissed in default, in which case the Court sits idle.

167. In order to properly regulate the work of the different courts in respect of the above matters, I have lately introduced the following system in the districts of this Division. It has been strictly laid down that the Joint Magistrate (or, in his absence, the most experienced Deputy Magistrate) receives petitions and sifts them in the first instance himself by examining the complainant under section 200, Criminal Procedure Code,* and determines whether each case is to be taken up or not. If he decides that the case should be proceeded with, he fixes the date of first hearing and issues the necessary processes. On the date fixed he passes orders admitting compromises, dismissing in default, &c., and he then makes over only *cases ready for trial*, with complainants and witnesses present, to the Bench or other subordinate courts. He has laid before him, on each day, immediately the courts open, a statement showing the part-heard cases with the number of witnesses in attendance before each court, and he can thus lay his finger on the courts to which the new cases ready for trial can be safely referred without fear of any file becoming congested or of any case having to be remanded for want of time. This system, which was introduced during the last quarter of the year, has been approved by all the District Officers, and if it is carried out efficiently I look for good results during the current calendar year.

* I have allowed in one district this examination to be recorded by one or other Subordinate Magistrate when the Senior Magistrate was overworked. But the examination is required to be a sifting one, and the case is then returned to the senior Magistrate, who decides whether it is to be proceeded with or not, and deals with it as described in the text.

168. I wish to add a few remarks here on the question of giving certain Deputy Magistrates at Sadar stations "territorial jurisdiction" over particular thanas, as well as on the system of relegating certain Deputies only to revenue work and certain others only to criminal duties. The "territorial" system is certainly not suited to any of the Bihar districts, and I cannot understand how it can be suited to any district where work is heavy and the District Officer is pushed hard to make the best and full use of the whole of his staff. The result of such a system, it seems to me, must be that we shall frequently find experienced Magistrates wasting their time over petty cases which could equally well have been tried by 3rd class Deputies or by Sub-Deputies; while, on the other hand, an inexperienced Subordinate Magistrate will not unfrequently find on his thana file important cases beyond his capacity. He may think himself capable of trying such a case, and, disliking to admit the contrary, may take it up and make a mess of it, and give rise to complications.

169. The fact is that the District Officer must be left to make the best use he can of the staff allowed him. At one end of the chain he has the Joint-Magistrate, or, if he has no Joint, one of his most experienced Deputy Magistrates to hear police reports (if the District Magistrate is on tour or unable from stress of work to do so himself), to receive and test criminal petitions and distribute them for hearing; and at the other end of the chain he has the Excise-*cum*-Income-tax Deputy Collector, the Butwara Deputy Collector, and the Treasury Officer, to whom criminal cases are not, as a rule, made over. Intermediately he has a staff of Deputies in charge of the Road Cess, Land Registration, Land Acquisition, Stamp, Certificate, Nizarat and minor Revenue Departments. I differ entirely with the view that certain of these officers should be employed only on criminal work and certain others only on Revenue duties. They must all be made use of for either work, as the state of their files permits. The system of giving three or four Revenue Departments to Deputy A. in order to free Deputy B for nothing but criminal work, does not commend itself to me. Work, especially Criminal work, comes in fits and starts; and though A's work under such an arrangement might be fairly regular, B's will certainly not be so. It will generally, I think, be found a much better arrangement to give both A and B a fair share of revenue duties, and to fill up their spare time with criminal cases. In this way, and only in this way, can the District Officer be certain of getting a full share of work from each and every officer, and that suitable cases are made over to the suitable men.

170. The chief advantages, to my mind, of giving all the Deputies in the general line both Revenue and Criminal work so far as can be arranged are, *first*, that which I have already mentioned, viz. that the District Officer is then in the

best position to make full use, as work ebbs and flows, of his whole staff; and, *secondly*, and particularly, that the general education of Deputies is far better advanced in this way than if they are each kept to one particular groove. A Deputy who can be utilised equally for either criminal or revenue duties, who is broken both to saddle and harness, must be a more useful officer to Government than one who has a knowledge of only certain particular subjects; and this I consider, having regard to the frequent changes and transfers necessary in so large a service, a matter of no small importance; and it is a matter in regard to which I know that the Deputy Magistrate-Collectors as a body, looking at it from the point of view of their own interests, hold the same opinion as I do.

171. A necessary corollary to this is that the confinement of the Excise-*cum*-Income-tax Deputy Collector to only revenue work is not a judicious measure. There seems no reason why, during his tours in the interior, he should not be made of use in inquiring into *badmashi* cases, doing chaukidari work, and in other criminal duties. Such use of him would be particularly advantageous in the Sadar subdivision, where, as has been already pointed out by several officers, the need is often felt of an executive officer of the kind available for general camp duties. There can be no question but that the Excise Deputies themselves would be only too glad to be given mixed work of this description. Their complaint everywhere is that, under the present system, they have no chance of gaining any experience of work in the general line to which they all hope some day to revert. And I think that it will almost invariably be found, if enquiry be made, that they have plenty of spare time, during 10 months out of the 12,* for the extra duties I propose to give them. I doubt if there are more than three or four districts in Bengal where the Excise Deputy Collector is not quite the lightest worked gazetted officer on the whole of the Collector's staff.

* Viz., when excise settlements are not going on.

172. The result of trial in the Sessions Courts is given below:—

	Districts.							Divisional figures.
	Patna.	Gaya	Shahabad.	Saran.	Champaran.	Muzaffarpur.	Darbhanga.	
1	2	3	4	5	6	7	8	9
Number of cases committed during the year.	58	45	51	45	50	35	42	326
Number disposed of ...	50	42	54	41	50	35	43	315
Number in which conviction obtained.	33	28	37	28	45	29	27	227
Of above in which sentence was modified or reversed by High Court.	...	...	4	5	2	4	2	17
Number of cases acquitted by Sessions Judge.	17	14	17	13	5	6	16	88
Percentage of convictions to cases disposed of for 1894.	66·0	66·6	68·5	68·2	90·0	82·85	62·7	72·06
Percentage of convictions to cases disposed of for 1893.	72·5	64·0	84·1	68·1	76·5	65·2	52·2	70·5

The percentage of convictions for the whole Division was 72 against 70·5 in the preceding year. The results were best in Champaran and Muzaffarpur and worst in Darbhanga, but the Magistrate explains that in two cases committed by the Subdivisional Officer of Madhubani, in which only two persons were charged, the Sessions Judge split them up into seven cases, and as the accused were acquitted on all of the charges, the percentage of acquittals was thus abnormally swelled. If it had not been for these cases, the percentage of convictions would have been 71 instead of 62.

173. The fines imposed and realised in criminal cases are shown below:—

	Districts.							
	Patna.	Gaya.	Shahabad.	Saran.	Champaran.	Muzaffarpur.	Darbhanga.	Divisional Total.
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Balance of fines due at the commencement of the year.	14,481 14 1	16,618 10 7	10,310 12 10	13,744 1 9	13,033 2 3	10,564 13 1	8,278 0 0	87,031 6 7
Amount imposed during the year.	23,818 4 6	24,237 2 0	18,630 5 5	19,163 8 3	15,062 10 3	23,496 7 6	12,940 0 0	1,37,356 5 6
Amount collected during the year.	16,281 12 10	17,345 13 6	14,410 0 6	16,713 8 10	10,949 0 3	15,259 14 0	8,576 0 0	99,536 10 11
Amount remitted or written off.	3,790 1 3	5,736 9 0	6,810 11 11	3,682 2 0	4,591 1 6	5,588 6 6	3,655 0 0	33,854 0 2
Balance of fines pending at the end of the year.	18,252 1 6	17,773 6 1	7,720 5 5	12,510 15 2	12,555 1 9	13,213 0 1	8,990 0 0	91,020 14 0

There is a falling off in the amount both of fines imposed and of fines collected as compared with the figures of the preceding year, and the outstanding balance has increased in all the districts, except Shahabad and Saran. The introduction of the new High Court Register (A1) of outstanding fines will possibly have some effect in bringing cases of the kind more prominently to notice, and so lead to better realisations; but I apprehend that the bulk of the outstanding arrears will on enquiry be found to be irrecoverable. The real fact is that there is not unfrequently considerable want of discrimination in the matter of imposing fines, especially among junior Deputy Magistrates. Thus I not unfrequently find unreasonably heavy fines imposed on low-caste labourers or petty cultivators—fines which cannot possibly be realised except by driblets and with an amount of attendant hardship altogether disproportionate to the offender's deserts. In the second place the term of imprisonment awarded in default is frequently so light that the person fined prefers to undergo it and to run the chance of eventually evading payment of the fine. The principle followed should be to award such a term of imprisonment in default as will prove effective in inducing the person fined to pay the fine in preference to undergoing the sentence of imprisonment. If the first principle be carefully observed there will be no hardship in this.

(*ii*) The Working of the Honorary Magistrates and Benches.

174. The work of Honorary Magistrates and Benches is shown in the following statement:—

District.	Subdivision.	Number of Courts.	Cases disposed of.	Persons disposed of.	Ratio per cent. of person convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeal to total appeals.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 11 to column 10.

It will be observed that the work of the Honorary Magistracy does not give the same indications of steady improvement as in the case of the Stipendiary Magistrates. On the contrary, there is a slight falling off in the matter of detention of witnesses, remands in A form cases and in results of appeals. On all these points the comparison is in favour of the salaried officers of Government.

175. The worst outturn of work was before the Champaran (Sadar) Bench, where of 189 persons accused only 8·4 per cent. were convicted. The inference is that a large number of charges were admitted which ought never to have been taken up, or that the enquiries were very carelessly conducted. The Aurangabad, Siwan, Nawada, and Sitamarhi Benches also show badly in this respect. As regards detentions of witnesses, the Samastipur Bench, and after it the Chapra and the Motihari Benches, exhibit the worst results.

176. The following statement compares the number of Honorary Magistrates' Benches and Honorary Magistrates sitting singly in the different districts on the 31st December in each of the two last years:—

District.	Number of Benches		Number of Honorary Magistrates		Number of Honorary Magistrates sitting singly	
	On 31st December 1893.	On 31st December 1894.	On 31st December 1893.	On 31st December 1894.	On 31st December 1893.	On 31st December 1894.
1	2	3	4	5	6	7
Patna	7	7	1	61	15	19
Gaya	6	5	7	45	1	1
Shahabad	7	7	8	55	4	4
Saran	4	4	2	28	......	......
Champaran	2	2	1	14	......	......
Muzaffarpur	4	4	4.	42	......	2
Darbhanga	6	4	73	46	......	......
Total ...	36	33	317	291	20	26

The total number of Benches thus shows a decrease of three as compared with the previous year, viz., one in Gaya and two in Darbhanga. This is due to the amalgamation of the Municipal Benches of Gaya, Darbhanga, and Madhubani with the regular Benches at those place The large decrease in the number of Honorary Magistrates in Darbhanga is also due to the same cause. The increase of six Honorary Magistrates in Saran is owing to the appointment of additional Honorary Magistrates to sengthen the Siwan and Gopalganj Benches during the year.

177. I give below an *epitome* of the reports on the working of the Benches in the different districts:—

Patna.—With the exception of the Khagoul and Barh Benches, where absentees were numerous, the system continued to work, on the whole, fairly well. At the Patna and the Bihar Benches, the attendance was good, and a considerable amount of business was disposed of. The Bench which on the whole did best is the Jhowganj Bench in the Patna City, and I consider that the result is chiefly due to the industry and interest taken in his work by the President, Syed Sarfraz Husein Khan. The number (seven) and powers of the Benches remained unchanged, but several additional Honorary Magistrates were authorised to sit singly with second class powers.

Gaya.—The Magistrate, Mr. Macpherson, mentions with approval the assistance rendered by Mr. Halim, Babu Ram Lal Aginwar, and several other members of the Gaya (Sadar) Bench, and by Babus Ayodhya Prasad and Rajendra Prasad of the Tikari and Daudnagar Benches. Mr. Macpherson observes as follows:—"Generally speaking, there has been a deterioration in attendance, particularly in the extent to which Honorary Magistrates absented themselves without leave or notice. * * * *

"With reference to the views expressed by the Commissioner on the employment of Honorary Magistrates, contained in paragraphs 459-62 of his General Administration Report for 1893-94, I can do nothing more than to invite attention to the remarks quoted in paragraph 448 from my own report, showing the result of an attempt made by me to give more important cases to the Bench at Gaya in accordance with the views previously expressed by him. I have noticed that where such cases have been made over to the Bench, the result has been a great waste of time and energy in the recording of the most minute and frivolous details brought out in elaborate cross-examination of the witnesses. The Gaya Sadar Bench, however, merits much commendation for the very substantial assistance it has been in the disposal of public business."

Shahabad.—Mr. Marindin reports that, with the exception of the Buxar Bench, where dissensions among the Honorary Magistrates interfered much with their usefulness, the Benches have on the whole worked well. The services of the Honorary Magistrates have also been utilised in making enquiries under section 202, Criminal Procedure Code, prior to the issue of process. The cases ordinarily made over to the Benches are nuisance cases, assaults, criminal trespass, mischief and other minor cases under the Penal Code. Mr. Marindin continues as follows:—"The Benches are certainly useful in relieving the Stipendiary Magistrates of a number of petty cases, and they do a substantial amount of work in this way. The orders issued last year to employ Honorray Magistrates on more interesting cases have not been overlooked, but the average capacity of the Benches in this district is not high enough to make it safe to entrust them with more important cases than they get, and I think most of the Honorary Magistrates would prefer to be left, as now, to deal with cases of minor importance, than to have the responsibility of deciding graver issues. It is the dignity of the position which renders it valuable in their eyes rather than the work which it entails."

Saran.—During the year a new Bench with third class powers was established at Gopalganj, so that at the close of the year there were four Benches with 28 Honorary Magistrates. Mr. Slack makes the following remarks:—"The attendance of the Honorary Magistrates for all the Benches, on the whole, was fair; but in several instances the cases at the Chapra Bench had to be postponed for want of a quorum, and I regret that the European Honorary Magistrates set a very bad example as regards punctuality and omitting to give previous notice of inability to attend. I have, however, prepared a roster based so as to suit the convenience of each Honorary Magistrate, and probably the result will be more satisfactory. During the year 1895 no case will be made over to the Bench for trial till it is ripe for hearing. To avoid delay as much as possible, I have arranged that when a quorum is not present, one of the second class power Stipendiary Magistrates is with the Honorary Magistrates present to sit as a Bench and take up the cases in the file, and I have also arranged that the Bench shall always have a fixed court-room at their disposal."

This last is an important point to which sufficient attention is not perhaps always paid.

Champaran.—There were two Benches of Honorary Magistrates in this district during the year, one at Motihari and one at Bettiah, the number of Honorary Magistrates attached to each Bench being seven. The Bench at Motihari was presided over by the special Sub-Registrar and exercised second class powers; that at Bettiah was presided over by the Rural Sub-Registrar of Bettiah and exercised third class powers. The Magistrate remarks as follows:—

"On receipt of a copy of your Report on the General Administration of the Patna Division for the year 1893-94, together with the Government Resolution thereon, I directed that more important cases should be made over to the Benches, * * * * * but owing to

the irregularity in attendance on the part of the Honorary Magistrates and the necessity of preserving the *personnel* of the Bench throughout a trial, as well to the inexperience of the majority of the members, the order could not be fully carried out. The instruction, however, will not be lost sight of; and as the Benches improve their knowledge of law and procedure, and if they show a keener interest in their work, they will be entrusted with the trial of more important cases."

Muzaffarpur.—In this district there are four Benches, viz., at Muzaffarpur, Hajipur, Lalganj, and Sitamarhi. With the exception of the Lalganj Bench, which exercises third class powers, the other Benches exercise second class powers. On the whole there was a slight improvement in the attendance of the Honorary Magistrates, although at Muzaffarpur and Lalganj 5 and 21 sittings respectively fell through owing to want of a quorum.

Darbhanga.—Towards the end of the year the Municipal Benches at Madhubani and Darbhanga were abolished, being amalgamated with the Regular Bench at each place. The number of Benches therefore at the close of the year was four against six in the preceding year. Mr. Tute makes the following remarks on the general working of the Benches:—"The work done by the Honorary Magistrates wholly consisted of nuisance and petty cases of assault and a few under the Cattle Trespass Act. The chief obstacles in giving them more important cases are, first, their irregular attendance, and, second, the rule that a case should be heard out by the same Magistrate. I hope to show an advance in Bench work during this year."

178. The attendance of Honorary Magistrates, taking the Courts in each district together, is given in the subjoined statement:—

Name of District.	Number of times asked to attend.	Number of times attended.	Absences		Total absence.	Percentage of attendance, column 3 on column 2.	
			With leave.	Without leave or notice.		1894.	1893.
1	2	3	4	5	6	7	8
Patna	2,4[illegible]1	1,967	400	205	605	82	89
Gaya	1,149	745	83	321	404	64	76
Shahabad	1,242	957	118	167	285	77	78
Saran	942	577	109	255	[illegible]65	61	75
Champaran	294	236	7	51	58	80	82
Muzaffarpur	2,662	1,998	215	419	664	75	74
Darbhanga	1,3[illegible]2	885	155	323	478	65	64
Total ...	10,052	7,365	1,087	1,772	2,859	73	78

Taking the Benches individually, the attendance was best in the case of the following Benches, viz., Sadikpur, Jhowganj, Bihar, Dinapore, Arrah, Jagdispur, Buxar, Hajipur, Bettiah, Revelganj and Roserah, and worst in the case of Khagoul, Nawada, Aurangabad, Chapra, Siwan, and Madhubani (Municipal Bench). This last after several years indifferent work has now been abolished.

179. I was able last year to report a general improvement in the attendance of Honorary Magistrates. This year I have to record the reverse. The percentage of attendance fell off in all the districts, except Muzaffarpur and Darbhanga, the average of attendances for the whole Division being 73 per cent. as against 78 per cent. in 1893. During the present year (1895) I have had a roster prepared for the whole year for each Bench, copies of which have been sent to my office for approval, after being circulated to the different Honorary Magistrates for their consent and information. The District Magistrates have also been instructed to call for explanation in cases of default, and to bring to my notice, for report to Government, all persistent cases of the kind, and I propose to ask Government in such cases, as I have done in one instance lately, to strike off the defaulter's name from the list of Honorary Magistrates (unless he elects to resign).

180. But after all, as the system at present obtains, the matter resolves itself in but too many instances into a case of *driving*. And what we want, if the system is ever to do proper justice to itself and to be of the best use to the public, is not that the work done by any Honorary Magistrate should merely be the minimum necessary to save himself from disgrace, but that the inducement should be to render such full and willing service as Government and the public have a right to expect in return for the distinction bestowed. The only remedy for the present state of things is, as I have before pointed out, to make the office tenable for a term of years, renewable on approved good service, instead of, as at present, for life.

XVI.—REGISTRATION OF DOCUMENTS.

181. The number of offices open in each district during the year of report and the previous year was as follows:—

Districts.	Number of offices open in— 1894-95.	1893-94.
Patna ...	7	6
Gaya ...	5	5
Shahabad ...	6	5
Saran ...	8	8
Champaran ...	7	5
Muzaffarpur ...	8	7
Darbhanga ...	8	8
Total ...	49	44

Of the five new offices opened during the year of report, two in Champaran were opened at the request of the manager of an indigo concern for the registration of indigo sattas. These two offices were in existence only for about four months, and the number of sattas registered in them was 2,554.

182. The total number of documents registered in the several offices, and the average per office in each district during the year of report and the two preceding years, will appear from the table below:—

	Number of documents registered in—			Average per office in—		
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.
1	2	3	4	5	6	7
Patna ...	14,776	14,336	13,997	2,111	2,389	2,333
Gaya ...	7,729	7,668	7,999	1,545	1,534	1,600
Shahabad ...	14,021	15,537	14,181	2,337	3,107	2,836
Saran ...	25,871	23,501	22,373	3,234	2,938	3,136
Champaran ...	20,321	20,454	20,729	2,908	4,091	4,146
Muzaffarpur ...	35,853	27,849	27,414	4,482	3,978	3,916
Darbhanga ...	24,891	21,353	19,993	3,111	2,669	2,499
Divisional Total ...	143,459	130,698	126,685	2,970	2,970	2,946

It will be seen that there has been a steady increase in the number of documents each year in every district, except in Shahabad and Champaran, which show a decrease as compared with the previous year. The decrease in Shahabad occurs under heads (*a*) Sales, (*b*) Mortgages, and (*c*) Other leases. The falling off under (*a*) and (*b*) is attributed to bad crops of 1893-94, which the Collector thinks lowered the price of *gujasta* holdings and discouraged the money-lenders, most of whom were cultivators, to lend money on the hypothecation of *gujasta* holdings at the same high rate as in previous years; and the falling off under (*c*) is said to be due to a temporary stoppage of business in the Dumraon Raj, pending the issue of a probate and the grant of new powers of attorney to its servants after the death of the Maharaja in May 1894. The

decrease in Champaran is slight and is attributable to the survey and settlement operations in progress in that district, which led certain people to hold over transactions in land pending completion of those proceedings.

183. The largest number of documents registered in any one district was in Muzaffarpur, due mainly to the large planting interests in this district, and the smallest number was in Gaya, where the prevalence of the bhaoli system is the cause of the paucity of formal transactions in the transfer and leasing of holdings. It will appear from the figures given below that the work of the Registration Department has within the last decade increased in a far greater ratio in the four North Gangetic districts than it has done in the three districts south of the Ganges. It would be of interest if enquiry were made by the Registration Department into the reason of this phenomenon:—

District.	1884-85.		1894-95.	
	Number of offices.	Number of documents registered.	Number of offices.	Number of documents registered.
1	2	3	4	5
Patna ...	7	11,287	7	14,776
Gaya ...	5	6,888	5	7,729
Shahabad ...	6	9,232	6	14,021
Saran ...	5	12,328	8	25,871
Champaran ...	3	8,801	7	20,321
Muzaffarpur ...	6	18,112	8	35,853
Darbhanga ...	6	11,897	8	24,891
Total ...	38	78,545	49	143,462

184. The total receipts and expenditure in each district in the year of report as compared with those in the previous year are shown below:—

District.	1894-95.		1893-94.	
	Receipts.	Expenditure.	Receipts.	Expenditure.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Patna ...	40,630	11,087	42,869	11,051
Gaya ...	27,534	7,471	28,841	7,392
Shahabad ...	23,259	10,007	26,788	10,266
Saran ...	32,278	15,656	32,807	14,266
Champaran ...	20,818	11,838	24,806	11,498
Muzaffarpur ...	42,262	17,698	38,057	15,163
Darbhanga ...	28,313	14,419	27,716	14,080
Total ...	2,15,094	88,176	2,21,884	83,716

The decrease in most of the districts in receipts is due to the reduction in the scale of fees introduced during the year of report.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

185. The total number of estates in the Division in the year of report was 63,829 against 61,815 in the previous year. The increase of 2,014 estates is due chiefly to partitions effected during the year.

186. The current demand was Rs. 82,22,868 against Rs. 82,06,064 in 1893-94. The demand of each class of estates during the past and the previous year was as shown below:—

	1893-94.	1894-95.
	Rs.	Rs.
Class I—Permanently-settled estates ...	77,58,617	77,58,865
„ II—Temporarily-settled estates ...	2,17,295	2,10,870
„ III—Estates held direct by Government ...	2,30,152	2,53,133
Total ...	82,06,064	82,22,868

187. The demands under classes I and III have increased by Rs. 248 and Rs. 22,981 respectively, while the demand under class II has decreased by Rs. 6,425, the result on the whole being a net increase of Rs. 16,804 against a net increase of Rs. 8,848 in the previous year. The increase of Rs. 248 in class I is due chiefly to the revenue added to certain estates in Muzaffarpur on account of lands which had been acquired for the Muzaffarpur-Sitamarhi Railway having been restored to them, the abatement of revenue granted when the lands were acquired being now re-assessed on those estates. Under class II the decrease occurred in the districts of Patna, Gaya, Saran, and Muzaffarpur, and is due to new settlements at reduced jamas as well as to transfer of estates from one class to another. Under class III the net increase in the demand, amounting to Rs. 22,981, is shared by four districts, viz., Patna (Rs. 13,203), Gaya (Rs. 202), Shahabad (Rs. 5,741), and Muzaffarpur (Rs. 5,155), and is due partly to favourable resettlements, but mainly to the increase in the number of estates of this class caused by transfer from class to class. In Gaya it is also partly ascribed to the increased value of bhaoli produce in certain villages. There was a decrease of Rs. 1,320 under this class in Saran, which is ascribed to the resettlement of nine estates at reduced jamas, and to the transfer of a portion of island No. 31 to the district of Patna.

188. The current collections from all classes of estates amounted to Rs. 76,90,165 against Rs. 77,51,166 in 1893-94, showing a decrease of Rs. 61,001, the percentage of total current collections on the current demand being 93·5 against 94·4 in 1893-94. This falling off is due to the shorter collections of demands in all the three classes. Under class I (permanently-settled estates) the current balance amounted to Rs. 4,19,712, of which Rs. 3,64,730 are on account of estates in only two districts, viz. Patna (Rs. 1,65,250) and Shahabad (Rs. 1,99,480). In both the districts the explanation is that the balance is due for the March kist, and steps could not be taken for their realisation until after the year closed. The defaults at the March kist are attributed in both the districts to the late harvest of rabi and poppy crops, which formed the chief means of paying the Government revenue at this kist. The next heavy balance is in Muzaffarpur, where the Collector, Mr. Hare, explains that out of the balance of Rs. 23,802, Rs. 11,575 were collected on the 20th March but credited after the close of the year, being partly remittances received from other districts by remittance transfer receipts. In Saran, where the current balance is Rs. 17,629, Rs. 2,300 will, it is said, be recovered after the sales have been confirmed; Rs. 6,080 are due from estates which have been sold but in which appeals have been preferred; but the bulk of the balance is due from estates which defaulted at the March kist. In Champaran the greater portion of the current balance, Rs. 5,232, is due from the estate of the late Nasir Hossain in Saran, which is being brought under the Court of Wards. The percentage of current collections on current demand in each district was as follows:—

Patna	88·3
Gaya	99·5
Shahabad	86·7
Saran	98·5
Champaran	98·9
Muzaffarpur	97·5
Darbhanga	99·6

189. The current collections under class II (temporarily-settled estates) amounted to Rs. 1,76,911 against Rs. 1,81,589 in the previous year. This class of estates is subdivided into three classes, viz. (*a*) settled for periods with the proprietors, (*b*) private estates leased to farmers for periods, and (*c*) Government estates leased to farmers for periods, the current collections under (*a*), (*b*), and

(c) being (a) Rs. 88,633, (b) Rs. 1,864, and (c) Rs. 86,414, against Rs. 93,163, Rs. 2,261, and Rs. 86,165 respectively in the previous year. The falling off in collections is due to the falling off in the demand, as explained in paragraph 187 above. The current collections came up to the standard of 95 per cent., or exceeded it, in Gaya and Darbhanga, as regards estates (a), in Shahabad as regards (b), and in Champaran and Darbhanga as regards (c). In other districts there was a failure to collect up to the prescribed standard under one or more of the three heads.

190. The current collections of estates under class III (Government estates) amounted to Rs. 1,74,101 against Rs. 1,83,390 in the previous year, showing a decrease of Rs. 9,289. The current demand was collected in full in Muzaffarpur and Darbhanga. In the other districts the percentage of collections ranged between 35·1 and 72·8. In Patna, where it was 39·9 for estates managed for proprietors and 70·6 for estates owned by Government as proprietors, the collections were retarded on account of the failure of the bhadoi crops on the diara lands, owing to floods and diluvion. The late sowing of rabi and the consequent late harvesting are also said to have interfered greatly with collections. I cannot say that I am satisfied with this explanation, and I have requested the Collector to call for a detailed explanation from the general manager. In Gaya the percentages of the two classes of estates under class III were 63·6 and 72·8, the short collections being attributed to the collecting and supervising staff being for most part of the collection season occupied in the survey and khanapuri operations in progress in the Government estates, to indifferent bhadoi and rabi harvests, and other special causes. In Shahabad there is only one class of Government estates, viz. "Estates owned by Government as proprietors." The percentage of current collections on current demand in this district was 67·9. The indifferent collections are attributed to the poor rabi and sugarcane crops of the year, as well as to the general disorganisation caused by the prevalence of cholera and fever to a very unusual degree. In Saran the percentage of current collections for "Estates owned by Government as proprietors" was only 35·1. One reason given for this is the existence of a dispute regarding the boundary of a certain large diara estate with a neighbouring proprietor. But the chief reason appears to be that in a number of diara estates, in which there is an outstanding balance of Rs. 5,256, most of the rent is paid from the rabi crop and should not be shown as due until April, while in the Collector's returns it is shown as due in March. The Collector has been told to recast his returns in future.

191. The current and arrear collections together on account of all three classes of estates amounted to Rs. 81,55,708, or 93·3 per cent., against Rs. 82,19,733, or 93·8 per cent. in the previous year. The percentage of the total collections on the current demand was 99·1 against 100·1 in 1893-94.

192. The remissions amounted to Rs. 18,751, of which Rs. 3,703 represent "Remissions of grace," Rs. 1,625 "Remissions of right," and Rs. 13,423 "Nominal remissions." Of the total of Rs. 18,751, Rs. 14,260 were granted in Gaya on account of class III estates, but is for the most part nominal, being due to a mistaken manner of treating *bhaoli* demands in the accounts. The Collector hopes that the mistake will be remedied by the introduction of the new Tauzi Rules.

193. The balances amounted to Rs. 5,71,318 against Rs. 5,22,090 in the previous year. They are distributed as follows against each class of estate:—

Class.	1893-94.	1894-95.
	Rs.	Rs.
I ...	4,19,397	4,43,820
II ...	49,787	42,781
III ...	[illegible]2,906	84,717
Total ...	5,22,090	5,71,318

The percentage of the total balance on the total demand was 6·5 against 5·9 in 1893-94 and 6·2 in 1892-93. Of the gross balance of Rs. 5,71,318, a sum of Rs. 5,45,706 was under recovery at the close of the year, and Rs. 25,612 were classed as doubtful and irrecoverable.

194. *Road and Public Works Cess.*—Out of a total gross demand of Rs. 31,24,055, a sum of Rs. 24,15,357, or 77·2 per cent., was collected (including the amount realised in advance in previous years), and Rs. 3,980 remitted, leaving a balance of Rs. 7,04,708, or 22·5 per cent., of the gross demand outstanding at the close of the year. The percentage of the total collections on account of both current demand and arrears to current demand was 96·1. The percentage of net balance on gross demand of the Division was 22·5 against 20·02 in the preceding year. It was least in Darbhanga (13·06) and highest in Saran (34·4). In the latter district the unsatisfactory result is due chiefly to the involved condition of some of the principal zamindars whose estates are let out on *zerpeshgi*. The *zerpeshgidars* cannot be called on to pay the Government demand, which rests upon the zamindars, the result being that the dues often cannot be realised until the Collector has been obliged to go through the process of advertising the estates for sale. The percentage of arrears is also high in Gaya, where it is 27·7 against 28·7 in the previous year. The large balance in this district is partly due to the failure of the 7 annas Tikari Raj to pay in about Rs. 14,000 of the final kist, and to errors in the accounts of the last revaluation proceedings which are in course of correction.

195. The revaluation of the Patna district, which was sanctioned in 1893-94, was commenced from the 5th February 1894, and was in progress during the year of report.

196. The revaluation of Darbhanga district, which was expected to be completed by the end of the year of report, is still unfinished, and will probably last for another six months.

197. *Remittance by money-orders.*—A sum of Rs. 2,50,935 was remitted by 27,685 money-orders for payment of land revenue and cesses during the year of report against Rs. 2,78,732 by 26,389 orders in the previous year. It will be observed that there has been an increase in the number of orders but a decrease in the amount remitted, the increase in the former being 1,296 and the decrease in the latter Rs. 27,797. In commenting on the figures for 1893-94 in my last report, I gave it as my opinion that the experiment had about reached the end of its tether, judging from the fact that the figures for that year were not dissimilar to those of five years previously (1889-90), when the number of money-orders issued was 25,832 and the amount covered Rs. 2,63,269. The results during the past year seem to confirm this view. I gave the reasons which, in my opinion, account for this in last year's report, and I need not repeat them here. The transactions with regard to the payment of rent to landlords by money-order show that during the year of report 2,788 orders, covering Rs. 56,658, were issued against 5,606 orders, covering Rs. 94,219, in the previous year. The decrease both in the number and value of money-orders issued for this purpose is thus very marked, and the more so when it is found that the number of such payments refused by the landlords has been considerably less both in actual number and percentage than in the preceding year. The fact no doubt is that both zamindar and raiyat prefer the long-established system of personal payments. The zamindar regards the new plan as interfering, as it no doubt does, with his prestige and influence over his raiyats; while the raiyats, on the other hand, are only too pleased to have their account explained to them by the village *amla*, and be satisfied that everything is right before they part with their money. The consensus of opinion among District Officers is that in Bihar the money-order system is only resorted to for the payment of rents in cases of dispute between the parties; and looking at the matter from this view, the fact that the system is losing ground is not a cause for regret.

198. *Operation of the Sale Law.*—Out of 6,571 estates and shares of estates which became liable to sale for non-payment of Government dues, 367, or 5·6 per cent., were actually sold. Of these 171 were whole estates and 196 shares. The revenue demand of the estates sold was Rs. 96,692, and the dues for which they were brought to sale amounted to Rs. 38,669. The amount realised by sale was Rs. 5,96,077, or about six times the Government revenue. Two whole estates with a revenue demand of Rs. 3,325 were purchased by Government for Re. 1 each. Sales were annulled with regard to 44 estates and 22 shares on appeals preferred to this Court. The largest number of

defaults occurred in Shahabad, Muzaffarpur and Patna, being 1,936, 1,418, and 1,021, respectively, but the sales actually effected in these districts numbered only 67, 88, and 71, respectively. These figures show that the law was administered with much leniency—a leniency the bad effect of which on the punctuality of payment is complained of by several of the Collectors. There can be no doubt but that the *one* improvement in the sale law which is urgently called for is an amendment of section 18. The Collector's hands are at present tied. He can only either sell the defaulter up, or let him go scotfree. What is needed is that the Collector should be allowed to adopt some intermediate course. As he is allowed to use his discretion in the matter of sale, there seems no reason why he should not be permitted to use it in the lesser matter of imposing fines (within certain prescribed limits) for default. If the late amendment Bill had been confined to this one point, it would probably have been accepted without opposition, and we should have had an easy solution, satisfactory to landlords and District Officers alike, of a much vexed question. The rest of the Act might have safely been left alone.

199. *Working of the Certificate Procedure.*—The total number of certificates filed during the year was 49,157 against 43,937 in the preceding year. The total number of cases disposed of during the year was 44,448, or 74·7 per cent. In 11,235 cases payment was made on issue of notice, in 22,672 cases on attachment of property, while the number of cases in which recourse to actual sale was necessary was 727. In 821 cases demands were paid on issue of warrants against the person. In 11 other cases the debtors were imprisoned. In seven of these cases the debts were paid, but in four cases the debtors had to be released without making payment.

200. *Grant for improvements in Government Estates.*—A total sum of Rs. 20,614 was expended under this head in the three districts of Patna, Gaya, and Shahabad, and Rs. 58 in Darbhanga. Among the items of expenditure may be mentioned Rs. 3,975 for constructing tanks and wells, Rs. 1,689 spent on irrigation and embankments, Rs. 9,957 on agricultural Public Works, and Rs. 6,051 on sanitary and other improvements.

201. *Settlements.*—The total number of cases for disposal during the year was 148; of these 88 were for settlement of estates belonging to Government, and 60 for estates belonging to proprietors. The number of cases disposed of was 67, viz. 2 original settlements, 29 resettlements, and 36 summary settlements. Besides these, seven cases were struck off, and the rest, 74 cases, were pending at the close of the year. The net increase of revenue obtained by the settlements and resettlements effected during the year amounted to Rs. 4,193. This does not include the settlements under the control of the Director of Land Records.

202. *Land Registration.*—There were 31,111 cases for disposal, of which 22,620 were disposed of, showing an increase of 1,476 cases over the figures of the preceding year. The survey and settlement proceedings in the districts of Muzaffarpur and Saran continue to bring to light a certain number of cases of neglect on the part of proprietors to file applications under section 42. As these are discovered the defaulters are dealt with under the punitive provisions of section 65. Reports of transfers of property received from Sub-Registrars and Civil Courts are now dealt with in all the districts in a systematic manner with a view to enforce the provisions of the law. The proceedings in the certificate department are also fruitful in bringing to light cases of default, and good use is now being made of the information obtained from this source.

203. The work of rewriting register D in the new form is well in progress in Muzaffarpur and Gaya, and special establishments have been lately sanctioned by the Board for the same purpose in the other five districts. I am arranging for the work in all these districts to be carried out on a contract or piece-work system instead of by special establishments paid by time, as has been the usual practice. The result, I hope, will be increased efficiency at a considerable saving in cost. The new register will, in all the districts, be prepared in English, in the order of the tauzi numbers borne by the estates, and will be supplemented by an alphabetical index for purposes of reference. These registers when completed will be invaluable in the acceleration of work in all the principal departments of the Collector's office. There will then

remain the C registers, which in all the districts require rewriting. The first point to settle is the best form of this register, and especially the order in which the estates in each district are to be entered in it. On this subject I have addressed the Board of Revenue recommending certain proposals made by the Collector of Muzaffarpur.

204. *Separate accounts.*—The number of separate accounts opened and closed during the year are noted below:—

	Opened.	Closed.
Under section 10, Act XI of 1859	1,095	79
Ditto 11, ditto	52	...
Ditto 70, Act VII (B.C.) of 1876 ...	603	41
Total ...	1,750	120

205. The total number of separate accounts remaining open at the close of the year was 36,790 with a revenue demand of Rs. 21,78,806 against 36,063 with a revenue demand of Rs. 21,20,141 at the close of the previous year. Applications for the opening of separate accounts of 427 undivided shares, 17 specific shares, and 290 complex shares remained pending at the close of the year.

206. *Partition.*—The number of cases pending at the close of 1893-94 was 1,510, and the number instituted during the year of report being 264, the total number for disposal was 1,774. Of these 545 cases were disposed of, leaving 1,229 pending at the end of the year. There has been a reduction in the number of institutions during the past three years from 338 in 1892-93 to 327 in 1893-94 and to 264 in 1894-95. This is owing in a great measure to the orders discouraging institutions in the districts where the survey operations are going on, pending the conclusion of those operations, the object being to save the parties the cost of having their estates twice measured and a double set of maps and khasra papers prepared.

207. The remarks made in paragraph 229 of last year's report regarding the general improvement in the work of the Special Deputy Collectors employed in this Department still hold good. Particular attention is now being paid to the holding of local enquiries by these officers for the purpose of arranging the distribution of the property among the newly-formed estates, and of disposing of objections after personal inspection of the locality. This is a matter of great importance, as a mistake in the initial stage necessarily leads to much future complication; and one can almost invariably trace the great delay in long pending cases to the slipshod manner in which they were dealt with in their early stages, sometimes 10 and 20 years ago.

208. *Land Acquisition.*—Proceedings for the acquisition of 59 acres 2 roods and 21 poles of land under Act I of 1894 for Government, municipalities, railways and District Boards, as per details given below, were confirmed by the Board of Revenue during the year under report:—

For whom acquired.	Area of land acquired. A.	R.	P.	Cost of acquisition. Rs.
Government	7	0	30	636
Municipalities	11	0	34	3,879
Railways	17	0	30	8,037
District Boards	24	0	7	6,339
Total ...	59	2	21	18,891

209. The Deputy Collector, Sone Canals Revenue Division, also acquired 2 acres 2 roods and 11 poles in eight cases at a cost of Rs. 200 for the construction of village channels and other purposes connected with the Irrigation Department.

210. *Advances.*—Out of a sum of Rs. 22,200 allotted to the Collectors for distribution during the year under the Land Improvement Loans Act, XIX of 1883, Rs. 15,300 were actually disbursed, viz. Rs. 15,000 in Gaya and Rs. 300 in Shahabad. Advances were not granted in other districts, as there were no applications for them.

211. Under the Agriculturists' Loans Act, XII of 1884, the amount allotted and the amount advanced are noted below:—

	Allotted.	Advanced.
	Rs.	Rs.
Patna	500	......
Gaya	2,500	2,500
Shahabad	5,000	1,005
Saran	4,500	2,127
Champaran	800	......
Mazaffarpur	6,500	142
Darbhanga	6,000	6,000
Total ...	25,800	11,774

212. I am of opinion that advances by Government to raiyats in estates belonging to private owners should be made with great care and only after full enquiry, and, except in times of scarcity and distress, *only* for the purpose of substantial and visible improvements, such as the construction of wells and other works for irrigation, &c. For such objects advances cannot be made too freely. But I am not in favour of Government making advances in *ordinary years* (except to its own raiyats) merely for such purposes as the purchasing of cattle, implements, seed, &c., for we have no ready means of assuring ourselves that the money is really spent for the professed object, and that it is not wasted in marriage expenses, litigation and so on. Where advances have been freely made, as has occurred in some districts, for such purposes, it has almost invariably happened that the money has been squandered or used to purchase food to save the borrower from having to work. Large amounts have had eventually to be remitted, or have only been recovered with considerable difficulty and great hardship to the defaulters. What I think is that we should encourage real and lasting improvements *as much as possible*, but for the rest, until we are in a position to set on foot a comprehensive scheme of agricultural banks, we must let the raiyat go to his mahajan.

213. *Bengal Tenancy Act.*—The working of the various sections of the Tenancy Act in the Division during the two years 1893-94 and 1894-95 is shown in the table below:—

		1893-94.	1894-95.
1.	Transfer of tenures voluntarily, section 12 (3) ...	1,276	918
2.	Ditto by decree sale, sections 13 (2) and 14 ...	1	...
3.	Ditto by succession, section 15	7	5
4.	Commutation of rent, section 40	73	11
5.	Appraisement of produce where rent is paid in kind, sections 69 and 70	292	335
6.	Registration of improvements	76	76
7.	Certificates of Collectors as to acquisition of land for building and other purposes, section 84 ...	3	1
8.	Notices of resumption of land by landlords, section 87 (2)	901	1,083
9.	Applications made for a survey and record of rights under Chapter X	8	7
10.	Local enquiries held by order of a Court, section 158	10	15
11.	Written permission to landlords to measure lands under section 90	...	1

The marked decrease under section 12 (3) is due to the fact that notices are now not required to be served on landlords in cases of transfer of mere occupancy rights or of fractional interests of tenants.

214.—The falling off in the number of "commutation of rent payable in kind" occurs entirely in Gaya. The Collector, Mr. Macpherson, points out that as a matter of fact both landlords and tenants in that district prefer the bhaoli system, which is the natural outcome of its physical features, and that the applications filed are only an indirect means of obtaining settlement of disputes which it is the function of the Civil Court to decide. A full report on this subject was submitted to Government in this office No. 68R., dated 6th November 1893.

215. The increase under the head "Appraisement of produce when the rent is paid in kind" is due to there having been a larger number of such applications in Gaya, where the bhaoli system extensively prevails. Resort is had to this procedure only in cases of dispute either between landlords and tenants, or among the co-landlords themselves.

216. Of the 1,083 "notices of resumption of land by landlords," 352 and 699 belong to Saran and Champaran, respectively, against 1 in Shahabad, 26 in Muzaffarpur, and 5 in Darbhanga. The prevalence of these cases in Champaran was explained in paragraph 232 of last year's report. The increase during the past year in Saran has not been explained by the Collector. He will be asked to do so.

217. Of the 7 applications made for a survey and record of rights under Chapter X, 5 were in Shahabad and 2 in Saran.

218. *Relations of landlords and tenants.*—In the north-east of the Darbhanga district there were somewhat serious disputes between Raja Rameshwar Singh Bahadur and his raiyats, which led to the committal to the Sessions of some of the Raja's servants on charge under sections 379, 148, 325, Indian Penal Code. The case ended in acquittal, but the fact of the existence of the dispute is not questioned. Mr. Macpherson, the Collector of Gaya, remarks as follows:—

"There was no general question which led to differences between landlords and tenants during the year either in the district as a whole or on any considerable individual estate. As usual, however, strained relations existed in particular villages, but there are certain zamindars who have acquired so great an influence over their tenants that they are able to behave very exactingly towards them without the risk of their complaining."

The past year does not present any unusual features in regard to this question. Judging from the fewness of cases of open rupture, the relations of landlord and tenant may be said to be on the whole of a peaceful nature.

219. *Cadastral survey operations in Bihar.*—In Gaya the survey and settlement of the Tikari Ward's estate continued in full swing. In the Tikari estate the total number of villages to be dealt with is 542 with an area of 387 square miles. Of these, 441, with an area of 319 square miles, had been both surveyed and *khanapuried* up to the close of the preceding year, and 82 villages, with an area of 55 square miles, were similarly dealt with during the year under report. The attestation work was begun in the estate during the year, and carried out in 434 villages with an area of 313 square miles, and the draft record was published in 316 of these. Advantage was also taken of the presence of the professional survey party to bring under survey and settlement 23 Government estates comprising 111 villages, which had not been surveyed or settled for a considerable period. Of these, 108 villages, covering an area of 67 square miles, were traversed before the close of the year, and 88 of them were cadastrally surveyed.

220. In Muzaffarpur the outturn of work during the year is noted below:—

	Villages.	Fields.	Sq. miles.
Surveyed ...	1,654	1,795,905	1,217
Khanapuried ...	2,009	2,414,341	1,455

The survey and record-writing of the district has almost been completed, leaving only 450 square miles for the next field season. The Settlement Officers attested the record of 712 villages covering an area of 376 square miles. During the recess, from May to October 1894, the officers were employed in disposing of case-work and copying, comparing, and preparing indexes of the records of villages which had been attested.

221. In Darbhanga the Bihar Cadastral Survey Party traversed 518 square miles in the west of the Madhubani subdivision.

222. The following table shows the work done during the year in Champaran:—

			Sq. miles.
Traverse survey	...	...	178
Cadastral survey	...	...	1,101
Record-writing	...	...	673
Attestation	...	...	361
Draft publication	...	...	379
Final publication	...	...	379

Besides the above, 334 boundary disputes were instituted during the year and 283 were disposed of. Three hundred and four cases for the settlement of fair rent were instituted, of which 188 were decided.

223. In Saran the following work was done during the last survey season:—

		Villages.	Fields.	Sq. miles.
Survey	...	1,260	810,717	549
Khanapuri	...	1,229	776,572	527

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

224. There were, at the close of the previous year, 17 estates under the management of the Revenue authorities in this Division, and during the year of report two new estates, viz., (1) that of the sons of the late Nawab Amir Ali of Barh, and (2) the Maghra estate in Bihar, were taken in charge. Thus there were 19 estates under the management of the Revenue authorities at the close of the year of report.

225. The estate of the late Nawab Amir Ali of Barh was taken in charge under Government order No. 5529L.R., dated 11th December 1894, on the application of his sons, Maulvis Syud Ashrafuddin Ahmad, Khan Bahadur, Afzaluddin Ahmad, and Mr. Ashanuddin Ahmad, C.S., under section 6(*e*) of Act IX (B.C.) of 1879, as amended by section 3 of Act IV of 1892, they having been declared, on their own application, to be disqualified to manage their estates.

226. The Maghra estate was taken in charge under the Board's order No. 139A., dated the 6th February 1895, on the death of its proprietor, Babu Mohadeo Prashad Singh, leaving a minor son, named Rajkishore Proshad Singh, now aged a year and a few months.

227. The total rent and cess demand of the 19 estates realisable during the year amounted to Rs. 29,63,635, *i.e.*, Rs. 15,29,954 arrear and Rs. 14,33,681 current. The collections amounted to Rs. 13,16,150, and the remissions sanctioned during the year to Rs. 2,49,854, thus leaving a balance of Rs. 13,91,511 unrealised at the close of the year, the percentage of total collections on current demand being 91·8.

228. The whole of the Government demand of revenue and cesses due from these estates, amounting to Rs. 4,03,648, was realised during the year; and out of Rs. 83,864 due to superior landlords for current and arrear demands, Rs. 76,997, or 91·8 per cent., were paid, leaving a balance of Rs. 6,741 still due at the close of the year. The bulk of this balance, amounting to Rs. 5,583, is due by two estates, Mobarak Hussain's in Saran and Paigumberpur in Darbhanga, and could not be adjusted owing to the confused state in which the accounts were left by the late proprietors.

229. The total receipts of all the estates, including opening balance, interest on Government securities, debts recovered, &c., amounted to Rs. 21,02,709, and the total expenditure to Rs. 18,96,382, of which Rs. 4,56,950 were on account of debts paid, Rs. 2,63,441 on account of management charges, Rs. 2,50,100 for maintenance of proprietors and their families, Rs. 1,27,147 were expended on improvements, and Rs. 3,18,099 on miscellaneous expenses, which include Government rates, municipal and income taxes, investments and suspense accounts.

230. The debt due to Government by the Deo estate amounted to Rs. 4,10,113 at the beginning of the year, and the interest which accrued during the year amounted to Rs. 18,590. Out of the total sum of Rs. 4,28,703, Rs. 38,179 were paid during the year, of which Rs. 19,685 were on account of principal and Rs. 18,494 interest. The debt could not be further reduced during the year of report, as, owing to unfavourable harvests, the time was not considered by the Collector propitious for putting up any of the estate villages for sale during the year; and, although this has since been done, the upset prices, except in a few minor cases, could not be obtained. I have asked the Collector what he proposes, under the circumstances, should now be done.

231. The education of the minors was well looked after during the year and proper care was taken of their health.

232. The condition of the tenantry on estates under direct management continued generally satisfactory.

XIX.--EXCISE.

233. The revenue under this head again shows an increase, the total excise revenue in the year of report being Rs. 26,44,363 against Rs 26,33,379 in 1893-94 and Rs. 24,91,128 in 1892-93, thus showing an increase of Rs. 10,984 and Rs. 1,53,235 over the two preceding years respectively.

234. I find that this result is more than accounted for by the large increase under one head, viz., "Country spirit," which alone gave an increase of Rs. 59,570. There has been an increase also under each of the heads "Opium," "Charas," and "Miscellaneous" of Rs. 3,288, Rs. 971, and Rs. 218, respectively, the remaining heads showing a total decrease of Rs. 53,063.

235. The increase under the head "Country spirit" was obtained in all the districts, except Champaran, where it showed a decrease from Rs. 1,20,677 to Rs. 1,10,069, or of Rs. 10,608. This falling off is, however, more nominal than real, being mainly attributable to the fact that the advance fees of most of the outstills were credited into the treasury before the close of the previous year. It is also partly due to the abolition of an outstill during the year of report. The general explanation of the increase in the other districts is that the taste for cheap distilled liquor is gradually superseding that for *tari*, the revenue from which has fallen off during the year of report from Rs. 5,86,355 to Rs. 5,71.778, or by Rs. 14,577. One reason for this seems to be that date and palm juice is not available in all seasons of the year. In Gaya the weak beverage known as *khasia* liquor is manufactured at the distillery and sold at a price only slightly higher than that obtained in outstills, the ordinary price being 4 pice a quart bottle. In the first year of the introduction of this liquor (1893 94) the total quantity of liquor passed out rose to 24,584 gallons London-proof from 14,360 gallons in the previous year, and during the year of report it has again risen to 28,153 gallons. The low cost at which a "skinfull" of this liquor can be had is said to make it a dangerous competitor of tari. I am inclined, however, myself to think that the lately introduced tree-system has a good deal to do with the falling off in the tari revenue.

236. The increase of Rs. 3,288 under the head of Opium has occurred simultaneously with a severe fever epidemic. Possibly the medical evidence given before the late Royal Commission has come to the ear of the native *kabirajes* and their patients.

237. The decrease of Rs. 53,063 is made up almost wholly by the falling off under two heads, viz. Ganja (Rs. 38,231) and Tari (Rs. 14,577). The latter has been noticed above. Under the head of Ganja the decrease occurs in five districts, viz. Patna (Rs. 19,143), Gaya (Rs. 3,7-6), Saran (Rs. 7,835), Champaran (Rs. 8,995), and Darbhanga (Rs. 2,177). The decrease is generally attributed to a falling off in consumption due to the failure of the crop in Rajshahi and the consequent rise in price, to say nothing of the bringing into use of a certain quantity of old ganja, which would, under the rule, have been destroyed, but which nevertheless had to be issued to consumers, unsuited though it was to their taste. In Shahabad the revenue was kept up to the former figure by the demand of the drug from the North-Western Provinces, to which large exportations were made from this district, while the increase of

Rs. 3,061 in Muzaffarpur is attributed to the influx of a number of employés addicted to its use from the North-Western Provinces in connection with the survey and settlement operations.

238. During the year under report a private distillery for the manufacture of rum and rectified spirits was licensed to Mr. Edward J. Lacey, Manager of the Sugar Refinery at Sakri in Darbhanga. By the end of the year the Manager exported to the Calcutta Custom House 8,282 gross gallons of spirit, chargeable with Rs. 57,680 as duty, at Rs. 5 per gallon London-proof. The distillery is expected to do in time an extensive business.

239. The following figures show the number of persons arrested during the last two years for offences against the Excise and Opium laws :—

District.	Number.	
	1893-94.	1894-95.
Patna	137	122
Gaya	115	67
Shahabad	59	50
Saran	76	66
Champaran	150	69
Muzaffarpur	113	75
Darbhanga	105	52
Total ...	755	501

There was a falling off in all the districts, notably in Champaran, Darbhanga, Gaya, and Muzaffarpur. Frequent changes of officers and want of energy on the part of the detective staff are, I fear, the real explanation, though one Collector (Gaya) attributes the result to exemplary sentences in the past.

240. The figures below show the number of prosecutions for drunkenness in the municipalities in each district during the last two years:—

District.	1893-94.	1894-95.
Patna	637	449
Gaya	100	87
Shahabad	97	152
Saran	98	140
Champaran	7	6
Muzaffarpur	175	85
Darbhanga	95	67
Total ...	1,209	986

The increase in these prosecutions in Shahabad and Saran is attributed to greater activity on the part of the police. There seems no reason to suppose that there has been any sudden improvement in morality in the other districts, and the only inference is that the municipal police there have been more than usually lethargic.

XX.—STAMPS.

241. The total revenue derived from the sale of stamps and court papers during the year under report was Rs. 20,62,830 against Rs. 20,70,584 in 1893-94 and Rs. 20,20,551 in 1892-93, showing a decrease of Rs. 7,754 as compared with the preceding year, and an increase of Rs. 42,279 as compared

with the year 1892-93. The following statement shows the revenue derived from the sale of each kind of stamp in the year of report and the previous year:—

DESCRIPTION.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Court-fees	13,48,896	13,77,379	28,483	......
Stamps for copies... ...	1,02,755	1,03,595	840	......
Impressed sheets	5,54,995	5,19,945	......	35,050
Receipt stamps	17,165	17,484	319	......
Notarial	88	76	......	12
Hundi	20,467	18,168	......	2,299
Court papers	26,221	26,183	......	38
Total ...	20,70,584	20,62,830	29,642	37,396
				Net 7,754

Unlike last year, when there was a diminution, there has been an increase during the year under report of sale of court fees (judicial) stamps. In 1892-93 sales of these stamps yielded a revenue of Rs. 13,54,409, in the year following the sales fell off to Rs. 13,48,896, but in the year of report the revenue again rose to Rs. 13,77,379, showing a net increase of Rs. 28,483 and Rs. 23,970 respectively over the two previous years. The largest increase occurred in Muzaffarpur, where it amounted to Rs. 31,968, and the largest decrease was in Shahabad, amounting to Rs. 9,141. The increase in Muzaffarpur is mainly due to stamps to the value of Rs. 20,946 having been bought in one case for a certificate of administration. The survey and settlement operations are also said to have contributed to the increase both here and in Champaran (Rs. 7,003). There was an increase also in Patna (Rs. 4,937) and Darbhanga (Rs. 7,629), due in both districts to the institution of a larger number of title suits during the year. The falling off in Shahabad is attributed to a temporary cessation of suits during the year of report in the Dumraon Raj estate pending the completion of mutation proceedings after the late Maharaja's death. There was a decrease also in Gaya (Rs. 6,274) and in Saran (Rs. 7,639), owing to a less number of civil suits of higher value having been instituted during the year in each district. The revenue from impressed sheets (non-judicial) on the other hand shows a net decrease of Rs. 35,050. The largest decrease, amounting to Rs. 14,337, occurred in Shahabad, where there were fewer bonds executed during the year owing to a fair outturn of crops which obviated the necessity of contracting mortgage loans. The same satisfactory explanation is given of the falling off in Patna (Rs. 1,205), Champaran (Rs. 11,541), Muzaffarpur (Rs. 11,544), and Darbhanga (Rs. 3,174). The Collector of Champaran further states that transactions of this kind fell off owing to the survey and settlement operations in progress in his district, but he does not explain how he arrives at this result. The only districts which show an increase of receipts from impressed non-judicial stamps are Saran and Gaya, the increase in them being Rs. 6,438 and Rs. 311 respectively. The Collector of the former has not given any reason for the increase, except that there were more deeds executed during the year. Mr. Macpherson, of Gaya, attributed the small increase in his district partly to the grant of more arm licenses, and partly to the increase in the number of revenue agents and muktears in Gaya, and the consequent sale of a larger number of certificate stamps. The small increase of Rs. 319 under the head "Receipt stamps" is shared by ll the districts, except Gaya and Champaran. The falling off of Rs. 2,299 in the sale of "Hundi stamps" is shared by all the districts, except Gaya, where there has been an increase of Rs. 275. The decrease is ascribed generally to dulness of trade and to the increased popularity of the money-order system. The increase of Rs. 275 in Gaya is said to be due to the establishment of a loan office there during the year.

242. There were 452 cases of unstamped or insufficiently stamped documents detected by the Civil Courts and the Revenue authorities during the year

of report against 488 cases detected in the preceding year. The amount of duty and penalty realised was Rs. 4,991 against Rs. 5,358 in 1893-94.

243. The number of prosecutions instituted for breaches of the stamp law was 69, in which 77 persons were brought to trial against 93 cases, in which 104 persons were brought to trial in the preceding year. Of the 77 persons brought to trial during the year of report, 72 were convicted and 5 were acquitted. The fines imposed during the year amounted to Rs. 794. I observe that no rewards were paid in any district. The attention of the District Officers will be called to this matter.

244. During the year of report stamps worth Rs. 575-15 disappeared from the Darbhanga treasury. The stamp muharrir was prosecuted and sentenced under sections 409, 465, and $\frac{409}{109}$ of the Indian Penal Code to five years' rigorous imprisonment by the Court of Sessions, but he was acquitted by the High Court on appeal. The value of stamps misappropriated was, however, realised from the treasurer, and he was at the same time dismissed for general incompetency.

XXI.—INCOME-TAX.

245. The following statement compares the financial results of the last two years in this Division:—

DISTRICT.	1893-94.				1894-95.			
	Number of persons finally assessed.	Final demand.	Collection.	Percentage of collection on demand.	Number of persons finally assessed.	Final demand.	Collection.	Percentage of collection on demand.
1	2	3	4	5	6	7	8	9
		Rs.	Rs.			Rs.	Rs.	
Patna ...	1,982	67,251	67,176	99·8	2,031	74,288	74,288	100·
Gaya ...	2,373	65,206	61,743	94·6	2,651	68,891	68,693	99·7
Shahabad ...	1,494	39,086	38,101	97·4	1,480	39,535	38,870	99·4
Saran ...	2,747	75,352	74,551	98·9	2,777	76,030	74,068	97·4
Champaran ...	1,596	43,901	42,901	97·7	1,633	40,256	39,814	98·9
Muzaffarpur ...	2,385	64,545	62,786	97·3	2,426	64,514	62,025	96·1
Darbhanga ...	2,373	63,763	60,024	95·07	2,303	62,725	57,221	91·2
Total ...	14,950	4,19,104	4,07,882	97·3	15,301	4,26,239	4,14,979	97·4

The statement shows a total increase of 351 assessees and of Rs. 7,135 in the final demand and a slight improvement in the percentage of collections.

The increase in the number of assessees occurred in all the districts, except Shahabad and Darbhanga. Gaya shows the largest increase of 288 persons against an increase of 159 persons, mostly under Part IV. Patna and Muzaffarpur come next with increases of 49 and 41 respectively.

The final demand increased in four out of the seven districts, *i.e.* in Patna, Gaya, Shahabad, and Saran, the increase being Rs. 11,849; the other three districts, *i.e.* Champaran, Muzaffarpur, and Darbhanga, showing a decrease of Rs. 4,714.

There was therefore a net increase of Rs. 7,135 in the Division during the year under report, or of nearly 2 per cent. The largest increase was in Patna and Gaya, being 10·4 and 5·6 per cent. respectively. The largest decrease was in Champaran, and is due to the fact that in the preceding year one assessee's tax was temporarily enhanced from Rs. 723 to Rs. 4,516 on account of his having received accumulated interest of above two lakhs from one of his debtors, but it was again reduced to Rs. 729 during the year of report. The decrease in Darbhanga is said to be partly due to the transfer to other districts of the assessment against several assessees. But it is certain that the work there was not well done, and the Deputy Collector has been called to account.

The collections amounted to Rs. 4,14,979, or 97·4 per cent., on the final demand. The percentage of collections on the final demand reached the prescribed standard of 95 per cent. in all the districts, except Darbhanga, which fell short of it by 3·8. It will be observed that collections were best in Patna and Gaya, where there was also the largest increase in the final demand.

246. The outstanding balance on account of tax, penalties, and costs at the close of the year under report amounted to Rs. 18,051, Darbhanga and Muzaffarpur showing the largest balance, principally due to the late disposal of objections and to late assessment.

247. The population of the Division being 15,793,854, the average incidence of the tax was Re. 1 to every 37 persons against 37 persons in the

previous year. In the several districts the average number of persons assessed to each rupee of tax was as follows:—

Patna	...	... 24 against	26 in the preceding year.
Gaya	...	... 31 „	33 „ „ „
Shahabad	...	... 52 „	53 „ „ „
Saran	...	... 32 „	33 „ „ „
Champaran	...	... 46 „	42 „ „ „
Muzaffarpur	...	... 42 „	42 „ „ „
Darbhanga	...	... 44 „	44 „ „ „

As in the preceding year, the incidence was highest in Patna, being Re. 1 to every 24 persons, and lowest in Sahahabad, where it was Re. 1 to every 52 persons.

248. The following statement shows the number of objections filed during the year 1894-95 as compared with those of the preceding year:—

District.	1893-94.				1894-95.			
	Filed.	Disposed of.	Pending.	Percentage of objection to assessment.	Filed.	Disposed of.	Pending.	Percentage of objection to assessment.
1	2	3	4	5	6	7	8	9
Patna ...	209	209	...	10·5	118	118	...	5·7
Gaya ...	775	770	5	32·7	1,028	1,028	...	35·03
Shahabad ...	185	181	4	12·3	196	196	...	12·9
Saran ...	388	387	1	14·1	442	434	8	15·5
Champaran ...	200	198	2	12·5	220	220	...	13·2
Muzaffarpur ...	375	375	...	15·7	265	265	...	10·8
Darbhanga ...	455	416	39	19·08	399	388	11	16·5
Total ...	2,587	2,536	51	17·3	2,608	2,649	19	16·8

Of the total number, 2,668, filed during the year of report, 1,801 relate to the areas selected in the different districts for revision during the year under report, and 867 to the areas in which the previous year's assessments were adopted.

As in the previous year, Gaya shows by far the highest percentage of objections to assessments. The large number of objections and the large proportion of successful objections in Gaya appear to me to be due to two chief causes, viz., (*a*) the system of serving every assessee with a special notice in form L, and thus bringing his liability prominently to each person's notice in good time, and (*b*) the fact that the district of Gaya is already, as compared with the other Bihar districts, somewhat heavily assessed. I have noticed this matter fully in my Income-tax Report. The percentage of successful objections in Gaya was also very high, viz. 45·6 against 21·4 per cent. in the previous year. Over-zeal on the part of the assessor, no doubt, had something to do with this, but at the same time the Collector notices that the percentage was higher in the cases from the unrevised than from the revised areas, which points to the fact of the previously high assessment being a principal factor in the result.

In Darbhanga and Saran the percentages of successful objections were also high. In Darbhanga the cause is probably due to bad work generally in the department, and in Saran to cause (*b*) above.

249. Penalties to recover arrears of tax imposed in each district during the last two years were as shown below:—

District.	1893-94.	1894-95.
1	2	3
	Rs.	Rs.
Patna ...	251	18
Gaya ...	2,703	1,740
Shahabad ...	182	197
Saran ...	404	503
Champaran ...	182	706
Muzaffarpur ...	1,574	1,195
Darbhanga ...	812	663
Total ...	6,108	5,022

250. Coercive measures were resorted to in all the districts of the Division, particularly in Gaya and Muzaffarpur, as in the previous year. The reasons given for this in last year's report still appear to hold. It is satisfactory to find that in Patna, where collections were best, coercive measures were least resorted to.

251. The unpopularity of the tax is as great as ever, but the assessees pay it, without open complaint, as a necessary evil.

XXII.—MONETARY ARRANGEMENTS.

252. As reported in previous years, in the native bazars and among the people themselves, the copper coins in use are *lohia* or Gorackpuri pice. Government copper coin is received only from the post office and municipalities and from the public in payment of Government dues. The value of the Gorackpuri pice varies in the different districts and at different seasons. During the past year its exchange value in Gaya was about the same as in the previous year, viz. from 96 to 108 per rupee, while in other places it ranged from 104 to 112.

253. Currency notes to the value of Rs. 28,02,195 were received from the public in payment of Government dues, and of Rs. 16,21,750 in exchange for silver, against notes to the value of Rs. 33,87,855 in payment of public dues, and to the value of Rs. 18,39,805 in exchange for silver received in the previous year. The value of currency notes issued to the public in payment of Government dues and in exchange for silver amounted to Rs. 27,39,810 and Rs. 18,75,715 against Rs. 25,14,590 and Rs. 18,99,550 respectively in the previous year.

254. There were seven prosecutions under the Metal Tokens Act—all in the district of Champaran. The transactions of the Post Office Savings Banks and payment and issue of money-orders will be found in section XXXII of this report.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

255. The working of the portion of the East Indian Railway in the districts of Patna and Shahabad was satisfactory. Among the improvements which were made on the Company's lines in these districts may be mentioned—

(1) Two latrines were built, one at Mokameh for railway passengers, and the other at Bankipore for menial servants of the Company.

(2) Arrangements were made for supplying filtered water to carriages and passengers at Dinapore.

(3) A Protestant Church was opened at Dinapore for the use of the Company's servants.

256. There were 22 railway accidents in the Patna district during the year against 32 in the previous year. In these 17 persons were killed, the other 5 being cases of suicide. In the Shahabad district there were 14 railway accidents during the year, in which 7 persons were killed. In each case it appears to have been the victim's own fault. Crossing the line in front of trains and jumping out or trying to get into trains in motion were the causes of all the accidents involving loss of life.

One native driver was punished judicially.

PATNA-GAYA RAILWAY.

257. No steps have yet been taken for improved accommodation of third class passengers to meet the pressure during pilgrimage seasons. Complaints of want of punctuality in the running of trains still continue, and the mails for Calcutta, as noticed last year, are still detained at Bankipore for about four hours. A new railway station was opened at Tehta, between Mokhdumpur and Jahanabad, towards the close of the year.

BENGAL AND NORTH-WESTERN AND TIRHUT STATE RAILWAYS.

258. Three persons were killed and two were wounded by railway accidents in the Muzaffarpur district, and there were six accidents in which lives were lost in the Darbhanga district. The most serious of these occurred at Dulsinghsarai on the 19th October, in which three persons were killed (or died soon afterwards from their injuries) and 11 others were wounded. The accident was caused by a collision between a passenger and a ballast train, owing to negligence on the part of the station master and pointsman, both of whom were convicted and punished under section 101 of the Railway Act. Another of

the accidents was due to the negligence of a gateman, who was punished departmentally, the evidence being insufficient for a criminal prosecution. No accidents are reported from Champaran or Saran.

259. The Magistrates of Muzaffarpur and Darbhanga still complain of the insufficient accommodation for third class passengers during times of large gatherings, of want of punctuality in the running of trains, and of the insufficient arrangements for the supply of drinking water at some of the stations during the hot weather. I recognise the fact, however, that general complaints of this kind are not perhaps quite fair to the management, and I am asking the District Officers in future to bring to the notice of the Agent and Chief Engineer any instances of the kind which require attention. So far as my own experience goes, the Railway authorities are always ready to meet all reasonable demands as far as lies in their power.

260. During the past year the Laheria Serai station at the civil head-quarters of the Darbhanga district has been enlarged and improved. The want of a waiting-room is, however, complained of, and such a room is no doubt very much needed for the accommodation of the numerous first and second class passengers attending the different courts and Government offices at that station. A new station was opened at Turki on the Hajipur section during the year.

261. The following statement shows the results of the working for the past eight years of the joint undertaking, the Bengal North-Western and Tirhut State Railways having been worked independently up to the 1st July 1890 and as one undertaking by the Company since that date. It will be seen that the amalgamation has effected a considerable reduction of expenditure, the mean working ratio for the three years prior to the amalgamation in 1890 having been 54·7 per cent., whilst for the subsequent four years the ratio has been reduced to an average of 41·5 per cent.:—

	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Gross earnings ...	36,66,957	40,16,826	41,08,490	46,01,691	49,66,188	51,23,939	52,95,376	55,59,547
Working expenses	21,34,227	22,29,106	20,76,289	20,28,338	19,88,347	20,97,870	22,87,437	23,23,360
Net earnings ...	15,32,730	17,87,720	20,32,210	25,73,353	29,77,841	30,26,069	30,07,939	32,36,187

262. Both the passenger and the goods traffic during the past year show a satisfactory advance over the results of 1893, as will be seen from the following figures:—

Years.	Coaching traffic receipts.	Goods traffic receipts.	Steam ferry and miscellaneous receipts.	Total receipts.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1893 ...	20,83,488	25,86,872	6,25,016	52,95,376
1894 ...	22,31,219	26,87,731	6,40,597	55,59,547

263. The increase in the number of passengers carried in the two years was from 5,058,307 in 1893 to 5,484,914 in 1894, and in general merchandise from tons 637,432 in 1893 to tons 688,035 in 1894.

264. *Tramways.*—The Patna City tramway extends over a length of five miles, from the front of the Judge's Court to the Patna City. The terms of the settlement of the misunderstanding between the Company and the Patna

Municipal Commissioners were noticed in paragraph 304 of last year's report. The manner in which the line is worked is, however, still the subject of much complaint, and the Company have several times been fined by the City Magistrate for using horses unfit for work; the carriages are reported to be ricketty and the roadway in bad repair.

265. The income of the Company was Rs. 38,531-7-3 against Rs. 37,426-15 of the previous year, while the expenditure during the year amounted to Rs. 32,433-7-1 against Rs. 31,299-3 of the previous year, showing a surplus income of Rs. 6,098 in 1894 as against Rs. 6,127 in 1893.

266. The tramway at Dehri in the Shahabad district, about 7 miles in length, which was constructed by the Bengal Public Works Department in 1892-93 in connection with their quarries, continued to be used during the year in carrying road metal for District Board roads and for the Grand Trunk road.

267. The concession for the light feeder line of railway to the Tirhut State Railway from Segouli railway station to Raxaul, referred to in paragraph 302 of last year's report, was granted during the year by the Champaran District Board to Sir William B. Hudson, K.C.I.E., and an agreement, dated 16th March 1894, signed by the two parties, has since been approved by Government.

268. Regarding the proposed railway line from Lakhisarai to Gaya, mentioned in paragraph 303 of last year's report, no further information has been received in my office

Patna drainage works.

269. The drainage works in Patna, noticed in paragraph 307 of last year's report, have nearly been completed. The expenditure incurred during the year amounted to Rs. 1,08,768, which, added to Rs. 1,68,962 expended in the preceding year, comes to a total of Rs. 2,77,730 up to the close of the year under review. From the point of view of sanitation the general opinion, in which I concur, is that the scheme so far has been of little or no benefit, owing to the absence of any means for flushing the drains; and I see no hope of improving matters until the Patna City has been provided with an efficient system of water-works This matter was pressed upon the attention of the Municipal Commissioners by His Excellency the Viceroy and Governor-General on the occasion of his recent visit to this district, and I am glad to say that they appear to be giving heed to His Excellency's advice, for I understand that they have the question of raising a fund or a loan for the purpose under consideration.

Gaya water-works.

270. The experiments made in the bed of the river Phalgu for supplying pure water to the town of Gaya were carried out during the year, with the result of proving that excellent drinking water in sufficient quantity can in all probability be procured from this source. A rough estimate of the probable cost of the work, amounting to Rs. 6,00,000, has been prepared by Mr. C. A. Mills, Inspector of Works. The estimate and the connected reports are being printed.

271. The survey of the town of Gaya required for the above scheme as well as for its improved drainage has been continued during the year under report.

272. The Surajkund tank in the heart of the city of Gaya was partially cleansed during the year at a cost of Rs. 1,300 out of a sum of Rs. 2,400 contributed by Babu Chhota Lal Sijwar, C.I.E., for the purpose.

Arrah water-works.

273. The Arrah water-works were completed on the 23rd April 1894, on which date they were formally opened by His Honour the Lieutenant-Governor of Bengal. The works were inspected by the Engineer to the Sanitary Board in March last, who has sent in a favourable report. The machinery is all in good order. Two of the settling tanks have been temporarily put out of use, as they were leaking. They will be brought into use again as soon as the river rises. This temporary disuse of the two tanks does not, however, in any way affect the supply of clear water, as the remaining two answer all requirements; the river water being clear scarcely requires settlement. The amount of filtered water drawn off at the standposts is 120,000 gallons per diem, which is equal to about 4 gallons per head of the population.

274. The works up to date have cost Rs. 3,81,503. They are reported now to be in thoroughly good working order.

Embankments.

275. *Patna and Gaya.*—The only embankment in these districts is the Sakri embankment, situated at the trijunction of the districts of Monghyr, Gaya, and Patna. The maintenance charges were very small, amounting to only Rs. 146 in the former and Rs. 9 in the latter.

276. *Saran.*—There is only one public embankment in this district, viz., the Gundak embankment, which is maintained by the Public Works Department under contract rates levied by the Collector from the proprietors of the estates protected under section 63 of the Embankment Act. The embankment was properly maintained during the year of report. The financial results during the year are shown below:—

Arrear demand.	Current demand.	Total.	Collections during the year.	Balance.
1	2	3	4	5
Rs. 12,756	Rs 23,900	Rs. 36,656	Rs. 23,095	Rs. 13,561

277. *Champaran.*—In this district also the only public embankment is the Gundak embankment mentioned in the preceding paragraph. During the year under report the Gundak river encroached considerably on the 80th to 82nd miles of the embankment near the village of Dhahaha. This has necessitated a new retired line, for which a declaration under the Land Acquisition Act has been issued. The work was to be completed before this year's rainy season. I have not yet heard whether this intention has been carried out.

278. The expenditure incurred on this embankment during the year was Rs. 19.361 against Rs. 29,789 of the preceding year.

279. The gap between the Gundak and the Turki embankments, a length of 1,200 feet, was closed up by the construction of an embankment with a sluice in the channel leading to the Baye nala at a cost of Rs. 10,833, of which Rs. 4,866 were spent during the year.

280. Sanction of Government has also been obtained for the construction of a sluice gate at Barharwa near the 52nd mile of the embankment.

281. The financial results of the administration of the Gundak embankment in the Champaran district are shown in the following statement:—

Arrear demand.	Current demand.	Total.	Collection during the year.	Balance.
1	2	3	4	5
Rs. A. P. 149 5 3	Rs. 13,000	Rs. A. P. 13,149 5 3	Rs. A. P. 10,913 15 5	Rs. A. P. 2,235 5 10

282. *Muzaffarpur.*—In the Muzaffarpur district there are two lines of embankments, namely, the Gundak, above mentioned, and the Turki. The former, as stated above, is maintained under the contract, and latter is under the takavi system. Both embankments were properly maintained throughout the year. Some damage was done to the Turki embankment by the floods of the Bagmati, which necessitated extensive repairs.

283. The net demand on account of these embankments (arrear and current) was Rs. 22,203. Of this Rs. 15,197 were collected and Rs. 3 remitted, leaving an outstanding balance of Rs. 7,003 as compared with a similar balance of Rs. 13,899 at the end of the previous year.

284. *Darbhanga.*—In Darbhanga the Gundak and the Ganges embankments continued to be maintained on the contract and *takavi* systems respectively.

285. The subjoined table compares the cost of maintenance and recoveries in respect of each system during the last two years:—

YEAR.	Embankment.	Arrear of last year.	Demand of the current year.	Total.	Collection.	Balance.	Percentage of collection.
1	2	3	4	5	6	7	8
		Rs.	Rs.	Rs.	Rs	Rs.	
1893-94 ...	Gundak	3,611	2,119	5,730	2,269	3,461	39 6
	Ganges	1,703	5,479	7,182	4,013	3,169	55·8
	Total	5,314	7,598	12,912	6,282	6,630	Average. 48·6
1894-95 ...	Gundak	3,461	2,119	5,580	2,286	3,294	40·96
	Ganges	3,286	3,414	6,700	4,908	1 792	78·13
	Total ...	6,747	5,533	12,280	7,194	5,086	Average. 58·58

There has thus been a slight improvement in the collections during the year under review.

Irrigation.

286. There was no complaint made during the year as to the working of the canals in this Division. They continued to be of great service to the agriculturists. The following table compares the area irrigated and the financial working of the Sone Canals in Patna, Gaya, and Shahabad during the last three years:—

DISTRICT.	Area irrigated in acres.			Total demand, including arrears (exclusive of miscellaneous demand).			Total collection.			Remission.			Balance.			Percentage of collection.		
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
				Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs			
Patna ..	32,009	36,898	35,905	1,03,434	96,260	97,074	74,778	76,322	92,336	10,060	342	224	18,596	19,596	4,514	72·3	79·2	95·1
Gaya ...	44,213	45,145	42,515	1,29,410	1,09,593	97,646	1,13,525	1,02,691	93,297	1,674	195	179	14,311	6,707	4,170	87·7	93·7	95·5
Shahabad ...	2,89,916	2,69,040	2,24,832	8,29,332	7,35,098	5,94,043	7,71,169	6,55,249	5,58,231	3,280	4,295	3,689	54,883	75,554	32,123	93·0	89·0	93·9
Total ..	3,67,038	3,51,089	3,03,252	10,62,170	9,40,951	7,88,763	9,59,472	8,34,262	7,43,864	14,014	4,832	4,092	87,790	1,01,857	40,807	90 3	88·6	94·3

It will be seen that the total area irrigated was 63,786 acres less than in 1892-93 and 47,837 acres less than in 1893-94, the reason being the greater abundance of the rainfall during the year under review. The total demand for the year, including arrears, was Rs. 7,88,763, of which Rs. 7,43,864 were collected, and the small aggregate sum of Rs. 4,092 was remitted, leaving a balance due on the 31st March of Rs. 40,807 as compared with balances of Rs. 87,790 and Rs. 1,01,857 in the two preceding years. The result is extremely creditable to the Special Deputy Collector, who is in charge of the collections, and his staff.

287. It has been found that the system of freely giving long leases for irrigation has operated in an injurious manner by inducing the cultivators in villages near to the canals to convert an undue proportion of their rabi lands in paddy fields. Many of these are high sandy lands and absorb a larger quantity of water than is required for legitimate rice lands, with the result that the area ultimately irrigable is materially reduced. But a greater evil than this is that in seasons of drought it becomes impossible to supply a share of the water to villages which are further away even for their legitimate rice

lands. The favoured villages get full crops, partly paddy, where they should have cultivated rabi and bhadoi, while the excluded villages get absolutely none. I understand that the Superintending Engineer has brought the matter to the notice of the Chief Engineer to Government, and submitted certain proposals with a view to remedy the above defects.

Saran Canals.

288. The long-outstanding claims against the guarantors under the former system of working these canals have recently been satisfactorily adjusted, with the result that nothing remains due from any of them. It only now remains for the Collector to recover certain rates due to them from cultivators who have used the water. A revised notification offering leases of the different channels was published in the *Calcutta Gazette* in March last, fixing the full annual demand at Rs. 10,000, but I understand that no application has yet been received. These canals are under the direct management of the officers of the Public Works Department.

Madhuban Canal.

289. This is the only canal in the Champaran district, and 10,845 acres of land were irrigated by it during the year against 3,071 acres in the preceding year.

290. The damage done to the canal by the floods of 1893 was repaired during the year under report. The total expenditure incurred during the year for the maintenance and repairs of the canal amounted to Rs. 6,910.

Roadside wells.

291. In paragraph 312 of last year's report I noticed the action that had been taken by certain District Boards in making use of section 76 of the Local Self-Government Act to acquire property in roadside wells along the chief traffic routes, in order to provide for their proper maintenance and cleansing in future. A good deal had been done in this direction during the past year in some of the districts, as the following statement shows. I have again called the attention of the District Officers to this very important matter:—

Districts.	1893-94.				1894-95.			
	Number of wells repaired or cleansed.	Number of new wells constructed.	Number of wells provided with chain bucket and *latha*.	Cost of operation in columns 2, 3, and 4.	Number of wells repaired or cleansed.	Number of new wells constructed.	Number of wells supplied with chain bucket and *latha*.	Cost of operations in columns 6, 7 and 8.

XXIV.—COMMUNICATIONS.

292. The communications in the Division, generally, have been maintained in good order throughout the year. Fortunately there was no repetition of the heavy floods which occurred in the northern districts last year, and the roads, which were then so seriously damaged, have now for the most part been repaired, and several of the more important bridges which were washed away have been rebuilt.

293. The total outlay for the year under report on both original and repair works was only Rs. 8,18,576 as compared with Rs. 10,09,562 expended last year.

294. The following table will show the expenditure in each district on both original works and repairs, the budget allotments, and the percentage of expenditure under both heads of works:—

District.	Original works.			Repairs.		
	Budget allotment.	Outlay during the year.	Percentage.	Budget allotment.	Outlay during the year.	Percentage.
1	2	3	4	5	6	7
	Rs.	Rs.		Rs.	Rs.	
Patna ...	36,906	34,076	92 33	64,115	62,221	97·04
Gaya ...	1,51,890	67,978	44·75	83,069	58,951	70·96
Shahabad ...	45,456	44,428	97·74	88,155	80,618	91·45
Saran ...	1,17,330	60,752	51·77	54,078	51,845	95 87
Champaran ...	42,405	38,667	91·20	32,640	29,940	91·72
Muzaffarpur ..	1,07,311	1,00,768	93·90	65,192	61,689	94·62
Darbhanga ...	52,867	45,636	86·32	92,802	81,007	87·29
Total ...	5,54,165	3,92,305	70·79	4,80,051	4,26,271	88·79

The above figures show that, with the exception of Gaya and Saran, the percentage of expenditure on original works varied from 86·52 to 97·74 of the budget grants. When it is considered that the accounts are closed on the 31st March, when a considerable portion of the working season still remains unexpired, this result may be taken as on the whole satisfactory. The lowest percentage is in Gaya, and the failure to work up to the full budget grant is reported to be due, partly to delay in obtaining Government sanction to certain plans and estimates, for which provision was made in the budget, and partly to some of the contractors having failed to work up to time. In Saran, although the percentage is only 51·77 up to the end of March, the original works have all been completed by the present date. Muzaffarpur occupies the first place in the Division for the year, having spent Rs. 1,00,768 out of an allotment of Rs. 1,07,311.

295. The percentage of the outlay on repair works as compared with the budget grants varies from 70·96 to 97·04, and no less than the five of the seven districts in the Division have spent 90 per cent. of their allotments. This result is also satisfactory.

296. The following is a brief summary of the works undertaken by the various District Boards in the Division.

297. *Patna.*—The important girder bridge over the Poonpoon river on the Putwa-Hilsa road was completed during the year at a total cost of Rs. 92,968, showing a large saving on the estimate. The metalling of the same road was continued during the year, and up to the present the total expenditure on this estimate has amounted to Rs. 88,954. Two important bridges, commenced in the preceding year over two of the branches of the Punchana river on the 16th and 18th miles of the Bihar-Bakhtiarpur road, were completed during the year of report. A causeway was also constructed across another branch of the

Punchana river, and the first two miles of the Bihar-Ekangerserai road were metalled. With the exception of a bridge which was constructed on the Barh-Sahsorah road, the other works undertaken in this district were not of sufficient importance to deserve separate mention.

298. *Gaya.*—The three important iron girder bridges over the Daroo, Mohurea, and Morhur rivers on the Jahanabad-Arwal road, which were commenced in the year 1893-94, were completed during the year. The estimate for the fourth girder bridge on this road over the Ghanghur nala had to be revised, the waterway allowed in the original estimate being considered insufficient, as the heavy flood of the previous year had widened the stream considerably. The revised estimate has received the sanction of Government, and the work is in progress. When this bridge is completed, there will be only one unbridged stream on this road, viz. the Poonpoon. The East Indian Railway have recently dismantled and rebuilt the Morhur bridge on the Patna-Gaya line, and it is understood that the bridge over the Dharda at Jahanabad will also be reconstructed. If the girders of the latter bridge would be purchased at a reasonable cost, they could be utilised in spanning the Poonpoon, and if this can be carried out, the very important feeder road will be bridged from end to end. The total cost of the three bridges which are already completed is Rs. 37,521. The raising and bridging of the Gaya-Shewganj road is now practically finished. This important line of communication cuts off a considerable distance in the journey from Gaya to Aurangabad and the west of the district. The amount spent up to the end of the year on raising this road was Rs. 31,899, and on culverts Rs. 27,606. A girder bridge of 60 feet span has been constructed over the Sabinala, on the Gaya-Sherghati road, in place of an old native-built bridge which was washed away by heavy floods a few years ago. The cost of this bridge was Rs. 15,888. The raising and bridging of the Nawada-Pakribarawan road was continued during the year, and now approaches completion. An important road in the south of the district, from Aurangabad to Moharajganj, was raised and bridged throughout. The total expenditure on the former of these works up to the present date has amounted to Rs. 20,042 and on the latter Rs. 23,889. The platforms of two large bridges over the Jamuria and Kowali streams on the Gaya-Daudnagar road have been renewed. The old platforms which were of timber and very rotten have been replaced by iron rolled joists. Another important feeder road from Jahanabad to Husalganj was nearly completed during the year. The road from Jahanabad to Bandhuganj was partly raised and bridged at an expense of Rs. 16,240, and the metalling of the Rowsilla and Pretsilla road was commenced. This road is very largely used by the pilgrims who visit Gaya, as Pretsilla is one of the most important shrines in the town. This work was therefore urgently needed, and when completed will be a great boon to the public. The other original works carried out in this district during the year are of minor importance.

299. *Shahabad.*—The budget allotments for both original works and repairs were fully worked up to, with the exception of one work, the raising of the Gurhani-Bhita road, in which instance the contractor failed to complete his work. The allotments for original works were, however, much smaller than usual. This is due to the fact that the gross income during 1894-95 was Rs. 1,25,930 less than in the previous year. The actual cash balance on 1st April 1893 was Rs. 1,40,194. Out of this amount the District Board contributed Rs. 1,00,000 to the Arrah water-works, which reduced the opening balance on the 1st of April 1894 to Rs. 24,600 only. Another cause which led to less money being available for original works was the very heavy expenditure on repair works, which is due to the large mileage of metalled roads in this district. Among the important original works which were completed during the year, the following deserve to be mentioned:—

The first four miles of the Sasaram-Arrah road were metalled, and the improvements on the Kailwar-Baheara road were continued. This latter road connects the East Indian Railway and the head works of the Arrah water-works. It is being raised and metalled throughout, so as to provide means of communication at all times of the year. An important bridge over the Gurhani river was renewed, and the construction of the Bharauni bridge and the raising of its

approaches were completed. The works in connection with the improvement of the Kailwar-Arrah road were also finished. Two dip bridges, which are constructed so as to allow very heavy floods to pass over them, were built on the Bundtoli-Bulbatra road and the Arrah-Salempur road. A bridge was also constructed over the Sonadia nala on the last-mentioned road, and an inspection bungalow was erected at Berhampore on the Kailwar-Buxar road. This bungalow was urgently required, as it is the only inspection bungalow between Kailwar and Buxar, a distance of about 60 miles.

300. *Saran.*—The budget grant for original works in this district was Rs. 1,17,330, being the highest in the Division with the exception of Gaya. The expenditure amounted to Rs. 60,752 up to the 31st of March, and the works have been practically all completed since that date. This is a very marked improvement on last year's work. Amongst the more important items, the following may be mentioned:—

Three miles of the Chapra-Sonepur road, three miles of the Khira-Ramkola road, and two miles of the Sitalpur-Makair roads were metalled. Brick side-drains were constructed along the sides of the road running through the Amnour bazar. This is a great improvement, as this portion of the road was practically impassable during the rains. The "liks" or side tracks of the Chapra-Rewaghat road were raised and improved from the third to seventh miles. An important bridge was constructed over the Gandak river on the road from Siwan to Basantpur. The raising and bridging of the Andar-Nurhan road was commenced, the expenditure during the year being Rs. 10,125. Work was started on the improvements of the Mirganj-Thaway road. This is an important road, as it connects the two subdivisions of Gopalganj and Siwan. The part now being raised and metalled was liable to be flooded during the rains. Three roads was demarcated, namely, the Siwan-Siswan, Siwan-Dharauli, and Siwan-Nugwa roads. An important bridge was commenced at Mushruk, on the Chapra-Sutterghat road, to replace an old decayed wooden bridge which existed formerly. The new masonry bridge has been completed since the 31st of March. Some 13 minor culverts were constructed in different parts of the district.

301. *Champaran.*—Champaran is by far the poorest district in the Division so far as road cess collections are concerned, and the District Board was able to budget only Rs. 42,405, of which Rs. 38,667 were expended during the year. The result is satisfactory. The money spent in Champaran was principally for small bridges on different roads in the district, and for renewing 13 culverts which were in a ruinous condition on the Bettiah-Bulther road. Materials were collected and well curbs prepared for a double 20 feet span arch bridge on the second mile. The Motihari-Mohsi road was improved, and 10 culverts of various sizes were built on the Shikarpur-Ramnagar road. Several culverts were also constructed on the Ramnagar-Bagaha road, and an iron bridge of 25 feet span was built on the Lagunoha-Bagaha road. A bridge over the Imirti river on the Motihari-Dhaka road was partially destroyed in last year's floods, and three additional spans of 25 feet each have now been added to it. Materials were collected for the construction of culverts on the Turkowlia-Sengaon road. An important bund called the Ticaha bund, which protects a large area of country from being flooded in the rains, was completed during the year. A causeway some 480 feet long, with a double 2′ 6″ arch culvert in the centre, was commenced on the Dacca-Padmohan road, but owing to the lateness of last year's rainy season it could not be carried to completion by the 31st March. Five culverts were constructed on the Lowria-Shikarpur road, and several minor culverts and pipe-drains were built in different parts of the district. Nearly all the works budgeted for were completed by the end of the official year, but a few bills were not ready and therefore could not be paid.

302. *Muzaffarpur.*—Muzaffarpur shows the highest expenditure of all the districts in the Division for the past year, so far as original works are concerned. A great quantity of important work was carried out, and the following deserve separate notice:—

A portion of the Korlahia ghat road was raised above high flood level and metalled during the year. On the Gopinathpur road two bridges were constructed, giving an additional 70 lineal feet of waterway, the formation of the

road was improved, and the limits of the District Board lands were permanently demarcated. Four masonry bridges, affording 150 lineal feet of waterway, were commenced on the Sursand road, the expenditure during the year being Rs. 7,216. Two large masonry viaducts, giving 345 feet of waterway, which were commenced the year before on the Sheohar road, were completed during the year, and two more, aggregating 270 running feet of waterway, were commenced. The expenditure against these works was Rs. 15,535. Five minor culverts were constructed on the Sereya road, and the road was otherwise improved. On the Arizpur road a masonry bridge of 9 spans of 15 feet was built over the Noon river, costing Rs. 12,384, and a similar bridge was commenced over the Dhanoha-Nasi on the Jeintpur road. At the end of the official year the masonry was completed up to the springing of the arches. Forty-eight minor culverts were con structed in various parts of the district, and 22 timber-topped bridges were arched over. Some sandy portions of the Karlahiaghat, Pusa, Deorea, and Sahibganj roads were metalled, and materials were collected for metalling a portion of the Rewaghat road. The progress made in this district during the year is particularly creditable to the District Engineer, Mr. Disney. The work is reported by the Inspector of Local Works, to be as good in quality as it is in quantity.

303. *Darbhanga.*—The greater part of the work in this district consisted of repairing the damages caused by the unprecedented floods of the preceding season. Additions and alterations were carried out to the Dhoi iron bridge of 6 spans of 36 feet each on the Darbhanga-Bohcara road at a cost of Rs. 22,760. This bridge has been partly destroyed by the floods above referred to. Another bridge, which was seriously damaged on the Madhubani-Banipati road, has been replaced by an iron bridge of 6 spans of 30 feet. A masonry bridge of 5 spans of 20 feet has been constructed over the Jamuria river of the Samastipur-Hursingpur road in place of an old rickety timber bridge. Besides the above works, seven new culverts were constructed during the year on different roads in the district, and three culverts, which remained unfinished at the end of the previous year, were also completed. A sum of Rs. 6,254 was spent in surveying the district roads and roadside lands in anticipation of the cadastral survey. This is an important matter, and has been attended to, I believe, in all the four northern districts. An inspection bungalow was constructed at Samastipur, and materials for another (to be built at Roserah) were collected. The large sum of Rs. 37,099 had to be spent in repairing flood damages. As reported last year, these damages were very heavy, and it will take the Board, which is still heavily in debt to Government, some years before it will be able to restore all its roads to a satisfactory condition.

The Collector of Darbhanga in his report remarks:—I consider the state of the roads to be on the whole excellent. Coming from a Bengal district, they strike one as being very good. I drove over all the Samastipur subdivision, part of it in a carriage and pair, and all over the Madhubani and part of the Sadar, and met with no difficulty. There are places where floods have damaged the roads, but they are the only bad parts.

Provincial road.

304. The section of the Grand Trunk Road, extending from Bhuluachutty to Baroon in the Gaya district, was, under the instructions of the Secretary to the Government of Bengal in the Public Works Department, handed over by the District Board of Gaya to the Superintending Engineer, Sone Circle. The only Provincial road, therefore, which is now maintained by a local authority is the road from Dinapore Cantonment to the Dinapore Railway station at Khagoul This road is maintained by the District Board of Patna, there being an annual Government grant of Rs. 5,000 Last year the expenditure amounted to Rs. 4,377, and the unexpended balance will be added to the grant for the current year.

Village roads.

305. The total amount spent in the Division on village roads was Rs 63,602 as compared with Rs. 79,899 expended in the previous year. The following statement shows the amount spent in each district of the Division during the year. As usual, Saran stands highest on the list, and the expenditure was lowest in Champaran. In all districts, with the exception of Champaran (where the

work is done by the District Engineer), these repairs are carried out by the Local Boards in whose areas the village roads lie:—

District.	Total length.	Outlay.	Rate per mile.	Remarks.
1	2	3	4	5
	Miles.	Rs.	Rs.	
Patna	586	8,628	14·7	
Gaya	563	4,787	8·5	
Shahabad	1,433	12,950	9·2	
Saran	1,680	17,796	10·6	
Champaran	318	2,277	7 1	
Muzaffarpur	496¾	7,526	15·1	
Darbhanga	703	9,638	13 7	
Total ...	5,784¾	63,602	10·9	

Most of these roads are unbridged surface tracks, and I have laid it down as a principle that, except in special cases, the cost of the repairs should not be more on the average than Rs. 10 per mile. This limit, however, has been slightly exceeded in Saran and heavily exceeded in Patna, Muzaffarpur, and Darbhanga. In Muzaffarpur the rate per mile is practically the same as that of the previous year. In Patna and Darbhanga the rates of the previous year were Rs. 27·17 and Rs. 18 per mile respectively, so that a considerable reduction has been effected in these two districts. The attention of the District Boards concerned will be again drawn to this matter, with a view, if possible, to limit the average expenditure to Rs. 10 a mile in future. In special cases, as, for instance, where any bridging is required, larger allotments can be made if due reasons are shown. A sum of Rs. 6,198 was spent by the District Board of Gaya on the improvement and maintenance of Government estate roads. The amount was paid to the District Board by Government as a special khas mahal grant.

Tree-planting.

306. The total amount spent in tree-planting in the entire Division during the year was Rs. 7,340, and it was distributed as follows:—

	Rs.
Patna	725
Gaya	1,888
Shahabad	3,207
Saran	1,432
Champaran	88
Muzaffarpur	Nil.
Darbhanga	Nil.

In three of the districts, namely, Patna, Gaya, and Champaran, no new trees were planted during the year, but the amounts spent were incurred on the maintenance of existing trees. In Shahabad the new trees which have been planted are reported to be "mostly timber wood," by which it is understood that trees which will hereafter give valuable timber have been preferred to other varieties and to fruit trees.

In Saran, on the other hand, most of the trees planted during the year are reported to be mango trees. Of the amount spent in Saran, Rs. 478 represent the cost of establishment. The result of the tree-planting in recent years in Shahabad has been very satisfactory, and this is due to the personal interest taken by the District Engineer, Mr. Edwards, in this branch of his work.

307. The following statements show (1) the length of metalled and unmetalled roads, whether maintained by District Boards, Local Boards or Municipalities, and (2) the allotments and expenditure incurred on works in the several districts of the Patna Division during the past two years:—

Statement showing the lengths of metalled and unmetalled roads maintained by the District Boards, Local Boards, and the Municipalities during the year 1894-95.

Test relief works.

308. It was not found necessary to open any test relief works during the past year.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

309. The Lodging-house Act is in force only in Gaya. The receipts of the year, including an opening balance of Rs. 2,2.2, amounted to Rs. 14,968 against Rs. 10,831 in the preceding year, which included an opening balance of Rs. 694. The expenditure amounted to Rs. 12,484 against Rs. 8,609, leaving a balance of Rs. 2,484. Rupees 2,500 was contributed to the Gaya Pilgrim Hospital and Rs. 1,221 to the Cholera Hospital, and Rs. 5,705 was spent on sanitary improvements.

310. The number of licenses taken out for the accommodation of 15,636 pilgrims was 320 against 421 in the previous year for 13,212 pilgrims. It will be observed that, although the number of pilgrims shows an increase, the number of licenses taken out is smaller than in the preceding year. This is because the rule is now fully enforced whereby no lodging-house is licensed unless fees are paid for the full number of pilgrims it can accommodate.

311. There were 35 prosecutions for breaches of the Act against 23 in the preceding year. All these were against persons who were found accommodating pilgrims without any license. The fines amounted to Rs. 1,191 against Rs. 113 in the previous year.

312. All the lodging-houses were inspected by the overseer and most of them by the Health Officer himself, who found them in good order. Strict supervision was exercised in the matter of lodging-house drains, privies, &c., the number of notices issued in this regard being 996 against 727 in the previous year.

313. The number of pilgrims admitted into the cholera hospital was 52, of whom 42 died. The Health Officer reports that the ratio of mortality is apt to be very high amongst these people, as they are not in a condition to resist disease, being reduced by hardship, fasting, fatigue and the excitement of their peculiar methods of worship. Altogether only 77 deaths are said to have occurred amongst pilgrims from all causes against 282 in the previous year. I confess I distrust these figures, having regard to the unusually unhealthy character of the year, and I am asking the Magistrate to make a further enquiry into the matter.

oth 314. This Act is in force in all the districts of the Division, and appears to

Serais and Puraos Act XII of 7. have been properly worked in Patna, Shahabad, and

repor Muzaffarpur.

the co XXVI.—EDUCATION.

Shaha 315. The total number of schools in the Division rose during the year taken l 6,265 to 6,560, and the pupils from 160,527 to 169,749, showing an 307se of 295 schools and 9,222 pupils. The increase occurred principally unmetalleary schools.

Municipal3. In Patna there was an increase of 33 schools and 1,451 pupils. The the several occurred principally in primary schools. There was an increase of three mber of high schools, due to the opening of three unaided schools at

Patna, Dinapore, and Bihar. Lower Primary schools show a gain of 29 schools and 1,361 pupils The increase is due to the re-appearance of schools which had disappeared in the preceding year, owing to failure to earn rewards. The Female schools increased by four, but the number of pupils decreased by 99. The falling off is attributed to the exclusion from the register of the names of such girls as declined to appear at the school examinations. There was a decrease of four special schools, due to the abolition of guru-training classes attached to Middle Vernacular schools, under paragraph 26 of the Government Resolution on the Report on Public Instruction for 1893-94.

317. In Gaya there was an increase of 75 schools and 1,766 pupils. The increase was practically confined to Lower Primary schools, and is due to the opening of new schools in backward parts of the district on the stipendiary system. The number of special schools decreased from four to three, owing to the closing of the madrassa in the Tikari Municipality.

318. In Shahabad there has been a gain of 52 schools and of 864 pupils in public institutions. The gain was highest in the Lower Primary schools for boys. The reason of the increase in this class of schools is that a good many indigenous schools conformed to the departmental lower A or B standard. The number of special schools decreased by two and the pupils by 79, the reason being that two high class Sanskrit schools that were returned among this class have this year been returned as private schools under instructions from the Director of Public Instruction. Among the existing five special schools are two madrassas at Arrah and one at Sasaram, one technical school at Dumraon, and the Railway Coolie school at Buxar. Five new girls' schools were opened, of which three with 54 pupils are in the Board's area, and two with 47 pupils in the municipal areas. Prizes and rewards in the shape of ornaments, clothes and books, &c., were distributed among the girls who were successful at the departmental examinations. Five new Lower Primary schools were opened on the Rohtas plateau during the year. There are now altogether six schools on the plateau for the use of the hill population. There are only 87 pupils at these six schools, but the Magistrate hopes that with time and patience the schools may become popular and be more largely attended. The District Board have succeeded in converting three of the Board's Middle Vernacular schools into grant-in-aid schools, and the savings thus effected have been applied to primary education. The rules for advance payments of rewards to backward schools under the reward system have been introduced. Some progress has also been made in inducing zamindars and mahajans to contribute towards the support of Middle and Primary schools in their neighbourhood.

319. In Saran there has been a net gain of six schools and 749 pupils. The increase was in primary schools. The Chapra zilla school, which is a self-supporting institution, is one of the best managed zilla schools, and stood first in Bihar at the last Entrance Examination. Female schools show an increase of five schools, but a decrease of 23 pupils. There are two special schools—(1) Sir Rivers Thompson's Gautam Pathsala at Godna in the Revelganj Municipality, teaching Sanskrit logic, and (2) Bharatishary Sanskrit Tol at Chapra, supported by private enterprise. The former receives a special grant of Rs 40 a month from Government.

320. In Champaran there was an increase of 44 schools and 1,212 pupils, principally under Lower Primary schools. The Moghya Dome school at Chowturwa was attended by 13 pupils. It received a stipend of Rs. 3 a month. The Magistrate says the progress was not satisfactory. I have separately reported on this matter in my report to Government on the Moghya Dome settlements.

321. In Muzaffarpur there has been a net gain of 109 schools and 2,264 pupils. High English schools have declined by one owing to the abolition of the Tirhut academy in Sitamarhi. This is not a matter of regret. There was no real necessity for an English school of this class in an out-of-the-way place like Sitamarhi, and the effect of keeping it up could only be to keep boys away from the much better institutions of the same kind at the district head-quarters. It was peculiarly a case where, if the parents of boys wished for a small special school for high English education, they should be required to pay all expenses themselves. There was, however, a large increase in Lower Primary schools.

322. In Darbhanga the number of schools rose from 828 to 830 and the pupils from 22,431 to 23,557, the increase being chiefly in Primary schools.

There is one special school in the district, that is, the Madhubani Sanskrit School, aided by the department. It prepares boys for the title examination of Calcutta and Bihar Sanskrit Sanjivan examinations. Female education has made some improvement, there being 31 girls' schools with 446 pupils against 27 schools with 414 pupils in the previous year.

323. The percentage of boys of school-going age attending schools for the Division has increased from 13·9 to 14·7. Patna stands first in this respect, the percentage being 30·6, or nearly double that of Gaya, which stands second.

324. The cost per head of pupil for the Division was Rs. 4-1 against Rs. 3-15-1 in the preceding year. It ranged from Rs. 25-9-11 in Patna to Rs. 17-2-5 in Gaya for high schools, from Rs. 12-0-5 in Darbhanga to Rs. 7-3-4 in Shahabad for Middle schools, from Rs. 2-12-5 in Gaya to Rs. 1-12 in Darbhanga for Primary schools, and from Rs. 96 9-1 in Patna to Rs. 7-9-4 in Saran for special schools.

325. The following table gives the number of Female schools and the pupils attending them in the several districts of the Division :—

District.	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Patna ...	102	1,643	106	1,544
Gaya ...	12	311	14	321
Shahabad ...	10	296	13	292
Saran ...	97	1,495	102	1,472
Champaran ...	2	77	3	91
Muzaffarpur ...	10	247	12	266
Darbhanga ...	27	414	31	446
Total ...	260	4,483	281	4,432

The number of girls at school decreased from 1,643 to 1,544 in Patna (owing to the cause stated in paragraph 316 above), and in a less measure in Shahabad and Saran, while it increased in all other districts. There are also 2,587 girls reading in boys' schools.

326. On the whole, judging from numbers, it cannot, I fear, be said that female education is making much progress in Bihar. Two Bengali girls appeared at the last Upper Primary scholarship examination from the Bankipore girls' school, and both passed, one in the first and the other in the second division. The former gained a scholarship of Rs. 3 a month, tenable for two years. One girl from Kutumba in Aurangabad subdivision passed the Lower Primary scholarship examination.

327. The percentage of Muhammadan pupils to the total number is shown in the following table for the last two years:—

District.	Percentage of Muhammadans to total population.	Percentage of Muhammadan pupils to total number of pupils.	
		1893-94.	1894-95.
1	2	3	4
Patna	11·36	17·2	17·08
Gaya	10·6	16·2	17 4
Shahabad	7·1	11·2	11 9
Saran	11·8	13·6	14·0
Champaran	12·0	15·9	17·01
Muzaffarpur	11·7	16·0	16·8
Darbhanga	14·3	18·8	16·1

It will be seen from the above that the proportion of Muhammadan pupils has slightly increased in four and fallen off in three of the districts; also that in all of the districts a larger percentage of Muhammadan boys go to school than of non-Muhammadans.

328. With a view to encourage Muhammadan education in the district of Patna, 21 stipendiary maktabs on Rs. 2 a month each have been established at places where they were urgently needed. The majority of the Muhammadan boys reading in middle schools in the same district are permitted to read free; and in the Lower Primary scholarship examination, when a Hindu and a Muhammadan boy earn the same marks, the scholarship is awarded to the latter. This seems scarcely fair, and I have suggested to the Magistrate that in such a case the pecuniary circumstances of the two boys should decide the question. The Magistrate of Gaya remarks:—"Muhammadans number only 10·6 per cent. of the population of the district, so that they are really attending school in far higher proportion than Hindus are." The Magistrate of Saran writes:—"The percentage of Muhammadan population to the total population in the district being 11·8, it is satisfactory to find 14 Muhammadan pupils to every 100 pupils under education. The percentage is highest in the high school and indigenous schools (21), 17 in middle English, 10 in middle vernacular, 8 in upper primary, and 11 in lower primary schools." In Champaran the total number of Muhammadan pupils in the high schools was 36 against 28 of the preceding year In the middle English there were 73 against 84, in the middle vernacular there were 18 against 15, in the upper primary schools there were 70 against 82, and in the lower primary schools there were 2,303 against 1,970 of the preceding year. In Muzaffarpur there has been a total increase of 509 Muhammadan pupils. The increase occurs in all classes of schools except high English and upper primary. In Darbhanga the number of Muhammadan pupils has increased from 4,225 to 4,865.

329. Besides the above, there were 3,552 private institutions and 32,203 pupils attending them, as noted below:—

District.	Number of private institutions.	Number of pupils.
1	2	3
Patna ...	621	5,269
Gaya ...	461	4,519
Shahabad ...	324	2,739
Saran ...	340	3,298
Champaran ...	504	4,200
Muzaffarpur ...	876	6,157
Darbhanga ...	626	6,021
Total ...	3,552	32,203

These are indigenous patshalas and maktabs which do not conform to the rules of the Department.

330. There has been a decrease in the number of special schools from 30 to 22. Patna shows a decrease of four, which is due to the abolition of guru-training classes attached to middle vernacular schools. Gaya shows a decrease of one, due to the closing of the madrassa in Tikari Municipality; and Shahabad shows a decrease of three, due to the exclusion of two high class Sanskrit schools from this class, they being treated as private schools, as already noticed above, and to the abolition of a guru training class attached to a middle school.

331. In the Bihar Industrial School there were 32 students in the Apprentice department and 37 in the Artisan department on the 31st March 1895. Thirty students of the Apprentice department get stipends from the District Boards in the Bihar Circle varying from Rs. 5 to Rs. 10 each. All the artisans get stipends at the rate of Rs. 3 per month from the school funds, except two who are paid at the same rate from money given by private persons.

332. The total expenditure incurred on this school during the year was as follows:—

Serial No.	Items of expenditure.	Amount.
1	2	3
		Rs. A. P.
1	Establishment ...	2,720 7 2
2	Stipends ...	1,123 10 7
3	Tools, plant and materials	2,595 15 3
4	Contingencies ...	375 4 1
	Total ...	6,815 5 1

333. The school was inspected twice during the year by the Principal of the Sibpur Engineering College. Following the advice of this gentleman, the General Committee of the Bihar Industrial School have recommended the amalgamation of the school with the Survey class attached to the Patna College. The Principal of the Patna College has assented to the scheme in the main, and the proposal is now before Government for orders.

XXVII.—DISPENSARIES AND HOSPITALS.

334. The subjoined abstract shows the number of dispensaries and hospitals in each district during the year 1894, their income, and the average number of patients treated:—

District.	Number of dispensaries.	Income from— Government.	District Board.	Municipality.	Subscription.	Total.	In-patients.	Out-patients.	Ratio per cent. of out-door patients to total population.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Patna ...	11	676	6,411	22,077	1,118	30,282	34·72	89·62	6·29
Gaya ...	8	761	8,545	7,665	3,486	20,457	13·30	73·52	2·3
Shahabad ...	8	2,699	2,826	7,705	6,660	21,390	9·18	97·91	3·7
Saran ...	10	520	3,874	9,071	9,905	23,370	19·17	104·07	5·91
Champaran ...	5	2,965	1 500	4,183	13,896	22,544	20·31	19·75	3·6
Muzaffarpur	4	98	4,000	1,514	3,887	9,499	11·33	80·69	1·9
Darbhanga ...	8	8,873	2,673	3,724	17,858	33,128	9·80	85·71	4·1
Total ...	54	16,592	29,829	55,939	56,810	1,60,670	16·83	78·75	3·9

During the year under review there were 54 dispensaries against 52 in the preceding year. The increase is owing to the opening of two new dispensaries, viz., at Sherghatty in Gaya and at Samastipur in Darbhanga.

There is a large increase in the total income of the dispensaries from Rs. 1,29,810 in 1893 to Rs. 1,60,670 in 1894. Municipal grants show a material increase in all districts, except Muzaffarpur and Darbhanga, and District Board grants in all, except Gaya and Saran. It will be observed that in several districts where the latter grants were formerly very inadequate, the District Boards are now coming to a sense of their duty in this respect. There was a falling off in voluntary subscriptions in the first four districts, but this was more than made up for by the large increase from Rs. 4,472 to Rs. 13,896 in Champaran, the difference representing the grant of nearly Rs. 9,000 by the Bettiah Raj for the support of the Dufferin Hospital at Bettiah. Similarly of the large item of Rs. 17,858 under the same head against Darbhanga, over Rs. 13,000

represent the costs incurred by the Maharaja on account of the Municipal and Dufferin Hospitals supported by him at Darbhanga. Otherwise it must, I fear, be accepted as a regrettable fact that there is a growing tendency among the general public to tie up their purse-strings and to leave the support of dispensaries more and more to the different local funds. The large increase from Rs. 654 to Rs. 8,873 in the Government grant to Darbhanga is due to a subsidy of over Rs. 7,000 for the construction of a new dispensary at Samastipur.

335. The total number of in and out patients treated in each district during the past two years are shown below :—

District.	Total number treated.					
	In-patients.		Out-patients.		Total.	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
Patna ...	3,254	3,399	90,254	111,393	93,508	114,792
Gaya ..	1,843	1,827	40,810	50,499	42,653	52,326
Shahabad ...	1,411	1,407	81,704	77,976	83,115	79,383
Saran ...	995	1,100	129,263	145,932	130,258	147,032
Champaran ...	1,327	1,677	62,981	67,909	64,308	69,586
Muzaffarpur ...	962	932	49,193	54,112	50,155	55,044
Darbhanga ...	1,332	1,368	112,542	116,185	113,874	117,553
Total ...	11,124	11,710	566,747	624,006	577,871	635,716

The total number of patients treated in all the 54 dispensaries during the year was 635,716 against 577,871 in the previous year, showing an increase of 57,845. The increase occurred in all the districts, except Shahabad, where there was a slight decrease. The general increase is no doubt in a great measure due to the unusual unhealthiness of the past year. In the case of Shahabad, however, the result does not answer to this theory, for it was the most unhealthy of all the districts.

336. In Patna there was an increase of both in and out patients, which is attributed (1) to necessity of medical assistance by spread of disease, and (2) to greater appreciation by the people of the English method of treatment.

337. In Gaya there was a slight decrease of in-patients, but a large increase of out-patients. The increase is attributed to the great prevalence of malarial fever during the year, and also to the increasing popularity of the European method of treatment. The female ward of the Gaya Pilgrim Hospital continued under the charge of the lady doctor of the Lady Dufferin Fund. Miss Perry was on leave to Europe from the 15th March 1894 to the end of the year. Mrs. Scott was appointed in her place, and joined on the 8th April 1894. In the interval the Assistant Surgeon looked after the female department. The attendance in this department has steadily grown since it was organised. The total number of patients treated in it was 4,710 in 1892, 5,284 in 1893, and 5,767 in 1894. The number of in-patients was the same in 1894 as in the previous year, namely, 408. The annual income of the Gaya branch of the Lady Dufferin Fund amounts to Rs. 3,820, of which Rs. 1,200 is a contribution from the District Board and Rs. 600 from the Tikari Raj. The remaining sum is the interest on Rs. 57,700 invested in Government securities. The balance at the credit of the Fund at the close of the year was Rs. 65,558 against Rs. 72,047 at the close of the preceding year. A zanana hospital has now been built, the entrance stone of which was laid by Lady Elliott on the 28th November 1894, and the main building was opened by Her Excellency the Countess of Elgin on the 30th March 1895. On the occasion of the opening of the hospital, the Raja of Maksudpur made a munificent contribution of a quarter of a lakh of

rupees to the Fund. At the same time Rajkumari Rattan Kuer, representing the 7 annas branch of the Tikari family, promised an annual contribution of Rs. 1,200, which, with an equal contribution from the 9 annas branch (now represented by the Court of Wards) and other sources of income, will practically secure to the hospital a regular endowment.

338. In Shahabad there was a decrease of 4 and 3,728 persons in the number of in and out patients respectively. It took place at all the dispensaries, except Dumraon and Sasaram, and is noticeable especially in fever cases. The decrease is difficult to explain, as the year was a most unhealthy one, and the sickness and mortality from fever and cholera were considerable. Mr. Marindin thinks that the fever was of such a virulent type that fewer persons who were attacked were able to come as out-patients to the dispensary for treatment than in ordinary years.

The Arrah dispensary is well managed and the Assistant Sugeon is attentive to his duties. The dispensary at Dumraon is entirely maintained by the Maharaja of Dumraon. The Assistant Surgeon, Babu Bepin Behary Gupta, is very popular. The institution is in a satisfactory state.

339. In Saran the increase in the number of patients is due to the very large amount of sickness prevalent in the district during the year. There were ten dispensaries in this district during the year, of which three are supported by the Maharaja of Hatwa. The principal diseases treated were malarial fever, diseases of the skin, rheumatic affections, goitre and worms. On the whole the working of the dispensaries in this district is satisfactory, and they are much appreciated by the people.

340. In Champaran the increase of in and out patients is also attributed to the unusual unhealthiness of the year. The Dufferin Hospital at Bettiah, which is supported by the Raj, continued its useful work under the able management of Miss Jane Marsh. There was an increase from 6,802 to 6,896 in the number of out-door patients, and a very satisfactory increase from 293 to 538 in the in-door attendance. I regard this latter, as a rule, as a reliable index of good management. The four outlying dispensaries mentioned in last year's report as having been founded by the Bettiah Raj have, it seems, not yet been completed. The Collector reports that they are to be opened during the present year.

341. In Muzaffarpur there was a small decrease of in-patients but a large increase of out-patients. Besides the four dispensaries under Government supervision, there are two other private dispensaries, viz. Nanpur and Parihar. The former is maintained by the Chaudhry of Nanpur, and the latter by the Maharaja of Darbhanga. A third has lately been opened at Baghi by Babu Gujraj Shahi, zamindar of that place. It is a well constructed dispensary and it has been endowed with funds by the founder.

342. In Darbhanga all the dispensaries except Laheria Serai and Tajpur receive both in-door and out-door patients. The dispensary of Samastipur was opened in September last, and it was in working order. Besides the above, there are five private dispensaries in this district supported by the Maharaja of Darbhanga, and are under the supervision of the Civil Surgeon.

343. The very useful medical work among women which is being carried on in the Patna City by Miss Grace Mackinnon was unfortunately interrupted by that lady having broken down from overwork at the beginning of the year, as mentioned in my last report. Miss Mackinnon was for this reason absent on leave from April to October. For part of this time Miss Gray carried on the work, but for two months the two dispensaries under the Association had to be closed. The number of in-door patients treated during the year was 28, out-door patients 3,902 with 14,477 attendances, major operations 26, minor operations 104, besides a large number of visits to private patients at their own houses. Hitherto the want of accommodation both for hospital cases and for the dispensary has been the great difficulty. I am glad to say, however, that the new building referred to in paragraph 385 of my last report, which has been named "The Duchess of Teck Hospital," has been nearly completed at a cost of Rs. 64,000, and will, it is hoped, be ready for use in a month. The hospital consists of the following buildings, viz. (I) administration block, containing out-patients and consulting rooms, compounders' room, store room, operating theatre and ward attached; (II) separate ward block, containing four

private wards on the cottage hospital system; (III) nurses' and matrons' quarters; (IV) lady doctor's house, containing one private ward and consulting room. There will be about 50 beds in all for in-patients. The site is an excellent one. large and airy, on a plot of high ground three-fourths of a mile to the west of the Opium Factory, not far from the bank of the river. The foundation stone was laid, as mentioned in my last report, by Sir A. P. MacDonnell on the 29th July 1893; and the building was visited by Her Excellency the Countess of Elgin on the 3rd April last during Her Excellency's stay at Bankipore.

XXVIII.—LIBRARIES.

344. The Bar Library at Bankipore had 72 members at the close of the year against 66 on the 31st March of the previous year. The reserve fund remained the same as in the previous year, viz., Rs. 1,000 in Government promissory notes. The cash balance on the 31st March 1895 was Rs. 1,291 against Rs. 973 on the 31st March 1894. The *Calcutta Gazette* and the Bengal Administration Report are supplied free by Government.

345. The Oriental Library received in the course of the year a considerable addition of English books and Arabic and Persian manuscripts from the late Secretary, Maulvi Khoda Baksh Khan Bahadur. A very handsome annual grant of Rs 600 has, I am informed, been promised by His Highness the Nizam of Hyderabad.

346. The Halliday Public Library at Gaya continues to be a useful institution. Almost all the European residents of the town and a good many native gentlemen are members. It has a funded capital of Rs. 12,000 in Government securities. A sum of Rs. 239 was received as interest during the year. The total income of the year, including an opening balance of Rs. 268, amounted to Rs. 914. A sum of Rs. 363 was spent on the purchase of 147 new books and Rs. 425 on other charges. The closing balance of the year was Rs. 125. The total number of books in the library now is 2,038. The Bar Library at Gaya had 45 members during the year. The donations and subscriptions amounted to Rs. 1,244. The cash balance on 31st March 1895 was Rs. 119. A sum of Rs. 837 was spent on the purchase of books and Rs. 275 on other charges.

347. The Bar Library at Arrah is reported to be an useful institution. It has 27 members.

348. The endowment Madrassa Library at Sasaram contains 453 Arabic, 215 Persian, 108 Urdu, and 138 English books.

349. The public library at Chapra is not in a prosperous condition. The house meant to be used as receptacle for the books is let to a private tenant, the subscriptions being too small to meet the necessary expenditure. The number of subscribers at the close of the year was 21 against 24 in the previous year. The subscriptions are not regularly paid. The opening balance, including the sale-proceeds of Government securities, was Rs. 2,225. The receipts of the year amounted to Rs. 989 and the expenditure to Rs. 2,891, including repairs to the building. The closing balance was Rs. 323.

350. There is no public library in Champaran, Muzaffarpur or Darbhanga.

351. The district and subdivisional libraries are generally in good order.

XXIX.—MUSEUMS.

352. The only museum in the Division is the Economic Museum at Bhojpur, established by the Maharaja of Dumraon in commemoration of the Jubilee year 1887. It continued to be maintained in fairly good order. The museum contains selected specimens of grain grown in India, of agricultural implements and tools, and of numerous economic products such as fibres, dyes and spices. This museum was one of the features at the agricultural exhibition which took place at Barahpur in February 1895.

353. There is a small building constructed by the Public Works Department near the Mahabodhi temple at Bodh Gaya, in which some Budhist remains are deposited. They have been arrayed so far as the Collector has been able to do. Mr. Macpherson recommends the addition of an iron railing round the building. This seems desirable, as it is unenclosed and the exhibits are practically unprotected.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

Municipalities.

354. *Patna.*—The Patna Municipal Committee consists of 30 members, 20 of whom were elected by the rate-payers and 10 appointed by Government. The number of meetings held during the year was 16, of which 12 were general and 4 special. The average attendance of Commissioners at each meeting was 13·6.

355. I regret to have to say that the affairs of this important municipality are in a far from satisfactory state. On recently looking into them in connection with the proposal to raise funds for a water-supply scheme, I found that although the total income of the municipality from all sources may be taken approximately at Rs. 1,55,000 per annum, while the ordinary recurring expenditure comes to about Rs. 1,46,000, showing an annual surplus of Rs. 9,000, yet for the next 29 years the Municipal Commissioners, over and above their recurring annual expenditure, will have to pay an annual sum of Rs. 19,420 to Government in order to pay off the loan of Rs. 3,18,000 which they borrowed two years ago for the drainage scheme noticed in paragraph 269 of this report. In effect, therefore, they are at present annually over Rs. 10,000 to the bad, or, in other words, are bankrupt.

356. Under considerable pressure from the late District Magistrate and myself, the Municipal Commissioners were induced in August 1893 to appoint a salaried assessor. This officer has since then done excellent work, having by a careful revision of the house-tax in 6 of the 15 thanas raised the demand from Rs. 34,937 to Rs. 43,845, or by about 25 per cent. But I regret to say that the Municipal Commissioners, with a few praiseworthy exceptions, have seriously retarded the good effect of this measure by their long continued failure to dispose of a large number of objections against the revised assessment. And I also find that in a number of cases where they have interfered with the assessor's findings, they have passed summary orders without recording any reasons for upsetting his assessment. In fact, both the inaction as well as the action taken are of such a kind as to tend to bring the scheme of Local Self-Government as worked in this municipality into serious disrepute. I have myself more than once addressed the Municipal Commissioners through the Magistrate on this subject, but hitherto with but very little effect. Unfortunately the late Magistrate during the latter part of his tenure of office was unable, from serious ill-health, to keep a controlling hand over the Municipal Commissioners in this matter, or to check the general state of disorder into which the administration has in other respects fallen. The Officiating Magistrate, Mr. Inglis, has, however, taken the whole subject in hand with characteristic vigour, and I trust that the Municipal Commissioners will now be stimulated to a proper sense of their duties. A thorough and early reconstitution of the administration, especially in regard to matters of finance, is especially desirable in view of the pressing want of municipal water-works, not only for drinking purposes, but more particularly as a means for flushing the new drains, any hope of which is quite out of the question so long as the existing state of chaos in the collection and other departments continues. One other measure which I have lately pressed upon the notice of the Municipal Commissioners is the advisability of making immediate use of the proviso to sections 85 (*b*) and 97A of the revised Act to raise the rate of tax from 7½ to 10 per cent. on the annual value of holdings. This measure would save them from present bankruptcy, besides assisting them to make provision, whether it be in the shape of a loan or of an accumulating fund for municipal water-works. I have pointed out to them that there is no reason why they should not at once, without further discussion, pass a resolution to the effect suggested.

357. The Magistrate reports that the attempt to close the well privies with which the city is honeycombed, as noticed in former report, is being continued. Mr. Inglis, however, on this point remarks:—

"A large number of well-privies have been suppressed, and endeavour is being made to close the remaining ones which are of considerable number. The only obstacle which presents itself in removing these privies is the action of the Civil Court, which not unfrequently, on a suit brought by the owner of such privy, declare, on some technical ground, the order of the municipality null and void."

358. The Barh Municipal Committee consists of nine members, six of whom are elected by the rate-payers and three appointed by Government. The number of meetings held during the year was 13, of which 11 were general and 2 special. The average attendance of members at each meeting was only 3·9. The income from all sources was Rs. 5,445. The total expenditure was Rs. 5,408.

359. The Bihar Municipal Committee consists of 12 members, of whom 8 were elected and 4 appointed. The numbr of meetings held was 21, of which 16 were general and 5 special. The receipts amounted to Rs. 14,485, and the expenditure to Rs. 16,083.

360. The Municipal Commissioners of Bihar have lately accepted mine and the Magistrate's advice, and have appointed a salaried assessor who appears to be doing his duty. I am glad to say that considerable vitality appears now to be being instilled into the Municipal Commissioners by the energy of their present Chairman, Maulvi Syed Aminuddin Ahmed.

361. The Dinapore Municipal Committee consists of 18 members, of whom 12 were elected and 6 appointed. The number of meetings held was 28, of which 14 were general and the remainder special. The receipts amounted to Rs. 12,916, and the expenditure to Rs. 15,434, the excess being due to the repairing and remetalling of a main road.

362. *Gaya.*—There are three municipalities in this district, viz., Gaya, Tikari, and Daudnagar. The Magistrate of the district is Chairman of the first, Babu Deoki Nandan, a pleader, of the second, and the Assistant Engineer, Irrigation Department, of the third.

363. The following figures give the number of meetings held and the average attendance:—

NAME OF MUNICIPALITY.	Number of members, including Chairman.	Number of meetings.	Percentage of attendance.
1	2	3	4
Gaya ...	25	11	56·3
Tikari ...	12	28	42·5
Daudnagar ...	11	24	48·1

364. The net receipts (excluding the opening balance) and the expenditure of each municipality as compared with the preceding year are shown below:—

MUNICIPALITY.	RECEIPTS.		EXPENDITURE.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Gaya ...	65,641	68,875	67,525	68,567
Tikari ...	6,967	6,949	6,582	8,651
Daudnagar ...	3,373	4,214	3,380	4,217

The increase of income in the Gaya Municipality is due to the proper taxation of places where certain offensive or dangerous trades are carried on, to larger receipts from fines, and to a donation of Rs. 1,500 by Babu Drigpal Lal, of Hasua, for a moribund ward in the Pilgrim hospital. The increase in

expenditure is chiefly on account of a drainage survey of the town, and completing the experiments for a supply of water from the bed of the river Phalgu, which has been already noticed in paragraph 270 of this report. The Magistrate reports that the Municipal Commissioners have, on the whole, shown a laudable desire to do their duty to the public and to give effect to the municipal policy of Government so far as their funds permit.

In Tikari the large increase in expenditure is chiefly owing to the construction of a municipal office and to the excavation of a tank.

365. *Shahabad.*—There are six municipalities in this district The following statement shows the number of members, the number of meetings, and the percentage of attendance:—

Name of Municipality.	Number of Commissioners.	Number of meetings.	Average percentage.
1	2	3	4
Arrah ...	18	25	40·3
Jagdispur ...	9	7	77·7
Buxar ...	13	14	57·6
Dumraon ...	9	16	53·3
Sasaram ...	22	25	50·0
Bhabhua ...	9	11	40·0

The highest percentage of attendance was 77·7 in Jagdispur and the lowest in Arrah (40·3) and Bhabhua (40·0). The decrease in the percentage of attendance at Arrah from 50 to 40·3 is, as remarked by the Magistrate, unsatisfactory. The total receipts during the year, including the opening balance, amounted to Rs. 1,77,011, and the expenditure to Rs. 1,73,581, against Rs. 74,996 and Rs. 71,093 respectively in the preceding year. The large increase in receipts occurs only in Arrah, which is due to the loan received from Government for meeting in part the cost of Arrah water-works. The increase in expenditure is observable in all municipalities, except Bhabhua, which shows a falling off.

366. The Arrah water-works, opened in April 1894, supply filtered Sone water to the people of the town. The water has come gradually into favour, and its use is now general wherever it is laid on. The result of the scheme has been already noticed in paragraph 273 of this report. In the Buxar Municipality a large pucka well was completed during the year.

367. The Magistrate remarks:—"The Municipal Commissioners of Arrah, except the Vice-Chairman, pay very little attention to their business, and most of them find even attendance upon committee meetings too severe a demand upon their time and energies."

368. *Saran.*—The following statement shows the number of members, of meetings held, and the percentage of attendance:—

Name of Municipality.	Number of members.	Number of meetings.	Percentage of attendance.
1	2	3	4
Chapra ...	18	19	59·6
Revelganj ...	12	18	77
Siwan ...	9	15	75·5

369. The receipts, including the balance of the previous year, the expenditure and the balance at the close of the year, were as follows:—

NAME OF MUNICIPALITY.	Receipts.	Expenditure.	Balance at the close of the year.
1	2	3	4
	Rs.	Rs.	Rs.
Chapra ...	36 259	36,178	81
Revelganj ...	9,806	9,100	706
Siwan ...	11,406	9,634	1,772

370. The Magistrate makes the following remarks:—

"The Chapra Municipality, owing to mismanagement, is both financially and administratively in a very bad state and is practically bankrupt. Under the system of management now followed, I fail to see that any reasonable chances of improvement exist. The Siwan and Revelganj Municipalities offer a very pleasant contrast, both being excellently managed; the latter, however, is suffering from a diminishing income due to the gradual decrease of the town's trade."

371. At my inspection of the Chapra Municipality in December last, I found its financial affairs in a very deplorable state, so much so that both the late and the present Chairmen had been obliged to make considerable advances from their own pockets to help the Municipal Commissioners to pay their way. Notwithstanding this, the Municipality was still heavily in debt, and a number of bills and salaries were for several months in arrears. I immediately drew the attention of the Municipal Commissioners to this matter in an official letter addressed to them through the Magistrate, at the same time pointing out to them that the town was much under-assessed and that their only hope of salvation was a proper re-assessment by a salaried assessor whom I pressed them to immediately appoint. I advised them, at the same time, to discard the very inadequate revision which had lately been made by the Municipal Commissioners themselves, but had not then been brought into force. I regret to say that the reply to this was a resolution rejecting my advice and confirming the very imperfect so-called revision that I had warned them against accepting. The obvious result was immediate bankruptcy, to save themselves from which the Commissioners adopted the expediency of striking out from their budget for the current year the usual allotment of Rs. 1,304 for street watering, reducing the grant for "lighting" from Rs. 3,2?2 to Rs. 1,119, and generally starving the administration. They also proposed to raise a loan of Rs. 8,000 to meet their debts—a loan which, as matters stood, they could not possibly pay off and at the same time provide for the most ordinary municipal requirements. Under the circumstances, I found myself under the necessity of reporting the case to Government for action under the revised section 111A of the Bengal Municipal Act. The necessary order has since been passed, and the Municipal Commissioners have been called upon to show cause or to carry out the order.

372. Several cases have also lately been reported by the District Magistrate of failure on the part of the Chapra Municipal Commissioners to perform their statutory duties. He has been directed, if he finds it necessary, to report the matters for action under section 64 of the Act.

373. *Champaran.*—There are two municipalities in this district—Motihari and Bettiah. The number of members, of meetings held, and the percentage of attendance, are given below:—

Name of Municipality.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Motihari ...	13	17	57·9
Bettiah ...	13	14	50

Both municipalities worked satisfactorily during the year.

374. The levels of the town of Motihari have been taken; but the Magistrate fears that the interest on a loan for the purpose of an efficacious system of drainage would be more than the municipality could afford.

375. I am inclined to think that the Magistrate's decision in this matter is correct, and with reference to the general question of municipal drainage schemes I venture to express the opinion that there seems a danger at present of such undertakings being too hastily engaged in. I refer to schemes for drainage by means of *masonry* drains. No doubt if all offensive matter can be effectually and quickly carried off by pucka roadside drains, a drainage scheme of the kind is very desirable. But it should first be certain that there are (1) a sufficient fall, and (2) proper means of flushing. Otherwise I look upon a system of pucka drains, whether open or covered in, as anything but an unmixed blessing. Large open kutcha drains have at least the great advantage of the liquid portion of the filth they contain being absorbed and deodorised by contact with the surrounding earth. The dry layer of dirt which results is comparatively innocuous, and can easily be carted away and fresh earth substituted at no great expense. But with a system of pucka drains the filth does not dry or have a chance of becoming deodorised and assimilated with the surrounding earth, and a scheme of the kind may, and often does, result (in the case of municipalities in the plains, where there is no fall and no good means of flushing) in the last state being very much worse than the first.

376. The Bayley sarai has not prospered, and the Magistrate thinks it a pity it was ever erected. Efforts are, however, being made to make it more popular.

377. The construction of the female ward in the charitable dispensary at Motihari, referred to in paragraph 417 of last year's report, has not yet been taken in hand. The Magistrate does not say why.

378. *Muzaffarpur.*—There are four municipalities in this district. The following table shows the number of members, of meetings held, and the average attendance at each meeting:—

Name of Municipality.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Muzaffarpur ...	19	12	44·4
Hajipur ...	13	12	40·7
Lalganj ...	11	19	38·1
Sitamarhi ...	12	15	45·7

379. The Magistrate says:—"Many matters of importance were discussed by the Municipal Commissioners of Muzaffarpur. Some of the Commissioners take considerable interest in the affairs of the town, but this is not the case with all." The Muzaffarpur drainage scheme has been nearly completed. A scheme for flushing the drains with river water has been prepared and an engine and pump purchased. A revision of the municipal tax has been made by the Municipal Commissioners during the year. I regret to say that they rejected the District Magistrate's proposal to appoint a salaried assessor for the purpose.

380. In the Hajipur subdivision there are two municipalities, namely, Hajipur and Lalganj. The Subdivisional Officer is the Chairman of both. Maulvi Jawad Hossein, the Vice-Chairman of the Hajipur Municipality, is said to take much interest in municipal matters. As regards the Lalganj Municipality, it is reported by the Subdivisional Officer that the Vice-Chairman, Babu Rash Bihari Ray, who is a Bengali, does not get on well with the other Municipal Commissioners. But the Magistrate remarks that at Lalganj there is no other suitable man available for the office of Vice-Chairman. The result, as Mr. Hare states, is that "nothing seems ever to be done unless it is looked after by the Subdivisional Officer," of the truth of which he proceeds to give an instance. The result is to be regretted, as Babu Rash Bihary Ray is an energetic and enlightened gentleman and might be of much use to the town if it were not for these dissensions.

381. The Subdivisional Officer of Sitamarhi is the Chairman of the Sitamarhi Municipality. The Vice-Chairman, Babu Ambica Prosad, has rendered him good assistance. The amount embezzled by the late tax-daroga Baldeo Sahai (see paragraph 410 of last year's report) has been realised and credited to the municipal funds.

382. *Darbhanga.*—There are three municipalities in this district, viz. Darbhanga, Madhubani, and Roserah.

383. The following table shows the number of members, of meetings held, and the percentage of attendance at each meeting:—

Name of Municipality.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Darbhanga ...	22	10	27·2
Madhubani ...	16	13	50·5
Roserah ...	14	23	56·7

384. The Magistrate writes:—

"As regards both the number of meetings and the attendance of the Commissioners, Darbhanga represents the worst feature. Collections, too, are in a lamentable state. Bills have sometimes to be held over for paucity of funds, while Madhubani closes the year with an outstanding balance of Rs. 31 only and Roserah with nil."

385. The unsatisfactory administration of the Darbhanga Municipality has been noticed in the reports of the last two years. I am glad, however, to say that the Municipal Commissioners have lately consented to appoint a salaried assessor for a general revision which is much needed. I may mention in this connection that I have recommended the Municipal Commissioners to apply for Government sanction to the levying of a rate on the annual value of holdings under clause (*b*) of section 85 of the Act, instead of, as at present, a tax upon persons under clause (*a*).

386. There has been a deal of discussion lately between my office and the Municipality on the subject of the introduction of Part IX of the Act,

which I suggested should be extended, as a tentative measure, to Ward IV, the most populous part of the town. The Municipal Commissioners have, however, expressed their decided opposition to the measure owing, it is pleaded, to the impoverished state of the inhabitants. I have now pointed out to them that there is no reason why the cleansing of latrines in a systematic manner should be more expensive than the present irregular system, excepting on the supposition that the work is not now properly performed.

387. *District and Local Boards.*—The statement below shows the attendance of members of the District Boards of this Division during the past year:—

NAME OF DISTRICT.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Patna ...	25	12	51·6
Gaya ...	21	20	45·7
Shahabad ...	25	10	41·6
Saran ...	31	15	44·5
Champaran ...	16	13	34·18
Muzaffarpur ...	19	13	37·6
Darbhanga ...	25	17	46·

388. *Patna.*—The allotments made to the several Local Boards of this district, and the amount expended by them, are shown below:—

LOCAL BOARD.	Grant for village roads.	Expenditure on village roads.	Grant for sanitation and medical aid.	Expenditure on sanitation and medical aid.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Sadar	5,000	4,992	2,150	2,021
Dinapore	3,000	823	1,400	1,387
Bihar	2,500	2,343	700	712
Barh	4,000	470	1,100	324

The Local Boards of Dinapore and Barh do not appear to have paid sufficient attention to the repairs of village roads. Dinapore spent only Rs. 823 out of Rs. 3,000 allotted, and Barh only Rs. 470 out of Rs. 4,000. There is also a saving in Barh under the head "Medical and Sanitation," which one would not have expected in such a notoriously unhealthy year.

389. *Gaya.*—The number of meetings and the average attendance in the case of the District Board were up to the standard of the previous year. There was an improvement in both respects in the case of Local Boards, except that of Jahanabad, where a falling off is apparent. All the Local Boards have official Chairmen, except the Sadar Local Board, the Chairman of which, Babu Durga Sanker Bhattacharjee, takes a prominent part in the public affairs of the district.

390. The following figures show the amount spent by each Local Board on the construction and up-keep of village roads:—

NAME.		1893-94. Rs.	1894-95. Rs.
Sadar	...	8,800	4,299
Nawada	...	3,723	3,218
Jahanabad	...	1,919	2,851
Aurangabad	...	2,080	1,769
Total	...	16,522	12,137

391. The Local Boards have also under them the management of pounds and ferries and the disbursement of money passed by the District Board for dispensaries and middle schools Altogether they did a substantial amount of work during the year.

Mr. Macpherson writes:—

"The District Board, as I have said in previous years, forms a useful consultative body, and I have found it, during the last couple of years or so, taking considerable interest in matters of executive detail. Several of the members have done valuable work of this class in the various sub-committees on which they serve; and the Vice Chairman, Mr. A. Halim, has continued to devote a great deal of attention to his executive duties. The Local Boards are, however, of little use either as consultative or executive bodies, as they practically leave the work to their Chairman and in a less degree the Vice-Chairman. The Sadar Local Board has, however, since its reconstitution during the year under report, proved itself a more useful consultative body than before.

392. *Shahabad.*—The Magistrate states that the general working of the District Board continued to be satisfactory and harmonious as a consultative body. The members on the whole take interest in the affairs of the Board and are willing to give support to the executive in whose hands they are content to leave the direct management. During the year under review ten meetings were held, the average attendance of members having been 10·4 against 10·8 in the preceding year.

393. The following statement shows the grants allotted to the Local Boards for expenditure on their roads and the sums spent:—

NAME OF LOCAL BOARD.		Amount of allotment.	Amount spent.
1		2	3
		Rs.	Rs.
Arrah	...	4,000	3,862
Buxar	...	4,000	3,859
Bhabhua	...	4,000	3,805
Sasaram	...	5,000	4,933

394. A Sanitary Inspector on a salary of Rs. 40 a month was employed during the year under the Arrah Local Board. Arrangements have been made for another Sanitary Inspector for the whole district on a salary of Rs. 50 a month.

395. Raja Raj Rajeswari Pershad Singh of Surujpura resigned the Vice-Chairmanship of the Sasaram Local Board during the year, as he could not afford time to attend to the duties of the post. The largest number of meetings was held by the Arrah Local Board, and the members of this Board continue to show interest in their work. The number of meetings held by the Sasaram Board was only 8. The Chairman says that there was no more work for the members to discuss, but the Magistrate remarks that the Chairman might probably have found more work for them if he had chosen. The Local Boards continued to have charge of fourth and fifth class roads, primary education, sanitation and pounds.

396. The Magistrate inspected the Local Boards' offices at Buxar, Sasaram, and Bhabhua during the year, and found them generally in good order. The

only non-official Chairman is Babu Chaturbhuj Saha, Chairman of the Arrah Local Board, who, the Magistrate reports, devotes much attention to his duties.

397. *Saran.*—There were altogether 15 meetings held by the District Board, of which two fell through owing to want of a quorum. On an average 13·8 members attended, or 44·5 per cent., against 48·65 in the preceding year. Mr. Slack reports that the standing committees for finance, education and public works did much good work.

398. The number of meetings held by the three Local Boards at Chapra, Siwan, and Gopalganj were 10, 13, and 5 respectively, as against 11, 10, and 6 in the previous year; but of the above 3 fell through at Chapra and as many as 6 at Siwan for want of a quorum. The paucity of meetings at Gopalganj is partly explained by the fact that for three months the Board was without either a Chairman or Vice-Chairman. The work, however, the Magistrate says, did not in any way suffer by this interregnum, as the Subdivisional Officer carried it on with, I presume, the consent of the members. Compared with the previous year there is a falling off in average attendance, except at Gopalganj. The Magistrate says that on the whole the working of the District and Local Boards was satisfactory. Looking at defaults by the Local Boards of Chapra and especially of Siwan, this is a kind-hearted view.

399. *Champaran.*—There is no Local Board in this district. Thirteen ordinary meetings were held by the District Board during the year, in three of which there was no quorum. The members generally took interest in discussing questions of general policy, and no interference was attempted by them in executive matters. Strictly speaking, the whole of the work during the year was, the Magistrate writes, done by the Chairman, Vice-Chairman, and Deputy Inspector of Schools under the orders of the Chairman.

400. *Muzaffarpur*—During the year 22 meetings were convened by the District Board. Of these 13 were held and 9 had to be adjourned for want of a quorum, mainly due to the death of two of the most active European members and apathy of certain native members in attending the meetings. The Magistrate, who is Chairman, reports, however, that he prevented any hurtful delay by, in each case of failure, holding the adjourned meeting within a week from the date of the adjournment. The average attendance at each meeting was 7·15 against 6·9 of the preceding year. The Muzaffarpur, Hajipur, and Sitamarhi Local Boards convened 9, 7, and 5 meetings respectively during the year, of which 3, 3, and 2 respectively had to be adjourned.

401. No new power was given to any of the Local Boards during the year under report. They continued to administer the grants for village roads and to control the working of cattle pounds.

402. *Darbhanga.*—Seventeen meetings were held by the District Board, in two of which there was no quorum. Out of the 17, 6 were special meetings. The average attendance at each meeting was 11·5 against 11·7 of the preceding year. The attendance of the official members was satisfactory.

403. The three Local Boards at Darbhanga, Samastipur, and Madhubani held 9, 8, and 11 meetings respectively during the year. The attendance at these was fair. The Local Boards are in charge of the village roads and the pounds in their jurisdiction. They have also certain powers with regard to the administration of primary education and general supervision over the works of the Sub-Inspectors of Schools. There are about 700 miles of village roads. A sum of Rs. 12,776 was allotted for their repairs, and the money was made over to the Local Boards for expenditure. Almost the whole of this sum was expended. Each of the Local Boards has got a sub-overseer under them to look after road works. The Magistrate writes:—"The Boards, both District and Local, are useful adjuncts to the administration of this district. I have some doubt, however, whether the amalgamation of the Sadar Local Board with the District Board would not be both an economical and useful measure. The area of roads under the Local Board is small, and could be worked without any increase to the District Board staff." I am inclined to agree with Mr. Tute on this matter, provided the measure is assented to by both of the Boards concerned.

404. It is not easy to give one's opinion in a condensed form, and without writing an essay, on the progress and success, or otherwise, of the system of Local Self-Government in this country. Putting the matter as shortly as I can,

my own opinion is that the experiment has to a certain extent been a success, though not in the way hoped for by its originators. Experience of the working of the system brings into relief the fact that although the different local bodies are, as a rule, extremely useful as consultative bodies and in strengthening the hands of the executive, yet, with a few notable exceptions, they are not fit, and probably never will be fit, to be left to manage their affairs themselves. I have often been struck with the contrast presented between the reports on the working of the District Boards and those on the working of the Municipal Committees. Take, for instance, the accounts of the working of each class of these two bodies in the preceding paragraphs of this report. It will be seen that while the District Boards are generally described as having worked well, the reverse is the case with several of the more important municipalities. The reason of this is to be found in the difference in the class of work required from each body. The District Boards have nothing to do with making assessments and collections; they are not responsible, beyond merely assenting to proposals and voting funds, for the execution of projects or the proper carrying out of other administrative details. Practically the whole responsibility, both as regards provision of funds and carrying out the work, devolves upon the Magistrate-Collector, the District Engineer, and (in a minor degree) the Deputy*Inspector of Schools, and their respective staffs, the functions of the Board being in effect only of a consultative character. But with municipalities the case is different. The Municipal Commissioners have to make, or at least to supervise the making of, assessments and collections, and to carry out the whole of the executive work themselves. And in all these *active* duties, whether from *inertia*, dislike to increase taxation, an instinctive shrinking from responsibility, or want of proper appreciation of the rules of sanitation, or from all these failings combined, if left to themselves, they almost invariably fall short of the standard of excellence one would wish to see them attain. It is a regrettable fact, but no less true, that in one municipality after another, any important reform, however patent its need, is, as a rule, only introduced in consequence of direct official pressure. And not only so, but the ordinary administration of each municipality, if not constantly looked into and brought into line by the officers of Government, is almost certain in a short time to fall into a state of *laisser-aller* and disorder.

405. Though I thus feel forced to admit that whatever hopes the founders of the scheme had of their *alumni* ever being able to walk alone have not been realised, yet I think that the scheme has certainly succeeded in being of use, although not in the way anticipated. The District Boards have certainly been an undoubted success in the role of advisers and upholders of the executive; and the system itself is a guarantee that everything is done *coram publico;* it ensures good counsels (or at least discussion) and publicity. That the members do not individually take part in the active work, or only to a very small degree, does not matter. The object is to get the work done, and it is done; and the Board see that it is done; and their usefulness is thus complete. In the case of municipalities also I consider that the system has in a way worked beneficially, notwithstanding the general failure of the municipal bodies to turn out good work, except under pressure. The fact is that the Magistrate instead of being the responsible head of a more or less inefficient body has now become its censor. There are many matters which an overworked officer, if he has to see to them himself, may be forced to let slide; but he will not be content to allow another person to do so. Whatever his own personal failings, he has no compunction in keeping others up to their work. Add to this that Government of late years has particularly insisted upon the Magistrate performing his duties as censor in a very thorough manner. The result is that shortcomings in municipal administration are now much more freely brought to light and criticised, and reform insisted on than formerly was the case when the Magistrate was himself the person chiefly responsible, and there was practically no one to find fault with him.

406. On the whole, however, I doubt very much whether, under the present system, we shall ever, in municipal matters, get beyond a certain limited point; and I am afraid that we have about reached it. Signs are not wanting of an unwillingness among municipal bodies to bestir themselves actively or to listen to advice, and I fear that the feeling is growing. And if this goes on it may

be found in time that the legislation of the last 12 years has weakened the hands of Government to an extent inconsistent with the public interests.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

407. The following table shows the employment of Muhammadans in both the grades of Government service (viz. with salary of above Rs. 100 and of Rs. 100 and under) and the percentage for each district:—

District.	Number of gazetted officers.		Number of Muhammadans holding gazetted appointments				Ministerial officers.			Menials.			Percentage of Muhammadans to entire population.	Percentage of gazetted appointments held by Muhammadans to total number of employments		Percentage of all employments
	Above Rs. 100 salary.	Rs. 100 and under.	Above Rs. 100.		Rs. 100 and under.		Total number.	Muhammadans.		Total number.	Muhammadans.			Above Rs. 100.	Rs. 100 and under.	
			1893-94.	1894-95.	1893-94.	1894-95.		1893-94.	1894-95.		1893-94.	1894-95.				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	
Patna ...	28	2	6	4	2	2	313	74	74	411	170	189	11·36	14·2	100	3
Gaya ...	27	2	4	6	...	...	197	25	26	240	117	121	10·6	22·2	Nil	3
Shahabad ...	21	...	7	2	...	...	231	43	51	372	146	160	7·1	9·5	...	3
Saran ...	22	1	5	4	...	...	232	47	53	364	145	136	12·2	18·1	Nil	3
Champaran ...	10	..	2	1	...	...	102	15	16	208	56	56	12·0	10·	...	2
Muzaffarpur ...	29	2	7	7	...	...	239	46	48	359	140	123	11·7	24·1	Nil	2
Darbhanga ...	18	2	1	3	1	2	212	52	43	257	86	94	14·3	16·6	100	2
Total ...	165	9	32	27	3	4	1,520	302	311	2,220	860	850	11·43	17·4	44·4	2

The percentage of Muhammadans to entire population in this Division is 11·43, while the percentage of gazetted appointments of above Rs. 100 held by them is 17·4. Of nine gazetted appointments of Rs. 100 and under, Muhammadans hold four. In Champaran alone the percentage of appointments held by the Muhammadans in the grades of above Rs. 100 was less than the percentage of their population. In all others it was higher.

408. Mr. Slack writes:—

"In filling up a vacancy I personally always see to what side the local proportion between the Hindus and Musalmans leans. If it is on the side of the latter, then the selection is made irrespective of religion; if on the former, then the best Musalman, should he be intellectually capable of doing the work, is chosen."

409. I am not prepared to entirely subscribe to the latter part of Mr. Slack's rule. Qualifications being equal, it would be right, in the case supposed, to select the Muhammadan competitor. But if the Hindu were undoubtedly the better qualified man of the two, he should be preferred.

XXXII.—POST OFFICES AND TELEGRAPH.

410. The working of these offices continues to be satisfactory. The Magistrate of Darbhanga, however, reports that there were a few instances in which the mail bags with all the letters contained in them were miscarried. He also remarks that the reduction of Samastipur post office from a head office to a sub-office has led to considerable inconvenience. Bearing letters are now delivered a day later than they used to be. Depositors also cannot now withdraw money from the Savings Bank with the same facility as before. As there is a large population in the place, of which the Europeans form a considerable portion, the matter should, the Magistrate thinks, be reconsidered.

411. The following statement shows the number of inland money-order transactions during the year, exclusive of rent and revenue money-orders:—

Name of District.	1893-94.				1894-95.			
	Issued.		Paid.		Issued.		Paid.	
	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.
1	2	3	4	5	6	7	8	9
		Rs.		Rs.		Rs.		Rs.
Patna ...	63,278	11,63,479	95,608	15,81,978	65,039	14,57,646	99,976	16,78,022
Gaya ...	55,416	9,88,466	104,843	15,60,198	58,516	10,58,783	98,501	13,68,161
Shahabad ...	40,848	7,86,954	101,795	20,19,056	37,557	7,90,857	103,952	21,76,069
Saran ...	35,507	6,38,593	125,259	19,09,956	40,424	6,00,842	148,324	22,98,723
Champaran ...	42,755	7,24,448	12,544	1,91,075	46,286	7,74,039	17,395	2,78,071
Muzaffarpur ...	49,420	7,21,609	77,541	11,52,707	49,752	8,59,519	41,423	7,42,846
Darbhanga ...	46,025	7,51,348	41,932	6,91,870	53,880	8,43,556	98,020	8,92,163
Total ...	333,249	57,74,987	559,612	91,66,846	352,054	64,75,842	6,07,581	94,34,064

The steady increase in the transactions, both as regards issues and payments, is a proof of the public appreciation of the post office as a means for remitting money.

412. The following statement shows the Post Office Savings Bank transactions in the last two years:—

Name of District.	Deposits.						Withdrawals.						Total number of accounts open on 31st March.		Total amounts in deposit on 31st March.	
	Number of accounts opened during—		Number of deposits made during—		Amount deposited.		Number of withdrawals.		Amount withdrawn during—		Number of accounts closed.					
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94	1894-95.	1893-94.	1894-95.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
					Rs.	Rs.			Rs	Rs.					Rs.	Rs.
Patna ...	1,195	1,470	8,241	7,703	2,80,446	2,89,134	5,547	6,235	2,56,281	3,17,358	613	799	5,133	5,498	6,58,951	11,92,673
Gaya ...	508	451	5,157	4,749	1,48,756	1,48,8 8	2,813	3,149	1,30,070	1,73,641	200	241	2,588	2,894	3,60,684	3,37,199
Shahabad ...	1,082	745	6,009	5,245	2,03,598	1,70,068	3,602	3,904	1,74,067	1,99,564	325	359	3,661	3,935	4,95,033	4,78,294
Saran ...	530	464	4,350	3,898	1,27,626	1,32,870	2,126	2,441	1,07,497	1,26,988	205	222	2,172	658	2,95,488	85,856
Champaran ...	231	390	2,287	2,141	50,358	57,113	842	946	29,071	42,579	84	200	2,073	1,971	49,764	72,728
Muzaffarpur ...	374	311	4,224	3,764	1,20,539	1,08,507	2,122	2,088	1,09,534	87,800	190	189	2,058	2,060	5,63,874	5,61,932
Darbhanga ...	341	398	3,761	3,617	1,04,330	1,18,536	1,527	1,838	73,542	1,00,878	189	120	1,608	1,807	1,97,020	1,71,864
Total ...	4,261	4,278	34,119	31,170	10,50,084	10,25,105	18,579	20,604	8,80,062	10,48,808	1,806	2,130	19,298	18,123	26,20,823	29,00,548

It will be seen that although the number of accounts opened during the year was slightly larger than in the preceding year, there was a decrease both in the number and the amount of deposits. This is probably owing to the reduction of the limit of the amount which can be annually deposited by each depositor from Rs. 500 to Rs. 200, and of the maximum limit from Rs. 3,000 to Rs. 2,000. At the same time the number and amount of withdrawals increased and so did the number of accounts closed. Fewer accounts remained open on the 31st March 1894 than on the last day of the previous year. The total amount in deposit, however, on the last day of the year under report considerably exceeded that on the corresponding day of the previous year, which may be accepted as a mark of the appreciation and confidence of the public.

413. A new railway telegraph office has been opened at Tehta on the Patna-Gaya railway, and an office is expected shortly to be opened at Aurangabad. The Magistrate of Gaya says that a telegraph office at Sherghati and the extension of the telegraph lines down the Eastern Sone Canal to Daudnagar and Arwal and from Nawada to Bihar are much needed. The telegraph office which was opened at Roserah in Darbhanga from the 1st January last has already proved to be self-supporting. The line may, the Magistrate says, with advantage be extended to Mohiuddinagar, Tajpur, and Pusa. He also suggests that the status of the office at Laheriaserai may with advantage be raised from third to second class, so that the public may utilise it the whole of the day instead of only during the limited hours now fixed.

414. No mail robbery took place during the year. Two postmen in Muzaffarpur were prosecuted for forging the signatures of a number of payees

of money-orders, and they were tried and convicted and sentenced to undergo different terms of imprisonment.

415. The system of revenue and rent money-orders has been dealt with in section XVII.

XXXIII.—(*a*) ZAMINDARI DÁK.

416. There was no change in the management of the zamindari dák, which continued under the Postal Department subject to the control of the District Magistrate. The cess is now realised by the Collector, the latest dates of payment in Bihar being fixed by the new tauzi rules as the 29th May and 13th December. The object of the rule was that the demand should fall due 30 days before the first and third land revenue kists; but as the dates for these kists are fixed in Bihar according to the Fasli year, the first of them falls on the 7th June, so that the 6th May should have been the date for the corresponding dák cess kist. The matter has been brought to the notice of the Board of Revenue.

417. The cess has been fixed at the following rates for five years from 1st January 1893:—

		Rs.	A.	P.	
Patna	...	0	8	0	per Rs. 1,000 of Government revenue.
Gaya	...	1	2	0	" " " "
Shahabad	...	0	12	0	" " " "
Saran	...	1	4	0	" " " "
Champaran	...	1	9	0	" " " "
Muzaffarpur	...	0	12	0	" " " "
Darbhanga	...	1	2	0	" " " "

The rate in Shahabad has lately been reduced from 12 annas to 10 annas.

418. The subjoined statement shows the income and expenditure of the dák fund in the several districts during the year under report:—

DISTRICT.	Opening balance.	Receipts.	Expenditure.	Balance in hand.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Patna	11,369	8,893	6,909	13,3[illegible]3
Gaya	14,036	16,087	15,515	14,608
Shahabad	11,548	13,283	10,671	14,160
Saran	12,016	16,701	11,060	17,657
Champaran	8,686	9,628	7,663	10,651
Muzaffarpur	9,463	8,278	9,582	8,159
Darbhanga	6,256	8,119	8,013	6,362
Total ...	73,374*	80,989	69,413	84,950
Total for 1893-94 ...	53,913	84,233	64,840	73,306

* This does not tally with the closing balance of the previous year, as there was some mistake in the Muzaffarpur figures [illegible].

419. The general working of the Department has been satisfactory.

(b).—FAIRS.

420. The most important fair in this Division is the Sonepur fair in Saran. It lasted for fifteen days from the 6th to 20th November 1894. Owing to prolongation of the rains and the unusual unhealthiness of the year, the number of people who attended the fair was fewer than ordinarily The sanitary conservancy arrangements were carried out under the supervision of the Magis rate, the District Engineer, the District Superintendent of Police, and the Civil Surgeon. Sixty public latrines were constructed as against 40 in the previous year, and permits for 198 private ones as against 239 in 1893 were issued. A hospital shed, with a native doctor and a compounder in charge, was constructed at a suitable site, and a set of palki-bearers with a *duli* was kept in readiness to convey cholera patients to a shed specially constructed for their treatment at a convenient distance from the fair. In all. 368 cases of sickness were treated, the prevailing causes being diarrhœa, dysentery, fever, and bronchitis. The number of cholera cases was 17. This disease appears to have been imported from the Hajipur subdivision, where it was prevalent. The disease fortunately did not become epidemic. The affected persons were at once removed to the cholera camp, and the localities where the cases occurred disinfected. The arrangements made for conservancy and a good water-supply by pumps from wells did much to prevent the spread of the disease. Considering the unfavourable conditions under which the fair was held—ground damp and drainage bad—the health of the people at Sonepur this year was, the Civil Surgeon considers, remarkably good. The receipts from various sources amounted to Rs. 1,572 and the expenditure to Rs 3,632, the balance being met from the Government grant of Rs. 3,000 allowed under the head "Fairs" to the Saran district. The District Board, on the recommendation of the Horse Show Committee, however, decided to discontinue the award of prizes to owners of horse stock, for the reason that Bihar is not a horse-breeding country, and they propose in future to grant prizes for cattle instead. An application for the continuance of a portion of the grant of Rs. 400 contributed to the Horse Show Fund by the Government of India and its diversion to the above purpose is under consideration by Government. There are three other principal fairs in this district, namely, the Silhowri, Melhwar, and Thaway fairs, the gatherings at which were estimated at 80,000, 60,000, and 50,000, respectively. Suitable sanitary and conservancy arrangements were made at each. There were four cases of cholera at the last-named fair, of which two proved fatal. There was no outbreak of disease at the other two.

421. In Patna, with the exception of the Rajgir fair, which is triennial, there is no fair deserving special mention.

422. In Gaya the principal fairs are the Bisua and Kartik Purnima held at Salempur, close to Gaya, in April and November, Deokund Baisakhi, and Phaguni mêlas in April and February, and the Raliganj Bisua mêla held also in April. The attendance at all was about the same as usual. The usual sanitary arrangements were made and no disease broke out in epidemic form in any of the gatherings. No agents of the Gowrakshini Sabha were reported to have preached against kine-killing at any of the fairs as in the previous year.

423. The most important fair in Shahabad is held at Barahpur near Raghunathpur in the Buxar subdivision. It was as usual held twice, once in April and again in February. It is essentially a cattle fair, but horse-dealers also attend. The usual arrangements were carried out in a very efficient manner by Mr. Oldham, the Subdivisional Officer, and Mr. Munro, District Superintendent of Police. There was no sign of any public feeling on the Gowrakshini question. One of the noticeable features of the February fair was the agricultural exhibition which was held in conjunction with it. The idea was Mr. Oldham's, and all the arrangements were successfully carried out by him with the assistance of a local committee. The District Board subscribed Rs. 400 and the Agricultural Department Rs. 250, and other subscriptions were received from some of the zamindars. Mr. Basu was deputed by the Director of Agriculture to give his assistance. Prizes were given for exhibits of field and garden produce and live-stock. The Magistrate reports that the exhibition was a decided success and attracted a large and orderly concourse of sight seers.

No outbreak of disease occurred at either of these large fairs. There are three fairs held at Buxar. They are called the Khichri, Amawas, and Satuan fairs respectively. They are essentially bathing festivals and are usually attended by from two to four thousand people. The principal articles of merchandise exposed for sale in these fairs were piece-goods, brassware, earthenware, and a variety of country manufacture. At the Bhalooni fair in the Sasaram subdivision there was a gathering of 80,000 people. The usual sanitary arrangements were made at the expense of the Maharaja of Dumraon, to whom the village belongs. I believe that there were no cases of cholera at any of the above fairs.

424. In Champaran, as mentioned in last year's report, the chief fairs are Bettiah, Tribeni, and Areraj mêlas. The Bettiah mêla is held about the time of the Durga Puja. The attendance was smaller than the average owing to the inclemency of the weather due to the lateness of the rains. The Tribeni mêla is held at Tribeni on the Gandak on the boundary between Champaran and Nepal. It is held twice in the year. The Areraj mêla is also held twice. The attendance was as usual.

425 The only fair of importance in the Muzaffarpur district is the Sitamarhi fair held during the Ram Navami festival in the month of Cheyt. The Magistrate estimates that over 100,000 persons came to the fair, and about sixty or seventy thousand bullocks. It is widely known as a cattle fair. The sanitary arrangements were effectively made by the local zamindars under the supervision of the Subdivisional Officer, Mr. Egerton, and the Municipal Commissioners. The fair passed off successfully without any outbreak of disease.

426. There are no fairs of any importance in Darbhanga.

(c) POUNDS.

427. The number of pounds and the receipts for the last two years are given in the subjoined statement for the several districts :—

Name of District.	Number of pounds.	Receipts.	
		1893-94.	1894-95.
1	2	3	4
		Rs.	Rs.
Patna ...	44	6,025	5,234
Gaya ...	73	12,172	12,096
Shahabad ...	36	7,717	6,933
Saran ...	50	4,160	4,702
Champaran ..	85	14,036	12.839
Muzaffarpur ...	167	4,118	3,754
Darbhanga ...	90	6,992	5,292
Total ...	545	55,220	50,850

It will be observed that the falling off in receipts is general.

428. In Champaran most of the pounds were under the khas management of the District Board during the past year. The falling off in receipts there is attributed by the Magistrate to the dishonesty of the pound muharrirs, and the

farming system has been introduced from the beginning of the present year. It already obtains in all the other districts. The Magistrate of Gaya explains the falling off in receipts to be due to smaller sales of impounded cattle. The Magistrate of Shahabad attributes it to the teaching of the Gowrakshini movement. The other Magistrates merely say that the bids obtained at the auction sales were less than at the previous settlement. This is patent enough, and is the point that should have been explained. It is very probable that the Gowrakshini movement may, as Mr. Marindin suggests, have affected the pound receipts, but I should have expected the effect to have been less felt at the settlement for 1894-95 than at those for 1893-94. Possibly the more favourable seasons of 1893-94, as compared with those of the two preceding years, and the consequent better provision of fodder, led to a smaller use of the pounds, and made the undertaking for the time a less paying one than previously. This to my mind is a more likely explanation than that the Gowrakshini movement is still inducing the cultivators to sink their private interests in an increasing degree.

429 The new forms of accounts were introduced, generally, during the year. It is said that the pound keepers find the forms somewhat complicated, but they will no doubt get used to them in time.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

430. The two most important institutions under this head in the Division are the Indigo Planters' Association and the Bihar Landholders' Association, of which Sir W. B. Hudson and the Maharaja of Darbhanga are the respective Presidents. Both Assocations were frequently consulted during the year on public questions, such as the maintenance of the record of rights, &c.

431. The Congress movement still shows but little vitality in Bihar. It has, I understand, but few adherents among Biharis, although the Bengali community continue to support it with some show of energy.

432. The only social institution in the Patna City is the Bihar Hetaish Library, regarding which the Magistrate of Patna remarks as follows:—

"A fair number of educated men of the city belong to this institution, which is purely a reading club taking in the most important English and vernacular dailies and periodicals. The premises of this Society are situated in the chawk and are small and ill-lighted. During the rains last year a committee was formed with a view to build premises for a library and club on the Mangle's tank. The necessary site has been obtained from the Municipal Commissioners, and all that is now wanting is the necessary funds. Subscriptions to the amount of above three thousand rupees have been collected. Such an institution would be an immense boon to the city, and I hope to be able to carry the proposal through."

433. The Victoria Jubilee Club is supported by the large native society of Bankipore. The club takes in several daily papers and periodicals, and possesses a good billiard table and tennis courts.

434. Regarding the Anjuman-Islamia and the Anjuman-i-Momini Associations at Gaya, the Collector reports as follows:—

"The Anjuman-i-Islamia, representing the Sunni community, was reorganised during the year under a Bengali Muhammadan pleader of the local bar, Maulvi Fazalul Bari, and appears to have devoted its attention principally to the Armenian atrocities, the anti-kine-killing agitation, the Shia Alam question, and the employment of Muhammadans in the public service.

"The other Muhammadan Association, the Aujuman-i-Momini, representing the Shia interests, gave unremitting attention to the Shia Alam question, and was instrumental in getting a memorial on the subject presented to the Government of India."

435. Regarding the branch of the Kayasth Sabha at the same place, Mr. Macpherson remarks—

"The Kayasth Sabha has been reorganised during the year with an energetic pleader of the local bar as Secretary, and has held more frequent meetings than before to consider social questions affecting the welfare of the writer caste in Bihar, foremost among them being the curtailment of marriage expenses. The interests of this pushing class of the Bihar community have been seriously affected by the decision of the Kayasth Conference held at Benares during the

year, not to re-admit into caste Mr. Sachitananda Sinha, who has qualified in England as a barrister."

436. The only new association founded during the year, and the only one of its kind in the Division, is the Rate-payers' Association at Arrah. Mr. Marindin thus describes its origin:—

"There was some agitation in the town of Arrah among the rate payers last February against the imposition of the water-rate, and a Rate-payers' Association was formed to protest against the tax. A certain amount of intimidation was practised against persons who continued to use the pipe water, but this was promptly suppressed and the agitation subsided."

437. Mr. Marindin also notices the fact that the annual Muhammadan Education Conference was held at Arrah in February last. A number of maulvis and gentlemen from Dinapore, Chapra, Muzaffarpur, Ghazipur, Benares, Lucknow, the Punjab and other more distant places took part in it.

Gowrakshini Sabha.

438. This movement has during the past year lost much of its former vitality, and especially of its influence for mischief as an agitating medium. Many of its principal members have withdrawn their assistance, though the Marwari and shop-keeping class continue to support it. I give the following extracts from the District Officers' reports:—

Patna.—"The Gowrakshini Sabha of the place is principally kept up by the Marwaris, who pay a tithe in the shape of a percentage on all their transactions. The Society maintains a "goshallah" for old and diseased cattle, but disorder and want of method are said to be its leading characteristics."

Gaya.—"The Gaya Gowrakshini Sabha continues to be carried on by the trading class in the town of Gaya, but seems to confine its operations to furthering the humane objects with which it was ostensibly started. The more influential members of the community have withdrawn active co-operation in the movement, since the mischievous results of its teaching in the hands of ignorant and irresponsible agents led to its being regarded with suspicion by the authorities."

Muzaffarpur.—"There is a Gowrakshini Sabha at Sitamarhi and at Hajipur and Lalganj. These institutions still continue to exist, but have not shown any particular activity in the year under report."

Darbhanga.—"The Gowrakshini movement, as far as any political significance is concerned, has died out. The sabhas that exist confine their operations in a half-hearted way to the legitimate objects of their existence, the preservation of sick and old cattle."

STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

Anti-kine-killing agitation.

439. In paragraphs 491 to 500 of last year's report, a full account was given of the anti-kine-killing agitation in Bihar during the year 1893 and the first months of 1894, of the riots in several districts which ensued from it, and of the preventive measures which Government were in consequence obliged to take in the Patna, Gaya, and Shahabad districts. It was also stated that the Bakr-Id festival in June 1894 had passed safely without any riotous scenes, with the exception of one case in the Siwan subdivision of the Saran district, where a mob of Hindus had seized a cow from two Muhammadan passers-by. I have now to add that in that case several of the leaders of the mob were judicially punished by the Subdivisional Officer of Siwan, and an additional police force of one head constable and four constables was quartered on the village concerned for three months by way of a warning. There were also, as mentioned in that report, a few cases, some half a dozen in the whole of the Division, where a disposition was shown by the Hindus to interfere with Muhammadan sacrifices, but all these were settled without any disturbance, either by the Muhammadan consenting to substitute a goat or a sheep for his sacrifice, or to hold it in the house of a friend where it was admitted to be an established custom, or by the Magistrate summarily deciding the case on its merits. I may mention that the most important of these cases, as the one most likely to lead to serious consequences, occurred in the heart of the Patna City, where, on the day before the Bakr-Id (of 1894), a wealthy Hindu bannia obstructed a Muhammadan who

was leading a cow along the street to a neighbouring Muhammadan tolah. Prompt measures were, however, taken by binding down the offender to keep the peace, and by, at the same time, moving a body of military police from Bankipore into the city; confidence was restored, and the incident ended.

440. Following the Bakr-Id of 1894, the high state of tension between the two sects was perceptibly relaxed, and the ensuing Muharram passed without any display of ill-feeling. The same was the case with the two large cattle fairs at Barahpur in the Shahabad district, which in previous years had been the scene of more than one serious disturbance. During the rest of the year, until certain recent events which will be noticed below, peace has everywhere been maintained; and it is a noticeable fact that in the two districts (Gaya and Shahabad) where the outbreaks in 1893 were most prevalent, and the measure of quartering additional police had to be most largely resorted to, the relations of the two parties may be said to have almost quite regained their former friendly live-and-let-live character, as the following extracts from the District Officers' reports will show. Thus Mr. Macpherson, the Magistrate of Gaya, says:—"It is gratifying to be able to record that the movement against kine-killing has not in the slightest degree excited public feeling in a mischievous manner during the year, in spite of the intensity of the agitation on this subject in the early part of the previous year. All the leading members of both the Hindu and the Muhammadan communities have continued to display much good sense and loyal feeling in this matter, which culminated in expressions of genuine mutual tolerance on the occasion of the visit of His Honour the Lieutenant-Governor in November and of His Excellency the Viceroy in March," and Mr. Marindin, the Magistrate of Shahabad, remarks:—

"The influence of the Gowrakshini Sabhas in the district appeared to have pretty well died out by the commencement of the year. A good deal of anxiety, however, was felt at the time of the large cattle fair at Barahpur in April, and at the Bakr-Id of 1894, and special precautions were taken to be in readiness to supress any disturbance which might arise. No disturbance took place, and there was no sign of ill-feeling at the Barahpur mêla, or at the Bakr-Id, between the Hindus and Muhammadans. The relations between the two races seemed in fact to be entirely amicable, and the Muhammadans were particularly careful not to do anything which would insult the religious prejudices of the Hindus, while the latter raised no objection to the customary sacrifices."

441. The reports from the other districts have also (with the exception referred to above) been, throughout the past year, of the same re-assuring character.

442. At the same time it is not to be supposed that the fanatical feeling which this mischievous agitation excited has yet been everywhere quenched; nor can those who fostered it expect that the desire for retaliation, which they have foolishly aroused in the opposite party, will suddenly die away and be no more felt. The embers still remain, and the position, I fear, will have to be one of anxious watchfulness for some time to come.

443. A week before the end of the year under report a serious outbreak occurred at a village called Mathurapur in the Showhar thanna of Muzaffarpur, on the border of the Champaran district. The village consists of 69 houses of Hindus and 21 of Muhammadans. It appears that the Muhammadans had for many years past an unroofed and unused (?) masjid in the outskirts of the village. This they recently roofed and otherwise improved, and on the 22nd March last they recommenced using the renovated building. The Hindus immediately commenced blowing shells and making other noises to annoy the Muhammadans whenever they assembled for prayers. The Muhammadans, according to the Magistrate's report, bore this in silence, persevering, however, in the use of the mosque. Meanwhile, according to the Hindu story, a report got about that the Muhammadans intended on the occasion of the Id-ul-Fitr (29th March) to sacrifice a calf at the mosque. The Muhammadans deny any such intention, and the District Magistrate, Mr. Hare, has recorded his opinion that this was a made-up story, and that it was the call to prayers, the "Azan," which aroused the anger of the Hindus. Be this as it may, on the 28th March a large crowd of Hindus armed with *lathis*, numbering several hundreds, assembled from the neighbouring villages, and made

a savage attack on the small Muhammadan population, twenty-three of whom were wounded principally from *lathi* blows, several of them severely, having their arms or legs broken (including a woman whose arm was broken). The police sub-inspector, who went to the spot with two constables, was chased away, and on the following day, when he again appeared to hold an enquiry, the mob of Hindus re-assembled and again hunted him from the spot. Finally, the District Superintendent of Police, with a body of police, arrived, and the enquiry was continued. The result of the case was that some 26 of the rioters were convicted and punished by the District Magistrate, and a body of additional police, consisting of 10 constables and 2 officers, have been quartered on the offending villages for 15 months (in order to cover the period of next year's Bakr-Id).

444. But this unfortunately is not all. Within a few miles of Mathurapur, both on the Muzaffarpur and on the Champaran side of the border, are a number of villages containing a strong Muhammadan element of a Pathan source. It became rumoured that these people, in revenge for the treatment of their co-religionists at Mathurapur, had resolved to sacrifice at the coming Bakr-Id more cows than usual, and that the Hindus were determined to prevent them. Every possible precaution was taken by the Magistrate of each district, especially in Champaran, where the danger appeared greatest. The Magistrate, Mr. E. G. Colvin, and District Superintendent, Mr. Tucker, personally visited the disaffected villages during the days immediately preceding the Bakr-Id. After an infructuous attempt to bring the two parties to an amicable agreement, the Magistrate, after due enquiry, summarily decided where sacrifices were or were not to be held; a number of the leaders on both sides were made special constables, or bound down to keep the peace; and bodies of armed police from the district reserve and from the military police detachment at Bankipore were posted in selected central positions. The result was that on the Muzaffarpur side of the border, where the recent lesson of additional police was probably taken more to heart than in the neighbouring district, everything passed off quietly. So also in the villages in Champaran where the precautions I have described were taken. But the fanatical feeling had spread beyond this line of defence, and large crowds of Hindus suddenly appeared in places where no disturbance was anticipated, bent upon attacking the Muhammadans wherever they could find them. Thus a Muhammadan village called Bara Fureed, where it is believed no sacrifice took place, was wantonly attacked by a mob who had been disappointed by finding armed police at another place against which they had originally proceeded; while close to the Dhaka thana and in other directions mobs assembled and were only dispersed by the personal efforts of the District Superintendent of Police or other police officers, and with considerable difficulty. But the worst feature of all was a most inexcusable outrage committed on the large Muhammadan village of Bijai on the 8th June 1895, after the Bakr-Id was over. The alleged cause appears to be that a Hindu, a few days previously, passing through the village, had been abused and assaulted. It seems doubtful if this is true, but in any case it did not warrant the subsequent conduct of the Hindu mob. The entire village was gutted; nearly all the houses, to the number of about 80, were burnt; everything that could be carried away of any value was looted; the men, wherever they could be caught, were mercilessly beaten, and the women stripped of their ornaments. Two indigo-planters, who were present and did all they could to restrain the mob, but in vain, witnessed the whole occurrence.

445. Some 40 odd arrests have been made in this case (which has since been committed to the sessions). Other arrests have been made in the Dhaka and Bara Fureed cases, which are under trial by the District Magistrate. Mr. Colvin has also submitted proposals for quartering additional police in the disturbed tracts, which I have forwarded to Government for orders.

446. It is a matter for profound regret that the period of peace, which the Division has experienced for the last eighteen months (since the Basantpur riot in September 1893), should have been thus suddenly broken into. The only satisfaction, if it may be called so, is that the disturbances so far are local and can be traced to a local cause. There are no signs of their having been fomented, as was the case two years ago, by outside agency. This affords hope that they will spread no further.

The tree-daubing mystery.

447. This curious movement was noticed in paragraph 502 of last year's report, where its characteristics were described. The opinion I then ventured to give of its origin was subsequently accepted by the Government of India, and has not yet, I think, been gainsayed. The most noticeable result of the movement was a series of the most silly alarmist letters, by a number of anonymous writers, that have probably ever appeared in the European press of this country. This movement and the subsequent "tree blazing" which took its place have since spasmodically reappeared for a few days here and there—the work doubtless of superstitious individuals who believe in its efficacy to ward off evil of some sort or other. As remarked by the Magistrate of Muzaffarpur, the good crop of mangoes this year will no doubt be largely ascribed to this measure, and will justify it in the eyes of the common people.

The Cadastral Survey.

448. Regarding the feeling on this subject, the Collector of Muzaffarpur makes the following observations, with which I agree:—

"The survey and record of rights does not excite any strong opposition except from a very few landlords. There are many landlords no doubt who view with alarm any curtailment of the power which the absence of a reliable record gives them. But I think the feeling is growing among the better class of landlords that the record will strengthen their hands in many ways.

"The general discredit into which the landlords' papers had fallen affected the mass of honest landlords most seriously and rendered it impossible in many cases to sue with any chance of success. The raiyats perhaps expect more from the record of rights than it will give them, many of them hoping to secure substantial reductions of rent. But the actual settlement proceedings have passed off very quietly—a sure sign that, whatever their first expectations, they have not been unreasonable in their demands"

449. The Collector of Champaran on the same subject observes as follows:—

"It was found that in one of the villages of the Bettiah Raj the raiyats had in a large number of instances encroached on land which was not originally settled with them, and the result has been an increase of about 14 per cent. in rents in those villages in which application for settlement of rent was made, *i.e.* in about one-third of the whole area cadastrally surveyed in the preceding season. The tenants, whose rates have always been exceptionally low, seemed to recognise the justice of the settlement, and in many cases effected willing compromises with their landlords. The settlement does not seem to have given rise to any ill-feeling between the tenant and landlord, and has no doubt done much to prevent any such feeling arising in the future."

The Budh Gaya Temple case.

450. Considerable interest has lately been aroused among the Hindu and Budhist communities by an attempt which was made in February last by Mr. Dharampala, accompanied by two Budhist priests, to enshrine an image of Budha, said to be of great antiquity, by a celebrated Japanese artist, in the temple. The image, after being placed in the temple, was removed from it by the followers of the Mohunt of Budh Gaya, who are also charged with having disturbed Mr. Dharampala in his performance of worship. The case has formed the subject of a criminal complaint which is still pending decision before the Magistrate of Gaya.

March of reliefs through the northern districts.

451. At the instance of the Magistrate of Saran, the route to be taken by the last of the four regiments which passed through that district during the past cold weather was changed, so as to allow of the men being marched through the centre of the district instead of along its southern edge where the people showed no particular signs of restlessness. The impression created by this measure on the minds of the people was, the Magistrate thinks, conducive to the maintenance of order, and Mr. Slack suggests that in the coming trooping season the regiments detailed to pass through his district should be required to follow the same route. In this I concur.

452. The excitement caused by the march of the reliefs through the northern districts, to which the inhabitants were unaccustomed, is thus described by the Collector of Darbhanga:—

"The movement of troops through the district was also a great element of excitement. When the first relief went through, the villages were deserted by the women. The men came round in crowds to stare at the soldiers, and on one occasion when the soldiers burst into a cheer for some reason, the spectators fled across country in the greatest terror. The men at other camps used this simple device to rid themselves of a staring throng when they were eating their food. The movement of the second relief caused even greater excitement; they were Beluchis, and their advent was regarded with dread. It took all the tact of the European residents and educated native gentlemen to assure the people that they had nothing to fear. The troops were models of good behaviour during their march through the district. I had not a single complaint from any one.

Newspapers.

453. *Patna.*—The two leading papers published at Patna are the *Bihar Herald* and the *Bihar Times*, both weekly papers, in English, with about 500 and 600 subscribers respectively. The tone of both papers is moderate. Another paper published in English is the *Patna Institute Gazette* with 150 subscribers. The vernacular papers are the *Bihar Bandhu*, a monthly Hindi journal with 500 subscribers, and the *Alpunch*, a weekly Urdu paper with some 400 subscribers.

454. *Gaya.*—The only papers published in this district are two weekly ones of a semi-comic character, in Urdu, called the *Gaya Punch* and the Shohrai *Afaq*, the former edited by a Sunni and the latter by a Shiah. The Magistrate says that each has influence in its own circle, and there is nothing, he understands, objectionable in either.

455. *Shahabad.*—The *Bihar Patriot*, started last year by a local pleader, has ceased to exist.

456. There are no local newspapers in any of the other districts, but in all of them there are presses from which pamphlets of various kinds issue, and which take up local printing jobs.

457. The circulation of English and native papers printed elsewhere was noticed in paragraph 510 of last year's report. I have nothing to add to the remarks there made.

XXXVI.—CONDUCT OF ZAMINDARS.

458. As a class the zamindars of Bihar are loyal and willing to co-operate with the authorities in matters of public good and usefulness. The estates of the great landholders are, as a rule, well and systematically managed, and the tenants have but little real cause of complaint. Indeed, in some of the larger estates, such as the Bettiah Raj, they occupy their holdings on remarkably easy terms. But in the small subdivided and co-parcenery properties the case is as a rule very different. In such a property the rent of each field is of importance to the petty and grasping malik, and every possible opportunity is taken to enhance it, whether by fair means or foul, resulting in a state of constant friction and harassment of the raiyats. The only real remedy for this is a survey and record of rights such as is now being made in the northern districts of this Division.

459. In Gaya the Collector, Mr D. J. Macpherson, reports that the only considerable zamindar whose conduct has attracted unfavourable notice is the Raja of Maksudpur, who has in his employ agents who do not hesitate to act very oppressively towards the tenants. Most of the leading zamindars of the district, the Collector adds, are not as a rule wise in the selection of their agents, whose attitude, as well as that of their masters, towards the raiyats is, generally speaking, unsympathetic. There has, however, been no general question of late to lead to any unusual differences. The zamindars of his district are as a body thoroughly loyal to Government, and the visits of His Excellency the Viceroy and of His Honour the Lieutenant-Governor during the year called forth enthusiastic demonstrations of this feeling.

460. The premature death of the Maharaja of Dumraon, which occurred in the early part of the year under review, was noticed in paragraph 516 of last year's report. The widowed Maharani and the Dewan Rai Jai Prokash Lall

Bahadur, C.I.E., were appointed joint-executors of the will of the deceased nobleman, under the terms of which the latter has retained the position of Manager which he held during the Maharaja's lifetime. Mr. Marindin, the Collector of Shahabad, remarks as follows:—

"As far as their relations with Government are concerned, the zamindars have shown every disposition to give the authorities loyal support when called upon to do so, and in connection with the arrangements made to maintain peace at the Barahpur fair and at the Bakr-Id the names of Rai Jai Prokash Lall Bahadur, C.I.E., and Raja Raj Rajeswari Prasad Singh, of Surajpura, deserve favourable mention. The Subdivisional Officer of Sasaram also gives the Raja of Surajpura credit for endeavouring to improve the sanitation of his village. The best administered estates in the district are the Jugdispur estates, belonging to Messrs. Thompson, Burrows, and Mylne, which are under the immediate management of Mr. L. H. Mylne and Mr. Ernest Mylne, where everything seems to be conducted in a businesslike and methodical way, and attention is paid to the welfare of the raiyats, who seem thoroughly contented."

461. In Saran the Maharaja of Hutwa's estate continues to be well managed, and care is taken to protect the raiyats when any village is leased out. The Maharaja, as noticed in previous reports, is a liberal supporter of useful public institutions and defrays the entire expenses of three charitable dispensaries and a high school. His example is unfortunately not followed by the other leading resident zamindars of the district. The Collector states that the Chainpur Babus, with the exception of Babu Damoodar Deo Narain Singh, have shown no signs of endeavouring to make up their family disputes which have seriously involved most of them and caused them to become of little account in the district. Rai Mahabir Prosad Sah Bahadur, of Goldenganj, makes but little benevolent use of his means, and is reported to be a grasping and hard landlord. With the exception of the two well-managed estates of the Maharaja of Hutwa and of the Dowager Maharani of Bettiah, and of the properties of the above-mentioned landlords, the land of the district is almost entirely held by hundreds of petty proprietors. The Collector remarks:—"With regard to obtaining private persons public-spirited enough to come forward and carry out works of public utility, the outlook is becoming year by year more and more narrowed."

462. In Champaran the management of the Bettiah estate was conducted with his usual ability by Mr. T. M. Gibbon, C.I.E. He has now been obliged to proceed on leave to Europe owing to ill-health, and his place has been taken by Mr. T. R. Lowis. Towards the end of the year the Shazada of Ramnagar appointed Mr. Broncke as manager of his estate. It is too early yet to say what influence the new manager will have in counteracting the counsels of the young man's evil advisers. The long-standing friction between the Madhubani Babu and his raiyats again showed itself to some extent in connection with the survey proceedings, but it is hoped that the new manager, Pandit Thakur Prosad, may be able to re-establish friendly feeling.

463. In Muzaffarpur the Collector has nothing to say under this head, beyond mentioning that the survey proceedings have been nearly completed in the Hajipur subdivision and have been conducted with singularly little friction, and that the relations between landlord and tenant are on the whole satisfactory.

464. In Darbhanga the Madhubani Babus' affairs are in as unsettled a state as ever, but there has been no serious disturbance arising from them during the year of report. The Collector writes:—"I received the most cordial aid from the Maharaja and all other zamindars through whose property the troops passed last winter. The Maharaja provided all *rassad* free of cost, and every one helped as far as they could to make the passage of the troops comfortable."

The Maharaja's large estate continues under the management of Mr. Henry Bell. The Maharaja's liberality in supporting the large male and female hospitals and dispensaries at the northern end of the town of Darhanga, besides several other dispensaries at villages in the interior, is well known to Government. I have already brought to the favourable notice of Government the munificence of Rai Ganga Prosad Singh Bahadur in making a handsome donation of over Rs. 18,000 to the Darbhanga Municipality for the construction and fitting out of a new dispensary and hospital at Laheria Sarai. The hospital

will supply a want which has hitherto been very much felt at the southern end of the town of Darbhanga, and I hope to see the building shortly commenced on a site which I have recommended should be granted free of cost by Government.

XXXVII.—GENERAL REMARKS.

Emigration to Burma.

465. In paragraph 527 of last year's report a short account was given of the progress of the scheme initiated by Mr. Louis Mylne, of Jagdispur, for the purpose of bringing under cultivation the grant of land made to his father by the Government in Burma, by the transfer to it of families of cultivators from his estate in Shahabad. It was there stated that up to the end of 1893-94 over 100 families, chiefly of the "Koeri" caste, numbering in all some 400 souls, had accepted the terms offered and were settled on the grant. I am now informed by Mr. Mylne of the continued success of the experiment. During the year ending 31st March 1895, 76 families, consisting of 84 adult males, 82 adult females and 129 children, have joined the former settlers from the Jagdispur estate. Of these 76 families, as many as 67 were of the "Koeri" class, the remaining nine families consisting of Chamars, Kandus, Lohars, and Nunnias.

Agricultural Loans Bank.

466. Mr. Mylne has also favoured me with a very interesting account of the working of an agricultural bank which he and his brother have established for the use of the cultivators on their Jagdispur estate. The bank has now been in operation for ten years, and some idea of the extent of its transactious may be formed from the following figures which show the average annual operations for a period of nine years ending 31st May 1893:—

	Rs.
(1) Debit balances outstanding in the hands of borrowers at the end of previous year	91,132
(2) Add amount of current year's advances	1,25,472
(3) Add balance ditto of interest account	12,401
(4) Total due by debtor cultivators	2,29,005
(5) Cash realised during the year	1,20,000
(6) Debit balance carried forward to succeeding year ...	1,09,005

It will be seen that item (5) is about 55 per cent. of item (4), so that about 45 per cent. of the debt has been carried forward, taking one year with another, during the nine years' operations. The realisations varied, Mr. Mylne informs me, year by year, from 45 to 68 per cent. of the aggregate debts due.

467. Advances are made under the personal supervision of Mr. Mylne and his brother, and only after careful consideration of the borrower's separate advance and rent accounts, of his character for steadiness, and the likelihood of his being able within a reasonable time to repay the loan. Enquiries are also made as to the man's other debts, and it is a strict rule that no account is opened with any tenant who has an open running account elsewhere or whose debts are in any way unadjusted. Where this is found to be the case, and the debtor is a good and deserving raiyat, Mr. Mylne not unfrequently settles the mahajan's account and transfers it to his own books, in the hope that the cultivator, with proper encouragement, will in time recover himself; or he allows the raiyat to give a portion of his holding in usufructuary mortgage (*rehan*) to the mahajan, so that at least interest may not continue to accrue against him. Mr. Mylne on this point observes:—

"I consider this a much better plan than repayment in instalments secured by a registered deed; for while in respect of his principal the mahajan is in possession of his security, realising interest from the profits of cultivating the land, there is an ever-present incentive to the cultivator to save and pay off his debt and recover the bit of 'jote' in the mahajan's possession. Whereas, if required to pay by instalments, he almost invariably defaults, incurring what might be called penal rates of interest on such unpaid instalments."

468. The rate of interest charged by the bank is 12 per cent. against the ordinary mahajan's rate of 24 per cent. on cash advances, and 30 per cent. on advances and recoupments in kind. Mr. Mylne states that he has practically succeeded in ousting the mahajan from his estate; or, where this has not been done, in causing him to reduce his rate of interest to that charged by the bank. He seems to doubt, however, whether the ultimate result of this will be for the raiyat's real good, and whether it will not in the end rather encourage the very strong tendency among the cultivators "to look upon their occupancy holdings as a source of infinite credit and a bank to be drawn upon at will."

EXCAVATIONS ON THE SITE OF ASOKA'S CLASSIC CAPITAL OF PATALIPUTRA.

469. During the year of report the excavation of "Upagupta's Hermitage Hill" (Chhotti-Pahari) and of the "Fine Residuary Relic Stupas" (Bara Pahari), the sites of which had previously been identified by Dr. Waddell, was undertaken under the personal supervision of the Collector of Patna, Mr. C. J. O'Donnell. The following description of the work is given by the Officiating Collector, Mr. Inglis:—

"The work was commenced at the end of October 1894, the Sadar kanungo being placed in charge. A trench 12 feet wide was dug directly northwards into the Bara Pahari. When nearing the centre of the hill, this trench was widened, and when the excavation had been carried down to 30 feet the work was stopped. In the course of the excavations nothing of interest was found. The hill is composed of brick rubble. In fact the excavation would almost make one believe that the place had been a vast kiln. Subsequently Mr. O'Donnell decided to deepen the pit and to excavate to 40 feet. An overseer was appointed, and the work of deepening, which also included widening the whole, was commenced in February 1895. It was continued to middle of March without anything of archæological interest being brought to light. The work at Chotti Pahari brought to light a circular wall, apparently that of a watch-tower. The wall is some five feet thick, and is composed of brick tiles rather more than a foot square by an inch and a half to two inches thick. After excavating to twenty feet, tiled flooring of the same material was found. This again further was excavated to four feet, at which depth water prevented any further work, and the excavations at this spot were abandoned.

"Out of one thousand rupees, the amount sanctioned by Government for this work, a sum of Rs. 576 has been expended."

470. Under the orders of Government since received, the excavations will be continued during the ensuing cold weather by the local officers in consultation with Dr. Waddell.

VISIT OF THEIR EXCELLENCIES THE VICEROY AND LADY ELGIN TO BIHAR.

471. The year was signalised by the first visit ever paid to the district of Gaya by the Viceroy and Governor-General of India. The following account is taken from the Collector's report:—

"Their Excellencies the Earl and Countess of Elgin arrived on the 30th of March and stayed at Gaya until the 2nd of April. On arrival, an address of welcome was presented by the Municipal Commissioners, to which His Excellency replied, and on the afternoon of the same day Her Excellency opened the Zonana Hospital of the Lady Dufferin Fund. In the evening the town of Gaya was illuminated, the inhabitants lighting up each his own house; and the outlines of the adjoining hills blazed with bonfires. Next day the Viceroy paid a private visit to the Mahabodhi Temple at Budh Gaya. On the 1st of April, their Excellencies visited the city and were received with interesting ceremonies by the Gayawal priests at the Vishnupad Temple. In the evening there was a reception at which the leading residents of the district presented an address to the Viceroy, who made an important speech in reply. The Countess of Elgin also paid a private visit to the female ward of the Pilgrim Hospital."

472. Leaving Gaya early on the 2nd April, their Excellencies arrived at Bankipore at 10-25 A.M., where, after being met at the station by the principal civil and military officers, they were presented with addresses of welcome at the Chajjubagh House by the Patna Municipal Commissioners and District

Board, and by the Bihar Landholders' Association, to which His Excellency replied. In the afternoon His Excellency visited the Patna Opium Factory, and in the evening a reception of the principal European and native residents was held and a display of fireworks given. On the following day His Excellency visited the Bihar Industrial School, the Patna College, the Oriental Library and the Bankipore Hospital, and Her Excellency paid a visit to the Beveridge (female) ward of the last-mentioned institution and to the "Duchess of Teck's" Zenana Hospital (not yet opened) in the Patna City. Their Excellencies proceeded up-country by special train leaving at 10 P.M. the same evening.

473. Both at Gaya and Bankipore their Excellencies were welcomed with much loyal enthusiasm by the people. They were also attended during their stay at each place by a well turned-out escort of the Bihar Light Horse.

VISITS OF HIS HONOUR THE LIEUTENANT-GOVERNOR TO BIHAR.

474. On the 23rd April His Honour Sir Charles Elliott, attended by the Hon'ble Mr. Cotton, paid a visit to Arrah and opened the municipal water-works on the afternoon of the same day. On the following morning the head works on the river Sone were visited, His Honour returning to Calcutta the same afternoon.

475. In the cold weather His Honour made an extended tour from the 17th November until the 3rd December in the Champaran, Muzaffarpur, Saran, and Gaya districts, in the course of which a number of the settlement camps in these districts were visited and various other inspections made. The subdivisions of Siwan and Gopalganj in Saran, Nawada in Gaya, and Bihar in the Patna district, were visited, and a stay of five days was made at Gaya, during which the Budh Gaya Temple, the Vishnupad Temple, and other objects of interest in the vicinity, including the various public offices, were all in turn inspected. His Honour and Lady Elliott, who accompanied him throughout the tour, were everywhere received with the same display of loyal feelings and respect as were later on shown during the visit of their Excellencies the Viceroy and Lady Elgin.

476. Ample proofs were on all sides forthcoming to show how much these visits by the Heads of both the Supreme and Local Governments were appreciated by all classes of the people. Wrapped up as they are in their own local affairs, they are particularly gratified at the evidence thus afforded of the interest taken by their Rulers in local matters and in the details of district administration.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE SALT DEPARTMENT FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT.—SEPARATE REVENUE.

Darjeeling, the 1st October 1895.

RESOLUTION—No. 642T.F.

READ—

The Report of the Board of Revenue on the Administration of the Salt Department for the year 1894-95.

The main feature of the year has been the great increase in the importation of salt and in the quantity remaining uncleared at the end of the year, for which provision had to be made in bonded warehouses in Calcutta. The chief administrative change has been the extension of facilities for the removal of salt under bond from the Government warehouses or from shipboard to warehouses appointed or licensed under the Sea Customs Act, or the Inland Bonded Warehouse Act of 1887. With this object the rules on this subject were remodelled so as to allow larger percentage for wastage, and to render more easy the weighment and transport of the salt. Very small use, however, has as yet been made of these facilities, and the amounts bonded under the new rules were insignificant. The Board received during the year an interesting report by Mr. Ashton of the Northern India Salt Revenue Department, who was deputed to enquire into the extent of illicit manufacture of salt on the sea-coast of Bengal, excluding Orissa, and this subject, together with various proposals affecting the salt administration, is now under the consideration of Government.

2. The receipts and charges of the Salt Department during each of the last six years are shown by the Board as follows:—

HEADS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	Increase in 1894-95 compared with 1893-94.	Decrease in 1894-95 compared with 1893-94.

* Revised figures received from the Accountant-General, Bengal.

(a) Includes the cost price of salt manufactured under the direct management of Government in Orissa.

(b) Details are given in the statement in paragraph 46 of the Report.

N.B.—There appears to be an error in the Board's figures against the sub-head "Miscellaneous" under Provincial Receipts, as explained by foot-note (a). The "cost price" of salt, or rather the sale-price ex-duty of salt manufactured in Orissa, and also the portion of the other miscellaneous receipts which is realised in Orissa, are Imperial receipts.

3. When compared with the statistics of 1893-94, the figures of the year under review show an increase of Rs. 8,81,910, or 3·7 per cent., in the receipts, and of Rs. 43,816, or 12·1 per cent., in the charges. The net revenue, therefore, has risen by Rs. 8,38,094, or 3·5 per cent., as compared with the previous year, and stands higher than in any of the preceding 10 years. The advance in import duty, which makes up all but a small fraction of the receipts, is attributed by the Board to larger clearances of salt, owing partly to a fall in the price of salt and partly to the reduced clearances of the previous year. The revenue from excise salt shows a slight improvement, owing to the larger sales of salt manufactured at the Government factories in Orissa. The Provincial expenditure on account of salaries, establishments, and contingencies, not including Orissa, amounted to Rs. 52,298 against Rs. 26,838 in the previous year. A portion of this increase (Rs. 11,105) was due to the cost of Mr. Ashton's deputation above referred to. The Lieutenant-Governor protested at the time against this charge being thrown on the Provincial Government, on the ground that it is not in accordance with the principles of the Provincial contract that the Imperial Government should compel the Provincial Government to pay for the services of an Imperial officer deputed to conduct an inquiry intended to raise the Imperial revenues; but his protest was overruled. The rest of the increase, which occurred mainly under the heads of rents, rates and taxes and petty construction and repairs, was due to the increased trade of the year. Temporary storage room was constructed at Sulkea, and sheds were hired from the Port Commissioners at the Kidderpore Docks for the bonding of salt, in consequence of the accommodation available at the permanent golas having proved insufficient. In writing on the question of additional permanent space for bonding, the Board rightly remark that it would not be proper for Government to provide unlimited storage which might lie empty for years, at the expense of the general tax-payer, for the benefit of the salt trade.

The salt trade

4. The fluctuations in the volume of the salt trade in Bengal during the last ten years are shown in the following statement:—

This statement brings out very clearly the leading features of the salt trade for the last ten years. It shows side by side the progressive increase in the quantity of salt imported, and the rapid decline, broken by occasional fluctuations, in the manufacture of local salt. The absence of entries under the head Excise salt in aurungs after the year 1887-88 marks the disappearance of *panga* salt made by boiling, which at one time furnished the entire supply of salt for Bengal, and which lingered on under difficulties as a local industry in Orissa until the last licenses were cancelled a few years ago. The stock of salt in the golas at the close of the year was over 36 lakhs of maunds, far exceeding the closing stock of any of the preceding nine years. In addition to this stock there were 7,02,189 maunds afloat in the port of Calcutta ready to be sold direct to purchasers.

Imports.

5. The combined imports into Calcutta and Chittagong show a net increase of 25,05,074 maunds, or 24·1 per cent. over those of the previous year; but Chittagong had again a decrease of 83,776 maunds. This is attributed partly to the large stock brought forward from the previous year, and partly to the fact that the space available for salt in ships visiting Chittagong for the purpose of the export trade in rice and jute was to some extent taken up for the import of railway material at rates of freight higher than salt could afford to pay.

The following statement shows the different countries and places from which shipments of salt were made:—

	1892-93.	1893-94.	1894-95.	Percentage of quantity imported for each group in 1892-93.	Percentage of quantity imported for each group in 1893-94.	Percentage of quantity imported for each group in 1894-95.

Total ...	93,83,308	1,03,58,803	1,28,63,877	100·0	100·0	100·0

The increase in imports into Calcutta was mainly contributed by the United Kingdom, Hamburg, Ras Rawayah, Hanjam, and Bombay. The trade in salt from Turkish Arabian ports in the Red Sea has developed greatly of late years, and an officer in the service of the Turkish Government visited India lately with the object of extending it further. The consignments from Aden were reduced by heavy rains, which destroyed a large quantity of the salt at that port. The imports from Madras show a falling off, but the salt trade between that port and Calcutta has always been most uncertain.

Clearance of salt.

6. Including Bombay and Madras salt cleared free of duty in Calcutta, duty was paid on 69,40,855 maunds of salt cleared from ship-board, against 60,65,233 maunds cleared in the previous year, while the clearances from bond fell from 38,99,085 maunds to 34,81,646 maunds. Four hundred maunds of salt were cleared during the year for the first time from each of the newly established bonded warehouses at Khulna and Balasore. On the whole the total clearances of all kinds, including those of excise salt, rose from 99,93,712 maunds to 1,04,62,366 maunds.

Consumption of salt.

7. Deducting from the above clearances the net exports from Bengal amounting to 7,07,717 maunds, and adding 27,175 maunds, being the quantity of salt made in saltpetre manufactories, the balance of salt left for consumption in Bengal during 1894-95

was 97,81,824 maunds, against 95,27,355 maunds in the preceding year. The rate of consumption per head, after allowing for a rather excessive yearly rate of increase (10·45 per mille in the population since last census, is shown as 5 seers 2 chittacks against 4 seers 15 chittacks in 1893-94. The consumption of the saliferous tracts, excluding Orissa, calculated on the same rate of increase, amounted to 5 seers 2 chittacks against 4 seers 15 chittacks in 1893-94. The lowest rates were in Midnapore, 4 seers 6 chittacks, Howrah and the 24-Parganas, 4 seers 13 chittacks. In the other parts of the tract the rate of consumption equalled or exceeded that of the rest of the Province. The accuracy of these figures, based on the records afforded by rowannas, has been discussed in a separate correspondence with the Government of India, and it is believed that they possess a fair degree of accuracy, but cannot be implicitly relied on. The Board attribute this increase to the comparative cheapness of salt during the year, the abundant harvest, and the vigilance of the police. The average rate of consumption per head in Orissa was 9·16 lbs. against 10·54 lbs. in the previous year. The decrease of 1·38 lb. is partly accounted for by the fact that a quantity of Ganjam salt imported into Cuttack used to be forwarded thence to Sambalpur; this source of supply has now been replaced by Bombay salt since that place was connected with the Bengal-Nagpur Railway. On the other hand it is known that the population of the Tributary Mahals, which is included in that of Orissa, is partly supplied from Midnapore, so that salt imported from that quarter and not credited to Orissa may be set against salt exported from Orissa but credited to it.

Prices.

8. The price of salt was generally lower than in the previous year, the decrease being due to abundant supplies. The average wholesale price (exclusive of duty) of 100 maunds of Liverpool salt, purchased from the ship's side in the port of Calcutta fell from Rs. 77-12-11 to Rs. 60-10-6, being a decrease of Rs. 17-2-5, or nearly 2 annas 9 pie per maund. The average wholesale price for the whole Province, including duty, at the nine chief wholesale marts of Bengal (Appendix B) fell from Rs. 3-11-6 to 3-9-1 per maund, or 2 annas 5 pies per maund. The corresponding average based on the wholesale prices of all the districts in Bengal Appendix A) fell from Rs. 3-14-3 per maund to Rs. 3-12-19—a decline of only 1 anna and 5 pies per maund, so that the retail dealers got the benefit of only about one half of the reduction in the price to the first-hand purchaser.

Inter-provincial trade.

9. The total imports from Madras and the Upper Provinces of duty paid salt fell from 5,52,228 maunds to 4,29,120 maunds during the year, the decrease being due to the lower prices of foreign salt. For the same reason the exports from Bengal to Assam, Northern India, and Foreign States beyond the northern border, rose from 10,45,7o7 maunds to 11,36,837 maunds, giving an excess over the imports of 7,07,717 maunds, against 4,93,539 maunds in 1893-94.

Working of the Salt Laws and Rules.

10. The total number of cases in which contraband salt was confiscated, including those in the Orissa district, rose from 1,071 to 1,096 during the past year, and the quantity confiscated from 285 maunds to 295 maunds. In Midnapore the cases were 227 against 175, but the quantities seized were in all cases extremely small, amounting only to 7½ maunds in 1894-95 against 6 maunds in 1893-94. In Orissa the quantities were larger, 205 maunds, but they consisted exclusively of salt-earth and brine, and the average seizure, which amounted to 15 seers, is equivalent therefore to only about 4 seers of manufactured salt. The number of cases instituted in the courts was 967, chiefly for illicit manufacture and possession, against 1,005 in 1893-94, and 988 persons were convicted. The rewards disbursed amounted to Rs. 6,061. The whole question of illicit manufacture in the saliferous tracts of Bengal outside Orissa is now under consideration in connection with Mr. Ashton's report.

Salt in Orissa.

11. As usual, the Board devote a separate part of their report to the administration of the Salt Department in Orissa. The following table shows the consumption of salt during the last five years, and its rate per head of the population, an allowance

being made for a yearly increase of 10·45 per mille upon the figures of the census of 1891:—

Year.	Locally manufactured.	Sold from local manufactories.	Imported from Calcutta.	Imported from Ganjam.	Total consumption.	Rate per head.
1	2	3	4	5	6	7
	Mds.	Mds.	Mds.	Mds.	Mds.	
1890-91 ...	61,765	1 30,572	2,84,033	3,11,257	7,25,862	10·42
1891-92 ...	8,554	18,866	2,51,971	4,43,071	7,13,908	10·12
1892-93 ...	52,962	81,329	2,76,408	3,37,423	6,95,160	9·75
1893-94 ...	15,422	24,460	2,85,934	4,48,913	7,59,317	10·54
1894-95 ...	2,10,628	38,715	2,75,764	3,51,714	6,66,193	9·16

For the first time since 1890, the Madras Administration has been successful in making salt in the Government factory on the Chilka Lake, owing to the dryness of the season, which lasted till well into June 1894; of this quantity, 38,715 maunds were sold during the year, and the rest remained in stock. But here their success ended. The attempt to increase the consumption of licit salt was a greater failure than ever. The rate consumed per head reached the lowest figure attained in the last five years, and indeed the lowest figure on record, being far smaller than was ever registered in any year when Orissa was in the charge of the Bengal Board of Revenue. And this was accomplished as the result of entertaining an establishment which (including manufacturing expenses) cost Rs. 1,54,023. The total sale of salt, 6,66,193 maunds, was less than in any year since the Madras Salt Department has been in charge, with the exception of 1888-89. Were it not, therefore, for the raising of the duty on salt from Rs. 2 to Rs. 2-8 per maund, the Government would obtain less revenue than it did when the preventive work was in the hands of the police. These facts go to bear out the indictment preferred against the Madras management in last year's Resolution. The whole question of retransferring to Bengal the administration of the Orissa Salt Department, with the exception of the manufacture of Government salt on the Chilka Lake, will be referred for the consideration of Government of India.

12. The thanks of the Lieutenant-Governor are again due to the Board for their careful supervision of the department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,
Secretary to the Govt. of Bengal.

FIRST FORECAST OF THE BHADOI CROPS IN BENGAL 1895.

The following is published for general information.

Rev. Dept., C. E. Buckland,
The 8th October 1895. *Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the bhadoi *crops in Bengal,* 1895 (*based on returns forwarded in the middle of September* 1895).

Explanatory.—The classification of crops adopted in the present forecast is the same as that followed in the final report on the *bhadoi* crops in Bengal 1894, except that *bhadoi til* has been shown under a separate heading, in order that complete returns for oilseeds may be available for the Provincial returns of Agricultural Statistics published by this Department. The crops included in the appended returns are (1) *bhadoi* food crops with separate figures for *bhadoi*

The rainfall in April was well distributed and generally above the normal.

In the early part of the month of May the rainfall was abundant. During the last half of May, heavy rain fell in East Bengal, but in other districts the fall was less than the average. For the whole month of May, East Bengal and the greater part of North Bengal and North Bihar received more than the normal fall, while West Bengal, Central Bengal, South Bihar, Orissa and Chota Nagpur, received less than the normal fall. In June, the rainfall was altogether abnormal. East and North Bengal received less than half the usual rain. In West and Central Bengal and parts of Bihar, the rainfall was short, but Chota Nagpur received more than the normal fall, and Orissa double the normal fall.

In July, throughout Central and Western Bengal, in South Bihar, except Shahabad, and in Orissa, the rainfall was deficient; while in North Bengal and in North Bihar the rainfall was in excess. In August, the rainfall in Bihar and Orissa was normal or a little above the normal, while in Bengal and in Chota Nagpur, it was less than the normal.

In the first week of September, the rainfall was much below the normal in all districts of these Provinces, especially in East and North Bengal. In the second week of September, heavy rain fell in East and North Bengal; elsewhere the rainfall was short of the normal. There was general rain during the third week of September, the falls being heaviest in Orissa, Chota Nagpur, Bihar and South-West Bengal.

Floods are reported to have done some injury to the *bhodoi* crops in Jalpaiguri, Bogra, Pabna, Dacca and Mymensingh.

3. *Area cultivated.*—The total area cultivated with *bhadoi* crops during the season under review, as shown in the appended returns, amounts to 15,678,600 acres against 15,920,100 acres estimated to have been cultivated with *bhadoi* crops in 1894. The decrease in area is nominal and requires no explanation. The areas occupied by *bhadoi* food crops during the season under report was about 77 per cent. of the total *bhadoi* area, *bhadoi* paddy representing about 45 per cent. of the whole area.

4. *Character of the crop.*—From the appended statement, it will appear that taking all the *bhadoi* crops together, one only out of the 45 districts of these Provinces, viz., Tippera returns a 17-anna crop; 8 districts* return an average crop of 16 annas; 25 districts return crops varying from 12 to less than 16 annas, and 11 districts† show crops under 12 annas. On comparing these figures with the estimates of outturn of the crop of 1893, as shown in column 8 of the appended returns, it will be seen that 20 districts report a better crop this year, 3 districts report equal crops, and 22 districts report worse crops. The general outturn of the *bhadoi* crops of the current year according to present estimates may therefore be expected to be the same as that of last year, or 15 annas for these Provinces as a whole.

* Rangpur, Pabna, Saran, Champaran, Muzaffarpur, Purnea, Angul and Khondmals and Hazaribagh.

† Burdwan, Birbhum, Hooghly, 24-Parganas, Nadia, Murshidabad, Jessore, Jalpaiguri, Bogra, Chittagong and Puri.

A separate estimate of the jute crop has been published. The indigo crop, so far as regards outturn of plant, has been very good in Bihar and fair in Bengal. The season is reported, however, to have been bad for manufacture in Bihar; and the outturn of indigo has probably been less than that of last year.

N. N. Banerjei,

Assistant Director of Land Records and Agriculture, Bengal.

(Countersigned.)

First Forecast of the Bhadoi Crops in Bengal, 1895.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year under each specified bhadoi crop* in acres.	Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan ...	1,726,080	1,382,600	*Bhadoi* paddy ...	173,700	172,700	165,700	13¼	10¼	In the Sadar subdivision, owing to insufficient rainfall, the prospects of *bhadoi* crops are not good. In the Kalna Subdivision, for want of rain the outturn will be less than last year's. Owing to deficient and late rainfall, all the lands in the Katwa subdivision could not be sown. A portion of cultivated and was affected totally by scanty rains, and so the plants did not develop. In the Raniganj subdivision, the late rainfall affected the paddy and the non-food crops to some extent, and hence the outturn is expected to be less in almost all cases.	The Collector returns [illegible] acres in column 3, against 1,283,800 acres returned by him last year.
			Indian corn (maize)...	3,000	3,000	3,000	14	14		
			Other *bhadoi* cereals and pulses.	8,100	7,700	6,900	13¾	10		
			Other food-crops (*e.g.*, vegetables).	700	600	600	14	12		
			Bhadoi til ...	2,800	2,800	2,800	10	10		
			Indigo	6,000	5,800	5,800	12	[illegible]		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	19,200	18,800	18,800	12	9½		
			Total ...	213,500	211,400	203,700	13¼	10¼		
Birbhum ...	1,121,920	885,000	*Bhadoi* paddy ...	150,000	150,000	130,000	16	10	Owing to deficient and untimely rainfall, there has been a decrease in the area under cultivation, and consequently the outturn will be affected. If sufficient rain falls now to keep the crops growing, it will hardly exceed 10 annas. otherwise it will be below 10 annas. Indian corn grows better in year of deficient rainfall. The decrease in the area under *bhadoi* rice is also due to the extension of cultivation of the *aman* or winter rice.	Last year, the area in column 3 was returned as 900,000 acres.
			Indian corn (maize) ..	3,000	3,000	1,500		15		
			Other food-crops (*e.g.*, vegetables).	1,500	1,500	1,200		10		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	2,500	2,500	2,000		10		
			Total ...	157,000	157,000	134,700	16	10

							Annas.	Annas.		
Bankura ...	1,677,440	642,800	*Bhadoi* paddy	26,700	21,900	14,800	16 (Bhadoi paddy to Other food-crops)	10	The figures shown in columns 5 and 6 differ considerably from those reported last year. It is reported that in the previous years the Police made an incorrect estimate of the acreage under each specified *bhadoi* crop. This year approximately correct figures have been obtained.	
			Bajra	900	800	600		12 (Bajra to Other *bhadoi* cereals and pulses)		
			Mandua	1,200	1,000	1,000				
			Indian corn (maize) ...	4,900	4,300	2,600				
			Other *bhadoi* cereals and pulses.	9,800	7,600	8,300				
			Other food-crops (*e.g.*, vegetables).	800	800	300		14		
			Bhadoi til	2,100	1,700	1,600	10	13	The cultivation of all the crops except that of indigo could not reach the normal owing to the scanty and unequal distribution of the rainfall of the year.	
			Indigo	2,200	2,200	2,200	16	16		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	5,600	3,700	3,600	16	13		
			Total ...	54,200	44,000	35,000	15¼	12¾		
Midnapore ...	8,292,800	2,111,500	*Bhadoi* paddy ...	119,700	110,200	99,700	11	10	The normal area has been reduced from 343,500 to 342,700 acres, the latter being considered to be the correct figure by latest calculation. Owing to insufficient rainfall, the area brought under cultivation has been less than the normal area as well as the area cultivated last year, and on the whole the outturn is likely to be the same as that of last year. (Of 11,600 acres shown under *bhadoi* til, 1,500 acres were shown last year under head "other bhadoi cereals" and 10 000 acres under "other non-food."	
			Bajra	7,000	6,000	6,000	14	12		
			Mandua	3,200	1,800	1,800	14	14		
			Indian corn (maize)...	22,000	21,000	22,000	14	16		
			Other *bhadoi* cereals and pulses.	53,000	46,960	49,000	10	10¾		

			Other food-crops (*e.g.*, vegetables).	27,600	23,500	22,500	11	10¾		
			Bhadoi til	11,500	11,500	10,500	9	13½		
			Indigo	50,700	40,600	45,200	14	11		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	48,000	33,200	35,.00	11	11½		
			Total ...	342,700	294,700	291,900	12	12		
Hooghly ...	1,096,080	762,200	*Bhadoi* paddy ...	85,500	49,700	30,700	11	8	... ...	From the Census Report of 1891 it appears that the area of the district is 1,087,340 acres. The area in column 3 as shown last year was 100 acres more than that now returned by the Collector.
			Indian corn (maize) ...	100	100	100	10	5½		
			Other *bhadoi* cereals and pulses.	3,100	2,500	2,000	10	8		
			Other food-crops (*e.g.*, vegetables).	5,800	1,900	1,200	13	11		
			Bhadoi til	1,200	300	300	11	9½		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	38,400	24,000	27,800	12	12		
			Total ...	131,800	78,500	62,100	11½	9		
24-Parganas ...	1,344,640	1,223,600	*Bhadoi* paddy ...	108,700	107,200	99,900	13	11	The decrease in the area cultivated with *bhadoi* paddy this year is due to scanty rainfall during the sowing season. Fair rainfall has increased the area cultivated with *bhadoi* cereals and pulses as well as the estimated outturn. The decrease in the area under other *bhadoi* food-crops is due to want of rainfall during the sowing time, but a fair amount of rainfall after the growth of plants has increased the estimated outturn. This year's outturn under other *bhadoi* non-food-crops is expected to be worse than that of last year owing to want of rain during the sowing as well as during the reaping time.	
			Other *bhadoi* cereals and pulses.	3,000	700	900	10	11		
			Other food-crops (*e.g.*, vegetables).	4,900	4,600	3,600	8½	9½		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	42,000	35,400	35,300	13	12½		
			Total ...	158,600	147,900	139,600	13	11		

1	2	3	4	5	6	7	8	9	10	11

			Total ...	437,200	437,200	408,900	13½	11		
Murshidabad...	1,372,160	985,500	*Bhadoi* paddy ...	232,900	251,400	212,300	10	9	The decrease in area in comparison with the last year's and the normal area is due to want of sufficient rain during the sowing season.	From the Census Report of 1891, it appears that the area of the district is 1,373,440 acres.
			Indian corn (maize)	300	200	300	10	8		
			Other *bhadoi* cereals and pulses.	2,000	1,900	1,900	12	9		
			Other food-crops (*e.g.*, vegetables).	12,700	9,600	7,700	11	11		
			Bhadoi til	3,300	3,200	3,200	12	12		
			Indigo	59,200	58,800	51,300	10	12		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	31,700	22,500	24,900	10	11		
			Total ...	362,100	347,600	301,300	10	10		

Jessore ...	1,672,000	1,116,800	*Bhadoi* paddy	314,500	314,100	314,300	18	10	The falling off in the outturn of all the crops, except indigo, this year is due to sufficient rainfall.	
			Other *bhadoi* cereals and pulses.	8,800	8,500	8,400	12	10		
			Other food-crops (*e.g.*, vegetables).	18,900	16,800	16,700	16	10	The decrease in area may be attributed to inadequate rainfall.	
			Bhadoi til	5,900	5,600	5,600	16	10		
			Indigo	17,800	16,800	17,300	12	14		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	43,600	34,900	35,400	16	12	The increase in area is due to high price obtained for fibres.	
			Total ...	409,500	396,700	398,200	16	10		
Khulna ...	3,103,942	870,000	*Bhadoi* paddy ...	56,400	52,600	51,500	17	(*a*)13	(*a*) The decrease in area as compared with that of last year occurs in the Satkhira sub-division only. Both decrease in area and outturn is expected owing to the want of timely rains. (*b*) The decrease in outturn is attributable to a like cause. (*c*) The increase in area over that of last year occurs in the Satkhira sub-division only. The outturn in Satkhira is expected to be good, but in the Sadar and Bagerhat sub-divisions it is expected to be bad, and hence also the total outturn.	In the Census Report of 1891, the area of the district has been shown as 1,389,280 acres.
			Other *bhadoi* cereals and pulses.	3,200	3,200	3,100	16	10		
			Bhadoi til	3,200	3,200	3,200	16	(*b*)12		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	26,600	21,600	25,400	15	(*c*)12		
			Total ...	89,400	80,600	83,200	16	12		
Rajshahi ...	1,639,952	1,065,900	*Bhadoi* paddy	105,500	104,800	100,700	15½	11½	The decrease in area this year as compared with the normal and last year's areas is due to want of sufficient rainfall. The outturn also cannot be expected to be more than 14 annas in consequence.	From the Census Report of 1891, it appears that the area of the district is 1,491,200 acres.
			Other food-crops (*e.g.*, vegetables).	1,600	1,600	600	13	12

							Annas.	Annas.		
Dacca	1,780,480	997,700	*Bhadoi* paddy ...	174,900	165,500	165,600	15½	12	Owing partly to the scanty rainfall in May and June and partly to the sudden rise of the rivers, the outturn was less than last year's.	
			Other *bhadoi* cereals and pulses.	1,000	300	300	9	9		
			Other food-crops (*e.g.*, vegetables).	50,300	43,300	43,300	12	11½	The normal area has been ascertained to be 50,300 and not 62,700 as shown last year.	
			Bhadoi til ...	300	200	200	10	10		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	219,300	211,200	178,300	13	14	Owing to favourable weather the outturn was better than in last year.	
			Total ..	445,800	420,500	387,600	14¼	12		
Mymensingh ...	4,052,480	2,465,700	*Bhadoi* paddy ...	360,400	353,600	353,600	15	14	Owing to the sudden rise of the river the crops on low lands were slightly damaged. Hence the outturn is expected to be less than that of last year.	
			Other *bhadoi* cereals and pulses.	58,900	58,900	58,900				
			Other food-crops (*e.g.*, vegetables).	41,500	36,500	36,500				
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	572,300	560,600	560,600				
			Total ...	1,033,100	1,009,600	1,009,600	15	14		

Faridpur ...	1,460,480	1,013,900	*Bhadoi* paddy ...	345,000	249,400	306,500	16	14	The increase in area in columns 2, 3, 5 and 7 is due to transfer of 15 square miles of char lands from Dacca to this district. The outturn of *bhadoi* crops in Madarinur which abounds in low tracts has been bumper, but in Sadar and Goalundo it is below the average. Hence the estimate for the entire district has been made at 14 annas. The *bhadoi* paddy suffered to a certain extent owing to insufficient rainfall during the growing season.
			Other *bhadoi* cereals and pulses.	100	100	100	16	16	
			Other food-crops (*e.g.*, vegetables).	500	500	500	16	16	
			Indigo	1,000	1,000	1,000	16	14	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	86,300	85,300	86,300	16	14	
			Total ...	432,900	336,300	394,400	16	15	
Backergunge...	2,335,360	1,343,200	*Bhadoi* paddy ...	283,500	283,500	283,500	14	12¾	Owing to scanty rainfall in some parts of the district, this year's outturn is expected to be worse than that of last year.
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	6,400	6,400	6,400	12	11	
			Total ...	289,900	289,900	289,900	13¼	12¼	
Tippera ...	1,694,240	1,167,300	*Bhadoi* paddy ...	241,100	302,000	256,700	20	17	The decrease in the area under heads *bhadoi* paddy and cereals and pulses is due to the fact that there were bumper rice crops last year, and that there is plenty of rice in stock, and therefore lands under these crops last year have this year been sown with jute. Besides, the cultivators last year were in b d circumstances owing to the scarcity of the previous year, and hence they sowed all available lands with rice and cereals.
			Other *bhadoi* cereals and pulses.	300	13,500	4,900	15	14	The decrease in area under head *bhadoi til* is trifling and does not call for remarks. The decrease in the outturn is due to want of timely rainfall.
			Bhadoi til ...	3,000	3,000	2,900	18	14	The increase in the area under head other non-food-crops, is due to the increase of area cultivated under jute crops as stated above.
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	92,200	226,300	247,600		18	
			Total ...	336,600	544,800	512,100	19	17

WEATHER AND CROP REPORT.

For the week ending the 7th October, 1895.

Burdwan.—Rainfall at Sadar 1·22. Weather close. Rain still wanted generally, and condition of *aman* rice not good Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·79, Contai 5·01. Tamluk 2·69, Ghatal 1·00. Weather getting cooler. Prospects of *aman* rice favourable in Sadar and Contai. More rain wanted in Tamluk and Ghatal. Prices of common rice :—

	Srs.	
Sadar	17	per rupee.
Contai	22	
Tamluk	16	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 1·95. Weather stormy. Prospects of *aman* fair and improved by the late rain. A considerable area of paddy land in the Diamond Harbour subdivision remains unplanted. Harvesting of *aus* completed and that of jute going on. Ploughing for sowing *rabi* crops going on in the Barasat subdivision. No cattle-disease. Fodder and wat.r sufficient. Rice sells at—

	Srs.	c.	
Sadar	13	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	17	8	

Murshidabad. - Rainfall 0·46. Weather seasonable. Sowing of *kalai* going on. Jute still being harvested Transplantation of *aman* finished. Sugarcane and mulberry doing well. Fodder sufficient. Common rice sells at 16 seers a rupee.

Khulna.—Rainfall at Khulna 7·40, Bagerhat 9·50, Satkhira 9·58. Weather hot and cloudy; cyclonic on the night of 1st October. Transplantation of *aman* over. Harvesting of *aus* completed, and that of jute still going on in some places. No damage is reported to have been done to the standing crops by the cyclonic weather. The rain has done immense good to them. Fodder and water plentiful. No cattle-disease. Prices of common rice :—

	Srs.	c.	
Sadar	16 to 21	0	per rupee.
Bagerhat	22	2	
Satkhira	15	0	

Dinajpur.—Average rainfall 1·89. Weather seasonable. Standing crops good. Price of common rice 15 to 16 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall 2·98. Weather seasonable. Transplantation of *aman* and steeping of jute still going on. Sugarcane doing well. Prospects generally favourable. Common rice selling at 12 to 14 seers per rupee. Fodder sufficient. Cattle-disease still prevailing in certain parts of the Nilphamari subdivision.

Pabna.—Rivers falling. Jute harvest in Sadar completed, but in Sirajganj not yet completed. Lands being prepared for *rabi* crops. Prospects of *aman* rice good. Fodder sufficient.

Dacca.—Rainfall 3·58. Cyclone in this district on the 2nd instant. Some damage to huts and trees. *Aman* also somewhat damaged where it was in ear, but this only in parts of the district. Common rice sells at 17 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall 7·40. Weather warm. Cyclone on the 2nd instant. Little damage to crops. Transplantation of *aman* nearly finished. Water and fodder sufficient. Rice selling at 15 seers per rupee.

Patna.—Rainfall at Sadar 1·96. Prospects of paddy favourable. *Sathi* rice being harvested. Lands being prepared for *rabi* cultivation. Condition of cattle good. Fodder and water sufficient. Common rice sells at 20 or 21 seers per rupee.

Gaya.—No rain. Paddy suffering on high lands, but otherwise fairly good. Rain urgently required within few days. *Rabi* preparations begun. Price of common rice risen to 14 seers per rupee, above average.

Champaran.—Rainfall at Motihari 0·78, *Bhadoi* being harvested; 14 annas outturn expected. Prospects of *aghani* good.

Darbhanga.—Rainfall at Sadar 0·18, Samastipur 0·34, Madhubani 0·59. *Bhadoi* harvest nearly over. Prospects of rice very favourable. Fields being prepared for *rabi* sowings. Prices stationary. Fodder plentiful.

Bhagalpur.—Rainfall at Sadar nil, Banka 1·03, Madhipura 0·29, Supaul 0·18. Weather bright and cool at night; days still hot. Reaping of *bhadoi* crops continues. Prospects of crops continue to be favourable. Coarse rice selling at 18 seers 15 chitaks per rupee. Fodder and water sufficient. No cattle-disease.

Purnea.—Rainfall 0·12. *Bhadoi* paddy and jute all cut. *Aghani* paddy is doing well, but rain is badly wanted. No cattle-disease. Fodder and water sufficient. Common rice selling at 22 seers a rupee.

Cuttack.—Rainfall 1·58. Weather seasonable. *Beali* being harvested. *Sarad* doing well. Sowing of *rabi* in progress. Condition of cattle good. Fodder sufficient. Common rice sells at—

				Srs.	c.	
Cuttack	...	...	...	21	0	per rupee.
Kendrapara	...	...	...	26	4	
Jajpur	...	...	...	22	10	
Banki	...	...	...	25	0	

Hazaribagh.—Rainfall at Sadar 0·38, Giridi 0·17. Prospects of rice crop generally fair. *Rabi* sowings in progress. Cattle-disease in places. Fodder plentiful. Common rice selling at Sadar 13 to 16 seers per rupee and Giridi 14 seers.

General Summary.—There was general rain during the week except in parts of Bihar. In the eastern and central districts the rain was heavy, being accompanied by a cyclone. The cyclone is reported to have done but slight damage to the crops, and the rainfall was generally beneficial. Reports of the winter rice crop continue generally favourable except in parts of the Burdwan and Presidency Divisions. In Gaya and in Purnea districts, where there has been little or no rain for the last two weeks, more rain is needed. The *bhadoi* harvest is almost complete, and the preparation of lands for the *rabi* sowings is in progress. Cattle-disease is still prevalent in parts of the Nilphamari subdivision of Rangpur. The price of common rice is on the whole stationary, but in Gaya it is reported to have risen from 17 to 14 seers per rupee.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 8th October, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

I.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the Inte[rior] by Rail, Road, River (Country-boat and Steamer) and Canal during the month of June, 1895.

IMPORTS INTO CALCUTTA.

Whence imported.	FOOD-GRAINS. Rice and Paddy. Rice.	Paddy.*	Total (in rice).	Wheat.	Gram and pulses.	Other food-grains.	Total.	FIBROUS PRODUCTS. Jute, raw.	Gunny-bags.†	OILSEEDS. Linseed.	Mustard seed.	Tea, Indian.	Cotton, raw.	Silk, raw.	SUGAR. Refined.	Unrefined.	TOBA[CCO] Unmanufactured.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns a[re] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at lea[st] ·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 5TH OF OCTOBER 1895.

TOWARDS the end of the previous week a low-pressure area, which had been over the south of the Bay for some days, began to develop into a disturbance of greater severity. The diffused depression had hitherto appeared to be moving towards the Madras coast, and on the 29th September it showed no signs of changing its line of motion. The changes of pressure and of the wind circulation give little information as to what was going on in the centre of the Bay, but a rapid rise of pressure in the south of Burma on the 29th led to much steeper gradients in the south and south-east. The stormy weather behind the depression was shown by the increase of wind velocity at Diamond Island. It rose to an average of 26 miles an hour on the 29th, the highest recorded during the present monsoon season. The depression was no doubt deepening near the centre, and the rapid rise in Burma was probably the cause, or at least the indication that it had begun to move with greater rapidity than had previously been the case.

About that time a local disturbance caused a good deal of rain in the north-east of the province, where pressure was rising briskly, but to what it was due it is difficult to say—probably to the interaction of the changing winds set up by the increasing pressure. On the 29th very little rain was falling in any of the districts except North Bengal, but there general heavy rain fell, especially in the Rangpur district, where the falls varied from 1 to 5 inches. On the 30th a slight fall of pressure was shown over those parts, while elsewhere it rose moderately to rapidly.

The rapid rise in the south-east of the Bay continued on the 30th, and the depression was much nearer the west coast, but moving in a more northerly direction. Winds from being north-easterly in the Circars had become north-west, and the centre of the disturbance appeared likely to cross the coast somewhere between False Point and Vizagapatam. There was still no indication of the depth of the depression, as pressure readings were within ·04 inch of the normal all round the coast except in the south of Burma, where there was excess of about ·1 inch. On the 1st of October the centre was a little to the south-east of False Point, and it then appeared to be following a line curving to the east. As the depression approached the coast line, pressure fell rapidly—first at Gopalpur and False Point, and then over the whole of the north-west angle of the Bay and in Lower Bengal and Orissa. The rate of motion was much higher than usual, as the centre, from being to the south-east of False Point at 8 A.M. on the 1st, was near Saugor Island about 8 P.M. and Narayanganj on the following mornning. The disturbance evidently developed after entering the north-west angle of the Bay, and also during the night of the 1st while passing over Lower Bengal. The fall of pressure at Narayanganj on the morning of the 2nd was more than half an inch, and the changes were large not only in South-West and East Bengal, but also in the north-east angle of the Bay as far south as Akyab.

Stormy weather accompanied the depression in its course over the Bay; and as the centre passed over the Sandheads, and very close to Saugor Island, the strength of the storm can readily be compared with what it was in East Bengal and the north-east angle of the Bay on the following morning. It may have been partly due to the curved path taken by the storm centre that the winds attained to the strength they had at the mouth of the Megna and inland as far as Narayanganj, but the depression appears also to have deepened, as the lowest pressure on the 1st was 29·443 inches at False Point, and at Narayanganj on the 2nd 29·264, while over an area extending from Mymensingh to Chittagong and from Jessore to Comilla the depth was as great as at False Point on the previous day.

As the depression was moving very rapidly to the east, it soon reached the hilly ground beyond East Bengal, and soon disappeared. On the morning of the 3rd the only trace of its existence was a rather rapid fall of pressure at Sibsagar and in Bihar, and a large defect over the whole of the province. The rise of pressure which followed the disturbance continued steadily till the end of the week, and by that time readings were everywhere above the normal.

During the passage of the depression across Lower Bengal heavy rain fell; but as it moved quickly, and, as always happens when a storm goes eastward, the weather moderated very rapidly, the quantity of rain was small compared with the intensity of the storm. It was only in East Bengal where general heavy rain fell. On the 2nd falls varied from 1 to 7 inches over the whole of East Bengal, and heavy falls were recorded in Tippera on the 3rd, the heaviest being 4 at Comilla and 6 inches at Agartala. Rainfall had almost entirely ceased in the western districts on the 3rd, and very little fell anywhere after the 3rd.

Pressure.—During the first two days pressure changes were small, but on the approach of the depression on the 1st of October, a very rapid fall became general over Orissa, South Bengal, and the north of the Bay. The subsequent rise was not so rapid, but it continued steadily, and by the end of the week the distribution had recovered, and readings were above the normal by small amounts increasing towards the north. As the defect in pressure continued for some days, mean pressure values for the week are all below the normal by amounts varying from ·02 inch in Assam and Bihar to ·1 inch in East Bengal.

Temperature—Was high in the west and centre of the province at the beginning of the week, and nearly normal in the eastern districts. As the sky clouded over with the approach of the depression, the days became cooler and mean temperature was below the normal till nearly the end of the week. On the 5th, the last day of the week, there was again a considerable excess in the south of the province, especially in Chota Nagpur and South-West Bengal. Mean temperature for the week is in excess in Chota Nagpur, normal in Bihar, and below in the other districts, by half a degree in Orissa and South-West Bengal, and by more than 1° in East and North Bengal and Assam.

Rainfall.—The disturbance, as stated above, caused heavy rain while it was crossing the north-west angle of the Bay and Lower Bengal, especially in East Bengal on the 2nd and 3rd. From the 30th to the 2nd rainfall was fairly general in all districts, but after that very little fell except in the extreme east. Chota Nagpur and Bihar received less than one inch on an average, and less than the usual amount by about a third of an inch. In South-West Bengal the fall was 2·45, North Bengal 3·06, Orissa 3·39, and East Bengal 5·35 inches. All these amounts are considerably above the normal, the difference varying from 1·4 inch in South-West and North Bengal to 3·8 inches in East Bengal.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 5th of October 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	83
	Inches.
The total fall of rain from 29th September to 5th October 1895	2·45
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·79
The total fall from 1st January to 5th October 1895	38·54
The average fall of the corresponding period for 24 years, Surveyor-General's Office	60·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; [strong wind], strong wind; [dew], dew.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGALPUR DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 14th October 1895.

RESOLUTION—No. 340T.—G.

THE Lieutenant-Governor directs the publication for general information of the Commissioner's Report on the General Administration of the Bhagalpur Division for the year 1894-95.

2. The only remarks to which His Honour desires to draw attention are those on the certificate procedure in paragraph 72 of the Report. Steps should be taken by District Officers to check the tendency of Collectorate peons to scamp the service of notices and sale proclamations.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGALPUR DIVISION FOR 1894-95.

No. 185G., dated Bhagalpur, the 29th June 1895.

From—G. TOYNBEE, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the Annual General Administration Report of this Division for the year 1894-95.

2. The reports of the District Officers were all received on or before the prescribed date, except that of the Magistrate-Collector of Purnea, which was received on the 3rd June. Numerous references had to be made and further information and explanation had to be called for. The reports were not all complete until the 29th instant, and the last were those of the District Officers of the Sonthal Parganas and Purnea.

I.—CHARGE.

(a) *Division.*

3. I held the office of Commissioner of the Division throughout the year.

The following tabular statements give the details of charge of districts and subdivisions:—

(b) *District Charge.*

DISTRICT.	Name of Officer.	PERIOD OF CHARGE— From	To
1	2	3	4
Monghyr	Mr. H. A. D. Phillips ...	1st April 1894 ...	31st March 1895.
Bhagalpur	„ F. H. B. Skrine ...	1st „ „ ...	3rd April 1894.
		9th November „ ...	31st March 1895.
	„ L. P. Shirres ...	4th April „ ...	31st May 1894.
	„ H. F. T. Maguire ...	1st June „ ...	8th November „
Purnea	„ C. J. S. Faulder ...	1st April „ ...	24th July „
	„ E. M. Konstam ...	25th July „ ...	16th November „
	„ H. F. T. Maguire ...	17th November „ ...	31st March 1895.
Malda	„ U. C. Batavyal ...	1st April „ ...	14th December 1894.
	„ J. C. Price ...	15th December „ ...	31st March 1895.
Sonthal Parganas ...	„ W. H. Vincent ...	1st April „ ...	7th April 1894.
	„ F. R. Roe ...	8th „ „ ...	26th „ „
		2nd September „ ...	9th November „
	„ R. Carstairs ...	27th April „ ...	1st September „
	„ J. H. Bernard ...	10th November „ ...	31st March 1895.

(c) *Subdivisional Charge.*

DISTRICT.	Subdivision.	Name of Officer.	PERIOD OF CHARGE— From	To
1	2	3	4	5
MONGHYR	Begusarai ...	Mr. H. Wheeler	1st April 1894	13th August 1894.
			4th November "	31st March 1895.
		Babu Radha Kant Banerjee ...	14th August "	3rd November 1894.
	Jamui ...	" Chandi Churn Chatterjee	1st April "	26th April "
		" Siti Kant Ghose ...	27th " "	20th November "
		" Syam Lal Gupta ...	21st November "	31st March 1895.
BHAGALPUR	Banka ...	Maulvi Gowhar Ali	1st April "	31st " "
	Madhipura	Mr. S. C. Roberts	1st " "	7th May 1894.
		Babu Girendra Nath Chatterjee	8th May "	21st July "
		" Dena Nath Mookerjee ...	22nd July "	13th August "
		" Bhupati Chuckerbutty ...	14th August "	31st March 1895.
	Supaul ...	" Suresh Chunder Chatterjee	1st April "	30th " "
PURNEA ...	Kishanganj	" Ram Narain Banerjee ...	1st " "	16th May 1894.
		" Debi Prosad	17th May "	31st March 1895.
	Araria ...	" Saroda Prosad Sarkar ...	1st April "	31st " "
SONTHAL PARGANAS.	Deoghur ...	Mr. H. H. Heard	1st " "	31st " "
	Godda ...	" F. C. Piffard	1st " "	31st " "
	Jamtara ...	" H. W. Stark	1st " "	31st " "
	Pakour ...	" E. McL. Smith	1st " "	31st " "
	Rajmahal ...	" A. McGavin ...	1st " "	25th August 1894.
			17th October "	31st March 1895.
		" J. E. F. Pereira	26th August "	16th October 1894.

It will be seen that, except as regards Monghyr, the Division has been exceptionally unfortunate in the non-continuity of the *personnel* of its district administration. The changes may be debited in equal proportions to the exigencies of leave and of transfer on public grounds. Except in the case of Bhagalpur, I cannot say that the district administrations concerned were seriously affected.

In the cases of the Jamui and Madhipura subdivisions, the administration was certainly weakened by the two and three changes (respectively) of Subdivisional Officers. The administration of the other subdivisions was fairly continuous. This is a matter of special importance in the Sonthal Parganas, where there was only one change.

II.—TOURS AND INSPECTION OF OFFICES.

(a) *Tour of Commissioner.*

4. The fact of this being my first tour in this Division, and of my seeing all the districts (except Purnea) for the first time, invested it with unusual interest. In July I visited Monghyr, where I stayed from the 8th to the 22nd idem. In the following month I went to Malda and inspected the subdivision of Rajmahal *en route*. I remained at head-quarters all September, disposing of appeals and other accumulations of office work. In October I inspected the subdivisional offices of Jamui (in the Monghyr district) and of Deoghur, Jamtara, and Pakour in the Sonthal Parganas. During this tour I paid return visits to the Maharaja of Gidhour and to Raja Ram Narain Sing Bahadur of Khaira. I paid a flying visit to Madhupur (*en route* from Deoghur to Jamtara) to see the abandoned military rest-camp, with regard to the settlement of which some questions are still pending. There I met Mr. W. M. Smith, late Subdivisional Officer of Deoghur, and from him I gained much valuable information regarding the Sonthal Parganas, in which he spent the best part of his service before retiring on pension. While at Deoghur I took the opportunity of visiting the Rohini ward and of inspecting the office of the managers of that and of two other estates in the subdivision.

I found here a large and daily-increasing Bengali colony, who look upon the place as a sanitarium. The Rohini ward's estate owns most of the land in and around the town, and is reaping a rich harvest from the great demand for building sites. A large area of land has been marked out for such sites, and all

have been taken up. As a fitting memento of Mr. Carstairs' many years' work in the Sonthal Parganas this embryo suburb of the town has been called after him.

At Jamui I found the criminal administration strained to the verge of a complete breakdown, and had to recommend an immediate change of Subdivisional Officers. The rural municipality of that place appeared to me not to fulfil, in many essential particulars, the requirements of the amended Municipal Act; and Government has since, at the request of the Municipal Commissioners, consented to abolish it. I found that the sub-jail had been several times much overcrowded and had lately been visited by a severe outbreak of cholera. Two of the wards were occupied by the Deputy Superintendent's office and by the Subdivisional Officer's tents; while a third (a large one) was used as a store-room, which was only half full. I had the subdivisional tents removed at once, and reported the matter of the other two wards to the Inspector-General of Jails.

At Pakour I discussed with Mr. E. McLaren Smith his proposals for a settlement with the paharias, and settled the lines on which a further report was to be submitted to Government. I also had an interview there with the Raja of Pakour.

The whole of the country I travelled through during this tour was covered with a magnificent rice crop which would, but for the untimely rain which fell in the latter end of October and in the beginning of November, have quite beaten the record.

On the 8th November I left Bhagalpur and marched, *viâ* Banka, Bausi and Godda, to Nya Dumka. I took this opportunity of making enquiries regarding the prospects of the proposed railway from Bhagalpur to Bausi, for which Sir William Hudson has obtained a concession from the District Board. I arrived at Dumka on the 20th November, and remained there until the 3rd December, when I left it and marched to Rampur Hât. On my way back thence to head-quarters, I inspected the Sahibganj and Colgong Municipalities, &c., and arrived at Bhagalpur on the 10th December. After staying there two days for the disposal of appeals and office work, I started on tour again on the 12th December, and visited the subdivisions of Begusarai, Supaul, and Madhipura on the north of the Ganges. On the day (14th December) on which I travelled to Bhaptiahi from Garhara, I found the 3rd class carriages of the Bengal North-Western Railway very badly overcrowded, and saw several passengers left behind as they could not be squeezed in any how. The roads I drove over in North Bhagalpur as well as those in the south of the same district reflect great credit on Mr. Robinson, the District Engineer, and his staff. During this tour I paid return visits to the Maharaja of Sonbursa and to Babu Ganpat Singh of Harawat, and met many of the influential zamindars of this part of the Division. On my way back to Bhagalpur I visited Bariarpur and Kharakpur in the Monghyr, and Sultanganj in the Bhagalpur, district, and arrived at head-quarters on the 2nd January 1895. On the 7th idem I left Bhagalpur for Purnea, where I met, at the annual volunteer camp, all the European residents of that district. Before leaving the Purnea district, I inspected the subdivisions of Araria and Kishanganj and the ward's office, buildings, &c., at Khagra. My tour extended over a total period of 120 days. The greater part of it was spent in acquiring general information regarding the Division, which was almost entirely new to me. All pending matters of importance were discussed on the spot with the District and Subdivisional Officers concerned, and, where possible, finally settled. I paid special attention to the subject of the realisation of criminal fines and the maintenance of the prescribed forms and registers. All Government and *quasi*-Government offices and institutions and all the municipalities in the Division were visited and inspected. A good general idea of the condition, wants and work of the Division was gained which has since proved to be of the greatest assistance to me. All the district and subdivisional offices were inspected in such detail that the labour of future inspections will be materially lightened.

(*b*) *Tours of Collectors.*

Monghyr.

5. Mr. Phillips' tour embraced a period of 114 days (or 24 days more than the prescribed minimum), and his diaries form a most interesting record of all matters which came under his notice. Nothing, indeed, seems to have escaped his vigilant eye and

ceaseless energy. There was not a single month during which Mr. Phillips was not away from his head-quarters, though the bulk of his tour was, as usual, done during the cold season. I give below an extract from his report, in which he details the principal matters which engaged his attention:—

"He inspected roads, ferries, pounds, police-stations, outposts, sub-registry offices, dispensaries, outstills, ganja, opium and tari shops, schools, subdivisional offices and sub-treasuries; attended chaukidari parades; enquired into the prospects of the crops and conditions of the people; visited several khas mahals and examined the accounts and talked to the raiyats; received visits from the zamindars in the interior, and heard their complaints. He enquired if there were any land disputes likely to lead to a breach of the peace, and took any necessary action; made enquiries about opening new dispensaries and schools, and made himself acquainted on the spot with several schemes and proposals before the District Board; enquired where new pounds were necessary, and what ferries should be taken up. He also inspected many Local Board roads and wells, and enquired regarding salt manufacture and opium cultivation."

Bhagalpur.

6. Messrs. Maguire and Skrine between them were on tour for 117 out of the prescribed tale of 120 days. No explanation has been given by the latter of his failure to make up the wanting three days, but it was probably due to his desire to dispose of all pending work before proceeding to Calcutta on transfer. Between the end of May and the 9th November Mr. Maguire visited and inspected all the three subdivisions. He was on tour for 45 days in all, and his work during that period does not call for any special notice. Mr. Skrine went into camp on the 26th November, and returned finally to head-quarters on the 6th March, his actual tour thus comprising a period of 72 days. Twenty-nine days out of this period were spent at Ghoga, Colgong, and Sultanganj (stations on the East Indian Railway), and only 20 days at the head-quarters of the three important and somewhat inaccessible subdivisions of Banka, Madhipura, and Supaul. The following extracts from his diaries indicate the nature of his tour:—

Colgong—December 13th, 1894.—"A day of turmoil. An immense concourse of people to witness the distribution of prizes to the boys of M. C. G. school, which is much improved in point of numbers since I had the 'rival show' closed. Afterwards races and athletic sports, greatly appreciated, especially the fact that a local man tried with a wrestling champion from Bhojpur; then illumination and fireworks, and the evening closed with a theatrical performance . . . . . . These *tamashas* are matters of policy with me, for nothing tends to make people more contented than innocent amusements. When will Government recognise this craving" ?

Colgong—December 14th, 1894.—"Every one in Colgong was so thoroughly exhausted by the excitement yesterday that I thought it hardly fair to hold inspection."

Banka—January 29th, 1895.—"In the afternoon my wife distributed the prizes to the pupils of the middle English school in a large *shamyana* on the village green; afterwards held a darbar, which was attended by all the principal *raises* of the south of the district—a very grand affair. Speeches were made on local topics, and after *attar* and *pan* every one went away greatly pleased. About 10,000 spectators assembled unused to such pomp. The darbar was well managed by a local committee."

There is perhaps a good deal to be said in favour of Mr. Skrine's views as to the benefits of pomp, ceremony, and amusements; but I fear they are somewhat incongruous in these work-a-day times.

Purnea.

7. The three officers who held charge of this district during the year were on tour between them for a total period of 120 days, viz., Mr. Faulder for 30, Mr. Konstam for 14, and Mr. Maguire for 76, days. These tours comprised the usual inspections of subdivisions, thanas, &c., and also included visits to Nipal territory in connection with the question of the encroachments of the Kosi river. They do not call for any special remark. The prescribed length of the Collector's tour in this district was increased during the year from 90 to 120 days (*vide* Government order No. 3792, dated 19th November 1894).

8. The Collector's tour in this district comprised a period of 92 days, in all of which 26 days were done by Mr. U. C. Batavyal and 66 by Mr. J. C. Price, who succeeded him on his transfer to Bogra. I give the latter's account of the tour in his own words:—

Malda.

"Between the 29th April and the 5th December 1894, Mr. Batavyal spent 26 days in the interior. In April he was out for one day, visiting Guziapara on the south-western border of the district in thana Kaliachak on the banks of the Ganges, as that locality had been the scene of a serious case of rioting attended with robbery committed by the people of the Pakour Raja. In July he was in camp for 10 days in the south and east of the district, visiting many important places on the banks of the Mahananda and Tangon rivers, and inspecting the outpost of Bamangala and the police-station at Gomasthapur. In this tour he also paid a visit to Debipur in thana Kaliachak, where a dacoity attended with murder had been committed. In his next trip, which began on the 1st November and lasted till the 12th idem, he at first proceeded up the river Kalindri as far as Kamalpur, a village in the extreme west of the district; and he next passed down the Ganges along the western and south-western frontier of the district to Turtipur, inspecting the tract on the left bank of the river as he moved along. Here he made special enquiry regarding the state of the Government khas mahal Amanut Sarkar Polashgachi, which was being cut away by the Ganges. From Turtipur he came back by way of Baroghoria, Nawabganj, and Muchia to head-quarters. In course of this tour he inspected police-stations and rural sub-registration offices, visited the important khas mahals, and also made a thorough inspection of the Bench Magistrates' office at Nawabganj. In December he was out only for two days, and merely inspected roads.

"I made the regular cold-weather tour, which began on the 19th December and ended on 31st March. In my first trip, which commenced on the 19th December, I visited the country on the western border of the district in the jurisdiction of thanas Rotna and Manickchak, and looked into the working of the Rajmahal ferry, and also paid a flying visit to the khas tahsil office at Panchanandpur. In January I made an extensive tour through the south and south-eastern parts of the districts comprising the thanas Kaliachak, Nawabganj, Gomasthapur, and Shibganj. In the beginning of February I visited Gazole, and proceeded as far as Deotola on the eastern border of the district. Then I went across country to Rotna, and after visiting Hyatpur, an important trading mart on the north-western corner of the district on the banks of the Kalindri, I returned to head-quarters *viâ* Mathurapur. In March I made a tour through the Barind tract on the south and south-eastern and eastern portions of the district. During these tours I inspected police-stations, excise shops, ferries, and cattle-pounds. I thoroughly inspected most of the district roads and looked into the working of the chaukidari system, and also made constant enquiries regarding the state of crops and the condition of people. Income-tax assesments were also occasionally tested by me. I spent 66 days in all in camp. Thus the joint tours of Mr. Batavyal and myself throughout the year extended over 92 days, being two days in excess of the minimum prescribed for this district. I may in fact say that all the miscellaneous details of district administration received attention from us. The tour diaries were also regularly submitted to you from time to time."

Mr. Price deserves the greatest credit for the energetic manner in which, at the sacrifice of personal convenience, he has made himself so quickly acquainted with every corner of his district and with all the details of its administration. His diaries are full of interesting and useful information.

9. Mr. Bernard, the Officiating Deputy Commissioner, gives the following account of the combined tour of this district, which exceeded the prescribed period by 24 days:—

Sonthal Parganas.

"Mr. Carstairs made a tour of 36 days, travelling 469 miles by rail and tramway and 94 by road; Mr. Roe of 28 days, travelling 479 miles by rail and 183 by road. I was out for 80 days and made a journey of 452 miles by rail and 418 by road. Thus the total number of days the three District Officers were on tour was 144, and they travelled on an aggregate 1,400 miles by rail and tramway and 695 miles by road.

"The tours were spread over almost the whole of the year. They were made with a view to inspect all outlying subdivisional offices and other public institutions at the head-quarters of each subdivision. The Court of Wards' estates in the Sadar and Deoghur subdivisions were visited and the managers' offices inspected. I made an extensive tour through the Damin, inspected the municipalities of Deoghur and Sahibganj, all the outlying subdivisional offices, and some thanas."

All three officers deserve commendation for the extent of, and also for the nature of, the work done during their respective tours. They made themselves thoroughly accessible to the people and did a large amount of good work which does not appear in returns and statistics. The survival of the patriarchal system of Government in this district—in which personal character and influence are of so much importance—render touring in it exceptionally interesting, useful, and instructive.

(c) Tours of Subdivisional Officers.

10. The following table shows the number of days spent by the different Subdivisional Officers on tour:—

District.	Subdivision.	Name of Officer.	Time spent on tour.	
1	2	3	4	
Monghyr...	Begusarai ...	Mr. H. Wheeler ...	97 days	Total 113 days.
		Babu Radha Kant Banerjee	16 "	
	Jamui ...	" Sita Kant Ghose ...	12 "	Total 90 "
		" Syam Lal Gupta ...	78 "	
Bhagalpur	Banka ...	Maulvi Gowhar Ail ...	155 "	
	Madhipura...	Mr. S. C. Roberts ... Babu Girendra Nath Chatterjee " Dena Nath Mookerjee ...	18 "	Total 94 "
		" Bhupati Chuckerbutty ...	76 "	
	Supaul ...	" Suresh Chunder Chatterjee	102 "	
Purnea ...	Kishanganj ...	" Debi Prasad ...	119 "	
	Araria ...	" Saroda Prosad Sarkar ...	93 "	
Sonthal Parganas.	Deoghur ...	Mr. H. H. Heard ...	167 "	
	Godda ...	" F. E. Piffard ..	120 "	
	Jamtara ...	" A. W. Stark ...	123 "	
	Pakour ...	" E. McL. Smith ...	114 "	
	Rajmahal ...	" A. McGavin ...	138 "	Total 141 "
		" J. E. F. Pereira ...	3 "	

It will be seen that all the Subdivisional Officers have been on tour for the prescribed period of 90 days, and most of them for a good deal more. Mr. Wheeler, the Subdivisional Officer of Beguserai, devoted special attention to the working of the Village Chaukidari Act and to primary education. The tours of his *locum tenens*, Babu Radha Kant Banerjee, were chiefly taken up with enquiries into the damage done by the high floods of August last and the necessity of giving loans to the raiyats of those tracts which suffered most from them. In Madhipura the Subdivisional Officer, Babu Bhupati Chuckerbutty, specially enquired into the causes of non-realisation of criminal fines, realised arrear subscriptions due to local hospitals and dispensaries, made sanitary and other arrangements for the annual fair at Singheswar, and gave much attention to the prompt payment of chaukidars and the administration of the Village Chaukidari Act.

Babu S. C. Chatterjee in the Supaul subdivision gave special attention to Government estates, income-tax, Nipal frontier boundary disputes and the realisation of agricultural loans outstanding since the scarcity of 1892. Both the Subdivisional Officers of the Purnea district made useful tours, as they did last year, but there is nothing in the Collector's account of them deserving of special

mention. The Deputy Commissioner of the Sonthal Parganas gives the following account of the tours made by his Subdivisional Officers:—

Sadar.

"Mr. Roe was out for 106 days and travelled 565 miles by rail and 571 by road. While on tour he inspected roads, bunds, forests, and Damin bungalows. He inspected almost all mutation centres, and devoted a greater portion of his time to excise matters, being himself the officer in charge of the Excise Department.

Deoghur.

"Mr. Heard, the Subdivisional Officer of Deoghur, was on tour for 167 days. He was unable to go out during the first four months of the year on account of a riding accident, which confined him in the house for 19 weeks. He visited nearly all parts of the subdivision, inspected schools, pounds, excise shops, roads and other matters of public interest, he tried some bad livelihood cases on the spot, and verified reports about outstanding fines, inspected works of improvements in Court of Wards' estates, and conducted elections of headmen.

Godda.

"Mr. Piffard was on tour for 120 days. His tour extended over nine months of the year. He inspected roads and other works of public interest, making estimates of new works and enquiries in land dispute cases. He did mutation work also.

Jamtara.

"The Subdivisional Officer, Mr. Stark, made a tour of 123 days. During this time he inspected roads and villages, marked out better lines for roads, and looked to sanitary improvements. He made local enquiries in several bad livelihood cases, and paid special attention to the working of the village chaukidars, sardar chaukidars and ghatwals.

Pakour.

"Mr. Smith was out on tour for 114 days. He visited nearly the whole of the subdivision. During the cold weather he made enquiries about the state of crops and the condition of the people. He inspected roads and lands in Government estates, made enquiries about the cultivation of lands by foreigners in the Damin and in many other matters of detail, explained excise matters to the people, and enquired about bad characters and registration of vital statistics.

Rajmahal.

"Mr. McGavin was out for 138 days and Mr. Pereira for 3 days, the total number of days spent by them on tour being 141. This tour was devoted to making miscellaneous, local and judicial enquiries, to the inspection of bunds, roads and other work of public utility, enquiring about crops, the revision of chaukidari beats in the Damin, and attending to all legitimate representations of the people."

The favourable remarks made on the tour of the Deputy Commissioner, Sonthal Parganas, apply equally to the tours of the Subdivisional Officers, who all did excellent work, made themselves accessible to the people and thoroughly acquainted with the condition, wants, and general affairs of their subdivisions.

The tours of all officers were rendered unusually pleasant and cheerful by the abundant harvests which the whole of the Division enjoyed during the year under report.

(d) Inspection of District Offices and Treasuries by—

(1) Commissioner.

11. I inspected all the district offices during the year. Those of Monghyr, Purnea, Malda, and the Sonthal Parganas were very thoroughly and minutely examined in all departments. The Bhagalpur offices, which I had similarly inspected in detail during the previous year, were more cursorily examined, but the Road Cess Revaluation Office was thoroughly overhauled. All the district treasuries were inspected by me, except those of Malda and Monghyr, the inspection of which had not fallen due at the time of my visits to those districts. I found the district offices generally in good order, but those of Monghyr and Bhagalpur suffer much from the overcrowding of clerks; and the establishments there, specially in the English Department, are not capable of coping with the work they have to do. A new treasury building now under construction at Monghyr will considerably relieve the demand for space there. At Bhagalpur it was proposed to move some of the offices into the old jail

buildings, part of which is now occupied as his office by the Superintending Engineer, Northern Circle. The scheme fell through, as the buildings are required for the accommodation of a Police Training School. Financial pressure alone has prevented my persistently pressing the need for more accommodation on the attention of Government. In several of the offices inspected I found a lamentable disregard of neatness and cleanliness. Black and greasy punkah frills were conspicuous in many offices, and in Purnea I found that the sweeper had used the underpart of the court platforms (or *ijlas*) as a receptacle for the daily sweepings of the floors. The number of microbes and disease germs hatched by this process must have been considerable, and it must have had a prejudicial effect on the health of the officers concerned. The treasuries which I inspected were all found to be in good order, though the want of accommodation above referred to presses severely on the Treasury and Tauzi Departments of the Bhagalpur Collectorate, and renders the introduction of the rules in the new Tauzi Manual a matter of considerable difficulty.

(2) *Collectors.*

12. All the Collectors in the Division inspected their own offices and treasuries twice during the year. Mr. Skrine, the Collector of Bhagalpur, in spite of the adverse remarks made in paragraph 14 of my last year's report, made his inspection chiefly by proxy. As his inspection report he forwarded a long string of questions from the Board's Inspection Manual with the replies thereto of his subordinates and his comments thereon. This was done in direct contravention of the Board's orders (Board's circular No. 2 of February 1895), which are to the following effect:—

"Such reports need not contain all the minute details of each inspection, but should give the general results in such manner as to indicate the condition of the office or department inspected, and to place prominently before the Commissioner any matters on which any action or orders on his part appear to be called for, or which he should be informed of."

As I pointed out in last year's report, it is an obvious waste of time and stationery to copy out the questions *in extenso*, and an equally unprofitable task for me to wade through them and extract their essence.

(*e*) (1) *and* (2).

13. The subdivisional offices and treasuries were all inspected once by me (except the Rajmahal sub-treasury) and twice by the District Officers. As a rule they were found to be in good order, and the inspection reports contain nothing of special importance.

As one result of my inspection of the Supaul and Madhipura subdivisional offices, I may note that the thana of Bangaon has since been taken away from the former and added to the latter, in order to equalise the work of the two subdivisions (*vide* Government notification No. 2825J., dated 20th May 1895). I think a general tribute of praise is due to all the Subdivisional Officers of this Division, and especially to Mr. E. McLaren Smith of Pakour, for the very excellent state of their offices and for their general grasp of the executive administration in spite of the (sometimes very heavy) judicial work which always has to be done, and from which District Officers are generally free.

III.—WEATHER AND CROPS.

14. The main features of the year's weather were the scarcity of rainfall at the beginning of the rains and their unusual prolongation into the month of November, which did some damage to the standing winter rice crops. Heavy floods in the months of July and August caused a considerable loss of *bhadoi* and early rice crops in the Monghyr and Malda districts, but this was compensated by the good *rabi* crop which followed. In the former district a sum of Rs. 16,387 was distributed under the Agriculturists' Loans Act chiefly to the tenants on Government dearahs, but in the latter no remedial measures were considered necessary. A marked feature of the year's rainfall was the absence of rain during the period, December to March. As the rainy season was prolonged well into November, a considerable amount of moisture remained

in the soil, and the *rabi* crops did not suffer as they would otherwise have done from the failure of the usual winter rains. On the whole the *distribution* of the rainfall was favourable to agricultural operations.

15. The following table shows at a glance the rainfall of each district during the year (compared with the average of the previous ten years) and the outturn of its principal crops:—

District.	Rainfall.		Outturn of crops, taking 16 annas as the average outturn.			Remarks.
	Average of 10 years.	In 1894-95.	Bhadoi.	Winter rice.	Rabi.	
1	2	3	4	5	6	7
Monghyr ...	46·40	53·97	10¾	16	12½	The figures in column 2 are taken from the Bengal Administration Reports. Those in column 3 are from the District Annual Administration Reports. Those in columns 4 to 6 are taken from the Director of Land Records and Agriculture's final reports.
Bhagalpur ...	51·67	49·09	15½	17¼	15¼	
Purnea ...	71·06	73·84	16	16⅔	13	
Malda ...	54·18	60·42	12¾	16	16	
Sonthal Parganas	57·09	64·93	13	17	13	
Divisional average	56·08	60·44	13½	16	14	

IV.—PUBLIC HEALTH.

16. The general health of the Division showed a marked deterioration during the year under report, as will appear from the detailed accounts of each district given below. The large increase in the death-rate is partly due to the excessive rainfall and to floods in some tracts, but generally to the unusual prolongation of the rains into the month of November. It may also be partly due, as claimed by some of the District Officers, to improved registration.

General.

17. The year under report was a most unhealthy one. The total number of deaths registered was 94,816 against 55,498 in the preceding year. The mortality during the months of April, May, and June was more than double that of the corresponding months of the year 1893. The lowest monthly mortality was in February and the highest in October. The thana which showed the highest mortality was Jamalpur, where the death-rate was 63·53 per mille of the population, and that which showed the lowest mortality was Chakai, where it was 34·53 per mille. Cholera prevailed in the district throughout the year, except in the month of January. The total number of deaths from this disease was 9,166, which is the highest on record since the year 1887. Small-pox also raged throughout the year. The total mortality from small-pox (1,030) was also the highest recorded ever since the year 1878. The disease, however, which caused the greatest devastation was fever, from which 73,835 persons died during the year. The unhealthiness is attributed by the Civil Surgeon to the want of proper drainage and to the contamination of the water of the wells, from which the majority of people draw their drinking water, by sub-soil accumulation of the filth of ages.

Monghyr.

18. The number of deaths registered during the year 1894 in this district was 83,418 against 58,145 in the year 1893, giving a death-rate of 41·03 per mille against 28·6 in the preceding year. The number of deaths caused by fever was 67,156. Cholera raged in an almost epidemic form and prevailed throughout the year with more or less severity: 7,594 persons died of it during the year against only 990 in the preceding year. There were only 430 cases of small-pox against 1,185 in the year 1893.

Bhagalpur.

The Civil Surgeon is of opinion that the increase in the number of deaths is due to more accurate registration and not to any abnormal unhealthiness, but the District Magistrate does not endorse this view.

Purnea.

19. The general health of the district of Purnea during the year under report was not as good as it was in the previous year. This is accounted for by the unusual lateness of the rains. Though the rainfall was less than in the preceding year, more rain fell in September and October than in the earlier months. Fever of a malarial type prevailed all the year round, and it raged most severely during the months from September to January. The Collector reports that the lateness of the rains, together with the unusual cold, caused a great increase in mortality amongst children from fever and its complications. The total number of deaths registered in this district during the year 1894 was 64,337, of which 58,682 were due to fevers, 3,482 to cholera, 55 to small-pox, 83 to dysentery and diarrhœa, and 2,035 to all other cases.

Malda.

20. The general health of this district is reported to have been somewhat better than in the year 1893. The total number of deaths registered was 32,056 against 32,947 in the preceding year, giving a death-rate of 39·3 per mille of population as compared with 40·4. Of the total number of deaths registered, 27,685 were caused by fever, 2,692 by cholera, and the rest by other diseases. There was no death from small-pox during the year under report.

Sonthal Parganas.

21. The number of deaths registered during the year 1894 in the district of the Sonthal Parganas was 45,061 against 30,360 in the year 1893, giving a death-rate of 25·68 per mille of population against 17·30 in the preceding year. The increase is said by the Deputy Commissioner to be due to better reporting, for no part of the district was specially unhealthy during the year under report. Some of the Subdivisional Officers in this district devoted their particular attention to the subject of registration of births and deaths, and the Deputy Commissioner is taking action to secure an improvement in this direction in other parts of the district where there is most room for it. There were some cases of small-pox and cholera in the Godda subdivision, but not of an epidemic nature; otherwise the health of the district was generally good.

In connection with the subject of public health the Deputy Commissioner states that the scheme which Mr. McGavin, the Subdivisional Officer of Rajmahal, took in hand last year with a view to improve the drainage of the Rajmahal marshes, has been considerably forwarded, and that it is hoped that if this improvement can be effected (which will depend upon the provision of funds), it will greatly reduce malarial fever, which is very prevalent in the town of Rajmahal.

VACCINATION.

Monghyr.

22. Compulsory vaccination was in force in all the municipal areas within this district. Vaccination was carried on in both rural and urban areas under the supervision of the Civil Surgeon, except in the town of Jamalpur (East Indian Railway), where the Railway Medical Officer supervised them. The operations were somewhat retarded on account of the general unhealthiness of the district. The Civil
few
nators reports that there was no actual demand for vaccination, and that very
The total number their children to be vaccinated unless pressed by the vacci-

...ainst 1,185 in the year 1893. The subdivisions
said to have been entirely free from this disease,

while the Sadar subdivision reported 283 cases, of which Colgong and Sultanganj registered 195 and 64 cases, respectively. In the Banka subdivision 56 cases occurred in thana Amarpur.

Purnea.

24. The number of primary vaccinations during the year 1894-95 was 62,880 against 59,864 in the preceding year, and of revaccinations 127 against 31; 99·56 per cent. of the primary vaccinations and 61·35 of the revaccinations were successful.

Malda.

25. Vaccination was carried on in this district both by licensed vaccinators and by paid agency. The total number of operations performed during the year was 31,181 against 27,826 in the preceding year, showing an increase of 3,355 cases; 31,019 were successful, 160 unsuccessful, and the result of two is unknown. The rate of successful primary vaccinations was 99·81 per cent. against 99·7 in the preceding year.

Sonthal Parganas.

26. The number of persons vaccinated during the year in the Sonthal Parganas was 61,935 against 57,808 in the preceding year, showing an increase of 4,127 persons. Strenuous efforts were made to make the people of the Godda subdivision understand the advantage of vaccination, and the result appears to have been very successful. The Marwari residents of Jamtara and Sahibganj were at first opposed to their children being vaccinated, but subsequently consented. In one part of Deoghur Mr. Heard, the Subdivisional Officer, had himself vaccinated publicly, and the example is said to have had a very good effect. Vaccination is becoming more popular every day in the Sonthal Parganas, and inoculation is now almost unknown. The appointment of Sonthals and other residents as vaccinators in the Pakour subdivision has had the effect of breaking down the prejudices of the people, and children are now freely presented for vaccination. Dr. Kelly, the Civil Medical Officer, is said to have taken special interest in this work as he did last year.

V.—MATERIAL CONDITION OF THE PEOPLE.

27. Taking the Division as a whole, the condition of the people was, owing to good harvests, fairly prosperous in spite of the continued tendency towards a rise in, or perhaps I should say equalisation of, prices due to improved communications. The following remarks made by the Collector of Monghyr as regards his district are to the point and of general application:—

"On the whole the material condition of the people during the year under report did not materially change.

"Trade has been brisk, and it was a profitable year to the trading community.

"The cultivating classes in the tracts not subjected to inundation were better off owing to the rise in the prices of food-grains. The condition of the labouring class was deleteriously affected by the rise in the price of food-grains, when there was little or no corresponding rise in their scale of remuneration.

"The middle classes are helped by the fact that they nearly all have some land under cultivation when they do not indulge in unnecessary luxuries.

"The condition of the man who has received a sufficient smattering of education to make him despise the trade of his forefathers, while not enough to make him succeed at the Bar or in Government employment, is unsatisfactory.

"The landholding classes are largely indebted, and their expenses have increased more than their incomes. A large proportion of them are in the hands of mahajans, from whose clutches they find it difficult to extricate themselves.

"That a desire for better food, better clothing, and better mode of living has sprung up in the minds of all classes of people, admits of no doubt whatever. Gold and silver ornaments are more common, and brass utensils have usurped the places of earthen pots. Shoes, umbrellas, and better dresses are now more extensively used than before, and articles of food which were formerly considered as luxuries are now in common use. With the opening of railroads and other communications and owing to the activity in trade, the expenditure of all classes of people is increasing."

The Deputy Commissioner of the Sonthal Parganas writes:—

"There has been a distinct improvement in the condition of the people owing to the plentiful harvests at all seasons of the year. The surplus population of the district, and those who have no cultivation of their own, find employment on railways, stone quarries, and buildings. Some emigrate to tea gardens, and others enroll themselves to serve Government as coolies in the Lushai Hills. The Subdivisional Officer of Rajmahal reports that the deficient outturn of the Indian-corn and bajra crops among the paharia population of his subdivision was amply compensated by the profit they made from the cultivation of sabai grass, the unrestricted sale of which was referred to in last year's report. Its cultivation is rapidly spreading, and it is apprehended that this may tend to denude the hills of the few trees they still contain. Measures will be taken to check such devastation. It has been arranged that the paharias shall not hypothecate more than one year's crop, and this has saved them from the extortionate demands of the mahajans who had hitherto been extorting agreements from them for periods ranging from five to seven years on very inadequate and unfair terms. Again, the order forbidding mahajans and other outsiders to go into the hills and cut sabai grass has furnished employment to hundreds of people resident in the hills.

In Purnea there are large tracts of uncultivated land used chiefly for grazing, which relieve the pressure of the people on the soil and tend to improve the material condition of the people. The ravages of the river Kosi, however, render a good deal of such land uncultivable.

VI.—EMIGRATION AND IMMIGRATION.

Monghyr.

28. The number of emigrants registered during the year 1894-95 under the Inland Emigration Act was 165 against 195 in the preceding year. Fifty-one of these were males, 45 females, and 69 dependants. The Magistrate states that the decrease in the number of emigrants registered is due to an increased resort to free emigration. The number of emigrants registered under the Colonial Emigration Act was 31 against 53 in the preceding year. Twenty of these were males, seven females, and four dependants. There was no recruitment through the agency of female recruiters. One criminal case was brought against a recruiter working under the free emigration system in this district. After detaining two boys at his house for one night on promise of finding them work at Baidyanath, the recruiter attempted to take them to Assam, when he was detected by the Railway Police at Jamalpur. He was tried under section 342 of the Indian Penal Code and sentenced to rigorous imprisonment for six months and to a fine of Rs. 50.

Bhagalpur.

29. There was no emigration from the district of Bhagalpur during the year under report. The Collector writes that the pressure of population in this district is not so great as in the western districts of Bihar, and that waste lands are still available for cultivation. This is also the case in Purnea. This accounts for the absence of any tendency on the part of the labouring classes to emigrate. The case in which two girls were enticed away by certain recruiters from the Banka subdivision during the preceding year was brought to a close during the year under report. Three persons implicated in the case were convicted and sentenced to rigorous imprisonment for two and-a-half years each under sections 363 and 417 of the Indian Penal Code. There was no immigration on a large scale into this district, but cultivators from western districts occasionally come and take up land and then gradually settle down on it. Some tailors and blacksmiths from Monghyr recently settled at Banka.

Purnea.

30. There is no regular emigration from, or immigration into, the district of Purnea. The supply of labour in this district is rather less than the demand, and casual labourers come from other districts for work. Large numbers of labourers pass through this district in search of work further east.

Malda.

31. As in the previous year there was very little emigration from this district during last year. The labouring classes in this district have no inducement for going out of it, as they find sufficient employment in their own fields and in the numerous

silk filatures. On the contrary, thousands of upcountry people come into this district in the cold season for employment in harvesting and in road-making and repairing, returning home when their temporary work is at an end. As in Purnea, large gangs of coolies from the North-Western Provinces pass through this district in October and November on their way to Eastern Bengal, returning in the spring. The Sonthal colonies in this district are reported to be adding to their number every year.

Sonthal Parganas.

32. Of the Hon'ble Mr. Buckingham's system of emigration to Assam, the Deputy Commissioner writes:—"The scheme devised by my predecessor, Mr. R. Carstairs, in consultation with the Hon'ble Mr. Buckingham for providing a safe means of emigration to Assam, has been in force during the year under review. Only some of the tea gardens have adopted it. Their agent in Dumka is Mr. W. F. Adlam, who, as far as integrity and zeal goes, is all that could be desired."

The number of emigrants registered by recruiters was only 30, of whom 8 were males, 13 females, and 9 dependants. The free emigration system, however, worked briskly. It has been ascertained that as many as 592 coolies were recruited from the Deoghur subdivision alone under this system, 112 from Jamtara, and 22 from Rajmahal. Yet this cannot be said to represent the actual number taken, as accurate information on this point cannot be obtained. No statistics are available for the other subdivisions.

Recruitment through *arkatis* has abated, but it has not altogether disappeared. Garden sardars from Assam, the Duars and other tea districts come with the necessary certificates and take away coolies unnoticed. This has occurred both at the Sadar and in the subdivisions, and the local officers have not as yet been able to put a stop to the practice. When the keepers of unlicensed depôts at Dumka were called upon to explain why the garden sardars whose certificates were received by the Deputy Commissioner did not present themselves before him nor register any coolies, their reply was that the sardars found that they could not get any coolies and had left the district in consequence. The Deputy Commissioner, Sonthal Parganas, writes :—

"It is reported by the Subdivisional Officer of Deoghur that complaints about persons being enticed away were many, but only three cases and three persons were sent up for trial, one under section 363 and two under 341, Indian Penal Code. In the case under the first section the accused was discharged, but in the last two conviction was obtained." I quote below Mr. Heard's remarks about abuses in connection with emigration :—

"I am strongly convinced that many abuses in connection with the so-called free emigration system go on, and that of the cases that actually occur few only come to light, and fewer still end in conviction. I have expressed before in various letters to your office my view that to a certain extent the law itself seems to blame for the abuses that prevail."

He thinks that there is no remedy for a man whose wife is abducted and sent away secretly to a tea garden. The only section applicable is section 417, Indian Penal Code, "cheating," but it is not easy to work it practically. The following case is quoted by him as an instance in point:—"A Dome complained to him that a woman of his own caste, whose brother is a cooly sardar, came to him and asked him to let his wife go to the assistance of a Sonthal woman in labour in an adjoining village. It was promised that the wife should return that evening. The man agreed and went off to his work. There was no wife at home when he got back, and proceeding at once to the Sonthal's house he learnt that the Sonthalin was not even *enciente*. The Domni is still missing, and the husband is left with an unweaned infant on his hands. The wife is probably over 16, so section 361 will not apply, and section 417 will most probably not do, not because sections 24 and 25 are not satisfied, but because there are seldom any reliable witnesses to the plausible pretext by which a recruiter's victims are decoyed from the home roof."

There were fewer cases of abduction of coolies than in 1893-94. The details of those which were of a heinous nature have been fully given in the quarterly returns of criminal cases connected with emigration, and it does not appear necessary to reproduce them here. The most important case may, however, be mentioned. One Mr. Crow was charged by Chewku Manjhi with

having enticed away his daughter, under 16 years of age, from Dumka. The girl was traced to Assam and brought back thence. A charge of kidnapping under section 363, Indian Penal Code, was proved against Mr. Crow, and he was sentenced to pay a fine of Rs. 350, or in default to undergo rigorous imprisonment for a term of two months. The sentence appears to be inadequate; but as the accused has since died, no action can be taken to enhance it.

After their own harvest is gathered many Sonthals with their families are in the habit of temporarily emigrating to Malda, Dinajpur, and to the tea districts of Jalpaiguri and Darjeeling in search of employment. Some acquire lands in these places and settle there, but the majority return home again. This movement was less marked during the year under report owing to the good harvest enjoyed by the Sonthals.

The Officiating Deputy Commissioner, Mr. Bernard, reports that the enlistment of coolies for Chittagong is still popular, and that they are collected for this work without any difficulty. Since the close of the year Mr. W. F. Adlam, the agent for the Hon'ble Mr. Buckingham, has been permitted by the Deputy Commissioner, as an experimental measure, to manage the business of collecting and despatching coolies to Chittagong free of charge. If he does the work satisfactorily the Deputy Commissioner proposes to ask the Commissioner of Chittagong to correspond with him direct.

There is no immigration into this district except for work in connection with the East Indian Railway.

33. In connection with the subject of emigration I attach a copy of an advertisement which appeared in the *Englishman* of 25th April 1895, and which hardly requires any comment—

"*Wanted—A partner to advance Rs. 2,000 or Rs. 3,000 for the cooly trade,* i.e., *to supply coolies to tea gardens through their agents in Calcutta; a very very profitable business; guaranteed cent. per cent. profit. For further particulars apply in first instance to 'Investor,' care of this paper.*"

34. The inspection of depôts under the Inland Emigration Act during the year has not been so frequent or searching as it ought to have been, and the attention of the District Officers concerned has been specially drawn by Government to the defect.

VII.—PRICES OF FOOD AND LABOUR.

Prices.

35. Taking the Division as a whole, the prices of wheat and salt remained nearly the same as in the preceding year. In the district of Monghyr wheat, common rice, and salt fell, while grain slightly rose, in price. Prices were somewhat higher in the Jamui subdivision than in the other subdivisions. The failure of the bhadoi crops in the *deara* tracts tended to increase prices there for a short time, but the excellent outturn of the winter rice crop brought them to their level. There was a fall in the price of common rice throughout the district of Bhagalpur due to the excellence of the winter rice crop which was above the average. Prices were not generally affected by export and import, but were almost entirely determined by the local harvests. In Purnea common rice sold at 16 seers a rupee at the beginning of the year, and after a rise in July and August and a fall in October and again in December, it continued to sell at 20 seers a rupee until the close of the year. There was some fluctuation in the price of wheat, but the prices of other food-grains continued favourable throughout the year.

Owing to a good harvest and to decreased exports the price of common rice in the district of Malda was a little easier than in the preceding year, but the price of wheat rose from 16 seers in 1893-94 to 12 seers 4 chitaks in the year under report. Large exportation, combined with a deficient outturn, caused the price of this staple to rule higher.

The principal food staples of the district of the Sonthal Parganas are rice and Indian-corn. Owing to the favourable outturn the price of common rice was low. Indian-corn, on which the Sonthals mainly live, was plentiful, and they were consequently well fed and prosperous. Wheat and gram are not staple articles of food in this district, and they are not much grown there.

Wages.

36. Wages of labour remained almost stationary. There is, if anything, a slight tendency towards a rise, but no marked changes took place during the year under report. The Deputy Commissioner of the Sonthal Parganas writes that in and near towns

masons and carpenters are in greater request than before, and that this fact has tended to increase their wages. As I remarked last year, wages do not appear to fluctuate with or to rise so rapidly as prices.

VIII.—MANUFACTURES AND MINES.

37. The principal manufactures of the district of Monghyr continued to be opium, molasses, saltpetre, indigo, and guns. It appears that 31,774 bighas of land were cultivated with poppy against 31,086 bighas in the preceding year. The outturn of opium was 2,587 maunds against 1,927 maunds in the year 1893-94. Thus there was an increase both in the area under cultivation and in outturn, but it is stated that the outturn was an average one, and it compares favourably with the previous year only because the latter year was unusually bad for poppy. Molasses manufactured in this district is exported to Calcutta and other places. Saltpetre is manufactured chiefly in the Begusarai subdivision, where there are many manufactories and refineries. Guns are largely manufactured and exported to Lower Bengal. The demand for Monghyr-made guns is very large owing to their cheapness. During the year under report 3,661 guns and pistols were manufactured against 3,799 in the previous year. The indigo season was a favourable one, and as prices were fair, most of the concerns made good profits. The statistics which have been received from four factories show that the total outturn in them was 4,888 maunds. In the preceding year the outturn in seven factories was only 3,705 maunds. Ghi and hides are also extensively manufactured and cured in this district and exported to Calcutta and other places. Among minor articles of manufacture may be mentioned ebony boxes, walking sticks, brackets, chairs, cane baskets and fancy articles made of straw, which find a ready sale in the district, all over Bihar, and in a part of the North-Western Provinces.

Monghyr.

38. The principal articles of manufacture of this district are *tassar* silk, indigo and molasses. During the year under report Rs. 1,78,270 worth of *tassar* silk cloth was exported from this district against Rs. 2,18,719 in the preceding year. The falling off in the export was due to the rise in the price of cocoons. There were 19 indigo factories at work in this district during the year under report, and the outturn was 1,834 maunds, valued at Rs. 3,41,888, against 1,172 maunds, valued at Rs. 3,02,560, in the year before. The cultivation of sugarcane and manufacture of sugar and molasses are steadily extending in the Supaul and Banka subdivisions.

Bhagalpur.

39. The principal manufactures of this district are indigo, country cloth, blankets, brassware, wood-work, gunny-bags, mats, molasses, and *bidri* work. The season was favourable to the growth of indigo, and the outturn was satisfactory. The prices obtained were also favourable. Country cloth and blanket are manufactured chiefly to supply local want. Some of the former is also exported to Nipal. The brassware, *bidri* work, and gunny-bag industries are on the decline. The wood-work consists chiefly of the making of cart wheels, which, owing to their durability, are in great demand and are sold in the district as well as in the surrounding districts. The mat industry, which is carried on chiefly near Kishanganj, has received an impetus by the opening of the Kishanganj railway line. Molasses are also manufactured chiefly in the Kishanganj subdivision and to a smaller extent in the Araria subdivision. The introduction of cane-pressing mills has given an impetus to this industry. A large quantity of the molasses is exported to Dinajpur, Jalpaiguri, and Nipal.

Purnea.

40. The principal manufactures of the district of Malda are silk (including the various kinds of silk fabrics), indigo and brass and bell-metal-ware. There were two silk factories under European management and numerous native silk filatures at work. The two European factories produced 41,810lbs. of silk of the estimated value of Rs. 3,46,410 against 67,920lbs. of the estimated value of Rs. 6,67,187 in the previous year. The estimated value of the silk produced in the native filatures was Rs. 11,50,000 against Rs. 14,00,000. The indigo cultivation in this district proved more successful than in the preceding year. The outturn

Malda.

was 1,395 against 1,132 maunds. The manufacture of brass and bell-metal utensils continued to be the same as in the previous year. There was no improvement or decline.

Sonthal Parganas.

41. Indigo and country cloth were the chief manufactures of this district. There were 15 factories, three of which did not work during the year. The outturn of indigo in the remaining 12 factories was 436 maunds against 264 maunds in the year before. Country cloth, which is preferred by the poorer people as being thicker and stronger than imported cloths, is manufactured for use in the district.

Mines.

42. The only districts in this Division where there are mines or quarries are Monghyr and the Sonthal Parganas. Two mica quarries were worked in the Jamui subdivision of the former district, and the output was 86 maunds against 260 maunds in the preceding year. The stone quarried at Dharahra continued to be worked by Mr. Ambler.

There are four coal mines in the Sonthal Parganas, of which the most important is that at Madankata. The output from this mine during the year 1894 was 40,227 tons of coal against 23,660 tons in the preceding year. Owing to the coal-strike in England last year the price of coal ran high, and this Company made the best of the opportunity. It is reported, however, that the mine is nearly exhausted. The other coal mines call for no remarks; they yielded altogether only 738 tons of coal. There are several stone quarries in this district near the East Indian Railway. The stone is used for railway ballast and for the roads of the Municipality of Calcutta and of the District Boards of Hooghly and Burdwan. A clay pit was also leased out by Government in the Rajmahal subdivision for three years at an annual rental of Rs. 370.

IX.—TRADE AND COMMERCE.

43. The trade routes of the districts of this Division, with the exception of Purnea, were the same as before. The description given by the Collector of Purnea of the trade routes of his district is quoted *in extenso*. He writes :—

"No great change is observable in the principal trade routes of the district. The opening of the Barsoi-Kishanganj Railway line has attracted a good deal of the traffic of Kishanganj subdivision, but the boat route by the Mahanadi river is still followed as being the least expensive.

"The merchants of Pichlsla-Kuttigola and other places on the Mahanadi still send a good proportion of their commodities by the river route to Bhadreswar and Calcutta. The boat routes of the Kosi and Ferriani from the Araria subdivision have been entirely abandoned. In course of time there can be no doubt that the railway will engross the whole traffic of the district.

"The extension of the Barsoi-Kishanganj line to Siliguri with good feeder roads, connecting the principal trade centres with the railway stations, seems very desirable to open up that portion of the district, and it will be a source of large income to the railway. The reduced special rates for certain goods proposed in my last report have, I am glad to notice, been made, and I have no doubt that in time a large proportion of the river traffic will pass on to the railway."

Monghyr.

44. The import of European piece-goods showed an increase over the preceding year, which, the Collector says, was due to the better general condition of the people and to the good outturn of crops. The import of country produce also was over the average. The import of rice was larger, and that of salt was smaller than in the preceding year. The import of wheat was about the same during the past two years. These temporary variations, which might have been caused by fluctuations in prices, are not in fact capable of satisfactory explanation. Except in the cases of wheat and ghi, the export trade in the most important commodities showed a falling off as compared with the preceding year. The Collector has been unable to ascertain the reason for the decrease.

Bhagalpur.

45. From the statistics of rail-borne traffic received by the Collector from the District Traffic Superintendent of the East Indian Railway for the six railway stations within the Sadar subdivision, it appears that the principal articles of export were rice, wheat, and oilseeds, other food-grains, and jute, and of import European

piece-goods and salt. There was a general falling off in export during the year under report as compared with the preceding year. The import trade in European piece-goods was rather dull, but that in salt showed a rise.

Trade with Nipal.

On this subject the Collector writes:—"The value of articles exported from and imported to Supaul from Nipal as registered in the three registering offices was Rs. 5,69,115 and Rs. 4,60,277 against Rs. 6,00,442 and Rs. 3,01,093 of the previous year. But this does not represent the correct figures, as a large quantity escapes registration by being carried through routes lying between the intermediate stations."

Purnea.

46. I cannot do better than quote the Collector's account of the import and export trade of his district. He writes:—

"The principal articles of export were jute, tobacco, rice, paddy, mustard and hides. An increase is observable in almost every article exported. Rice and paddy are taken in considerable quantities to Revelganj, Chapra, Arrah, and other places in Bihar, a portion finding its way even to Ghazipur. The goods are sent down by rail to Manihari ghat, whence they are taken by country boats to the places aforesaid. Forbesganj is the chief centre of this rice and paddy trade, the supply whereof is received to a large extent from the Nipal Terai. Mustard and hides are sent down to Calcutta and jute and tobacco to Bhadreswar and Calcutta, the two principal marts in Lower Bengal.

"Jute is daily becoming a very important article of the export trade of this district. Messrs. Ralli Brothers of Calcutta have opened a screw-house at Kasba and established sub-agencies at Forbesganj and Kishanganj. Cultivators have been growing jute to a considerable extent on account of the increased demand for this article of trade and the ready market they find for it. They also find its cultivation in some years much more profitable than paddy, but it it is a speculative crop.

"The principal articles of import were European piece-goods, salt, iron, brass and copper wares, cotton, kerosine oil, sugar, and gold and silver. There was an increase in almost every article of import, except rice and paddy. The successive good harvests of the preceding years did not necessitate the bringing in of paddy, in any considerable quantity, to the district. The supply was more than the requirements of the district, and thus it was able to export a large quantity of its produce.

"The increase in European piece-goods is remarkable. The general prosperity of the people consequent on the good harvests of successive years enabled them to purchase new clothes and to celebrate a larger number of marriages. The increase in kerosine oil is also considerable; cheapness is its principal characteristic, and people are learning to use it to a considerable extent.

"A large increase is also observable in salt. It was necessary to bring in a large quantity of this article to replenish depleted stocks of the previous year. The increase in the other articles of import is not great, and does not require special mention. They are due to fluctuations in trade."

Trade with Nipal.

The trade with Nipal is daily growing in importance with the increased trade of the district and with increased facilities for transit. The principal articles of exports were rice, paddy, jute, mustard, and tobacco. All these articles showed an increase over the figures of the preceding year, except mustard and jute. The decrease cannot be satisfactorily accounted for. The principal articles of import were European piece-goods, salt, iron, betel-nuts, sugar, and kerosine oil. All these articles, except sugar, show an increase.

Malda.

47. The principal articles of export from this district were the same as in the preceding year, viz., rice, wheat, oil-seeds, pulses, silk, silk-cloth, jute, indigo, metal-ware, cocoons and mangoes. The principal articles of import were European piece-goods, cotton twist, salt and kerosine oil. The export of rice which was taken to the North-West Provinces fell off from 8,00,000 in 1893-94 to 7,00,000 maunds during the year under report. The export trade in wheat, raw silk cocoons, and metal-ware was normal; that in kalai and pulses was dull, and

the export of silk fabrics was smaller than in the preceding year. The import of European piece-goods, cotton twist, and kerosine oil increased, and that of salt was normal.

Sonthal Parganas.

48. The Deputy Commissioner reports that trade was, as usual, very brisk in the eastern parts of his district, viz., in the Rajmahal and Pakour subdivisions, where the lines of communication were the East Indian Railway and the river Ganges. In the Deoghur and Jamtara subdivisions trade was less brisk, but was more active than in the Sadar and Godda subdivisions. The principal articles of export were grain, pulses, oil-seeds, sugar, unrefined, tobacco, lac, tassar cocoons, stone metal, hides, buffalo horns, and sabai grass. Mohua was also exported from this district, but accurate statistics are not available. Those of import were European piece-goods, kerosine oil, spices, salt, gunny-bags, and brass-ware. The export of sabai grass was considerable. The grass was despatched to the Bally, Titagar, and other paper mills. The export of lac was not large. The trade in hides and bones expanded. The import trade increased generally during the year. The number of cattle registered in the Hiranpur cattle market was 27,814 against 33,722 in the year 1893-94. No satisfactory explanation is available of the large falling off in this trade.

The District Officers have not been able to make much use in their present reports of the statistics furnished by the Railway authorities and the Government under orders passed in Statistical Department circular No. 2, dated the 16th April 1895, on the subject of statistics of river and rail-borne traffic. Long after the submission of their Annual General Administration Reports the District Officers of Monghyr, Bhagalpur, and Malda, and the Deputy Commissioner of the Sonthal Parganas, forwarded to this office, without comments, the statements of "up" and "down" import and export boat traffic carried along the Nadia rivers; and the District Officer of Monghyr alone submitted the statement of boat traffic along the Calcutta and Eastern Canals. Only the Deputy Commissioner of the Sonthal Parganas and the Collector of Bhagalpur have submitted figures of rail-borne traffic. It is hoped that all the statements ordered by Government will be received by the District Officers in time for incorporation in their reports for the current year, and that they will be fully reviewed by them in their next reports. Figures for two years will then be available for comparison. Their special attention will be called to this important subject early next year and before their next reports become due.

X.—ADMINISTRATIVE CHANGES.

49. The most important administrative change made during the year was the formation of a separate Arrear Collection Department in each district under Government Order No. 1648L.R., dated the 22nd March 1894. It is yet too early to give final opinion on the results of this scheme, as it was in operation only for a part of the year. So far as I have been able to judge, however, it has been of considerable advantage.

A revised scale of apprentices for mufassal offices, *i.e.*, 20 per cent. on the number of permanent employés in the whole office (instead of 10 as before), was sanctioned by Government in their No. 5959M.A., dated the 15th November last.

Two outposts, one at Harda and the other at Assuragarh, in the Purnea district, and the outpost of Bholahat in the Malda district, were abolished; and the outposts at Manikchak and Tulsihatta in Malda were converted into thanas.

The Sadar Munsif of Malda was vested with the powers of a Small Cause Court Judge for trial of suits up to the value of Rs. 100.

The following Acts of the Governor-General in Council were extended during the year to the Sonthal Parganas, viz.—

Act V of 1881, Probate and Administration.
Act I of 1894, Land Acquisition.

A Bench of Honorary Magistrates was established for the first time at Deoghur in the Sonthal Parganas. Messrs. W. M. Smith and W. C. Müller, both retired Deputy Magistrates, were invested with powers to try cases

(sitting alone) at Madhupur and Barkope, respectively. The latter has since resigned and left the country.

The Sultanganj Bench was made independent during the year under report.

XI.—STATISTICAL ENQUIRIES.

50. Both births and deaths were registered by the police throughout the Division. In the non-police tracts of the Sonthal Parganas they were recorded by the parganites with the help of other indigenous agencies. The accuracy of these statistics is doubtful and is questioned in many quarters, but the subject is now receiving increased attention from all officers concerned, and yearly improvement in this direction is visible. Much depends on the interest taken in the matter by the superior officers of police. The Magistrate of Monghyr writes:—"'Births' and 'deaths' have been registered by the police during the year. The rural chaukidars take the information under these heads through the *punches* to the thana on parade days, where they are registered. The local police and outpost officers check this information. 'Death' registration is fairly well carried out in this district, and has been so ever since 1885, when Colonel Ramsay, District Superintendent of Police, took up the subject and more than doubled the registered death-rate of the previous year.

"'Birth' registration in rural circles, on the other hand, has only been in operation for three years, and there is no doubt that the figures are much below the truth. The figures for the three years are as follows:—

1892—Birth	...	71,357—35·04 per 1,000.
1893— Do.	...	74,654—36·66 „ „
1894— Do.	...	75,479—37·07 „ „

"During the year under review five circles show an increased birth-rate as compared with the preceding year and nine a decrease.

"Sikandra and Chakai, which were formerly two of the most backward thanas in the district, show a large increase—

Sikandra from 3,516 births (30·72) to 4,100 (35·82).
Chakai from 3,709 (31·66) to 4,373 (37·32).

"But for the large increase in these two thanas the district as a whole would have shown a decreased instead of an increased birth-rate for 1894."

The Magistrate of Malda writes:—"The system is still defective. I always inspect the death and birth registers when in the interior, and am sorry to have to admit that the entries do not appear to be reliable. I have directed the police officers to warn the chaukidars to report births and deaths regularly. Any marked delinquency in this respect is punished judicially, sometimes with imprisonment."

Statistics were also collected during the year regarding crops, industries, prices-current, and rainfall. The Collector of Purnea writes that statistics of trade were also collected by a Deputy Collector at the Sadar and by a Sub-Deputy Collector at Kishanganj. In Malda enquiries regarding the export and import trade were made by the police.

51. Statistics of traffic with Nipal were, as in previous years, collected in the districts of Bhagalpur and Purnea by muharrirs stationed on the frontier. On this subject the Collector of Bhagalpur writes:—"The registration of traffic with Nipal continues to be made at the same places, viz., Birpur, Kanoli, and Panchparia The Subdivisional Officer of Supaul reports that the registration at these places does not represent the exact trade with Nipal as goods pass across the boundary at intermediate points. He considers that the number of articles which escape registration must be large." The Collector of Purnea writes:—"These stations are on the most important routes through which the trade principally passes, but there are other routes of lesser importance by which it is believed a fair portion of the trade is carried on." The figures can only be regarded as approximately correct, and I do not think it would be safe to place much reliance on them.

XII.—CIVIL JUSTICE.

52. The figures for the work done by the several civil courts in this Division have, as ordered by Government, been obtained direct from the District Judges.

The Munsif's Court at Jamui worked almost throughout the year 1894, and was of much advantage to the people of that subdivision. Owing to heavy pressure of work a second Subordinate Judge was deputed to Monghyr for a portion of the year.

Several zamindars of the Supaul subdivision, headed by the Maharaja of Darbhanga, applied for a separate munsifi for that subdivision. The Judge, however, was of opinion that there was not sufficient work there for a separate Munsif, and he did not approve of the Munsif of Madhipura being removed to Supaul. The matter has been dropped for the present; its revival would involve the expensive question of new buildings.

The permanent Sadar Munsif of Malda was vested in October last with the powers of a Small Cause Court Judge for trial of suits up to a value of Rs. 100.

The Collector of Malda, Mr. Price, states that great inconvenience is felt in having the District Judge at Rajshahi, which is 92 miles from Malda. For half the year parties cannot avail themselves of the steamer service for going to and coming from Rajshahi for the institution and conduct of appeals and original cases of value exceeding Rs. 1,000. He suggests the establishment of a Subordinate Judge's Court at Malda, and I think the proposal is a reasonable one.

The Officiating Collector of Monghyr, Mr. Wheeler, writes:—"The relations between creditors and debtors were far from satisfactory: all the Munsifs report unfavourably of the high rates of interest charged by money-lenders, specially by the Marwaris. The raiyats cannot do without the help of the mahajans, but once in their grasp, it becomes extremely difficult to extricate themselves." The usury law is now under discussion by the Government of India, and it would be premature to say more on the subject. I think that agricultural banks for the benefit of the raiyats might be tried in some of the districts of this Division. If these banks were started under Government patronage and guarantee, native gentlemen of position and means, especially Government officers, would be glad to keep their savings in deposit in such banks if 4 to 6 per cent. interest were allowed on such deposits according to the time allowed for the right of withdrawal.

The increase in the number of rent suits in Monghyr is attributed to the fact of the Srinagar estate instituting a large number of rent suits on its release from the control of the Court of Wards. The Collector of Bhagalpur reports that the increase of such suits in his district is due to the partition of the Srinagar estate, which resulted in the institution of rent suits on behalf of each share of the estate. The increase in the district of Malda is attributed to the institution of a large number of such cases by the Raja of Pakour.

It is reported that in the district of Monghyr the number of enhancement suits increased owing to disputes both as regards the quantity of land and the rate of rent. The claims on both sides are said in many cases to have been supported by fabricated documents.

The Munsif of Begusarai says:—"I take special care to see that only those applications for distraint are granted in which the landlords could furnish *primâ facie* strong evidence of their title." This precaution, he says, has led to a visible falling off in the number of such applications.

Mr. Wheeler refers to the general complaint of the great delay in the disposal of title suits by the civil courts. I agree with him that if decrees in such cases could be obtained within a reasonable time and at a reasonable cost, many disputes, which otherwise occupy the time of the criminal courts and disturb the peace of the district, would be avoided. It is, however, only fair to admit that such delays are as often as not the fault of the parties rather than of the courts.

With reference to the increase in the number of title suits in Bhagalpur from 524 in 1893 to 934 in 1894, and the decrease of money suits from 5,096 to 4,302, the Officiating Collector, Mr. Mullick, writes—"The above increase and decrease is, according to the District Judge, due to the fact that a number

of mortgage suits which had hitherto been wrongly classed as money suits have now been classed as title suits." This correction of classification would still leave a portion of the variation unexplained. The Collector thinks that "a possible explanation may be found in two years of successive prosperity."

In the district of Malda the number of title and other suits increased from 673 in 1893 to 1,583 in 1894. The Collector attributes the increase to the institution of a very large number of cases by the zamindar of Chanchal (Babu Sarat Chandra Roy Chaudhury) against the tenants of his newly-purchased estate of Shyampur. All these suits were for ejectment of tenants.

There was also an increase in this district from 3,221 to 3,374 of suits for money; and the Munsif of Malda attributes it to the ill-feeling between the landlords and tenants of thanas Malda and Gazole.

53. The special report on the Administration of Civil Justice in the Sonthal Parganas was submitted with my letter No. 1130J., of the 22nd May 1894.

The total number of original suits instituted in that district during last year was 13,348 and of execution cases 7,600 as against 12,583 and 6,706, respectively, in the year 1893. The Officiating Deputy Commissioner, Mr. Bernard, with reference to the increase in title suits, writes that a majority of them was instituted with a view to have contested claims to land confirmed by the civil courts in tracts which have not been recently resettled.

The good harvest of two successive years has, it is said, induced the people to institute many money suits, in the belief that they had a better chance of realising their dues.

The number of cases referred to arbitration fell from 506 to 386. The Deputy Commissioner writes that the decrease took place everywhere, except in Deoghur and Jamtara, and that arbitration is not liked by any class except the Sonthals and Paharias.

The result of the Administration of Civil Justice in the Sonthal Parganas was generally satisfactory and creditable to the officers of the staff of that district. I may add that the tendency is for work to increase without a corresponding increase of workers, and that the demand for officers for the Bihar survey was felt in this district as in the other districts of this Division.

XIII.—CRIME.

54. The total number of cases reported to and investigated by the police during the year under report was 11,526, which, compared with the figures for 1893 (10,253), gives an increase of 1,273 cases. With the exception of a slight decrease in Malda and the Sonthal Parganas the increase is about equally shared by all the districts of the Division.

Of the 10,253 cases enquired into during the year 735 were found to be false and 10,791 to be true. Five thousand eight hundred and seventy-four cases were disposed of by Magistrates, of which 4,839 ended in conviction. The number of *persons* brought to trial was 11,818, of whom 7,504 were convicted and 3,828 were acquitted. The Magistrate of Bhagalpur writes:—"An unsatisfactory feature of the year's returns is the apparent revival of dacoity. In 1893 there was only one case, but the number rose to five in 1894, and of these only one was detected and successfully prosecuted. The proximity of the Nipal frontier accounts for the successful escape of the criminals in the northern subdivision. It is always possible to check this form of crime when it is the work of local gangs, but when we have to deal with bad characters from the other side of the frontier the police at our disposal can no more prevent dacoities than they can prevent murder." There is only one Police Inspector for the two subdivisions of Madhipura and Supaul, and the area of his jurisdiction is far too large to allow of effective supervision. The matter has been specially represented to the Inspector-General of Police since the close of the year with an application for a second Inspector and a slight increase to the police force on the Nipal border.

XIV.—POLICE.

Regular police.

55. The conduct of the police of this Division was, on the whole, satisfactory during the year under report, and there is nothing which calls for special mention under this head.

Preventive police were employed in Monghyr owing to repeated obstructions on the East Indian Railway line, and in the Sonthal Parganas owing to agrarian disputes.

Rural police.

56. The introduction of Act VI (B.C.), 1870, is practically complete in the districts of Purnea and Malda. In Monghyr and Bhagalpur a considerable amount of work in this direction remains to be done during the current year. The Sonthal Parganas has a rural police system or systems peculiar to itself. The Magistrate of Monghyr writes:—"The rural police have worked well. One hundred and one men were rewarded, and Rs. 359 was paid as reward for good services. Two hundred men were punished. As compared with 1893, the number has fallen from 119 rewarded and 273 punished. It is probable that the greater number of punishments in 1893 had a salutary effect. The pay of the men has also been gradually raised throughout the district, which may be expected to have a good effect.

"The chaukidars' salaries were paid more regularly, and a large number of villages were brought under the Chaukidari Act during the year."

The Magistrate of Bhagalpur remarks:—"The extension of the Chaukidari Act in the district is being gradually carried out. Early in the year under report it was successfully introduced into the whole of the Sadar thana. The system has hardly had time to get into thorough working order in the new area, but in those parts in which it has been longer in force it is found to be very successful. The District Superintendent of Police considers the reporting of crime to be quite as good as in other districts in which the Act is fully in force. The attendance at parade is decidedly good, substitutes being for the most part sent when the chaukidar is unable to come.

"In consequence of the extension the number of chaukidars under Act VI has largely increased. The number in 1893 was 2,219 against 1,519 under Regulation XX of 1817, while in 1894 it rose to 2,503 against 1,200 jagirdars. It is a matter of surprise to me that the introduction of Act VI has proceeded so smoothly; for there can be no doubt that every class of the public regards it with disfavour. The villagers hate it because it means additional and, what is more direct, taxation. The zamindar hates it because it deprives him of a willing servant, and the chaukidar hates it because he loses what is dear to the heart of every cultivator—land, and because his commuted pay by itself is not nearly enough to support him. It is fortunate, however, that in the majority of cases the holder of the tenure is appointed chaukidar. The number of chaukidars judicially punished was 26, while 884 were fined departmentally. The percentage of chaukidars rewarded is only ·01, an unsatisfactory feature, to remedy which efforts will be made during the current year."

The Magistrate of Purnea says:—

"Of the 4,517 rural police or chaukidars (*vide* paragraph 21), 4,443 are under Act VI of 1870 and 74 under Regulation XX of 1817. The general rate of pay is Rs. 4, though there are chaukidars in some places who get Rs. 6 or Rs. 5, and Rs. 3 in a few instances also. In spite of all measures adopted, it has been found difficult to secure men of good caste to take the office of chaukidar. In some instances the services of Sheikhs, Pathans, and Rajputs were secured by offering higher salaries. The Hari caste is the prevailing element in the rural police. They are very low in point of repute and caste, so much so that good caste people are said to tremble at the bare idea of having to use the spear of a Hari chaukidar." Mr. Meares, the District Superintendent of Police, writes:—"The working of the rural police is extremely unsatisfactory. A very large proportion of these are Haris, one of the most criminal classes in the district, and decidedly the most dangerous class owing to their extensive organisation, extending as it does throughout the centre of the district from south to north and into the Morang. The *panches* prefer employing Haris, as they are a menial class from whom they are able to get more private work than from men of other castes, and who from their low social position are more amenable than most castes to their orders in every thing."

57. Mr. J. H. Bernard, Officiating Deputy Commissioner, Sonthal Parganas, makes the following observations on this subject:—"The rural police in the Deoghur subdivision are underpaid. In the Jamtara subdivision a considerable

improvement in the status of chaukidars has been effected by raising their pay to Rs. 3 per mensem by taxing the villagers. In the Deoghur subdivision the subject is under consideration. Probably the ghatwals in ghatwali estates and zamindars in other estates should provide either pay or jagirs for badly paid chaukidars. In Jamtara a scheme has been devised by which the old ghat chaukidars, who have now no work to do, pay for the entertainment of sardar chaukidars. These officials are now well off and are said to be working well. The ghatwal of Ghati in the same subdivision received special commendation for prompt action in a case of dacoity which resulted in the discovery and conviction of the culprits who had not been identified by the complainant, and probably thought they had got safely away. The Subdivisional Officer of Jamtara is endeavouring to prevent the subletting by chaukidars of their jagir lands to mahajans and to get lands with which they have parted back for them. The difficulty lies in their identification. The Subdivisional Officer of Pakour has paid much attention to the organisation of indigenous police in his subdivision and reports of their work in terms of praise. They certainly do a great deal everywhere, and perhaps more in Pakour than elsewhere, where they are all personally known to Mr. Smith. I am at present attempting to improve the rural police arrangements in the Dumka subdivision. In Rajmahal police tracts Mr. McGavin, the Subdivisional Officer, has taken steps to cause chaukidars to be punctually paid."

XV.—CRIMINAL JUSTICE.

58. The number of cases disposed of by Stipendiary Magistrates in 1894 was 12,009, or 9 less than in 1893, but the number of persons tried was 17,863, or 265 more than in the preceding year. Forty-seven thousand one hundred and forty-seven witnesses were examined against 51,396 in 1893, an increase of 4,249. These figures indicate that the cases disposed of during the year under report were of a more serious and difficult nature than in 1893. The slight increase (of 3·5 over 3·3) in the ratio of detention of witnesses over two days points to the same conclusion.

Of the total number of persons on trial, 63·1 per cent. was convicted and 36·5 was acquitted, as against 58·8 and 40·5 per cent. respectively in 1893.

It is satisfactory to note that the number of appeals fell from 1,443 in 1893 to 1,363 in 1894, while the ratio per cent. of decisions confirmed on appeal rose from 73·4 to 78·5 respectively. Each Stipendiary Magistrate disposed of an average number of 237·8 cases in 1894 against 225·6 in 1893.

59. The results shown in the preceding paragraph would hardly have been attained but for the help rendered to the administration by the Honorary Magistrates, who disposed of no less than 3,439 cases last year compared with 2,523 in 1893, an increase of 916. In these cases 4,039 persons were tried against 3,088 in 1893, an increase of 951. The nearer correspondence between the number of cases and the number of persons tried by the Honorary Magistrates indicates the fact that they were of a more simple nature. The percentage of persons convicted and persons acquitted in the above cases was 63·1 and 36·2 in 1894 against 56·6 and 43·4 in 1893. Five thousand eight hundred and six witnesses were examined as against 5,285 in 1893, and only 143 of the former were detained more than two days. The ratio of detention fell from 7·8 in 1893 to only 2·4 in the year under report. The percentage of decisions confirmed on appeal fell, however, from 69·7 in 1893 to 65·0 in 1894.

Each Bench disposed of an average of 129·7 cases as against 110·9 in the previous year, and the average number of witnesses examined in each case fell from 2·0 to 1·6. It will be seen therefore that the judicial work of the Benches of Honorary Magistrates is still of the easiest and most primitive description. I consider that the older and more experienced of them having served their apprenticeship might in future be entrusted with the trial of cases of a more difficult and important nature. The relief afforded to the administration by the work of the Honorary Magistrates is considerable, but it might, I think, be increased with advantage to all concerned. Their services are certainly worthy of acknowledgment and praise.

60. There are altogether 23 Benches in this Division composed of Honorary Magistrates. Eleven each of these Benches have 2nd and 3rd class powers, and the Bhagalpur Sadar Bench has 1st class powers. The Shaikpura

Bench sits four days a week, the Jamui Bench three days: six Benches sit twice a week; ten sit once and the other five sit every fortnight. A new Bench was established at Deoghur shortly after the close of the year, and the Kishanganj Bench was made independent, to which class all the Benches in the Division now belong, except the former, which is still in leading strings. The names of the Honorary Magistrates who *specially* distinguished themselves by regular attendance are given below:—

Monghyr.

Name	Place
Mr. John Hartley	Jamalpur.
Revd. Lewis Thomas Terry	Ditto.

Bhagalpur.

Name	Place
Munshi Sujaet Ali Khan	Sadar.
Babu T. Prasanno Kumar Bury	Banki.
„ Saligram Singh	Do.
„ Kartic Prasad Chaudhuri	Madhipura.
„ Rash Behari Mandal	Ditto.
„ Shama Pado Ghose	Ditto.
„ Baidya Nath Bose	Colgong.
Maulvi Syed Shah Mahomed Anwar Ali	Ditto.
Munshi Golam Maula	Supaul.
Babu Sanki Lal Jha	Sultanganj.
Munshi Mukdoom Buksh	Ditto.
Maulvi Mahomed Faniq	Bihpur.
Babu Bhagwan Chandra Chaube	Do.
„ Pryag Chaudhuri	Do.
Mr. Herschel Dear Christian	Bongong.
Babu Jagat Narain Singh	Partapganj.
„ Sripati Mookherji	Ditto.
Munshi Haji Najibulla	Ditto.

Purnea.

Name	Place
Babu Kamakhya Nath Ghose	Sadar.
„ Gobind Chandra Banerji	Do.
Maulvi Mahomed Hadi	Do.
Mr. Vivian Ernest Weatherall	Do.
„ Charles William Thomas	Do.
„ Roderick Jefferson Cave	Do.
„ Charles James Shillingford	Do.
Maulvi Mir Jahor Ali	Do.
Babu Girwardhari Lal	Do.
Mr. Algermond Caswell Rolt	Kishanganj.

Malda.

Name	Place
Babu Thakur Das Das	Sadar.
„ Bhagawati Charan Sen	Do.
Maulvi Abdul Aziz Khan	Do.
Babu Gopi Charan Sen	Do.
„ Radhica Lal Satyar	Old Malda.
„ Haris Chandra Das	Ditto.
„ Promotho Nath Banerji	Nawabganj.
„ Gopi Mohun Shah	Ditto.

61. The following Honorary Magistrates had powers to sit singly for the disposal of cases during the year:—

Rai Medni Prosad Singh Bahadur.
Babu Bhubneshar Prashad.
Raja Ram Narain Singh Bahadur.
Babu Baidya Nath Bose.
Dr. David Picachy.
Babu Gobind Chandra Banerji.
Mr. Frederick Alexander Shillingford.
Mr. Charles William Thomas.
Babu Girwardhari Lal.
Mr. William George Morey.
„ William Muller Smith.
„ William Charles Muller.
Maulvi Syed Abdul Rahman Muzuffer.
Mr. Sidney James Bazalgette.

62. The Magistrate of Bhagalpur writes:—"Taking the district as a whole, the Bench Magistrates have done very useful work. Their attendance

has been more regular, the quality of their work has been better, and they have shown a sense of responsibility which does them great credit. My predecessor, with the sanction of the Commissioner, was able to acknowledge in writing the services of several among them who had shown particular zeal. In this connection the Maharaja of Sonbursa and Sub-Registrar, Colgong, as Honorary Magistrates deserve special mention: the former attended every sitting of the Sonbursa Bench and the latter as President of the Colgong Bench and in his capacity as a Magistrate empowered to sit singly disposed of a large number of cases. During the year under report the Sultanganj Bench, was converted into an Independent Bench and the Honorary Magistrates of Colgong were empowered to take cognizance of complaints and police cases under section 191, Criminal Procedure Code.

"In contrast with this progress, I regret to state that in point of despatch and efficiency the administration of justice has not improved. The percentage of witnesses detained over two days was 3·9 against 1·4. Of A cases remanded more than six times, 3·8 as against 1·2, and of convictions in sessions cases 62·9 as against 80·7 in 1893. I am unable to supply any explanation for this apparent decline."

The Magistrate of Purnea remarks:—"The Sadar Bench, 5 of whose 16 members are empowered to sit singly, tried only 70 persons against 136 in 1893. Many of the members were absent from the district on private affairs for a great part of the year. The former system by which cases were made over to particular Magistrates, who made their own arrangements for attending, was not calculated to produce convenience to parties who had often to wait many days till the pleasure of the Honorary Magistrates was known. A Bench has now been arranged for each day in the week, as it is hoped that this plan will work better. But there is no great administrative need for Benches in this district, as there are not more cases than the Stipendiary Magistrates can try."

Sessions trials.

63. The total number of sessions cases in 1894 was 166 as compared with 131 in the previous year, and the percentage in which conviction was obtained rose from 79·6 to 81·7. This is a very creditable result. In one case of riot in the Jamui subdivision of the Monghyr district eight persons were killed. The accused were acquitted by the Sessions Judge, and against this acquittal an appeal was preferred by Government to the High Court under section 417, Criminal Procedure Code. The appeal was not, however, successful. In the Sonthal Parganas an important change was made during the year under report in the conduct of sessions prosecutions. These were formerly prosecuted by one of the stipendiary Magistrates at Dumka, but the prosecution is now conducted under the sanction of the Legal Remembrancer by a pleader.

Criminal fines.

64. The year 1894 opened with an outstanding balance of Rs. 45,054. A sum of Rs. 85,173 was imposed during the year, making a total demand of Rs. 1,30,227. Rupees 76,227 was collected, Rs. 14,330 remitted on appeal or written off (total Rs. 90,557), leaving an outstanding balance on the 31st December 1894 of Rs. 39,670. It is satisfactory to observe that the outstanding balances were reduced during the year instead of being increased as they were in 1893, and this in spite of a larger total demand. About Rs. 8,000 more (in round figures) was remitted and written off in 1894 than in the preceding year, and this accounts chiefly for the above result.

Increased attention has been paid during the year under report to the subject of the realisation and remission of criminal fines. The power of writing off such fines as are irrecoverable has been delegated by Government to District Magistrates, and they have been asked to use it freely though with due care and caution and after local enquiry. Many of the fines imposed by the courts, especially in excise cases, are far beyond the means of the accused person, and are generally given with the object of securing a full term of imprisonment in default. If such imprisonment is suffered in the case of a low caste person or landless labourer, fined, say, Rs. 50, it is worse than useless to keep the fine outstanding and to make periodical enquiries regarding its realisation. Such a fine hanging over his head only makes such a person hopeless and drives him again to crime in sheer despair.

65. Of 3,548 A forms sent up in 1894 only 1,051 were disposed of on the first day, the figures for 1893 being 3,111 and 1,020, respectively. The ratio of cases remanded six times and more rose from 3·0 in 1893 to 4·2 in 1894. This is accounted for by the increase in the number of cases and of witnesses examined in them and by the fact that the district staff fell considerably below actual requirements during last year owing to the demand for officers for the Bihar survey. Work was carried on at one time or another at high pressure throughout the Division, and but for the Benches of Honorary Magistrates it would have been still more difficult to cope with it. As remarked in paragraph 59, the help given by them might with advantage be considerably increased.

Remands.

XVI.—REGISTRATION OF DOCUMENTS.

66. The number of Registration Officers (29) and of Special (6) and Rural (23) Sub-Registrars in the Division remained the same as in the previous year.

The total number of documents registered in the whole Division during the year was 71,648 against 70,477 in the preceding year, showing an increase of 1,171. This increase occurred in all the districts, except Purnea, and was most striking in Bhagalpur and Monghyr. The Collector of Bhagalpur writes:—"The increase is chiefly observable in the registration of term leases, mortgages, and sales of immoveable property of the value of Rs. 100 and upwards. The cause of increase in the term leases is attributed to the abnormal increase in Banka subdivision owing to the renewal of leases and counterparts in the Lachmipur, Sabalpur, and Panjwara estates. The rise in the registration of sales is due to the effect of the Bengal Tenancy Act."

The Magistrate of Monghyr writes:—"The cause of increase is the reduction of the minimum fee from 12 annas to 8 annas. The partial failure of bhadoi crops also caused the poorer tenants and other people to sell and mortgage their lands to meet daily expenses and to pay off the arrears of rents on their lands."

Regarding the decrease in Purnea the Collector states:—"The decrease of 1,143 in the number of registrations is attributed to two causes,—*first*, a good harvest; *second*, that in the previous year a large number of term leases were registered in consequence of several settlements between landlords and tenants."

The increase in Malda and the Sonthal Parganas was small, and does not call for any particular remark. Regarding fluctuations in the different kinds of documents, however, the Deputy Commissioner writes:—"There has been a remarkable decrease both in perpetual and terminable leases. Transfers of lands by sale or lease are not recognised and usufructuary mortgages are not allowed to have full effect. In such cases the courts do not allow the mortgagees to remain in possession when it is proved that they have realised what the usury clause of Regulation III of 1872 allows. The fall in the registration of these deeds has been made up by a number of deeds of sale of *sabai* grass by the paharias in Rajmahal subdivision."

This department continued to work well and to give satisfaction to the people. Many of the Sub-Registrars are Honorary Magistrates, and as such and as Municipal Commissioners and in other ways give considerable assistance to the general administration without any detriment to their own special duties. They also give valuable advice to parties as to the proper stamp required for documents brought or about to be registered. In the smaller offices they have considerable leisure which might, I think, be often usefully employed by District Officers in various miscellaneous executive duties and enquiries. They are as a rule trusted and liked by the people.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

[NOTE.—Where the figures under this head XVII differ from those in the Annual Land Revenue Report submitted to the Board of Revenue, the difference is due to the inclusion of the figures for the Sonthal Parganas, which are not included in the latter.]

67. The number of estates borne on the five revenue rolls of the Division was increased during the year by 155 (net), *i.e.*, from 14,639 to 14,794. Ten estates in Monghyr were redeemed by payment of the capitalised value of the Government

Number of estates.

revenue; five in Bhagalpur were purchased by Government at revenue sales in the absence of other bids, and two (one in each of the above districts) were removed from the revenue rolls as untraceable.

Demand.

68. The current demand from the above estates decreased from Rs. 33,77,505 in 1893-94 to Rs. 33,75,022 in the year under report. The net decrease of Rs. 2,483 occurs chiefly in estates in class II, and is mainly due to diluvion of land and dispossession from a fishery. The demand from estates in class I is almost exactly the same as in the previous year. There was a slight compensating increase in estates in class III due to resettlements and to settlements of alluvial accretions.

Collections.

69. The current collections were Rs. 33,04,963 during the year as against Rs. 32,83,230 in 1893-94, giving a net increase of Rs. 21,733 and an increased percentage of 97·9 compared with 97·2. The arrear collections amounted to Rs. 87,895 out of an arrear demand of Rs. 98,696—a percentage of 89·05 against 93·7 in the previous year; 97·6 per cent. of the current and arrear demands together was collected, the remissions amounting to about ·2, leaving a balance of only 2·2 per cent. distributed over estates as follows:—

		Rs.
Class I	... ...	24,307
„ II	... ...	5,716
„ III	... ...	47,340
Total	...	77,363

Sales for arrears of Land Revenue.

70. Out of 14,500 revenue-paying estates in the Division, 1,767 fell into arrear for a sum of Rs. 72,416: 212 were put up to sale, but only 103 were actually sold, the rest being exempted by the Collectors under section 18, Act XI of 1859, on payment of all the Government arrears of whatever nature due from them. It cannot, I think, be said that these figures show any severity or harshness in the administration of the revenue sale laws. I should rather be inclined to say that they indicate such a leniency in the application of section 18 as to make landlords somewhat lax and careless in the matter of punctual payments, and to favour the idea that sale day may be looked upon as a second or subsidiary kist day. It is, I think, much to be regretted that the discretion given by section 18, Act XI of 1859, was not taken away as proposed in the Bill prepared by Mr. Beames, which was withdrawn at the last session of the Bengal Council. Standing as it does, it produces irregularities and variations of procedure every time a new Collector comes to a district, to the great bewilderment of the people.

Settlements.

71. Eighty-two estates were under settlement during the year, of which 56 were pending from 1893-94, and 26 were new institutions: 21 were disposed of, leaving a balance of 61 for disposal. With the exception of taufir Barhia in Monghyr and the settlements under Mr. Craven in the Sonthal Parganas, all of these were of a petty nature. In Monghyr work was hampered by the want of a qualified Deputy Collector, and in the Supaul subdivision of North Bhagalpur by the want of a Sub-Deputy Collector. In the Sonthal Parganas Mr. Craven was able, before his transfer to Singhbhum, to complete the bulk of the settlement work he had in hand, and it will be finished by the Deputy Commissioner with the help of a Sub-Deputy Collector (Maulvi Ekram Hossein), who was one of Mr. Craven's Assistant Settlement Officers. With the exception of parganas Teor, Ambar, and Sultanabad, the records of which remain open for a year under section 25, Regulation III of 1872, all the other settlement work which Mr. Craven had in hand has been closed.

In connection with the recent settlements in the Pakour subdivision the Deputy Commissioner, Sonthal Parganas, quotes the following from the report of Mr. McL. Smith:—"There has been great excitement and dissatisfaction among the Sonthals with the result of the settlement. They say they have been ruined by the settlement taking away their rights."

Mr. Bernard adds:—"Lately on Mr. Smith's representation and on petitions filed by village headmen, I had under consideration the grievances complained of. Many of them seemed to be groundless. The action of the Settlement Department was based on previous custom and on principles carefully considered and sanctioned by my predecessor, Mr. Carstairs. There were some omissions and mistakes, to rectify which steps are being taken. On the whole, I suspect the excitement is overestimated by Mr. Smith, who is apt to see things from the raiyat's point of view alone. No doubt the people object to pay more rent, but they have been found to possess more land than they pay for, and they cannot reasonably expect such a state of things to last for ever."

72. The total number of certificates for disposal during the year (including those pending at the close of 1893-94) was 12,974, and they covered a demand of Rs. 2,94,373. Of this sum Rs. 1,29,371 was realised by means of 8,545 certificates, and 1,116 were cancelled, leaving at the close of the year under report 3,313 certificates pending for the realisation of Rs. 1,44,581. Out of the Rs. 1,29,371 realised during the year, Rs. 65,085 was realised on issue of notice under section 10, Rs. 53,773 on the issue of sale notification, and only Rs. 10,513 by actual sale or arrest. The certificate work shows a considerable increase over that of the previous year in all departments, except Road Cess. In spite of this, actual sales were fewer, and only two persons were sent to jail. From what I have seen of the working of the Certificate Procedure during my inspections and in the exercise of my appellate and revisional powers under the Act, I consider that it has not generally pressed hardly on debtors. The great blot on it appeared to me to be the perfunctory and careless, if nothing worse, manner in which notices and sale proclamations are served by the Collectorate peons. Little or no trouble is, I fear, taken to see that personal service is the rule and not the exception. The usual return of the peon is "stuck up on the house in presence of the village chaukidar." The most common ground of appeal to my Court was that the debtor had had no intimation whatever either of the filing of the certificate or of the proclamation of sale, owing to the carelessness or collusion of the peons concerned. I issued instructions to the Collectors to insist on personal service as far as possible, and when it was not possible, for a full explanation of the reason why it was not.

Certificate Act.

In several certificate cases which came before me in appeal from the district of Monghyr from time to time, I was struck by the frequent occurrence of the name of Balaki Lal as respondent. On enquiry I found, as reported last year, that he was the head of a sort of syndicate at Monghyr which made a profit by buying landed property at certificate sales and restoring it to the judgment-debtors for a premium or reselling it at a profit. Section 19 of the new Act I (B.C.) of 1895 will, I hope, effectually put a stop to such transactions, while section 31 will, I think, effect a great improvement in the service of notices under section 10. The revision by sections 15 to 17 of the above Act of the sections relating to appeal to the Civil Court gives still further protection to judgment-debtors and softens to a considerable degree the summary nature of the procedure. A special word of praise is due to Mr. Jarbo, the Certificate Officer of Monghyr, for the excellent and methodical way in which he performed his certificate work during the year under report.

73. There were 37 new cases during the year, and these, with 140 remaining over from last year, gave a total of 177 cases for disposal. Of these, no less than 142 cases were in the Purnea district and related to the acquisition of lands for the Assam-Bihar State Railway. In the other districts the cases were chiefly for land for railway sidings and other purposes and for pounds and inspection bungalows for the District Boards. Most of them were of a petty nature. Twenty-seven cases were disposed of and 150 left pending.

Land acquisition.

74. Of the 190 cases on the file for disposal during the year, 115 were pending from last year, and 75 were new institutions. Fifty-eight cases were disposed of during, and 132 left pending at the close of, 1894-95. Eighty-three of these cases belong to the district of Monghyr, where there is a Special Deputy Collector, 35 to Bhagalpur, 13 to Purnea, and one to Malda. Except in Monghyr and Malda, disposals did not keep pace with institutions. The procedure of

Partitions.

the Partition Act is very tedious and cumbrous; and where, as in this Division, one or more sharers object at every stage before the Deputy Collector, Collector, and Commissioner, with a total disregard of the principle of give and take, speedy disposal of work becomes impossible in spite of the exertions of the officers concerned. However fair and equitable the general arrangement may be, it seems to be a point of honour to object to it, and mean-spirited to do otherwise. I cannot but think that some plan of village arbitration would greatly accelerate the disposal of partition work and lead to greater satisfaction to the various sharers.

Land registration mutations.

75. The total number of cases for disposal was 3,874, of which 1,013 belonged to previous years and 2,861 were new institutions. No fewer than 2,167 of the above total belonged to the district of Monghyr. The disposals numbered 2,921 (Monghyr 1,568), and the year closed with a balance of 953 cases. Only 25 cases were pending over six months. These results are creditable to District Officers.

Landlords' fees, &c.

76. The number of transfers on which fees were paid under sections 12-13 of the Bengal Tenancy Act was 1,119. Of Rs. 1,327 paid as fees, about half was accepted and half rejected. The relations between landlords and tenants during the year are reported to have been generally satisfactory. The passing of the Bengal Tenancy Act has, however, effected a change in the nature of those relations which becomes more and more perceptible every year. The old feudal or personal feeling of mutual trust and dependence is gradually giving way to a feeling of independence and estrangement, and disputes are settled in the Civil Court instead of in the zamindar's cutcherry or at the Collector's or Subdivisional Officer's camp.

Road and Public Works cesses.

77. The total demand of current and arrear Road and Public Works cesses at the commencement of the year was Rs. 9,29,413. The collections (including advance payments) amounted to Rs. 8,45,410, and the net balance, after deducting remissions, was Rs. 1,04,168, or a percentage of 11·2 on the gross demand. Revaluations by Special Deputy Collectors of the districts of Monghyr and Bhagalpur were in progress during the year. So far as they have gone, they show good financial results.

Use of the money-order system for the payment of Government demands and of rent by raiyats.

78. Curiously enough, the number of money-orders issued and the amount covered by them on account of Government land revenue and cesses in the years 1892-93 to 1894-95 are almost the same, viz.—

Year.	Number of money-orders.	Amount.
1	2	3
		Rs.
1892-93 ...	9,008	1,11,963
1893-94 ...	9,074	1,10,204
1894-95 ...	9,363	1,11,373

The above figures, which do not include those of the Sonthal Parganas, where the system of payment of rent by money-orders is not in force, certainly do not indicate a very hopeful progress, and it is difficult to account for the apathy of the people in not availing themselves more fully year by year of the advantages of the money-order system. It is probably due to the backwardness of education and to the inherent conservatism of the people.

The figures for money-orders remitting rents to landlords are not complete, but so far as they are available they agree with those given above in showing no more than a nominal progress. The system seems to have flourished more in Purnea than in any other district of the Division. The number of orders issued in that district and the amounts covered by them are larger than in all

the other districts put together, and the proportion of refusals also is much less. This is, I think, accounted for by the greater independence of the Purnea raiyats, and by the peculiar terms on which some of them hold their lands. It may also be due, in some measure, to the peculiar unhealthiness of the climate and to the long distances of many of the villages from the nearest zamindari cutcherry.

Advances under the Land Improvement and Agriculturists' Loans Acts (XIX of 1883 and XII of 1884.)

79. Only Rs. 300 was advanced under Act XIX during the year, and this was given in the district of Bhagalpur. Including the above sum, the amount outstanding in the Division was Rs. 5,849, including Rs. 469 interest: Rs. 2,035 was collected, and there remained a balance of Rs. 3,814, the greater part of which did not fall due within the year under report.

Under Act XII of 1884 Rs. 16,387 was advanced in the district of Monghyr to those raiyats who suffered a total loss of their bhadoi crops by the excessive floods of last August. There were large outstandings in Bhagalpur (Rs. 16,383) and Purnea (Rs. 7,074), and the total divisional demand, including interest, came to Rs. 45,945. Of this, Rs. 22,330 was collected, leaving a balance of Rs. 23,615. The Bhagalpur balance was reduced from Rs. 16,383 to Rs. 4,224, and that in Purnea from Rs. 7,074 to Rs. 2,689. The outstandings in the former district are due from raiyats in the Supaul subdivision, which suffered somewhat severely from scarcity in 1892.

80. The following information is furnished regarding the amounts expended in Government estates on account of miscellaneous and sanitary improvements, including agriculture, in accordance with the instructions contained in Government letter No. 3505, dated 19th October 1894:—

Monghyr.—A sum of Rs. 270 was spent in repairing the tahsil offices. No other work of improvement was done. The Government estates in this district are chiefly deara lands, which are flooded every year, and it is not worth while to spend money on works which cannot be protected. A sum of Rs. 64 was spent on conservancy arrangements for keeping clean the bazar at Lakhiserai. No attempt at clearance of jungle was necessary, as all the Government lands in this district are free from it.

Bhagalpur.—Out of Rs. 1,000 sanctioned for miscellaneous improvements, Rs. 212 was spent in repairing the existing village *cutcherries* in the Sadar and Supaul subdivisions, and the balance in building a new *cutcherry* at Tintunga, which, however, has not yet been completed. Articles of furniture have also been supplied to the village cutcherries. The patwaries have been supplied with guard-books in which to paste the parwanas which they receive, and with order-books to enable the inspecting officers to record their instructions on the spot. An agricultural show was held in the Government estate Tintunga, opposite Colgong railway station, on the left bank of the Ganges in February last. The Officiating Collector writes that at this show though good bullocks, sheep, goats, horses, and buffaloes were not wanting, not a single good cow was exhibited, the reason being that while the bullocks are, at considerable expense to the cultivators, fed with fodder at home, the cows are turned out to get what scanty grazing they can. The allotment of Rs. 600 for agricultural improvements was spent in repairing existing embankments in Pealapur and Muktapur in the Sadar subdivision and in Rajanpur in the Supaul subdivision. The grant of Rs. 500 for sanitary improvements was utilised in sinking two pucka wells—one in Tintunga and the other in Jagatpur, and in repairing an old well in the latter estate.

Purnea.—Under the head of Miscellaneous Improvements a sum of Rs. 5 only was spent in clearing jungle in Baghmara.

Malda.—The sum of Rs. 250 allotted to this district for miscellaneous improvements and Rs. 700 for sanitary improvements was spent as follows:—

Sanitary improvements.—For reclamation of the Andhua tank in English Bazar Rs. 500; for reclamation of two tanks in the circuit-house compound Rs. 200.

Miscellaneous improvements.—For cleaning jungle in khas mahal English Bazar Rs. 50; for repairing cutcherry bungalows at Shergar and Jhowbana, including balance of charges incurred in the construction of the record-room at Shergar, Rs. 185.

Sonthal Parganas.—The following works of improvement were executed in the Government estates in this district:—

(1) For repairs to Tiliachak *bandh*, Rs. 300; (2) for repairs to the *bandh* at Maharu, Rs. 150; (3) for constructing and improving some of the Damin bungalows, Rs. 270; (4) purchase of furniture for the above bungalow, Rs. 70; (5) for construction of a shed for registration of cattle at Hiranpur, Rs. 200; (6) for repairing Damin roads, Rs. 208-8; (7) for purchasing galvanised corrugated iron culverts for use in Damin, Rs. 471-8; (8) for improving two *bandhs* in Damin, Rs. 100; (9) erecting a *bandh* at Panchgarh, Rs. 100.

The following works were constructed from funds given by the Messrs. Grant:—(10) Sinking a well at Borio, Rs. 276-8; (11) excavating a tank at Patua, Rs. 176-4; (12) erecting a *bandh* at Simuljuri, Rs. 200.

Nothing was done in the way of introducing new staples, and no agricultural improvement was introduced in the Division throughout the year under report, nor were any improved implements or machinery tried.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

81. The estates named in the margin were under the management of the Court of Wards at the commencement of the year under report, and no new estate was taken charge of, nor was any estate released. The financial result of the year's management was the collection of Rs. 4,06,280 out of a demand of Rs. 6,04,990; Rs. 27,985 was remitted, leaving a balance of Rs. 1,70,076. The percentage of collections was only 67·15, which cannot be regarded as satisfactory, considering that managers have the certificate procedure at their backs. After paying Rs. 1,84,697 to Government and superior landlords the estates had a net balance of Rs. 2,21,583 to their credit; Rs. 11,907 was spent in paying off debt, Rs. 49,452 on the cost of management, Rs. 88,011 on the maintenance and other expenses of the proprietors, Rs. 13,347 on improvements, and Rs. 58,832 on miscellaneous items, leaving a surplus of Rs. 1,41,981. The only one of the above estates which is still heavily involved in debt is the Lugma estate in Bhagalpur. A new loan of Rs. 25,000 at 6 per cent. was taken in 1893-94 to pay off an old debt carrying a high rate of interest.

1. Sukraj Rai. | 4. Rohini.
2. Lugma. | 5. Punasi.
3. Khagra. | 6. Narainpur.
7. Sankara.

During the year under report a sum of Rs. 7,000 besides interest was paid towards the liquidation of the above loan.

82. The following works of improvement were carried out in wards' estates during the year under report:—

The Lugma estate spent Rs. 250 on repairing roads.

The Sukraj Rai's estate spent Rs. 386 on sinking a well for the benefit of the raiyats. Steps have been taken to increase the future expenditure under this head.

In the Khagra estate 60 bighas of jungle in and around ward's residence were cleared at a cost of Rs. 1,490 for the double purposes of sanitation and agriculture.

In the Sonthal Parganas the Rohini estate spent Rs. 2,249 on the construction of roads and culverts and in repairing *bandhs*.

The Sankara estate in the same district expended Rs. 4,284 on the construction of bridges and on the excavation of a tank in a village where there was a deficient supply of drinking water.

83. The condition of the tenantry in the various wards' estates was on the whole good, though some slight and partial failure of crops occurred in the Lugma and Sukraj Rai's estates.

There were no attached estates during the year in any of the districts of Bhagalpur, Purnea, Monghyr, or Malda. The Nagore estate, which was attached under Regulation XIX of 1814, remained in charge of the Deputy Commissioner, Sonthal Parganas, as before.

XIX.—EXCISE.

84. The total excise revenue of the Division amounted to Rs. 14,02,744 as against Rs. 13,36,456 and Rs. 12,17,837 in the two previous years. The chief items which make up this total are country spirit Rs. 6,17,877, tari Rs. 1,16,678, ganja and bhang Rs. 4,50,568, opium Rs. 1,53,114, pachwai (in the Sonthal Parganas) Rs. 39,540—total Rs. 13,77,777.

The large increase of Rs. 66,288, or about 5 per cent., is due mainly to the settlement of shops at higher prices. The increase was spread over all the districts of the Division. Mr. Wheeler, the Officiating Collector of Monghyr, adds that the increase in opium revenue was "due to the falling off in illicit consumption." The Officiating Collector of Purnea, Mr. Temple, attributes the increase in his district from Rs. 2,86,162 to Rs. 3,21,742 "to the improved condition of the people." The Collector of Malda, Mr. Price, writes that the increase of tari revenue in his district "was due to the increase of the Sonthal population in the district," and owing to the increasing Sonthal immigration he expects a further development of revenue under this head. There was, however, a falling off in the revenue from ganja and opium in this district (Malda) consequent upon the failure of the bhadoi and kalai crops in the deara tracts.

In Monghyr there was a large decrease in the revenue from ganja, which the Collector says was partly due to the falling off in the exports to the North-Western Provinces, and partly to a diminished consumption in the tracts affected by the high floods of August last.

The incidence of the divisional excise revenue was annas 2-7 per head of population against annas 2-3, the figure for the whole province in 1893-94. The highest incidence (annas 3-5) was in Malda and the lowest (annas 1-7) in the Sonthal Parganas.

The details are shown below:—

	Revenue from all sources.	Incidence per head of population.
	Rs.	As. P.
Monghyr	3,66,908	2 10
Bhagalpur	3,54,417	2 9
Purnea	3,23,702	2 7
Malda	1,76,399	3 5
Sonthal Parganas	1,81,318	1 7
	14,02,744	2 7

The total number of shops in the Division was raised from 3,044 to 3,197, the increase being in the number of tari and pachwai shops.

The Officiating Collector of Bhagalpur, Mr. B. K. Mullick, writes:—"The withdrawal of the restrictions on vat capacities was much appreciated by the abkars. It is desirable that the restrictions on *still* capacity be also withdrawn." No doubt the withdrawal of all restrictions would be hailed with joy by the *abkars*, but I am certainly opposed to the withdrawal of the restrictions as to the capacity of each still, which were imposed on the recommendation of Sir John Edgar's Commission after a very thorough enquiry and mature consideration.

From the annual reports of the District Officers it appears that some experiments are being made in towns with a view of introducing the *tree-taxing system* of tari revenue. No uniform rate per tree was, however, enforced last year, as the Collector of Bhagalpur says, for fear of losing revenue. I agree with the Collector that a large detective and preventive establishment will be required if it is meant to stop the tapping of trees which are not marked or included in the schedules attached to tari licenses.

With reference to paragraph 106 of my last year's report, reproduced in the margin, Mr. Bernard, the Officiating Deputy Commissioner of the Sonthal Parganas, writes:—"A recommendation was made to close ten pachwai shops in the district, but the Board of Revenue have not yet agreed to this. Pachwai shops are believed to do considerable harm to the Sonthals." I have asked the Deputy Commissioner to submit proposals to me for abolishing such shops as are doing harm, so that I may address the Commissioner of Excise on the subject.

Mr. Carstairs writes:—"We have found that the pachwai shops have too often been centres of disorder, as many as 80 to 100 getting together and drinking to excess. Dacoities and crimes were also arranged at such places, and they brought distress on many families by getting the men into the habit of tippling every day instead of, as was formerly the case, contenting themselves with an occasional spree on home-brewed."

A proposal for remedying this state of things was made by the Deputy Commissioner towards the close of the year, but it was disallowed as being too late. The Deputy Commissioner hopes to be able to bring it forward in proper time this year.

The Collector of Bhagalpur states that there was a large falling off in the number of petty cases of smuggling of Nipal liquor and ganja on the frontier. In the Rajmahal subdivision 54 persons were improperly prosecuted for tapping tari for home consumption. The cases were eventually

withdrawn on its being pointed out to the Subdivisional Officer that such acts did not constitute any offence.

XX.—STAMPS.

85. The following table shows the revenue derived during the year 1894-95 from the sale of stamps used under the Indian Stamp Act I of 1879 and of stamps used under the Court-fees Act VII of 1870 in each district of the Division:—

DISTRICT.	Total revenue.		Increase.	Decrease.
	1893-94.	1894-95.		
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Monghyr	2,88,411	2,94,642	6,231	...
Bhagalpur	2,90,730	3,19,270	28,540	...
Purnea	2,82,410	2,85,392	2,982	...
Malda	1,17,892	1,22,561	4,669	...
Sonthal Parganas ...	1,23,824	1,36,960	13,136	...
Total ...	11,03,267	11,58,825	55,558	...

It will be seen that there was a general divisional increase of about 5 per cent. The increase in revenue derived from the sale of non-judicial stamps is attributed mainly to the renewal of bonds for heavy sums owed by the Baneli estate, and to such stamps having been largely used for sale certificates in civil courts. The increase in the sale of adhesive and impressed court-fee stamps is due in Monghyr to the large sale of four-anna stamps for cess revaluation processes; in Bhagalpur to the institution of suits of considerable value by the Baneli zamindar against one of his relatives; in Purnea to the sale of eight stamps for Rs. 1,000 each for a probate; in Malda to the institution of a large number of rent suits by the zamindar of Chanchal against his tenants; and in the Sonthal Parganas to a large increase in the number of civil suits instituted during the year.

The number of cases in which duty and penalty were realised by civil courts under section 34 of Act I of 1879 was 81 against 78 in the year 1893-94, the amounts realised being Rs. 731 and Rs. 784, respectively. The number of cases in which duty and penalty were realised by Collectors was 324 against 380. The Collector of Monghyr, where the decrease was largest, attributes it to the fact that parties are now better acquainted with the law and generally consult Sub-Registrars before the execution of their documents. The amount of duty and penalty realised by Collectors was Rs. 1,964 against Rs. 2,335.

Criminal prosecutions were instituted for infringement of the provisions of the Indian Stamp Act I of 1879 in 133 cases, 160 persons being brought to trial, of whom 135 were convicted and 24 acquitted. The amount of fines imposed was Rs. 956, out of which only Rs. 45 were paid as rewards. The attention of all Collectors has been specially drawn to Rule 1, Part II, page 117 of the Stamp Manual, and to the policy of giving rewards liberally in such cases.

XXI.—INCOME-TAX.

86. The results of the year's administration are summarised below and compared with those of the previous year:—

Year.	Number of persons assessed.	Total demand, including arrears, costs, penalty, &c.	Total collections, including arrears, costs, penalty, &c.	Remissions.	Balance.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1894-95	11,219	2,61,630	2,56,968	1,356	3,871
1893-94	11,031	2,56,973	2,52,402	2,381	3,340
	+188	+4,657	+4,566	—1,025	+531

The greater part of the balance, viz. Rs. 2,249, is outstanding in the Purnea district, and as much as Rs. 1,289 of it is said to be of doubtful recovery.

This is the only blot on the administration of the tax in this Division; otherwise efficiency and improvement are evinced: by an *increase* (i) in receipts; (ii) in the number of villages visited by assessing officers; (iii) in the ratio of population assessed to villages visited; and (iv) in the percentage of collection: and by a *decrease* (i) of the percentage of exemption after assessment; (ii) of reductions on revision; (iii) of remissions; and (iv) of objections filed, the percentage of which is only 9·5 against 11·1 last year, and 14·8, the average of the previous eight years. The Officiating Collector of Bhagalpur (Mr. B. K. Mullick) makes the following remarks regarding the unpopularity of the tax:—

"The tax continues to be as unpopular as ever, and the sympathy of the people is always with the assessees. This, more than anything else, leads to unjust assessment. The information, generally available, is either vague or malicious. In almost all objection cases the objector takes a wrong line of defence, either entirely denying any income or putting forward figures which are apparently absurd; and it is often impossible to act justly, however anxious one is to do so."

None of the other Collectors have said anything on this subject. The fact appears to be that, with all its faults and defects, the income-tax has come to be generally accepted as a financial necessity from which there is no escape. Government officers, assessees and the press are all tired of their ineffectual protests against its suitability to this country, and have resigned themselves to the inevitable. That there has been so little friction and open discontent in the working of the Act is highly creditable to the administration of the district officers.

XXII.—MONETARY ARRANGEMENTS.

87. There was a general decrease in both receipts and issues of currency notes in all the districts of this Division during the year 1894-95 as compared with the preceding year. The Collector of Monghyr thinks that the decrease in receipts was due to the mahajans having made their remittances to Calcutta and other places in currency notes, and therefore being able to spare fewer notes for payment of Government dues. The decrease in issues was due to the smaller number of notes available for the purpose.

The Collector of Bhagalpur has not given any reasons for the decrease in his district. In Purnea the decrease in receipts both in payment of Government dues and in exchange for silver was due to the very small amount of currency notes received at the land revenue kist of March. The accumulation of silver was very great in consequence of the dullness of the import and export trade in rabi crops, jute, oilseeds and other commodities.

The short stock of notes and the stoppage of their supply by the Accountant-General, Bengal, at times when there were demands for them, account for the decrease in issues. The Collector of Malda reports that, owing to the discontinuance of transactions in hundis by private firms, the demand for and

use of currency notes increased in his district, that they were largely used by private parties and never brought into the Government treasury. The decrease in the Sonthal Parganas was not large. Currency notes were in much demand at Dumka and Deoghur, where the Marwaris and other traders ask for them in exchange for silver to enable them to make their remittances to Calcutta. At Rajmahal the receipts were generally larger than the issues, because the traders of Rajmahal and Sahibganj got their remittances from Calcutta in currency notes, which they exchanged for silver for the purpose of purchasing grain, seed, &c., and of making payments to workmen.

Supply bills of the value of Rs. 50,000 were cashed in Malda during the year against Rs. 1,86,700 in the preceding year. The decrease was due to the dulness of the silk trade in that district.

The transactions in copper coin did not present any unusual feature during the year under report.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

Railways.

88. No new lines of railway were constructed during the year, except sidings from the Sultanganj and Maharajpur stations on the East Indian Railway to the riverside. Surveys were made for a branch line from Garhara on the Tirhut State Railway to a point opposite to Khagaria on the Gandak, a mart of considerable importance, between which and Monghyr the East Indian Railway has a steam ferry. An extension of this line from Khagaria through the Madhipura and Supaul subdivisions of the Bhagalpur district to Bhaptiahi or Raghupur on the Tirhut State Railway is said to be contemplated. Both lines would be of immense service in opening up the trans-Gangetic tracts of this Division. The proposed line from Bhagalpur to Bausi, with prospective extensions to Deoghur on one side and to the Ahmadpur or Cynthia station of the East Indian Railway, loop line, on the other (for which the District Board of Bhagalpur gave a concession to Sir William Hudson), has been surveyed, but nothing is known as to the prospects of its construction. It would open up the Sonthal Parganas, and be a great boon to the tract of country which lies between the loop and chord lines of the East Indian Railway, to which also it would be a valuable feeder.

89. Three cases of obstruction on the East Indian Railway occurred in the Monghyr district, but no clue was discovered as to the perpetrators. In one case punitive police were employed under the sanction of Government to watch the line at a cost of Rs. 366.

90. There were 25 railway accidents in this district during the year (against 19 in 1893-94), the number of persons killed being 12 and wounded 13.

91. The Collector of Bhagalpur writes:—

"It appears that on the Tirhut State Railway only one compartment is reserved for third class female passengers. Considering the large traffic on that part of the line which passes through North Bhagalpur, I think the accommodation utterly inadequate. The Railway authorities have intimated that better accommodation will shortly be provided."

I saw many bad cases of the overcrowding of third class carriages when I travelled over this line last cold weather. Only one railway accident is reported from this district, in which a boy of 12 years of age got crushed by a waggon during shunting operations at Colgong station.

92. The Collector of Purnea reports as follows:—

"The up train which reaches Purnea at 10-50 A.M. used to arrive several hours late for some time in December last, as the East Indian Railway Company, owing to the silting up of the river-bed, discontinued the Sikrigati ghat and adopted the route *viâ* Tinpahar and Rajmahal. Great inconvenience was felt by the public on account of this change in the route, and after some time it was given up. The East Indian Railway Company now run their train *viâ* Maharajpur, where goods and passengers for the Assam-Bihar Railway lines are carried by a steamer to the Manihari ghat station.

"A local train has been running between Parbatipur and Purnea since January last. It arrives at Purnea at 12-55, and leaves again for Parbatipur at 1-35 P.M. in the day. This local train runs in connection with the down

Darjeeling mail and the Assam express, and is intended to facilitate journey to Calcutta *viâ* the East Bengal line.

"Formerly only one train used to run each way daily between Purnea and Forbesganj, but there was only one train per day between Forbesganj and Anchera. In the year under report two trains were running throughout the length of the line. The want of a waiting-room at the Anchra railway station was brought to the notice of the Manager, who said that the number of first and second class passengers was too small to justify the construction of a waiting-room. At the Anchra ghat station, whence passengers are crossed over the Kosi, there is no shed for the third class passengers. This is a want which should be removed without delay by erecting even a *cutcha* shed."

One accident is reported from this district in which three persons were killed, and there were five cases of obstruction.

93. In the Sonthal Parganas there were 12 accidents, half of which were of minor importance. The following account is given by the Deputy Commissioner, Sonthal Parganas, of the serious accidents and of other matters affecting the East Indian Railway Company:—

"An up passenger train started from Madhupur before its guard was in his van. He reported the matter to the assistant station-master, who at once sent off a pilot engine as far as the distant signal to ascertain if the train had stopped. The pilot returned with the message that the train had come to a standstill a mile from the distant signal. The assistant station-master then again deputed the pilot with the guard to convey him to his van on the train. On reaching the distant signal it was noticed that the train was coming back towards Madhupur. The driver of the pilot engine tried to reverse, but failed somehow to do so. It thus ran into the passenger train, damaging the brakevan and two third class carriages next to it. No passenger was seriously wounded. After departmental enquiry the assistant station-master was fined Rs. 50.

"A male intermediate class passenger, in attempting to jump out of the train while in motion near the Madhupur up distant signal, sustained severe injuries in several places. He had a ticket from Howrah to Hooghly, and it appears that he jumped out of the train to avoid detection. He died in Giridih hospital.

"On the 28th February 1895 the guard of No. 8 down passenger train was standing on the line between the buffers of his own brakevan and those of the bank pilot engine, which had just been uncoupled from the rear of the train. The train having overshot the water column by about half a waggon's length set back a little without due warning or signals by the station-master. The guard was crushed to death instantly. The driver was tried by the Subdivisional Officer of Deoghur, and sentenced to pay a fine of Rs. 50 under section 304, Indian Penal Code, read with rule 254 of the Government rules under the Railway Act. He was dealt with leniently, as there was contributory negligence on the part of the deceased guard.

"In the Rajmahal subdivision the child of a female cooly was killed by a fall of a boulder from an uncovered waggon below which he was sitting and which was being loaded at the time. The mother of the child was to blame for the accident.

"A man was run over by the mail train at night between Sahibganj and Pirpointi railway stations. He was stopping with a friend at a level crossing. It is supposed that he got up at night, and being half asleep sat down by mistake between the rails, when the mail came up and ran over him.

"An insane Sonthal was run over by the down mail train between Kotalpokur and Bahwa. It was elicited during the enquiry that the man was subject to temporary fits of insanity and had strayed from home the previous day.

"There has been more than one attempt made to derail the trains on a section of the loop line between Pakour and Nalhati stations. It is believed that these attempts have been made or instigated by the heads of gangs employed on the maintenance of the permanent-way, in the hope of getting rid of a Permanent-way Inspector of European extraction who was stricter with them than his predecessor. For one of these attempts made in October 1894 a khalasie was recently sent up for trial and was convicted by me as Sessions Judge and sentenced to transportation for life. The sentence in this case was upheld on appeal."

94. *Other public works.*—A new treasury building is under construction at Monghyr at a cost of Rs. 20,227.

In Bhagalpur similar increased accommodation is urgently needed, but cannot be provided for want of funds. New wards in the central jail were under construction during the year. The scheme for the extension of the Bhagalpur municipal water-works to other parts of the town was matured during the year, and is now under examination by the Sanitary Board. A handsome building was constructed by the pleaders of Bhagalpur during the year on Government land for use as a Bar Library.

In Purnea a considerable amount of embankment work was done by the District Board to prevent the encroachments of the river Kosi. Special enquiries were made as to the protective works likely to be required in future, and the result is now before Government.

In Malda the office of the District Board was enlarged at a cost of Rs. 1,000. A new under-trial ward in the district jail was completed at a cost of Rs. 4,492, and a new well was under construction. On the new zilla school building, which is to cost Rs. 13,000, but little progress was made. Only Rs. 2,345 was spent during the year in making bricks and laying the foundations.

XXIV.—COMMUNICATIONS.

95. This Division is on the whole fairly well off as regards communication by rail, road, and river. Its wants as regards subsidiary railways and feeder roads to existing lines grow apace, while the funds available for their construction are inelastic and almost stationary, and the financial difficulties of Government prevent its giving that assistance on which the local officers in more prosperous times invariably relied. The income of the District Boards barely suffice to maintain existing roads and bridges; and though the Government grant to the Sonthal Parganas Road Fund has recently been increased, it is still far below the requirements of that district, where the Road Cess Act is not in force. All large original works and schemes have to be carried out piecemeal as funds become available year by year. As a rule existing communications by road were well maintained throughout the year in all districts of the Division. I was particularly well pleased with the state of the roads, bridges, and bungalows in the district of Bhagalpur, many of which I passed over during my cold-weather tour, and consider that they reflect great credit on the District Engineer, Mr. James Robinson.

In Purnea considerable damage was done by floods from the Kosi, the ravages of which river have cost the District Board a considerable sum of money for embankments and training works, to say nothing of the cost of the special surveys and enquiries which the vagaries of that river rendered necessary during the year under report.

96. In the Sonthal Parganas no less than Rs. 10,879 was spent on bridges and causeways, which are the great want of that district. Three very necessary inspection bungalows at Jamtara, Godda, and Pakour were also completed, or nearly so, during the year at a cost of about Rs. 1,500 each. Mr. Craven, when making the settlement of parganas Amhar and Sultanabad in the last-named subdivision, demarcated all existing roads and tracks and had them noted in the settlement papers. The Subdivisional Officer of Pakour, Mr. E. McLaren Smith, has had a register made of all these roads, and it is hoped that by this means they may be effectually preserved from the encroachments which are so dear to the hearts of raiyats who cultivate land adjoining roads in this country. A very rare, peculiar, and pleasing feature in the road administration of the Sonthal Parganas is the fact that nearly 400 miles of village roads were maintained by the villagers without any cost to the District Road Fund. The zamindar of Mahagama also presented the fund with a sum of Rs. 2,500 for the construction of a masonry bridge of 3 spans of 10 feet each on the Godda-Peerpointi road.

Mr. J. H. Bernard, the Officiating Deputy Commissioner, Sonthal Parganas, writes:—

"A unique feature of this district is the amount of work done free of charge on roads throughout the district, but more especially in the Damin-i-koh. Coming to the Sonthal Parganas from a Bengal Road Cess district, where

no one will take the trouble to put a single spadeful of earth in a hole on the road in front of his house, although there may be a bank of earth a few feet from it, one cannot but be surprised to find that many wide roads which one finds, at any rate in the cold weather, in very fair order, cost nothing to the road fund. Jugal parganite, of Gopikundar, in particular, is an excellent road-maker, and causes the villagers of his pargana to make cuttings and raise embankments, which, if paid for, would cost hundreds of rupees for nothing.

"During my tour I saw Mr. Smith laying out a road down a very steep hill. The whole of this work was being done for nothing, or, at any rate, in the expectation of only a small present, and no one murmured when the workers were told that the alignment they had been working on was too steep, and would have to be altered. In the Damin-i-koh, at any rate, the rents are very low, and the people understand that in return for this they must work, and they are usually very ready to do so."

This admirable spirit of self-help has been greatly developed and encouraged by the personal influence of Mr. Carstairs, and it cannot be too highly praised.

97. *Arboriculture.*—The following information regarding the planting and maintenance of trees on the sides of roads is given in accordance with paragraph 3 of Government Resolution No. 4366, dated the 28th December 1894:—

In Monghyr about 22,000 fruit trees, chiefly mango and jack, and a few mahogany, barh, pipal trees, were maintained at a cost of Rs. 2,564.

In Bhagalpur about 1,600 trees (of which 165 dead plants were replaced by new ones) were maintained at a cost of Rs. 828. The following kinds of trees were also purchased—Polyalthia-longifolia-sweetenia, mohogani-sweetinia-macrophylla, layersbrecemia-regenæ.

In Purnea nothing was spent under this head. The Magistrate promises that the matter will be attended to in the year 1895-96.

In Malda 375 mango seedlings were planted at a cost of Rs. 143.

In the Sonthal Parganas 437 trees, chiefly fruit trees, were newly planted, and 1,012 maintained at a cost of Rs. 537.

The revenue derived from the sale of the fruits of road-side trees is still inconsiderable. The trees being planted in long lines, it is difficult to protect the fruit from the depredations of monkeys, travellers, and villagers. So far as the provision of shade for the comfort and convenience of travellers is concerned, I think the *pipal* and *bar* are superior to all other trees, inasmuch as they are easily planted, and, being of quick growth, require little or no care when once they have taken root. If fruit trees be planted, I think clumps of them near some well, tank or river, are better than long avenues, not only because the fruits can be more easily watched, but also because no traveller expects to walk in continuous shade, and is contented to rest and refresh himself once or twice during his journey.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

98. This Act is only in force in one town in this Division, viz. Deoghur in the Sonthal Parganas, where the celebrated shrine of Baidyanath is situated. The Deputy Commissioner, Sonthal Parganas, gives the following account of the working of the Act during the year:—

"The number of licenses issued during the year was 149 against 198 in the preceding year. The receipts amounted to Rs. 1,888 against Rs. 1,872 in 1893-94. The increase in receipts, accompanied by a fall in the number of licenses, is due to the imposition and realisation of fines amounting to Rs. 384 against only Rs. 28 in the preceding year.

"Owing to the inadequate privy and latrine accommodation in some of the lodging-houses, the Subdivisional Officer had to suspend their licenses. This could have been avoided if from the outset the Health Officer had done his duty before recommending the grant of licenses. While he was on leave, his *locum tenens* pointed out that lodging-houses had been certified to be fit without any regard to the provision of privy accommodation. Mr. Heard, the Subdivisional Officer, was firm in suspending the licenses of all lodging-houses where suitable and sufficient latrine accommodation had not been provided. This of course created much discontent; but when people found that they could not

get round the law, they gave in; and now nearly all old licensees have done what was required of them, and have had their licenses restored to them. The expenditure for the year was Rs. 2,617 against Rs. 1,406 in 1893-94. The large increase was partly due to the contribution of Rs. 1,460 to the local municipal funds, and partly to the construction of a bridge over the flood-escape channel of the Siva Ganga tank. Twenty-six prosecutions were instituted during the year (including one pending from the previous year) against an equal number of persons, 25 of whom were convicted and one acquitted. The chief convictions were under section 17, for keeping lodgers during suspension of license (15), and for housing in excess of the authorised number (6). Mr. Heard has exhibited both tact and firmness in his proceedings under the Act in a town where the majority of the population is bitterly opposed to sanitary reform in any shape."

XXVI.—EDUCATION.

99. The subjoined table compares the number of schools and the number of pupils attending them during the last two years:—

Class of Institutions.	1893-94.		1894-95		Average number of pupils, 1894-95.
	Schools.	Pupils.	Schools.	Pupils.	
1	2	3	4	5	6
Public Institutions.					
Secondary ... High English	18	3,492	18	3,498	194·3
Secondary ... Middle "	35	1,966	35	2,035	58·1
Secondary ... " Vernacular ...	45	2,688	45	2,743	60·9
Primary ... Upper Primary	230	9,714	244	10,051	41·1
Primary ... Lower "	3,019	63,355	3,155	66,353	21·0
Special	21	333	14	358	25·5

Total ...	1,345	10,153	1,296	9,970	...
Grand Total ...	4,947	95,691	5,079	99,567	...

100. It will be seen that there has been a net gain of 132 schools with 3,876 pupils, and that the gain is shared by all the districts, except Malda, which experienced a loss of 38 schools with 574 pupils.

The number of secondary schools remained the same as last year, but the attendance at them increased by 130 pupils, 6 in high English, 69 in middle English and 55 in middle vernacular schools.

Primary education advanced by 150 schools with 3,335 pupils; upper primaries increased by 14 schools with 337 pupils, and the lower primaries by 136 schools with 2,998 pupils. While all the other districts of the Division gained both schools and pupils, Malda alone lost both. The Magistrate of that district writes:—"The upper primary schools have suffered most in both respects," and he gives the reason as the "scarcity of or rather rise in the price of food-grains caused by the sudden rising of the Ganges and the failure of crops" in two thanas. The Assistant Inspector of Schools (Babu Mathura Nath Chatterjee), however, thinks that the decline may be due "to the growing ill-health of the district." Comparatively, however, the general health of the district was rather better last year than in 1893-94 as shown in paragraph 20. The Magistrate and the District Board will be asked to pay special attention in future to the spread of primary education in this district.

Under the head of Special schools there was a loss of 7 schools with 25 pupils, which is the net result of the abolition of 8 guru-training classes attached to middle schools (6 in Monghyr and 2 in the Sonthal Parganas), and of the opening of an industrial school in the latter district. The Deputy Commissioner of the Sonthal Parganas writes that technical education is making some progress in his district.

Female Education.

Female education shows a gain of 38 schools with 569 pupils, Monghyr gaining 17 and Bhagalpur 22 schools. Malda lost 3 schools and 120 girls, but the Magistrate reports that there was an increase in the number of girls taught in the boys' schools.

Entrance examination.

101. Two hundred and ten candidates from this Division appeared at the Entrance examination during the year under review, of whom 103, or 49 per cent., passed against 47·5 per cent. in the previous year.

Of the Government zilla schools, those at Dumka and Malda did very well, passing 6 and 9, respectively, out of 7 and 11 sent up.

Of the aided schools Jamalpur did remarkably well in passing 17 out of 19. The result shown by the Deoghur school was also very satisfactory, as 7 out of 8 passed from that school.

Of the unaided schools the Victoria Jubilee school passed only 2 out of 17; the Kamaleshwari Prosad Institution 1 out of 13; Barari 2 out of 17, and Bhagalpur Madrassa 4 out of 11. I think the educational authorities should take some notice of private schools like the above which unnecessarily send up so many boys only to be plucked.

Twenty-seven middle English schools sent up 105 candidates for middle scholarship examination, of whom 62 passed, 28 obtaining middle English and the rest middle vernacular certificates. Ninety-eight candidates from 36 schools appeared at the middle vernacular examination, of whom 72 were successful, all but one obtaining middle vernacular certificates. Eighty private students competed at these examinations, of whom 36 passed, 4 obtaining middle English and 32 middle vernacular certificates.

At the upper primary examination 352 candidates appeared from 152 schools, and 266 candidates were successful from 131 schools. Besides the above, 32 candidates from secondary schools and 34 private students were also successful at this examination. Of the 823 lower primary schools which sent up 2,624 candidates for the lower primary scholarship examination, 719 schools passed 1,958 candidates, including 133 girls. Besides these, 36 candidates from secondary and 633 from upper primary schools and 57 private students passed this examination.

102. The number of Muhammadan pupils in all classes of schools increased from 20,678 to 22,063, while the percentage of the Muhammadan male population to the total male population of the Division was 20·3. The percentage of Muhammadan pupils to total school population was 22·1 against 21·5 in the preceding year. There was thus some improvement both in the number of Muhammadan pupils and in their percentage.

103. The number of aboriginal pupils declined by 14, 6,183 pupils having been returned during the year under report against 6,197 in the year preceding. Monghyr showed an increase of 75 pupils, Purnea of 11, and the Sonthal Parganas of 54, while Bhagalpur and Malda lost 106 and 48 pupils, respectively. No explanation of the decrease is given. The Deputy Commissioner of the Sonthal Parganas writes that there was an increase in the number of *Dhangar* pupils due to the establishment of two lower primary schools in the Godda subdivision at villages where they form the majority of the population.

Of 5,598 aboriginal pupils in the Sonthal Parganas, 5,408 were Sonthals, 155 Paharias, 3 Kols and 32 Dhangars. Of 197 schools for Sonthals 135 received aggregate stipends of Rs. 7,500 from the Damin-i-koh Fund. The total expenditure from this fund was Rs. 7,494 against Rs. 7,374 in the year before. Taking the population and the children of school-going age into consideration, one Sonthal in every 15·2 and one Paharia in every 60·5 was at school.

104. The Deputy Commissioner, Mr. Bernard, writes:—"The Subdivisional Officer of Rajmahal remarks on the difficulty of realising subscriptions and on the callousness of the Sonthals with regard to education. It is remarkable that of nine parganaits in the portion of the Damin-i koh within the Sadar sub-

division less than half can read and write. Most of them take no steps to get their sons taught." It appears, however, that 18·2 per cent. of the boys of school-going age in the Sonthal Parganas now attend the schools.

105. The total cost for educational institutions in this Division amounted to Rs. 3,77,907 against Rs. 3,67,587 in 1893-94. Of this amount Provincial revenues contributed Rs. 42,698, District Boards Rs. 60,925, and municipal funds Rs. 7,830. The collections from fees showed a falling off from Rs. 1,95,470 in 1893-94 to Rs. 1,92,522 in 1894-95. The income from other sources also decreased from Rs. 78,180 to Rs. 73,932. The cost per head of pupil was Rs. 4·2 last year as against Rs. 4·1 in the preceding year.

106. The proportion of the number of boys attending the schools to the total number of boys of school-going age improved from 13·6 to 14·2. The Magistrates do not say anything about the discipline in schools and the physical and moral training of the boys. They will be asked to notice these important subjects in future reports.

XXVII.—DISPENSARIES AND HOSPITALS.

107. The following table gives the particulars of the 30 dispensaries in this Division during the year under report and the previous year:—

Year.	Income from—					Expenditure.	Total number treated.			Daily average number of in-patients.	Daily average number of out-patients.	Cost of diet per in-patient.	Remarks.
	Municipal grant.	District Board grant.	Government.	Private subscriptions, endowments, &c.	Total.		In-patients.	Out-patients.	Total.				
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.						Rs. A. P.	
1894	18,982	11,034	3,112	28,574	61,702	58,718	4,902	153,434	158,336	194·7	1,186·4	0 1 5	1·7
1893	16,261	9,539	2,848	22,510	51,158	49,038	3,945	130,120	134,065	175·6	1,124·5	0 1 4	1·5

It will be seen that there has been a general increase in income and expenditure of the number of patients and of the cost of their diet.

The remarks made under head IV (Public Health) amply account for this increase. There is still a great deal of room for improvement in the matter of punctual payment of subscriptions, and constant pressure by Government officials is necessary to make many of the subscribers pay up. Some of the dispensaries have been driven to the expedient of refusing medical aid to defaulters and their families until they have paid up. The work of inspection by Civil Surgeons and by District and Subdivisional Officers is reported to be satisfactory both in quantity and quality.

In the Government Damin-i-koh estate in the Dumka subdivision of the Sonthal Parganas an attempt is being made to raise a general fund for the maintenance of the dispensary at Katikhund. The Deputy Commissioner writes:—"Parganaits have been directed to collect a subscription of one anna a year from every house in villages in the Dumka Damin. Till now, only those rural villages which comprised 16 or more houses have subscribed one rupee annually. The above arrangement will be fairer and should lead to an increase in funds, and will, moreover, bring home to all the fact that there is a dispensary in existence."

108. Besides the seven Government dispensaries in the Sonthal Parganas, the Raja of Pakour maintains one at that place entirely at his own cost. It is situated in his house and treated 10,652 persons during the year under report at a cost of Rs. 2,012. The Deputy Commissioner gives the following account of the various Mission dispensaries in the Sonthal Parganas.

"The following were the Mission dispensaries :—

1. Benagaria	... ...	Dumka subdivision.
2. Khairbani	... ...	Jamtara ditto.
3. Dharampur	... } ...	Rajmahal ditto.
4. Taljhari	... }	
5. Pathra	... ...	Godda ditto.

"Numbers 1 to 4 received a Government grant of Rs. 10 each per mensem. The total expenditure on account of these institutions comes to Rs. 3,003, so

the grand total of expenditure on private dispensaries amounted to Rs. 5,015 against Rs. 5,479 last year. At Benagaria and Khairbani 2,065 in-door patients were treated. In all the six dispensaries 22,923 out-patients received medical aid. The homœopathic system of treatment is administered at Khairbani by Mr. Haegert. According to his own account the institution is successful, but no regular account of patients is kept. Dharampur and Taljhari dispensaries are well managed."

The increasing utility and popularity of these institutions hardly admits of a doubt.

XXVIII.—LIBRARIES.

109. As last year, there was a public library at the head-quarters of the Bhagalpur district and two smaller ones at Banka and Supaul. These latter are public libraries only in name: the books are not generally read, and I found the subscriptions at Supaul very much in arrear.

A new public library was started during the year at English Bazar (Malda) under the patronage of some of the local pleaders and a few native officials. It is only kept open for a limited time during the day. There are East Indian Railway Mechanics' Institutes at Jamalpur and Madhupur. Bar libraries at the head-quarters of the Monghyr, Bhagalpur, and Purnea districts are kept up by the local pleaders.

The books in all the district office libraries were re-arranged during the year, and useless and obsolete publications were weeded out, and were either sold by auction or otherwise disposed of.

XXIX.—MUSEUMS

110. There were no museums in this Division during the year 1894-95.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

111. The number of municipalities in the Division remained the same as it was last year, and little or no change occurred in their condition. The application of modern western ideas of sanitation to eastern towns is not only a difficult but a very costly operation. The municipal authorities cannot carry the people with them, not only because sanitary reform means extra taxation, but also because conservative as they are they cannot divest themselves in a day of the habits of generations. In most of the municipalities in this Division the Municipal Commissioners are engaged in a constant struggle to make both ends meet and to steer clear of any very unfavourable remarks by the Sanitary Commissioner or local auditor. Unless they are rich enough to afford a paid Secretary, the supervision of outdoor work has practically to take care of itself. No funds are available unless a loan be obtained from Government for any new works or improvements, however necessary or advisable they may be. It is not therefore, I think, to be wondered at that true Local Self-Government seldom or never stirs out of the meeting rooms of the Municipal Commissioners. The municipal cart sticks in the mud, but as a rule no Municipal Commissioner puts his shoulder to the wheel.

District	Municipality.
Monghyr	Monghyr. Jamalpur. Jamui.
Bhagalpur	Bhagalpur. Colgong.
Purnea	Purnea. Kishanganj.
Malda	English Bazar. Old Mala.
Sonthal Parganas	Deoghur. Sahibganj.

112. In the Monghyr Municipality the crying wants are a drainage system and an improved water-supply. The drains in many of the principal streets of the town have been covered over and encroached upon to such an extent as to seriously affect the general health. A drainage scheme is contemplated, but surveys have not yet been prepared. The question of the removal of existing obstructions is beset with difficulties, and Government has been asked to give its advice in the matter after consulting the Law Officers of the Crown.

Monghyr district.

The large proportion of Europeans who reside in the town of Jamalpur (chiefly employés in the East Indian Railway workshops) renders its circumstances somewhat peculiar, and its management is a good deal above the average. The question of the abolition of the municipality of Jamui, which is really a collection of agricultural villages, was taken up and thoroughly gone into by

Mr. Phillips during the year under report. The result is a notification issued during the current year under section 9 (*a*), and I have no doubt that the abolition will be hailed with joy by the inhabitants.

113. The only matter of special importance in this district was the extension of the Bhagalpur water-works to other parts of the town. Of the work of the Bhagalpur Municipal Commissioners, the Officiating Magistrate, Mr. B. K. Mullick, writes as follows:—

Bhagalpur district.

"It will thus be seen that the Commissioners of the Bhagalpur Municipality have during the year under report showed a healthy energy in looking after the most crying wants of the Corporation and in utilising the slender funds at their command by increased expenditure in the direction where it was most needed.

"The water-works still require to be extended to the remote Champanagore and Nathnagore wards and to some of the more important street and lanes near the civil station, and pucka drains are wanted in two of the most populous quarters of the town. It is hopeless, however, to carry on these much-needed improvements from the ordinary income, and an application has been made for a loan of three lakhs which it is hoped will soon be sanctioned. It is to be feared, however, that the additional burden which must necessarily be imposed on the tax-payers—

(1) to meet the interest on the loan,

(2) to provide for a sinking fund,

(3) for the working charges connected with the extended water-works, will bear hard on the poorer rate-payers. This fear is grounded on the fact that even at the present moderate rate of assessment there was an outstanding balance of Rs. 16,736 on the 31st March 1895 out of a gross demand of Rs. 87,986. There is also reason to believe that the incidence of house assessment presses more heavily on the poorer than on the richer classes, and the revision of the assessment by an agency independent of the Municipal Commissioners will be a move in the right direction.

"A good water-supply is a most excellent thing, but it is possible to pay too dearly for it. The only way to lessen the burden and to mitigate injustice is to have a paid assessor."

The proposal to create a new municipality at Sultanganj has been finally dropped.

114. Both of the municipalities in this district, Purnea and Kishanganj, are exceptionally difficult to manage, owing to their great size and straggling shape and to the inclusion within their limits of much arable land and jungle. I made some enquiries when I was on tour at Kishanganj with a view of reducing the municipal area, but I found that the question was beset with difficulties, and that the probable expansion of the trade and importance of the place since it was opened out by the extension to it of a branch of the Assam-Bihar State Railway rendered any present change inadvisable.

Purnea district.

115. The English Bazar Municipality in this district distinguished itself unfavourably during the year under report by general inefficiency and by an almost total collapse of the Collection Department. Under constant pressure by the District Magistrate and threats of suspension under section 65 matters were not so bad at the close as they were at the beginning of the year.

Malda district.

116. Of the Deoghur Municipality the Deputy Commissioner, Mr. J. H. Bernard, writes:—

Sonthal Parganas district.

"The chief work of improvement done during the year was the extension of the main pucka drain by 292 feet at a cost of Rs. 1,141. It has been decided by the Commissioners to complete this drain. They propose at first to appeal to the public for funds, and should this appeal be unsuccessful to apply to Government for loan. The cost is roughly estimated at Rs. 10,000.

"Dr. Deare, the Deputy Sanitary Commissioner, inspected the municipality in July 1894 and criticised its action in many respects. He condemned the Hindu cremation ground, the swamp into which the municipal main drain then discharged, the latrines, the wells, &c. His suggestions have received proper consideration. On his recommendation the Muhammadan burial-ground, situated in the heart of the town, is to be removed to a reasonable distance. The present Chairman, Mr. Heard, has shown both firmness and tact in insisting

on sanitary reform. The collections during the year were nearly cent. per cent., and the office was found to be in absolutely correct order by the local Auditor."

Of the Sahibganj Mnnicipality he says:—

"The Sahibganj Municipality has made a considerable advance during the year under report. The present Vice-Chairman, who is the Civil Hospital Assistant in charge of the dispensary, is energetic, and does not absent himself from the town as his predecessor used to do. The late District Traffic Superintendent, Mr. Kelly, was Chairman during the greater part of the year till he was transferred and did valuable work. Attention is being paid to sanitary improvements. The drainage from houses on its banks has been prevented from flowing into the important tank in the middle of the town, wells have been protected from pollution, and it is proposed to make a survey of the town with levels with the view of improving the drainage. The improvement of the slaughter-house has been taken in hand. The income should be larger than it is, as the East Indian Railway Company do not pay taxes at the same rate as other owners of holdings in the town. The Company have delayed to furnish the return called for; otherwise the matter would have already been submitted for the orders of Government."

District and Local Boards.

117. Of the District and Local Boards it may be said as of the municipalities of this Division that their requirements increase out of all proportion to their incomes: the latter are almost stationary, while the spread of education and general opening up of the country by railways render the former more urgent year by year. The District Board of Monghyr has since the close of the year applied for a loan of 1½ lakhs to enable it to carry out a programme of important and necessary works. They have this advantage over the municipalities that they can afford more highly-paid officers to look after their outdoor work. As these institutions have all official Chairmen (the District Magistrates) they are rather of the nature of consultative than executive bodies. They pass resolutions, and the Magistrate-Chairman and the District Engineer see that they are carried out. The number of meetings is not large owing probably to the above fact. The Local Boards act generally as agents and assistants to the District Boards and have independent control only over such funds and business as are made over to them. Generally speaking, they manage pounds and primary education. Nothing of any special importance occurred during the year under report in connection with any of the District Boards.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

118. The following figures illustrate this subject and show the existing position of affairs in the Division:—

Class of employment.	1893-94.		1894-95.	
	Total number of officers in each class.	Total number of Muhammadans.	Total number of officers in each class.	Total number of Muhammadans.
1	2	3	4	5
Gazetted officers on salary above Rs 100.	93	10	95	9
Gazetted officers on salary of Rs. 100 and less.	3	1	3	...
Ministerial officers ...	789	131	809	137
Menials ...	1,169	500	1,340	518
	2,054	642	2,247	664

The percentages of columns 3 to 2 and 5 to 4 are 31·2 and 29·5, respectively, and the percentage of Muhammadan to that of the Hindu population is 27·8. The figures show that little or no progress has been made in carrying out the wishes of Government. The Collector of Purnea observes that the Muhammadans in his district "are mostly agricultural and illiterate. Those who have some education take service under zamindars, but do not aspire in large numbers to service in Government offices, their education being below the required standard." The fact appears to be that the Muhammadan candidates for vacancies on the ministerial staff are so inferior in educational requirements that they cannot be appointed without serious detriment to the efficiency of the office concerned. This is a defect which time and the exertions of the Muhammadans themselves alone can remedy.

XXXII.—POST OFFICE AND TELEGRAPH.

119. The record of the work done by the post offices, so far as it appears from the facts and figures furnished, was one of continued progress. New post offices were opened, and the work in every branch of the department increased. Complaints of postal irregularities were few and far between. Mr. Bernard, the Officiating Deputy Commissioner of the Sonthal Parganas, however, writes thus:—"Briefly it may be said that in the Postal and Telegraph Departments no progress towards meeting the wishes of the public was made during the year under report." From Godda complaint was made of the unpunctuality of letters from the north. Postal arrangements in this outlying part of the Division are no doubt still somewhat more primitive than elsewhere, and are capable of considerable improvement. This will come in time along with the spread of education and consequent increase of correspondence and postal work.

The Collector of Purnea writes:—"Nearly one-third of the small branch offices in the interior of the district were worked by cheap extraneous agents, such as shop-keepers and village *gurus*, who are paid a small allowance varying from Rs. 3 to Rs. 5 a month. The extension of the postal facilities to the obscure parts of the district, where costly departmental servants cannot be maintained, is mainly due to the employment of these cheap agents." The District Officer of Purnea also mentions the following extraordinary case of the misappropriation of a registered cover:—"A branch postmaster substituted an ordinary letter for the registered letter, from which he abstracted two currency notes of Rs. 100 each. He was prosecuted, and on conviction sentenced to rigorous imprisonment for two years." The following is quoted from the report from the Deputy Commissioner of the Sonthal Parganas:—

"The Deputy Postmaster-General, Bihar Circle, was requested to make arrangements to have letters from Jamtara carried by the No. 5 up passenger train to Modhupur to be taken up by the down mail train, which does not stop at Jamtara, but the request has been refused on the ground that the number of letters is small.

"Nothing has been done to remedy the inconvenience complained of last year by the Subdivisional Officer of Rajmahal arising from the fact that all insufficiently stamped and bearing letters are sent first to Dumka, many miles out of their way, by road."

Statistics regarding working of the telegraph offices have not been supplied by all the District Officers, but it may be said that the Department generally worked well. During the year under report the Maharaja of Sonbarsa in the district of Bhagalpur applied for a postal telegraph office at the Sonbarsa post office, but the arrangement has not yet been completed. In the district of Purnea the number of combined post and telegraph offices was increased by one, *i.e.*, the Katihar sub-post office was turned into a combined post and telegraph office.

The Officiating Deputy Commissioner of the Sonthal Parganas notices the fact that the restriction of the working hours from 10 A.M. to 4 P.M. for the Deoghur telegraph office is considered by the public as a great inconvenience.

General.

Generally speaking, it may be said that, considering the materials and establishments which it has to work with, especially in the more inaccessible parts of the Division, the Postal Department has done wonders. Year by year it plays a more and more

important part in the domestic and commercial life of the country. Nothing but constant inspection could, I think, enable it to maintain the high standard which it has attained and to preserve the confidence of all ranks and classes of the population.

XXXIII.—ZAMINDARI DÂK.

120. The following table shows the income and expenditure during the year 1894-95 and the rate at which the cess was levied in each district:—

DISTRICT.	Income.	Expenditure.	Rate at which cess was levied.
1	2	3	4
	Rs.	Rs.	Rs. A. P.
Monghyr ...	7,176	7,700	0 14 0
Bhagalpur ...	19,875	11,923	2 8 0
Purnea ...	12,093	9,970	1 0 0
Malda ...	8,075	7,128	1 14 0
Sonthal Parganas	6,517	4,356	3 8 0
Divisional Total	53,736	41,077	......

The excess expenditure was met from the balance in hand (Rs. 11,794) on 1st April 1894. Except in the district of Purnea, where the rate was increased from 14 annas to one rupee, the rate was the same as in 1893-94. In the district of Monghyr three new lines, covering 61 miles, were opened during the year. In Bhagalpur the line from Amarpur to Bihar, a distance of 24½ miles, was closed, and in its stead a new line of 23 miles from Banka to Bihar was opened. In Malda a new line from Kaliachak to Panchanandpur khas mahal was opened. The total length of the zamindari dâk lines in Purneà and in the Sonthal Parganas was the same as in the preceding year.

FAIRS.

121. Fairs of more or less importance, and generally of a religious character, were held in all the districts of this Division. The important fair at Singheswar in the Madhipura subdivision of the district of Bhagalpur was held in March last. It lasted for 12 days, but the Magistrate has not reported the number of persons who attended it last year.

The necessary sanitary arrangements were made, and where necessary a *posse* of police was told off to preserve order and to prevent theft, &c. A native doctor was deputed to the fairs at Singheswar in Bhagalpur, Karagola and Khagra in Purnea, and Ramkeli in Malda. No epidemic broke out in any of the fairs.

The following is an estimate of the number of people present at each fair:—

Bausi in the district of Bhagalpur	175,000
Kabilas	40,000
Karagola, Purnea	8,000
Khagra	50,000
Ramkeli, Malda	50,000
Rameswar, Sonthal Parganas	10,000
Dhamsavi	16,000
Deoghur, Sripanchami	8,000
" Sivaratri	15,000
" Bhadro Purnima	8,000

A fair was held for the first time in February 1895, under the auspices of the Collector of Bhagalpur, at Tintunga, a Government estate in the Sadar subdivision of this district. It included an agricultural show and lasted for two days, and was attended by about 20,000 people. The sanitary arrangements were good, and no accidents occurred.

POUNDS.

122. In the district of Monghyr the number of pounds increased from 47 in the year 1893-94 to 62 during the year under report. In all the other districts the number was nearly the same during the past two years, as noted in the margin. In the Regulation districts most of the pounds continued to be under the control of the District Boards. Those situate within municipal limits were managed by the respective municipalities. The farming system continued to be in force. In the Sonthal Parganas all the pounds were farmed out by the Deputy Commissioner and his subordinates, except the Godda pound, which was under direct management for six months, as there was no bid for it. The Magistrate of Monghyr reports that owing to close supervision and consequent discovery of malpractices and conviction in criminal courts the revenue of the pounds under the management of the District Board fell off to some extent during the last settlement. The pound-keeper of Jamalpur was convicted of taking double fees for release of cattle, and there were also several prosecutions in the Begusarai subdivision. Regarding the abuses in his district the Magistrate of Malda, Mr. Price, writes:—"From a financial point of view the farming system is commendable; but the cattle pound farmers are generally a bad set of people. They are said to encourage malpractices in various ways, such as the improper seizure of cattle, they charge fees in excess of the authorised rates, and they refuse to grant receipts for fees paid by the owners of impounded cattle. Besides these, I have often noticed that pound farmers neither feed nor water cattle properly; there is no shed, wind and waterproof, for the shelter of the cattle that are exposed to the sun, and the fencing is broken and falling into decay."

DISTRICT.	Number of pounds.		Income.	
	1893-94.	1894-95.	1893-94.	1894-95.
			Rs.	Rs.

XXXIV(a).—SOCIAL AND POLITICAL INSTITUTIONS.

123. The Magistrate of Monghyr gives the following account of the social and political institutions in his district:—

Jamalpur Rate-payers' Association.

This Association has been established by the East Indian Railway Company's employés, consisting chiefly of Bengalis, and is an imitation of similar associations in Bengal. No information has been obtained as to its working.

Anjuman Islam Institution.

This institution was established in 1888. It is under the patronage of the local Muhammadans. Its principal object is to afford relief to poor and needy Muhammadan boys and orphans by imparting to them English and Persian education. There is an educational institution in connection with it, which gave free education to 48 Muhammadan boys in the year under report. Its income during the year was Rs. 2,513 and expenditure Rs. 2,165.

Kayesth Sabha.

This Sabha was started in 1887 by the Kayesth community of Monghyr for the general improvement of their condition. It held 11 sittings during the year, and the average attendance of members was 62.

The collection of a handful of rice every day from every Kayesth family was the principal source of its income, which amounted during the year to Rs. 127, the expenditure being Rs. 103. The education of four helpless Kayesth boys was undertaken, and a monthly allowance was given to a Kayesth widow.

Posurakhini Sabha.

This institution was started on the 24th of May 1892. Its principal object is to give shelter to all sorts of worn-out animals, specially of the bovine species, after they become unserviceable for domestic purposes. This institution was supported by funds collected in boxes placed in shops and also by donations. The total income of the Sabha during the year was Rs. 701 and the expenditure Rs. 656. These figures compared with those of last year show clearly how the interest in the movement (stimulated by the excitement of the anti-kine-killing agitation) is generally subsiding. The income last year was Rs. 1,600 and the expenditure Rs. 1,500.

There were 42 animals in the goshala on the 31st March 1894, and 189 animals were received during the year, making a total of 231. One hundred and seventy-six animals died, leaving a balance of 55 animals in the register.

There are besides the goshala at Monghyr 16 or 17 goshalas in the district. Many of them are languishing for want of support. Their chief supporters are Marwaris.

In Bhagalpur the Societies existing in the district are reported to be the same as last year, viz., the Land-holders' Association, the Muhammadan Association, the Gaurakhshini Sabha, and the Hari Sabha.

The school of the Muhammadan Association is reported to be doing well. The Gaurakhshini Sabha is said not to possess any political significance. The cow-killing movement in this district may be said to have died at its birth.

Purnea.

The only political institution in the district of Purnea is a branch Committee of the National Congress, but its existence does not take any practical shape.

Malda.

The Collector says that there are no social or political institutions of any importance in the district of Malda, and that the people of the district do not generally concern themselves with politics, but are inclined to criticise the working of local institutions like municipalities.

Sonthal Parganas.

The Deputy Commissioner writes:—"The Jubilee Institute with its branch at Pakour is the only social institution in the district. A building for the Pakour branch was under construction during the year. The Hijla *méla*, which is held under the superintendence of the member of this institution, was a great success last year, as all classes attend, and Sonthal and other dances and sports are arranged."

XXXIV (*b*).—STATE OF PUBLIC FEELING AND THE PRESS.

124. There has been no agitation in the Division during the year on any important subject, and the native press has been singularly free from attacks on Government officers serving in it.

The Collector of Monghyr writes:—"No newspaper is issued by the one local press. The nearest publication is at Patna. The circulation of English Calcutta papers is limited. Public feeling was not strongly exercised during the year. The excitement about the anti-kine-movement and the mud-plastering of mango trees has died out. There was a slight tension in the relations of the Shias and Sunnis over the performance of the Haziri ceremony, which, however, was soon relaxed. There were no public questions during the year which excited much local interest."

In Purnea there is no public press, nor do the people of this district appear to take much interest in any public matter.

Malda.

The agitation against cow-killing does not appear to have extended to this district. The relations between Muhammadans and Hindus have been generally amicable during the year under report.

The educated classes read the *Statesman*, the *Bengali*, and *Amrita Bazar Patrika*, but the circulation of these papers is very limited. The *Bangabasi* is the principal vernacular paper read by the people both in the mufassal and in the towns.

Sonthal Parganas.

Some of the villagers in the Jamtara and Pakour subdivisions were at the outset dissatisfied at the increase in rents effected by the last settlement, but this feeling appears to have died out.

A monthly Bengali journal, called the *Dharani*, is published from Malhati in the Dumka subdivision. Its tone is so far moderate.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

125. A statement is submitted containing my remarks and those of District Officers regarding the character of the officers employed in this Division during the year 1894-95.

Under Government Notification No. 136A.D., dated the 12th May 1894, Babu Sarat Chunder Mukerji and Mr. C. H. J. Craven were posted as Probationary Sub-Deputy Collectors in this Division, and have since been appointed to be Sub-Deputy Collectors.

No Deputy Conservators of Forests of the first three grades were posted to this Division during the year under report.

XXXVI.—CONDUCT OF ZAMINDARS.

126. The Division, as a whole, has been fortunate in the absence of any serious disputes between landlords and tenants. On the subject of the conduct of the former, the following extracts are given from the district reports:—

Monghyr.

"Of the larger zamindars in the district, the Maharaja of Gidhour and the Raja of Khaira are said to be enlightened. The amla of the Darbhanga and Banoli Rajas exercised some petty oppression in the matter of taking forest produce from the hills. In the thana of Shekhpura a large number of villages are let out to an utterly unscrupulous set of Muhammadan ticcadars, against whom there are frequent complaints. The disgraceful case of riot and murder at Ekara, in which eight persons were killed, is an instance of such disputes.

"In the Begusarai subdivision the maliks are mostly of little standing. The relations between them and their raiyats are not satisfactory—men of no education and little conscience. They are constantly fighting in endeavours to enhance rent and turn raiyati land into khud-kasht. The factories are, as a whole, on good terms with their tenants. Much of the land is gradually passing into the hands of mahajans and pleaders, and it cannot be said that this change is altogether to the advantage of the raiyats. On the other hand, there exist certain casts of raiyats, Babhans, and sometimes Goalas and Rajputs, who refuse utterly to pay their legal rents unless complained against, and are adepts at enforcing their rights to the uttermost. Such men are well able to protect their own interests and even to oppress their maliks.

Bhagalpur.

"The conduct of zamindars was generally satisfactory during the year under review. In the Luchmipur estate in the Banka subdivision some of the raiyats combined for a time against the Manager, Mr. F. Braidwood, but he has administered the property with great success, and all disputes are now at an end. This gentleman's management is also well spoken of by the Deputy Commissioner of the Sonthal Parganas.

"In Supaul the Subdivisional Officer notices a serious quarrel between the Raja of Barwari and his cousin, Babu Tajendra Narain Singh. It is reported that both these gentlemen are contracting large debts on account of this dispute. The Subdivisional Officer of Banka reports favourably of the manager of the estate of Rai Tej Narain Singh Bahadur, Zamindars Mohashaya Taruk Nath Ghose and Babu Tilakdhari Lall.

Purnea.

"There was a dispute during the year near Manihari regarding the right to sow indigo between Babus Gour Mohan Rai and Hari Mohan Missor. A rioting case was sent up, but the accused were acquitted, and matters seem to have since quieted down. There is a similar dispute between Mr. A. J. Shillingford and Babu Chhatraput Singh. There are other disputes about what are called *mal* and *milik* lands in many places, but the above are the most important. Rents are very low almost everywhere, and no case of oppression has come to notice except in the aforesaid disputes, where steps are said to have been taken to cause the raiyats to submit to one party or the other.

"The conduct of the resident zamindars of this district continues generally to be satisfactory. One of the absentee zamindars, Raja Sitesh Chandra Panday, of Pakour, however, gave trouble. The Raja's men were guilty of serious rioting at Gaziapara, a village in Kaliachak thana. This case arose in respect of the possession of a newly-formed diara, which was claimed by the Raja on one side, and by one Arzuman Khan, another zamindar, on the other. A part of the said village was devastated by the Raja's men, who, it is said, set fire to houses, and thereby caused great damage to the unfortunate raiyats. In this case 17 persons were sent up for trial, of whom 13 were discharged and the remaining 4 convicted by the Magistrate. They were, however, acquitted on appeal."

Malda.

The zamindar of Handwai continues to neglect the interests of his raiyats. There have been complaints of oppression against his peons, some of which have ended in conviction. He is heavily in debt. The Raja of Hetampur also has lands in the Dumka and Jamtara subdivisions. He is represented by his amla, who are no credit to him. He has neglected to keep up the roads in his estate, though he has promised to repair them since the close of the year. In Jamtara the only other large zamindar is the zamindar of Pahia. He has a large income, which he hoards. He does almost nothing for the public good.

Sonthal Parganas.

The ghatwals of the Deoghur subdivision are most of them deeply in debt. The high priest of Deoghur might be a person of importance, if he were a man of high character, but he is not, and has no influence. The Raja of Pakour is perhaps the best among a batch of men who, as a whole, deserve little praise. He is not ordinarily oppressive to his tenants, and is well disposed to Government and helps Government officers at times. None of the zamindars of Rajmahal have shown any public spirit. There have been disputes between Mr. Grant's Manager at Sahibganj and the raiyats. The latter are said to have accepted land at a rent of four annas a bigha on condition of sowing indigo on it, but to have disregarded this condition. The dispute does not seem to have been yet settled. Mr. Grant's estate in this district is ordinarily well managed, and I have received no complaints from them.

XXXVII.—GENERAL REMARKS.

127. Nil.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF THE PURI LODGING-HOUSE ACT IN BENGAL DURING 1894-95.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Darjeeling, the 9th October 1895.

RESOLUTION No. 663T.—M.

READ—

The reports from Commissioners of Divisions on the working of the Puri Lodging-house Act [IV (B.C.) of 1871, amended by Act II (B.C.) of 1879] during the year 1894-95, in the various places in their Divisions to which it has been extended.

READ again—

The Resolution reviewing the Commissioners' reports on the working of the Lodging-house Act during the year 1893-94.

12. The "Chattis" on the Jagannath road in the district of Puri.
13. Jajpur.

1.* *Extension of the Act.*—The Puri Lodging-house Act IV of 1871, as amended by Act II of 1879 and I of 1884, was in force in the towns and areas mentioned in the margin. No report was received from Jajpur during the year under review, as the machinery of the Act could not be put into motion till the 1st April 1895. The Pandas, who for the first time realised that they would suffer pecuniary loss by the proposed enforcement of the Act, protested against the measure. Their memorials were duly considered; but as no valid reasons were adduced by them against the measure, the orders extending the Act to the Jajpur town were allowed to stand.

2. *Licensed lodging-houses.*—The number of licensed lodging-houses declined from 2,234 in 1893-94 to 1,721 in 1894-95, the reason being that fewer pilgrims visited the principal shrines during the year. In Gaya, although the number of licenses fell from 421 to 320, the number of pilgrims for whose accommodation they were taken rose from 13,212 to 15,636. This is attributed to the enforcement of the rule that no lodging-house can be licensed unless fees are paid for the full number of pilgrims it can accommodate. In the town of Puri, however, licenses were issued for a smaller number of pilgrims than the lodging-houses could accommodate. As this practice may lead to fraud by giving the owners of these houses opportunities to take in more lodgers than they have licensed space for, the Lieutenant-Governor desires the officers who work the Act to decline to receive fees for partial accommodation.

3. *Income.*—The total income of the year was Rs. 36,352 against Rs. 47,361 in 1893-94; the opening balance was Rs. 31,864 and the closing balance Rs. 29,954. The fees realised for licenses for the reception of pilgrims decreased from Rs. 34,868 in 1893-94 to Rs. 24,541 in the year under report. This falling off was most marked in Sitakund and Puri, and was mainly due to the year being regarded as inauspicious for pilgrimages. For similar reasons the fees for certifying houses to be fit to accommodate pilgrims showed a decrease from Rs. 1,576 to Rs. 1,202. The receipts from other fees, however, rose from Rs. 1,171 to Rs. 2,856, and those under "Miscellaneous" increased from Rs. 243 to Rs. 2,661, the increase in the former case being due to the rent of roadside lands in Balasore being credited to "other fees," while similar receipts in Cuttack are shown as Miscellaneous. These rents should in future be treated as miscellaneous receipts.

4. *Expenditure.*—The total expenditure of the year was Rs. 38,262 against Rs. 32,201 in 1893-94. The largest item of expenditure (Rs. 10,247) was again under the head of Contributions. Of this amount Rs. 5,018 were contributed by the Lodging-house Fund of Puri to the local municipality for sanitary

and medical purposes, and Rs. 1,460 by the Deoghar Lodging-house Fund for the improvement of conservancy and lighting. The expenditure under the head "Medical" is shown as Rs. 5,804 against Rs. 7,719 in 1893-94, but besides this, Rs. 3,769, which appears in the accounts as a contribution, was really spent on medical requirements. The expenditure under conservancy during the year rose from Rs. 4,563 in 1893-94 to Rs. 8,072. The increase is most marked at Gaya, where the conservancy charges rose from Rs. 1,900 in 1893-94 to Rs. 5,705. Beyond a passing remark that of the money spent on sanitary improvements, Rs. 2,752 was expended under the supervision of the local municipality, and the rest under that of the Health Officer, the report does not show how this sum was laid out. Fuller information should be given in future. The expenditure under "Construction" rose from Rs. 663 in 1893-94 to Rs. 3,430 during the year under review, owing to the completion of a bridge in Deoghar and to the excavation of two tanks and the erection of a cholera shed and latrine on the Jagannath road. This is satisfactory so far as it goes; but so long as these funds show a closing balance, amounting to 82 per cent. of their total income, it is clear that their resources are not utilised so fully as they might be.

5. *Prosecution.*—The number of persons prosecuted for lodging pilgrims without a license, for lodging more than the licensed number, and for other offences against the Act and the bye-laws, was 254 against 265 in 1893-94; the number convicted was 222 against 215. The amount of fines realised rose from Rs. 2,051 in 1893-94 to Rs. 2,544. In Gaya 35 persons were prosecuted, of whom 29 were convicted, four acquitted, and two cases remained pending at the close of the year. In the town of Puri 64 persons were prosecuted, of whom 56 were convicted and one acquitted, while seven remained undisposed of at the end of the year.

6. *Public health.*—Thirty cases of cholera were reported at Dantun in the month of July. Of these, seven were treated in the cholera hospital shed, six resulting in recoveries, and one terminating fatally. The further progress of the disease is said to have been checked by the measures taken by the Lodging-house Committee, but the attack seems to have been of a mild type. The total number of indoor patients of all diseases admitted into the hospital was 40 during the year against 81 in the preceding year, and the total number of deaths was 16 only against 32 of the previous year. A severe epidemic of cholera broke out in Gaya in July and August fortunately at a time when there were not many pilgrims in the town. Fifty-two pilgrims were admitted into hospital for cholera, and 42 died. It is explained that the high death-rate was due to the patients being reduced by hardship, fasting and the excitement of their peculiar methods of worship. In the town of Puri there were 173 cases of cholera against 89 in 1893-94, and the number of deaths rose from 77 to 141. It is stated that the outbreaks of the disease coincided with the arrival of pilgrims.

7. During the year under report a Committee, comprising both official and non-official members, was appointed to assist the Magistrate and Health Officer in administering the Act in the town of Nadia. The opposition offered by the principal mohunts of the place, whose profits from lodging pilgrims had been affected by the introduction of the Act, was partially removed during the year by the successful prosecution of one of their number who has since taken out a license. The Subdivisional Officer of Deoghar met with similar opposition from the *pandas* of the place in insisting on sanitary requirements being complied with before licenses were issued, and Mr. Heard deserves credit for his firmness in enforcing the provisions of the Act. In the chattis along the Jagannath road in the district of Cuttack, a large tank has already been excavated, and it is proposed to excavate another: the necessity of insisting that tanks thus made are preserved from pollution should not be forgotten. In the town of Puri much good work was done by the Health Officer, Dr. Banks. Some new lodging-houses were constructed and licensed, 87 new latrines were built, and 121 improved. The Swetganga tank was partially emptied, and a large quantity of foul silt was removed from it. Another tank, remarked on by the Sanitary Commissioner in 1893, was completely emptied and cleaned out, and the owner of a third tank, said to be even more filthy than the Swetganga, was required to cleanse it under section 200 of the Municipal Act. In the chattis along the Jagannath road in the Puri district lodging-houses were frequently

inspected to prevent overcrowding, and in 34 cases prosecutions were instituted. Food was also examined and destroyed when unfit for consumption. The water-supply at the chattis and along the road is said to stand in need of improvement, but it will be better to incur no large expenditure until the results of the opening of the East Coast Railway have been seen.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India in the Home Department, and that copies of it be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur and Orissa Divisions for information.

Ordered also, that a copy of the Resolution be communicated to the Sanitary Commissioner and to the Sanitary Board, and that it be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

WORKING OF THE BENGAL JUTE WAREHOUSE AND FIRE-BRIGADE ACT, I OF 1893, IN THE COSSIPUR-CHITPUR AND MANIKTOLA MUNICIPALITIES.

No. 3626*M.—The* 14*th October* 1895.—The following report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-brigade Act of 1893.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

No. 101M., dated Calcutta, the 7th September 1895.

From—E. V. WESTMACOTT, ESQ., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith a copy of the report submitted by the Magistrate of the 24-Parganas on the working of the Bengal Jute Warehouses and Fire-Brigade Act, I of 1893, in the Cossipore-Chitpur and Maniktolla Municipalities, during the year 1894-95.

No. 1082M., dated Alipur, the 30th August 1895.

From—E. W. COLLIN, ESQ., Offg. Magistrate of the 24-Parganas,
To—The Commissioner of the Presidency Division.

I HAVE the honour to forward the Report on the working of the Bengal Jute Warehouses and Fire-Brigade Act of 1893, during the year 1894-95, in the Cossipore-Chitpur and Maniktolla Municipalities.

Cossipur-Chitpur Municipality.

2. The Commissioners retained the old rate of fees at 10 per cent. on the annual valuation of warehouses subject to a maximum fee of Rs. 750 in accordance with section 10 of Act I of 1893.

3. The operation of section 46 of Act I of 1893 was suspended by section 46A, subsequently added. Section 10A of the Act, similarly added, empowered the Commissioners to realise the fees in respect of licenses payable for warehouses under the provisions of section 5 of Bengal Act IV of 1883. The first operation of Act I of 1893 came into effect from 1st April 1894.

4. Owing to the passing of section 46A and section 10A mentioned above, the Commissioners had to recover the arrears due under old Act IV of 1883. The license fee of the warehouses that remained unpaid during the year 1893-94, as reported last year, as well as the arrears under the provisions of Act IV of 1883 (B.C.), amounting to Rs. 6,006-7, were realised in the year under report.

5. During the year under review, licenses were granted to 82 jute presses and warehouses including roperies, firewood and straw depôts as detailed below, and the amount of license fee realised therefrom was Rs. 14,983-10-6, against 72 in the preceding year with fees amounting to Rs. 28,442-4-3. The decrease was owing to the lowering of fees in respect of jute presshouses, from which Rs. 9,000 were collected, against Rs. 20,218 in the preceding year, thus:—

	Rs.	A.	P.
12 Jute presshouses	9,000	0	0
55 Jute warehouses	5,723	5	9
1 Warehouse for storing rags	3	9	9
9 Roperies	228	0	0
5 Firewood and straw depôts	28	11	0
Total ...	14,983	10	6

6. The following statement shows the receipts and disbursements of the jute, &c., and license fees during the year under review:—

RECEIPTS.	Amount.	DISBURSEMENTS.	Amount.
1	2	3	4
	Rs. A. P.		Rs. A. P.
Opening balance on the 31st March 1894	12,170 1 9	Paid to Commissioner of Police for the maintenance of Fire-Brigade arrear for 1893-94	12,161 0 0
		Paid to the Municipal Fund on account of 20 per cent. of the aggregate amount collected under the old Act during 1893-94 and 1894-95 (on account of arrears) as per detailed account given below	5,306 9 4
		Collections for 1893 94 ... ... Rs. 28,442 A. 4 P. 3

		Total collection ... 34,448 11 3	
		20 per cent of which is 6,889 11 10	
		Deducting 1,583 2 6	
		already shown in the last report, the balance is now shown. 5,306 9 4	
		Paid to Commissioner of Police for the maintenance of Fire-Brigade for the year 1894-95 as per the budget estimate ...	11,380 0 0
License fees realised for the year 1894-95 under Act I of 1893	14,983 10 6	Balance at the hands of the Commissioners on the 31st March 1895	4,312 9 11
Total ...	33,160 3 3	Total ...	33,160 3 3

7. During the year under report the Commissioner of Police reports that there were four fires in the following jute warehouses within the Cossipore-Chitpur Municipality, and the property destroyed was to the approximate value of Rs. 2,90,000, as detailed below :—

No.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks showing nature of damages done, &c.
1	2	3	4	5	6
				Rs.	
1	23rd November 1894 ...	Section B, Suburbs, Kali Prosono Singie's Road, Calcutta Hydraulic Press.	34 hours and 20 minutes.	2,27,000	Pucca building and five hydraulic presses and jute.
2	24th " " ...	Ditto ditto ...	19 hours and 30 minutes.	20,000	Pucca building and jute.
3	26th " " ...	Section B, Suburbs, Nawabputty Road, Ashcroft Jute Press.	8 hours	15,000	300 bales of jute partly burnt.
4	3rd December " ...	Section B, Suburbs, Nawabputty Road, Union Hydraulic Press.	12 "	28,000	Pucca building and two hundred drums of jute.
		Total ...	......	2,90,000	

8. The accompanying statement gives a list of the jute presses, warehouses, roperies, &c. to which licenses were granted during the year 1894-95 :—

9. *Maniktolla Municipality.*—The revised budget estimates of 1894-95, framed by the Commissioner of Police, Calcutta, under section 26 of the Act, were accepted by the Commissioners at a meeting, and the share of contribution budgetted for this municipality, amounting to Rs. 218 (exclusive of Rs. 478 paid in excess during the preceding year), was paid.

10. License fees were realised from nine jute warehouses and 38 warehouses dealing with firewood, hay, wood packing cases, &c., showing an increase of 25 warehouses. The fees amounted to Rs. 1,285-13-6, against Rs 966-8-3 in the preceding year. A number of warehouses dealing with very small quantities of inflammable materials were exempted from the operation of the Fire-Brigade Act in terms of the Government Notification No. 2853M., dated the 14th August 1893, and were made to take out licenses under section 261 of the Municipal Act. In some instances the classification was revised by the Fire-Brigade Inspector who, at the time of his inspection, observed the quantity stored to be more than 60 maunds.

11. Under section 10 of the Fire-Brigade Act, the rate of annual license fees, levied by the Commissioners during the year, was the same as in the previous year, being six per cent. per annum on the annual value of holdings as assessed for payment of municipal taxes on jute warehouses and ten per cent. on that of other warehouses. Deduction of ten per cent. was made on the outlay incurred in respect of the appliances and for extinguishing fire in the case of Soora Jute Mills & Co.

12. The Inspector of warehouses prosecuted the owners of 13 warehouses under section 14 of the Act for not taking out licenses, although notices were served on them previously, and they were convicted by the Deputy Magistrate of Sealdah. The amount of fine realised from these defaulters was Rs. 260-12, which was credited into the municipal fund.

13. The warehouses, especially of jute and firewood, are situated close to the circular canal, which forms the western boundary of this municipality. The premises of the Soora Jute Mill and Company are situated on the side of the Narkeldanga main road, and about a mile from the canal side. Jute was stored in pucca brick-built houses, but firewood, hay, and straw were piled up on open grounds. Besides jute godowns, there are three jute ropery concerns, which were licensed under the Act. There were also wood packing case depôts, and in one packing cases are prepared by machine carpentry. Firewood and jute were imported from eastern districts through the circular and new cut canals, and carried to the warehouses from the sides of the canals. Both the trades prospered during the year under review.

14. No conflagration occurred anywhere within the limits of the municipality, and the assistance of the Fire-Brigade was, therefore, not required.

WEATHER AND CROP REPORT.

For the week ending the 14th October, 1895.

Burdwan.—Rainfall at Sadar nil. Weather cooler. *Aman* rice suffering for want of rain. Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16 seers per rupee.

Midnapore.—Rainfall nil. Weather getting cooler. Want of rain is still felt in the Tamluk and Ghatal subdivisions. Indigo and some of the *rabi* crops are being sown. Prices of common rice:—

	Srs.	
Sadar	16	per rupee.
Contai	22	
Tamluk	16	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 0·19. Weather seasonable. Prospects of crops fair. Harvesting of *aus* and jute continues. Ploughing for *rabi*, crops going on. A considerable area of *aman* land remains unplanted owing to short rainfall in the early part of the year, as has already been reported. Fodder and water sufficient. Health of cattle generally good. Rice sells at—

	Srs.	c.	
Sadar	12 to 16	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	17	8	

Murshidabad.—Rainfall nil. Weather seasonable. Estimated outturn of *aman* 10 to 12 annas. *Rabi* promising well. Harvesting of jute nearly over with average outturn. Sugarcane doing well. Rain much wanted. Fodder sufficient. Common rice sells at 16 seers a rupee.

Khulna.—Rainfall at Khulna nil, Bagerhat 0·25, Satkhira nil. Weather cooler. Harvesting of jute still going on in some places. Grain in the ear of *aus* not full. *Aman* doing well. Fodder and water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	c.	
Sadar	16 to 21	0	per rupee.
Bagerhat	22	2	
Satkhira	16	0	

Dinajpur.—Rainfall nil. Prospects of standing crops good. Price of common rice 15 to 16 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Rainfall nil. Weather hot during day, but cool early in the morning and late at night. Transplantation of *aman* and steeping of jute nearly finished. Land is being ploughed for tobacco in some places. Prospects generally favourable. Rice selling from 12 to 14 seers per rupee. Fodder sufficient. Cattle-disease still prevailing in some parts of the Nilphamari subdivision.

Pabna.—Rainfall nil Weather hot at day, but cool at night. Prospects of *aman* paddy good. Harvesting of jute at Sirajganj completed. Lands being prepared for *rabi* crops. Fodder sufficient. Common rice sells at Sadar 16 seers and Sirajganj 14½ seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Price of common rice 16 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall nil. Weather dry and cool. Transplantation of *aman* finished. Tea prospects bad. Water and fodder sufficient. Rice selling at 16 seers per rupee.

Patna.—Rainfall nil. Prospects of paddy favourable. Sowing of mustard, wheat and gram commenced in places. Common rice sells at 21 seers per rupee. Condition of cattle good. Fodder and water sufficient.

Gaya.—No rain anywhere. Paddy suffering severely on high lands and will be much injured on others also if no rain falls within a week. Rain also needed for *rabi* lands. Common rice sells at 15 seers per rupee, which is cheaper than average.

Champaran.—No rain. *Bhadoi* crops are still being harvested with 14 annas outturn. *Rabi* crops are being sown. Prospects of *aghani* rice good. Fodder and water for cattle sufficient.

Darbhanga—No rain. *Bhadoi* harvest over; outturn good. Prospects of rice crop continue favourable, but rain wanted in places. *Rabi* sowings commenced. Prices stationary. Fodder plentiful.

Bhagalpur.—No rain. Weather seasonable. More rain is needed in Banka and Supaul for high land paddy. Prospects otherwise fair. Coarse rice sells at 18 seers 15 chitaks per rupee. Fodder and water sufficient.

Purnea.—No rain. *Aghani* paddy is doing well, but rain is badly wanted. *Rabi* sowings going on. Fodder and water sufficient. No cattle-disease. Common rice selling at 16 to 25 seers a rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *beali* rice continues. *Sarad* rice doing well. Sowing of *rabi* crops going on. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	27	8	per rupee.
Jajpur	34	2	
Kendrapara	27	14	
Banki	27	8	

Hazaribagh.—No rain. Rain is badly wanted in the Giridi subdivision. Prospects of paddy crops generally fair. *Rabi* sowings in progress. Cattle-disease in places. Fodder plentiful. Common rice selling at Sadar 16 seers and Giridi 14 seers per rupee.

General Summary.—There was no rain in any of the reporting districts during the week except a slight shower in the 24-Parganas. The general prospects of the winter rice crop continue good, but in some districts it is now in need of more rain. As previously reported, considerable portions of the rice land in the Burdwan and Presidency Divisions remain uncultivated owing to deficient rainfall. The preparation of lands for the *rabi* crops is generally going on, and the early sowings have begun. No cattle-disease is reported except from Rangpur and Hazaribagh. The price of common rice is generally steady, but in Cuttack it has fallen owing to the appearance of the new *beali* crop in the market.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 15*th October*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the ret[urns are] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when [...] has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 12TH OF OCTOBER 1895.

FINE settled weather has prevailed during the past week over both the province and the Bay, but with features somewhat more marked than usual in the early part of October. Following the stormy weather which passed over Lower Bengal on the 1st and 2nd, a high-pressure distribution developed similar to what obtains during the cold-weather months. Throughout the whole of the week ending on the 12th, pressure readings have been highest in the north of the province and lowest in the extreme south of the Bay, more especially towards the Madras coast, where conditions have been favourable for the commencement of the north-east monsoon. The changes of pressure have been of the oscillatory character usual in fine weather. It fell slightly at the beginning and end of the week, and rose slowly to moderately in the middle, the high readings becoming considerably more marked. On the 9th excess was between ·1 and ·14 inch except in East Bengal, where readings were slightly lower, and on the 10th it was again high in the north of the province, but was giving way in Orissa and Chota Nagpur.

Owing to this arrangement of pressure winds have been northerly almost everywhere. They have generally been south or south-west in the west of Bihar, but elsewhere, if not light and variable, they have had a steady northerly tendency. As a rule directions have been north-easterly over the Bay; and as there has been no depression of any importance except the wide-diffused low-pressure area, extending across the south of the Bay, the moist air of the south-west monsoon has drifted towards the Madras coast, where at the end of the week moderately heavy general rain was falling.

After the setting in of the northerly winds a change of temperature became general. It was first shown in the west of Bihar, but it spread very quickly towards the south-east, affecting the night more than the day temperatures. Minimum temperature fell several degrees below 70° at all stations, except a few in Lower Bengal and chiefly in East Bengal. In Chota Nagpur the lowest night readings were 63°, in Bihar between 66° and 67°, and in South-West Bengal and part of Orissa about 67°. In the other districts there was greater irregularity, but everywhere considerable defect. At the same time maximum temperature was above the normal, so that the large defect during the night was partly neutralised, and does not affect the means for the week so much as might have been expected. The highest day readings were with few exceptions on the 6th.

In the early part of the week the sky was almost cloudless, but towards the end, owing to some local causes, there was a general increase of cloud over Lower Bengal and Orissa. It slowly intensified, and gave rise to a few scattered showers of but little importance.

Pressure.—As stated above, only small oscillations in pressure have obtained such as occur in settled weather. Readings were high at the beginning of the week, and have remained so throughout, excess increasing somewhat about the middle. Means are above the normal everywhere by amounts varying from ·05 inch in east Bengal to ·1 inch in the north of the province.

Temperature.—As stated above, the northerly winds caused a large fall in temperature, which was more apparent in night than in day readings. The means for the week are below the normal in all districts by fairly uniform amounts. In Chota Nagpur and North Bengal defect is about 1°, in South-West Bengal 1° ·3, and in East Bengal and Chota Nagpur about 1° ·5. In Bihar it is nearly 2°, and in Assam somewhat over 2°.

Rainfall.—Showers were still falling in East and North Bengal on the 6th, the first day of the week, but since then there has been practically no rain. Bihar and Chota Nagpur have received none, South-West Bengal and North Bengal less than a tenth of an inch, while in East Bengal and Orissa there has been about a quarter of an inch. In Assam, Sibsagar and Dhubri report light showers—less than a tenth of an inch in all, and Silchar none.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 12th of October 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895.

The number of hours with winds from each of the 8 points—

N. 30, N.E. 54, E. 81, S.E. 95, S. 115, S.W. 135, W. 53, N.W. 36, Calm 121.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The total fall from 1st January to 12th October 1895	38·73
The average fall of the corresponding period for 24 years, Surveyor-General's Office	61·62

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; p, passing temporary showers; ▲, dew.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS.

The 21st October 1895.

RESOLUTION No. 362T.—G.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Orissa Division for the year 1894-95 for general information.

2. The following passages in the report contain Mr. Cooke's views on some important points to which His Honour desires to call the attention of officers:—

Paragraphs 55-76.—The economic condition of the people and relief given by emigration.

Paragraphs 88-97.—The salt question. This is under the separate consideration of Government, and there is much that is useful and instructive in these remarks.

Paragraphs 125-28.—The proposal that Banki and other outlying parts of Cuttack should be transferred to Puri seems good, and should be separately submitted.

Paragraph 193.—The proposal to establish Benches of Honorary Magistrates in the mufassal, away from the control of Government officers, is not viewed with favour by Government.

Paragraphs 299-300.—Shelters for pilgrims at Puri and on the road thither. The Commissioner's remarks bring out the caste difficulties.

Paragraph 317.—The relation of the Commissioner to the Educational Department should be closer.

3. The Lieutenant-Governor regrets to notice that nothing has been said in paragraph 358 of the Report about the water-supply at Puri as to whether the subject has engaged the attention of the District Boards, and whether anything is being done or is needed for its improvement.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR 1894-95.

No. 1059R., dated Cuttack, the 5th July 1895.

From—H. G. COOKE, ESQ., C.S.I., Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following Report on the General Administration of the Orissa Division for the year 1894-95.

2. This year I directed the District Officers to submit their reports part by part, for the sake of convenience. The last contributions were received on the dates shown in the following statement:—

DISTRICT.	Name of officer submitting the report.	Date of report.	Date of receipt in Commissioner's office.
1	2	3	4
Cuttack ...	Mr. W. Maude ...	Submitted piecemeal on various dates.	12th June 1895.
Balasore ...	" B. De ...		1st June 1895.
Puri ...	" A. C Sen ...		Ditto.

Complete information was not received from Balasore till 26th June, and from Puri till 2nd July 1895. Certain information called for from Cuttack has not yet been received.

I.—CHARGE.

3. The subjoined tables give the details of such changes as occurred in the Divisional, District and Subdivisional Administration during the year under report.

(a) Commissioner.

DIVISION.	Name of Officer.	From—	To—
1	2	3	4
Orissa ...	Mr. H. G. Cooke ...	1st April 1894 ...	28th February 1895
	" G. Stevenson ...	1st March 1895 ...	31st March "

(b) District Officers.

DISTRICT.	Name of officer.	From—	To—
1	2	3	4
Cuttack ...	Mr. G. Stevenson ...	1st April 1894 ...	13th October 1894.
		13th November " ...	28th February 1895.
	" H. McPherson ...	14th October " ...	12th November 1894.
	" W. Maude ...	1st March 1895 ...	31st March 1895.
Balasore ...	" C. H. Bompas ...	1st April 1894 ...	15th May 1894.
	" S. L. Maddox ...	16th May " ...	25th October "
	" B. De ...	26th October " ...	31st March 1895.
Puri ...	" H. R. H. Coxe ...	1st April " ...	22nd February "
	" A. C. Sen ...	23rd February 1895	31st March "

(c) Subdivisional Officers.

Subdivision.		Name of officer.	From—	To—
1		2	3	4
Cuttack	Jajpur	Babu Monmohan Chakravarti ...	1st April 1894	31st March 1895.
	Kendrapara ...	" Nabin Chandra Das ...	Ditto ...	9th December 1894.
		" Tara Prasanna Acharya ...	10th December 1894	31st March 1895.
Balasore	Bhadrak ..	" Nagendra Nath Ghose ...	1st April "	27th December 1894.
		" Basanta Krishna Bose ...	28th December "	28th March 1895
		" Sriram Chandra Bose ...	29th March 1895	31st " "
Puri	Khurda ...	Mr H. McPherson	1st April 1894	31st August 1894.
			2nd October "	5th October "
			15th November "	31st March 1895.
		Babu Monmohan Roy ...	1st September "	1st October 1894.
			6th October "	14th November "

4. Except in the Jajpur subdivision, there was no continuity in the year's administration in the *personnel* of officers in charge of the Division or of the districts and subdivisions.

II.—TOURS AND INSPECTIONS OF OFFICES.

5. The details of the tours made by the Officers of this Division are shown in the following tables:—

(a) Commissioner of the Orissa Division (and Superintendent of Tributary Mahals).

Name.	Number of days on tour.												Total.

6. It will be seen that with the exception of the District Officer of Cuttack, the tours of all others were far in excess of the standard prescribed, which is very satisfactory. The tours appear also to have been well distributed throughout the year. The short tour in Cuttack is said to be due to the changes in the *personnel* of the District Officer.

(a) *Commissioner's Tours.*

7. The tour of the Commissioner and Superintendent of Tributary Mahals extended over 176 days, out of which 167 days were performed by me and 9 days by Mr. Stevenson during my absence on leave in March 1895. Of the total number of days spent in camp, 80 were devoted to inspection duty in the regulation districts and 96 to the Tributary Mahals. An account of the latter will be given in my Annual Report on the Administration of those Mahals.

8. My tour began with the reception of His Honour the Lieutenant-Governor, whom I met at Chandbali on the 1st April 1894. On the 7th I accompanied His Honour from Cuttack to Balasore, whence, on the 12th, I embarked with His Honour for Calcutta. I came back to Chandbali on the 19th, where I inspected the khas mahal office and discussed various matters with the Sub-Deputy Collector, the Port Officer being away. I returned to head-quarters on the 20th April.

9. On the 13th May 1894 I proceeded to Puri, and returned therefrom on the 17th June 1894. During this time the office in all its branches, the Treasury, the Local Fund, Municipal, District Board and Registration offices, were thoroughly inspected. I also found time to visit and inspect the salt factories at Tua and Gurbao on the Chilka Lake with Mr. Simpson, Assistant Commissioner of Salt Revenue, and Mr. Parish, the officer in immediate charge.

10. On the 9th July 1894 I started again for Balasore, reaching it on the 11th. After a day's halt, occupied in disposing of office work, I visited the Tributary State of Nilgiri. From the 16th July I was engaged in inspecting the Balasore offices, which, with the exception of the Municipal and District Board offices, were completed on the 21st. I then visited the Moharbhanj State. On my return I inspected the remaining offices at Balasore, and left for Bhadrak on the 4th August 1894. After completing the Bhadrak subdivisional office inspection, I returned to Cuttack on the 9th.

11. On the 4th February 1895 I proceeded to Calcutta on casual leave. On return on the 14th I proceeded to the Kendrapara office, which I inspected, and returned to head-quarters on the 16th.

12. On my leaving the Division on three months' privilege leave on 1st March 1895, my *locum tenens*, Mr. Stevenson, inspected Chandbali from the 9th to 11th, and the Khurda subdivisional office and sub-treasury from the 20th to the 25th March 1895.

13. The subdivision of Jajpur alone was not inspected by the Commissioner; this I intended to dispose of in March 1895. I went on leave in that month, and Mr. Stevenson did not think it necessary to inspect the office as Commissioner, having shortly before inspected the subdivision as Collector.

(*b*) *Tours of Collectors.*

(*c*) *Tours of Sub-divisional Officers.*

14. *Cuttack District.*—Though the touring fell short of the standard by three days, its efficiency does not appear to have suffered, as the Collector's tours were directed to all parts of the district and were thorough in every respect.

15. It may be noted that as Commissioner Mr. Stevenson put in nine more days, which makes the period spent in camp by him exceed three months. Mr. Maude, who acted for Mr. Stevenson during March, is not reported to have done any camping as Collector, though he certainly did some in the course of the year as Settlement Officer.

16. The half-yearly inspections of the subdivisions were duly made by Mr. Stevenson, who also very usefully spent his tours in inspecting thanas, lock-ups, dispensaries, Municipal, Local Board and Sub-Registrars' offices, excise shops and golas, *chatties* and sanitary works.

17. He also visited schools, police outposts, pounds and wards' offices. He was engaged in inquiries in connection with the damages done by the floods of July and August in August and September, and in making arrangements for the relief of sufferers.

18. *Jajpur Sub-division.*—The Sub-divisional Officer inspected almost all public institutions and public works, some once and some twice. During the summer months he was chiefly engaged in making inquiries about compensation proposed to be paid for removing a large number of houses along the banks of the Baitarani, Bura, and the Kharsua rivers by the Public Works Department. From June to December his tours were principally occupied in examining the state of crops affected by the high floods of July and the condition of the people, and in the closing quarter of the year he visited some remote tracts of the sub-division which had previously escaped inspection by public officers. He is said to have held office in various places while in camp, and thus found opportunities for familiarizing himself with local wants and feelings.

19. *Kendrapara Sub-division.*—Babu Nobin Chandra Das visited almost all the important parts of the subdivision, making special inspection of inundated tracts and making inquiries about the state of the crops and the condition of the people, and arranging for relief operations. He also inquired into complaints made against the Raja of Aul of levying illegal cesses. He and Babu Tara Prasanna Acharya inspected between them all the thanas and outposts, schools, village roads, tahsil offices under the Court of Wards, and ferries. Experiments with a view to ascertain the outturn of crops were made by Babu Tara Prasanna Acharya while on tour.

20. *Balasore District.*—The district was successively in charge of Messrs. Bompas, Maddox, and B. De. Mr. Bompas inspected the police-stations at Basta and Baliapal, the offices of the Managers of the Shahbunder and Jamkunda Wards' estates and *chatties* at Basta. Mr. Maddox, inspected the police-stations at Soro and Bhadrak, some *chatties* on the Trunk Road, rain-gauges at Bhadrak and Soro, and dispensaries at the above places and at Chandbali, where also the school and the Port, Customs and Honorary Magistrate's offices were inspected. While at Bhadrak, the khas mahal office and sub-jail were inspected by him. He visited some of the villages in thanas Chandbali, Basudebpur and Dhamnagar which were affected by the floods of July and August 1894, and made arrangements for relieving distress. He made local enquiries into certain questions connected with the drainage of the southern part of the district, and about the desirability of cutting the Nadigan embankment. He also made enquiries into the grievances complained of by raiyats in regard to settlement.

21. Mr. De inspected eight out of the nine thanas of the district and six outposts and pounds. He also inspected lower primary schools at different places, the *chatties* on the Trunk Road and at Chandbali, excise shops, customs

offices at Dhamra and Chandbali, dispensaries, kanungos' offices, the office of the Manager of the Jamkunda Ward's estate, district and village roads, khas mahal offices, and other institutions in the district. Enquiries were also made by him into the state of crops and into matters connected with drainage, health, sanitation and the wants of villagers.

22. *Bhadrak Subdivision.*—The Subdivisional Officer, Babu Nagendra Nath Ghose, put in 84 days touring from May to November 1894. His uncertainty as to the date of his being relieved prevented his going out in December. His successor, Babu Basanta Krishna Bose, however, seems not to have been in camp at all in January and February, and for only seven days in March; he then proceeded on leave after conspicuously neglecting his touring; no explanation of this is given. The Sub-divisional Officer's inspections were as usual directed to seeing pounds, kanungos' offices, road works, a number of excise shops, and lodging-houses. The areas affected by the flood were also inspected, and the accounts of khas mahal sarbarakars examined, the check receipts granted to raiyats being compared with the sarbarakars' counterfoils.

23. *Puri District.*—The tours performed by Mr. Coxe in April, May and October 1894 were entirely devoted to the affairs of the Nyagarh and Runpur Tributary States. In April, however, he visited the salt works at Satpara and Gurubai, went to Joypur on the pilgrim road, where he examined latrines in which alterations in structure had been proposed, and the site of the proposed dispensary. Thence he went up to Pipli, inspected the dispensary there, and enquired into a small outbreak of cholera in an adjacent village.

In June and August he inspected the Pipli thana, some of the lodging-houses on the pilgrim road, and the land acquisition and the subdivisional offices at Khurda.

In September he enquired into the distress alleged to have been occasioned by the floods caused by the Bhargovi and Kushabhadra rivers, and the breach of the embankment at Gabkund. During the remaining days of his tour he was engaged in inspecting kanungos' offices, excise offices and shops, dispensaries, registration offices, police thanas and outposts both at Khurda and in the interior of the district.

24. Mr. Sen, who took charge of the district on the 22nd February 1895, spent only nine days in the latter part of March in visiting the Gope thana, situated at the north-east corner of the district, which Mr. Coxe had not been able to visit. He enquired into the condition of the people who lost their crops by the breaches in the embankments of the Bhargovi and Kushabhadra rivers, and inspected outposts and kanungos' offices. At Astrang he inspected the progress of the District Board bungalow.

25. *Khurda Subdivision.*—With the exception of October 1894, the subdivisional tours were distributed over all months of the year, Mr. McPherson putting in 124 days and Babu Monmohan Roy 19 days, out of the total 143 days. Mr. McPherson gave his attention to all the important questions of the subdivision requiring local enquiries.

26. Mr. McPherson took a very active and personal interest in the work of training the sarbarakars in their duties of maintaining the settlement record up to date. These men have now been trained in schools, and their work has been under the frequent and personal supervision of Mr. McPherson. He paid three visits to the remote and difficult Banpur Mal with its Khond population and mountainous formation. He personally checked the returns of remissions that were to be granted to the Government tenants, by inspecting the affected area; he also paid frequent visits to the spots where experimental cultivation was in progress, and visited cholera-stricken areas with a view to detect the cause and supply a remedy.

27. In fact Mr. McPherson does not appear to have omitted to give the fullest personal attention and supervision to the various special works of importance and interest which are mostly peculiar to his very interesting charge, the Khurda estate and subdivision.

28. Babu Monmohan Roy, who acted as Sub-divisional Officer for the short time that Mr. McPherson was on leave and deputation, spent the 19 days of his touring in inspecting a large number of outposts, making local enquiries into waste land disputes and proposals about improvement works, and in checking sarbarakari accounts.

(d) *Inspection of District Offices and Treasuries.*

29. The following inspections were made by—

(1) *Commissioner.*

	District Offices.			District Treasuries.		
	Cuttack.	Balasore.	Puri.	Cuttack.	Balasore.	Puri.
1	2	3	4	5	6	7
Dates of inspection ...	October 1894 ...	July 1894 ...	May 1894 ...	October 1894 ...	July 1894 ...	May 1894.

(2) *Collectors.*

Dates of inspection	August and September 1894. March 1895 ...	September 1894 March 1895 ...	July and August 1894. January, February and March 1895.	October 1894 March 1895.	September 1894 March 1895 ...	April 1894. March 1895.

(e) *Inspection of Sub-Divisional Offices and Treasuries.*

30. The following table shows the dates of inspections:—

Inspections made by—	Sub-divisional Offices.				Sub-treasuries.			
	Jajpur.	Kendrapara.	Bhadrak.	Khurda.	Jajpur.	Kendrapara.	Bhadrak.	Khurda.
1	2	3	4	5	6	7	8	9

31. Only the Bhadrak sub-treasury remained uninspected by me. Mr. Stevenson took up the inspection of this subdivision in my absence.

III.—WEATHER AND CROPS.

32. Great variations are to be observed not only from station to station, but also from year to year. In imitation of the Patna Division Report, 1893-94, I have prepared the following statement from the *Calcutta Gazette* to show the rainfall month by month in each district:—

Statement showing actual rainfall month by month in each district as compared with normal average rainfall.

Month.	Cuttack.		Balasore.		Puri.		Average for Division.		Remarks.
	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	
1	2	3	4	5	6	7	8	9	10
April 1894 ...	1·37	1·24	2·43	1·68	1·69	0·50	1·83	1·17	The figures shown in columns 2, 4 and 6 differ from those shown by District Officers in column 4 of Appendix I, which is due to the omission of the following rainfall stations in the District Returns, viz.— *Cuttack.* Jagatsingpur. | Dharmsala. False Point. | Salepur. *Balasore.* Aonapada.
May " ...	0·65	3·59	1·15	4·75	0·25	2·72	0·68	3·69	
June " ...	15·33	9·56	8·75	8·40	9·07	8·42	11·05	8·79	
July " ...	15·75	12·31	25·16	13·01	11·66	11·93	17·52	12·44	
August " ...	9·23	11·03	8·90	11·41	10·02	11·88	9·38	11·44	
September " ...	6·45	9·63	6·86	11·10	7·54	9·82	6·95	10·18	
October " ...	7·76	5·63	4·70	5·25	7·50	8·18	6·65	6·35	
November " ...	2·76	1·35	3·04	0·89	3·74	2·34	3·18	1·53	
December " ...	0·26	0·58	0·00	0·30	0·40	0·80	0·33	0·56	
January 1895 ...	0·13	0·40	0·05	0·44	0·87	0·20	0·35	0·35	
February " ...	0·90	0·80	1·07	1·06	0·89	0·81	0·95	0·89	
March " ...	0·25	1·07	0·64	1·39	0·29	0·70	0·39	1·32	
	60·84	57·19	62·75	59·58	53·92	58·45	59·17	58·41	

33. It will be seen that the figures in this statement slightly differ from those which were supplied by the District Officers. This difference is probably due to the stations Jagatsingpur, False Point, Dharmsala and Salepur in the district of Cuttack, and Acquapada in the district of Balasore, which appear in the statement of the Meteorological Department published in the *Calcutta Gazette*, being omitted from the statements of the District Officers. It is not known why the observations at these stations were omitted from the district reports. Enquiry will be made about it.

34. The rainfall was well distributed and was neither too much nor too little. But the condition of the districts of Cuttack, Balasore and Puri does not depend on the rainfall of those districts alone. The Mahanadi takes its rise in Central India and drains a vast tract of country. Similarly the Brahmini, the Byturni and the Subarnarekha take their rise among hills far beyond the limits of the three districts, and bring down the rain water from those parts. The condition of the three districts is thus more or less affected by the rainfall in other regions. Though the rainfall was not excessive and was well distributed, considerable tracts were affected by the unusually high floods of the Mahanadi, Brahmini-Byturni, and the Subernarekha, in July and August, on account of the heavy rainfall in the hilly tracts which those rivers drain. Great damages were suffered, in some parts to such an extent as to necessitate relief measures on a small scale.

35. Relief was given by the timely action of the District Boards of Cuttack and Balasore, aided by the liberality of some zamindars whose services will be acknowledged under heading "Conduct of zamindars." But for the mischief done by floods, I believe that the rice crop would have broken the record for Orissa generally; as it was, it was greatly in advance of recent averages.

36. The lesson to be derived from the above fact is that a rainfall in excess of the average is advantageous; the *Calcutta Gazette* averages given in column "normal" are higher than those given by Sir W. Hunter by 2 to 4 inches. The figures now adopted show either that the statistical account is incorrect, or that the climate of the Division has become slightly more rainy than formerly.

37. Almost all the crops were better than in the preceding two years. This, combined with a fall in the export trade, led to much improvement in the condition of the people after successive partial failures of crops in the previous years.

IV.—PUBLIC HEALTH.

38. The following statement compares the number of deaths and the death-rate per mille in the different districts during the last two calendar years:—

District.	Population as per census of 1891.	Number of deaths from—										Rate per mille.	
		Cholera.		Fever.		Small-pox.		Other causes.		Total.			
		1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Cuttack ...	1,937,671	2,884	6,712	23,641	37,390	2,135	1,719	19,354	22,357	47,014	68,108	24·26	35·14
Balasore ...	994,625	1,825	4,905	11,290	14,859	not given.	210	12,610	12,784	25,725	32,758	25·91	32·99
Puri	944,998	1,763	1,993	7,293	8,302	2,415	405	15,957	18,367	27,428	29,067	29·02	30·75
Total ...	3,877,294	6,472	13,610	41,224	60,481	4,550	2,334	47,921	53,508	100,167	129,933	25·8	33·5

39. The public health during the year, as will be seen from the above figures, was far from being satisfactory, there being an increase in the mortality

from all causes in all the districts, small-pox only excepted, which shows a considerable decrease.

40. The following tabular statement shows at a glance the death-rate per mille of the population during the past five years, and how the Division fared with regard to health during the year under report:—

Year.	Cuttack.	Balasore.	Puri.	Total.
1	2	3	4	5
1890 ...	21·61	25·98	24·23	22·5
1891 ...	23·38	26·18	27·76	25·
1892 ...	38·34	43·61	37·86	39·
1893 ...	24·26	25·91	29·02	25·8
1894 ...	35·14	32·99	30·75	33·5

Cuttack.

41. The increased number of deaths in this district from cholera, fever and bowel-complaints is attributed in a great measure to the bad crops of the preceding year and the consequent high prices of food-grains which led to scanty nourishment and weakened constitutions less capable of withstanding the inroads of disease. The distress was aggravated by the high floods of July, which forced the poorer classes in the affected tracts to supplement their scanty meals of rice by jungle products. This, followed by excesses when the *beali* and the *saradh* crops gave opportunities for full meals, no doubt caused a considerable increase of bowel-complaints, culminating in diarrhœa, dysentery and cholera. The stagnant water left on the subsidence of the floods no doubt had much to do with the prevalence of fever.

Balasore.

42. No attempt has been made by the Collector to assign any cause to the increase in the mortality in his district. He considers that the preceding year was an exceptionally healthy one, which in fact would appear to be the case from a comparison of the figures given above.

Puri.

43. The increased mortality from cholera was almost entirely confined to a few villages within the jurisdiction of the Khurda station, not far from the line of pilgrim traffic. In every village affected, the outbreak is said to have been clearly traceable to communication with Puri or with villages where cholera had broken out as a result of visits paid by cholera-stricken pilgrims. Every precaution was taken to prevent the spread of the disease here as elsewhere, and happily with good results.

44. The Collector considers the number of deaths from fever, though somewhat large, still not above the normal figure. It is not understood what the Collector's normal standard is. The number of deaths from fever during the year under report seems to be the highest on record since 1890, the figures standing as follows:—

1890	4,851
1891	5,541
1892	5,490
1893	7,293
1894	8,302

which show a steady increase. It is remarked that the drainage in some parts of the district during the flood season is extremely bad, and this probably accounts for the prevalence of fever in those parts.

45. The following statement gives the total number of deaths and the death-rate in the different municipalities:—

DISTRICTS.	Town.	Population.	DEATHS REGISTERED.				BIRTHS REGISTERED.			
			1893.	1894.	Rate per mille.		1893.	1894.	Rate per mille.	
					1893.	1894.			1893.	1894.
1	2	3	4	5	6	7	8	9	10	11
Cuttack ...	Cuttack	42,033	941	1,404	22·4	33·4	Not available.			
	Jajpur	11,992	372	555	31·02	46·2	395	276	32·1	23·01
	Kendrapara	17,647	510	582	28·9	28·9	654	521	37·0	29·5

* Cases inspected by different officers have been taken as so many different cases inspected.

47. The number of vaccinations performed during the year shows a vast increase over that of the previous year, which is very satisfactory. The effect produced by the protection thus afforded would appear to have been not less so as a comparison of the statistics of mortality resulting from small-pox shows a marked decrease.

48. The free system of vaccination introduced in Puri is said to have contributed much towards increasing the number of vaccinations in that district. In Balasore each licensed vaccinator is required to furnish a deposit of Rs. 10, but exceptions to this rule are made at the discretion of the Civil Medical Officer. This system is not in force in the Cuttack district.

49. The Collector of Cuttack, Mr. Maude, remarks that the villagers still seem to prefer inoculation to vaccination, and to think that it has more effect as a protective measure; but it has not been reported by him, nor by any other of the District Officers, if any cases occurred under the Prohibition of Inoculation Act IV (B.C.) of 1865.

50. Considering the population of Cuttack is more than double that of either Balasore or Puri, and singly exceeds that of the latter districts jointly, it certainly requires explanation that the amount of work done in Balasore is much greater, and that done in Puri nearly as great as that done in Cuttack. The fact may be explained by vaccinators having been at work in Cuttack for a greater number of years than in the other districts, if such indeed be the case, on which point I have no evidence. This, however, would not affect the vaccinations necessitated by the growth of population, which may be assumed to be uniform throughout the Division; and taking 5 per cent. as the increase of the province shown by the last decennial census, we may look for an annual increase of ½ per cent., which would call for 9,686 operations in Cuttack, 4,773 in Balasore, and 4,725 in Puri. Deducting these figures from the operations in each district, we have in Cuttack only 13,041 cases that cannot be attributed to the increase of population, in Balasore 32,348, and in Puri 13,709. Some reason should be forthcoming for so marked a lack of uniformity, and the matter seems one that calls for special departmental notice.

51. Considering the facts from another point of view, we find that the average number of operations to each vaccinator is, Cuttack 528, Balasore 884, Puri 714; but the contrast is most striking in column number of cases inspected.

In Cuttack about one case in six was inspected; in Balasore there were more inspections than cases, some having been inspected more than once; in Puri approximately 3 in 4 were inspected. The cost of establishment varies in a very striking way. Cuttack with 43 vaccinators cost Rs. 2,709, Balasore with 42 only Rs. 1,535, whilst Puri with 30 tops even Cuttack with Rs. 2,797. If the above figures are compiled on a uniform system, they unquestionably stand in need of elucidation, and I should suppose also that the system followed in Cuttack admits of considerable improvement.

52. No cases are reported under the Vaccination Act V (B.C.) of 1880. The attention of the District Officers will be called to this.

V.—MATERIAL CONDITION OF THE PEOPLE.

53. The year commenced badly. Prices were high owing to indifferent harvests in preceding years. No general calamity occurred in the present year, and, but for the mischief done by the overflow of the northern rivers, the Brahmini-Byturni and Kharsua, which affected the north-east part of the Cuttack and the south of the Balasore district, the year would have been marked by an exceptionally good harvest throughout the Division. As it was, the rice harvest, making allowance for the losses thus incurred, was a good one. Similar floods occurred in Puri, but without injurious effects to crops. As is usually the case, after floods some compensation for the destruction of the rice crop was derived from good *rabi* and *dalua* rice crops owing to silt deposit.

54. The effect of the harvest was very noticeable on the price of rice, which, during the latter half of the year fell greatly, the lowest price, 21 seers 14 chitaks per rupee, being reached in March 1895, which is in striking contrast to the highest price reached in the year, viz. 13 seers per rupee in July 1894.

55. This fall in prices was favourable to the non-agricultural classes, the officials, mahajans, tradesmen, artizans and day-labourers, whilst its effect on a portion of the cultivators was twofold: they had more to sell, but sold at a lower price; as it is reported they had to sell off their whole produce to satisfy their creditors the money-lenders, they had at least the satisfaction of buying or borrowing their personal requirements more cheaply than before.

56. I have never heard it directly stated that the peasants of Orissa keep a supply of rice sufficient for their household use for a year, as is done in some parts of Bengal. The evidence that exists on this point consists of Mr. Stevenson's opinion that they sold off their stocks of rice to satisfy their landlords and money-lenders; but on the other hand we are informed in the same report that stocks of rice buried in the earth were swamped by a cyclone in the month of May, that is, several months after the rice harvest, and after their accounts with landlords and money-lenders had been adjusted, and after the close of the export season. Unless these buried supplies were only seed-grain, the practice of keeping rice sufficient for a year's consumption does exist. I should like Collectors next year to notice this point, which has an important bearing on the capacity of the people to withstand a period of high prices.

57. A practice exists in Orissa of zamindars keeping granaries which are supplied from home farms and from the interest in kind derived from loans to their tenants at 25 per cent. compound interest recoverable at harvest time. These transactions, allowing for bad debts, give a safe return of 20 per cent. They affect the material condition of the people in various ways: the interest is usurious and tends to impoverish the people; they form a direct encouragement to unthriftiness by affording facilities for borrowing—a practice that it is obviously the landlord's interest to encourage to enable him to place his stock out at interest instead of it lying unprofitably in his store-house, and I am informed that loans are taken so soon after the rice harvest as February even in a good year. Thus one year's crop in the case of the poorer tenantry does not carry them over two months of the new year without the assistance of advances.

58. I have heard the proportion of tenants who habitually take such advances estimated as high as one-half of the tenantry. I believe this to be an over-estimate, but still the number who do so is great, and there is in addition the ordinary professional money-lender, who is certainly not more moderate in his terms than the landlords.

59. The subdivision of Khurda affords facilities for an intimate knowledge of the condition of the people, as the State is the landlord. Mr. McPherson, as in the previous year, has made an intelligent use of his opportunities, and his remarks again form the most interesting contribution that I have received from the District Officers towards this section of the report. It would tend greatly to improve our knowledge of the vital question under consideration if Collectors were to obtain from Wards' Managers and Tahsildars of Government estates, who enjoy opportunities similar to those that exist at Khurda, some contribution towards a precise knowledge of the condition of the people in their charges, which information would make it possible to arrive at more correct estimates of the state of the people generally.

60. Mr. McPherson's conclusions last year were that, while mahajans and agriculturists had prospered, and the wages of artizans had increased, the wages of labourers had not advanced with prices, and that this class was increasing not only by growth of population, but by considerable recruitment from among the smaller peasantry.

61. Mr. McPherson's later enquiries confirm these opinions. The only modification of them that I can find is that so long as the labourer is paid in kind, as is usually the case when he works for an agriculturist, his actual earnings are not affected by the rise in prices. Some agriculturists, however, pay in money at from 1½ to 2½ annas a day, and on rare occasions as much as 3 annas.

62. The labourer's wages in kind is three standard seers a day. It is not stated whether regular employment at these rates is ensured throughout the year; but in other parts of the country I know that the agriculturist makes it his business to look after the interests of his farm labourers to the extent at least of keeping them from starvation.

63. I referred last year to the condition of semi slavery of these farm labourers. They, like slaves, are too valuable to be allowed to die of want, except in seasons of famine when their employers themselves are in difficulties.

64. Mr. McPherson, with reference to this class, writes: "In the house of almost every cultivator who owns more than 5 acres of land, farm servants, here called *halias*, are employed. Their supply is proportioned to the amount of land at the rate of one to every 5 or 10 acres. They are paid Rs. 12 to Rs. 18 per annum, and in addition receive their daily food and an annual supply of clothing valued at about Rs. 2." Where they do not mess with their employers, they receive half the remuneration of a hired labourer. They have in nearly all cases taken advances, which fact forms the barrier to their becoming free men.

65. The case of labourers who work for contractors differs from that of these farm labourers in being worse. They too, I learn from other sources, have taken advances which bind them to one employer, and thus stand in the way of competition rates in wages, and makes it necessary for them to accept wages that do no more than provide a bare subsistence.

66. The conclusions arrived at by Mr. Sen are that the labouring classes are swelled by the decrease in the size of the holdings, due to sales to mahajans making men who were previously peasants supplement their reduced incomes by working for others.

It is clearly true that the class is also increased by smaller tenants selling all the land they possess, and also by the natural growth of the population. There appears, therefore, an unquestionable tendency for the labouring class to increase more rapidly than the demand for their services in existing local pursuits.

67. There are happily certain safety-valves available, namely, railway works and service in Calcutta and its neighbourhood, which latter already provides for some 100,000 natives of Orissa. There is also emigration to the extensive waste lands in the Gurjat, and, so far as may be, utilizing unoccupied culturable land in the Division, which, in the hilly parts at least, is not yet exhausted; but to fully utilize such waste lands it will be necessary to contract the area of protected forest; but I conceive that no considerations of forest policy should stand in the way of ameliorating the condition of the people, which, we have to confess in the case of a portion of the labouring classes is deteriorating.

VI.—EMIGRATION AND IMMIGRATION.

68. One depôt for emigration to British Guiana under Act XXI of 1883 was opened in the Cuttack town during the year, and 26 coolies (21 adults and five children) were sent to Calcutta for shipment to that colony; but the business was closed in November owing to no coolies of the class that would be accepted by the Calcutta Agent being procurable in the months of September and October 1894.

69. No emigrants were registered under Act I of 1882, but the following free emigrants passed through the cooly depôts in Cuttack and Balasore, there being no such depôts in Puri:—

	1893-94.	1894-95.
Cuttack	611	741
Balasore	159	89
Total ...	770	830

The above shows a falling off in Balasore, but a large increase in Cuttack more than compensating the loss in Balasore.

70. There were at the end of the year two rest-houses for free emigrants in Cuttack, and three in Balasore, one having been closed in each of these two districts. The depôts were regularly inspected by the Magistrates and Police Inspectors, and their sanitary condition was found to be satisfactory. The premises selected for the British Guiana depôt were passed as suitable by the Civil Surgeon.

71. The usual movement of labourers between Chandbali and Calcutta continued during the year. From the Puri district a large number of people visit other districts. The Panda Brahmans of the towns of Puri, Satyabadi and Bhubaneswar visit almost every part of India in search of pilgrims, and a large number of people also go to Sambalpur in connection with a lucrative trade in cocoanuts.

72. The Subdivisional Officer of Khurda reports that a few labourers left for Cuttack perhaps *en route* to Calcutta and Assam, and that there was, as in the previous year, a small influx of South Indian and up-country workmen owing to the railway construction works.

73. There was no immigration during the year.

74. The Census Report, 1891, volume III, page 85, gives the total number of emigrants from Orissa to Western Bengal at 44,231 males and 8,633 females, total 52,864 or over half a lak, which bears a very large proportion to the stay-at-home Uriyas, who number in the three districts only 3,837,294. The percentage of emigrants to the stay-at-home population is 1·34, but this represents only the balance who happened to be absent from Orissa at the time the census of 1891 was taken. The emigrants, however, from Orissa are not a constant quantity and are continually changing the individual items that make up the total, as may be seen from the number of passengers who are continuously going and coming between Chandbali and Calcutta. Making every allowance for pilgrims and others, it would be a moderate estimate, I believe, to place the passengers of the purely labouring and emigrant class at 1,000 a week or 52,000 a year, approximately the number to be found at any one time in Calcutta and the adjacent districts. Therefore the number of Uriyas who get employment in these places is probably twice as large as the census table shows. While some return to their homes, others go and fill up the vacancies. I should therefore place the number of emigrants from Orissa to these places at a hundred thousand a year, it being understood that the *personnel* of the emigrants is continually changing.

75. The same table (B) shows that the Uriyas contribute but a small portion to the 66·3 per cent. of the population which is due to immigration. Bihar contributes over two lakhs, which gives a percentage on the resident population of Bihar of ·941 as against 1·34 from Orissa. It is difficult to arrive at the percentage for the rest of the province, as Bengal has been divided into contiguous and other districts; but the figures of the two categories together would give but a small ratio to the population of the Bengal districts collectively. Even disregarding the additions to the census figures of immigrants from Orissa due to the perpetual coming and going of the emigrants,

which is probably balanced by similar conditions in the case of Bihar, Orissa contributes relatively half as much again to the immigration as compared with Bihar, allowance being made for differences of population.

76. The above fact is the more remarkable as the population of a very considerable portion of Bihar is over 800 to the square mile, and nowhere less than between 400 and 600, which is the density of Orissa. The conclusion that I deduce from the above is not that poverty is greater in Orissa, but that the Uriya is possessed of more enterprise. He is, moreover, capricious or fastidious in adhering to Calcutta and the adjacent districts as his field for emigration other than agricultural emigration. We do not find him in Assam or in the other tea districts.

He emigrates still to some Tributary States, as he has always done, in search of land and a permanent home. He has with the same object spread into Madras and the Central Provinces, as may be proved by the fact that he has introduced the Uriya tongue in these regions.

VII.—PRICES OF FOOD AND LABOUR.

77. On the whole it is satisfactory to note that the prices of food-grains, especially common rice, which is the main staple of food, ruled considerably lower at the end of the year under report than at a corresponding period in either of the two preceding years. The prices, however, were unfavourable from the beginning of the year till the harvesting of the saradh or winter rice—a state of things which in Cuttack was due to short crops in the previous two or three years, combined with a brisk export trade, and a depletion of the stock by damage caused to paddy stored under ground by the unusually heavy rains of May 1893 and the high floods of July 1894. All these events conspired to raise the price not only of common rice but of all food-grains, and the result was scarcity and distress until a full average outturn of rice crops lowered the prices to the range at which they prevailed during the last fortnight of the year.

78. In Balasore there has been a gradual fall in the price of rice since 1892-93, which is due to the successive good crops and to a decrease in the export trade from the district.

79. In Puri common rice stood at 15 seers per rupee in April, and gradually rose to 12 seers in August; but with the prospect of a good crop the price gradually fell again, reaching 23 seers 10 chitaks per rupee after the harvest.

PRICES OF LABOUR.

80. Wages remained much the same in Cuttack and decreased, in the case of superior masons, in Balasore, which is attributed to less work in the Public Works Department and to the cheap price of food-grains. The wages of coolies in Balasore show an increase. It is said that the idle habits of this class of people, and their disinclination to work unless absolutely compelled to do so, have served to raise their value.

81. Puri shows an almost all-round decrease in the wages of labour, which is attributed to decrease in the prices of food.

82. It may be noted that the prices shown in the statement represent those which prevail at head-quarters. Prices in the interior are much lower. In rural tracts in the interior labourers are ordinarily paid in kind, and their wages therefore vary with the price of the staple food.

83. In rural areas artizans are not remunerated in accordance with what might be called the market value of their services; they are the servants of the village and perform such services as are necessary to the community in consideration of holding service lands, and by contributions in kind from each tenant. Where no service lands are held by the village blacksmith or carpenter, these are remunerated entirely in kind, as I have found to be the case in Bengal. I am informed this system is dying out, and I am not sure that this is to be regretted; on the one hand it ensured some sort of handicraftsman being available in each village, but there is a danger, in the absence of competition or a very high standard of morals, that it would ensure inefficiency also. It possibly is answerable for the low standard of efficiency attained by rural artificers.

VIII.—MANUFACTURES AND MINES.

84. Except the silver filigree work of the town of Cuttack, there is no manufacture worthy of special notice, though many articles are manufactured on a small scale and for local use.

85. Tobacco is cultivated and manufactured, but is not known as an article of export. No sugar is manufactured, though sugarcane is cultivated and used for the preparation of molasses for local consumption. The same is the case with oil, brass and bell-metal utensils, coarse and tasar cloth, gold and silver ornaments. Iron smelting was carried on to a small extent in killa Sukinda. The Collector of Cuttack says that the manufacture of Gulnagari muslin in the Kendrapara subdivision is on the decline on account of the competition of cheap machine-made goods. I understand that paper used to be largely manufactured at Padmapur, a place a few miles from the town of Cuttack, and this was in old times the principal source of supply of paper for the Division. The industry has declined owing to the competition with imported cheap paper of better quality. The manufacture would have probably altogether disappeared were it not that such paper, owing to its durability, is still in demand in the Cuttack Collectorate, where it is used for fly-leaves of records.

86. There was formerly a very considerable salt industry on the Orissa coast, which has now entirely disappeared, thereby entailing the loss of their means of livelihood on a large and industrious population formerly depending on salt manufacture for their support.

87. No adequate provision has been made to supply a local substitute for the indigenous modes of manufacture, and what has taken place is that imported European and Madras salt has replaced the local product with the exception of an insignificant amount of Orissa salt which is produced under Government supervision on the Chilka lake.

Destruction of a local industry.

88. I have had a statement prepared which will show at a glance the changes that have taken place under the new as compared with the old system, under head "Locally manufactured salt." It will be found that the yearly local outturn has fallen from an average between 1882-83 and 1885-86 of 462,444 maunds to 41,552 maunds, or by over 90 per cent. It appears to me doubtful whether the extent of the mischief that would accrue to the manufacturing interest in Orissa was realized at the time the change was made.

Object of the Madras system in Orissa.

89. The change was introduced at the close of the financial year 1885-86 in March 1886, and it has now had a trial of over nine years. The time seems to have come to briefly review the results from an Orissa point of view. The reason for introducing the change, which consisted of replacing the simple and inexpensive Bengal system by the more expensive method followed in Madras, was that it was found that whereas in Madras the consumption was 14 pounds a head, that in Orissa was from 10 to 12 pounds a head of the population of Orissa and the Tributary States. The object aimed at was to raise consumption in the latter area to that prevailing in Madras. A reference to the statement under head "Consumption per head" will show that the object has not been attained, and that, on the contrary, the consumption in the earlier period averages 10·73 pounds a head under the Bengal system as compared with 10·13 pounds a head in the later period under the Madras system, and this in spite of an establishment of preventive officers consisting of an Assistant Commissioner, inspectors, assistant inspectors, sub-inspectors, jamadars, duffadars, and peons, who, excluding those engaged on manufacture, number 388 strong. The Madras system has brought about a decrease in consumption of over half a pound a head, and has therefore failed in its main object.

The object not attained.

The object itself attributable to a misunderstanding as to facts.

90. It would not be difficult to show that the object aimed at does not admit of attainment; that the short consumption alleged to exist is due to other causes than illicit manufacture. The consumption is said to be from 2 to 4 pounds less than it should be per head. Two to four pounds per head has therefore to be produced by illicit manufacture. I have shown that the consumption has not increased to 14 pounds a head, and now stands at a fraction over 10 pounds a head; consequently in the three years between 1891-92 and 1893-94 illicit manufacture went on year by year at the rate of nearly 4 pounds a head. Even taking it at 3 pounds a head, the amount so manufactured for the population of Orissa and the Gurjat would be 5,925,103 × 3 = 17,775,309 pounds, or 222,192 maunds a year. This amount has, owing to

physical causes, to be made in five months, from February to June, at the rate of 44,438 maunds a month, which is obviously impossible either under the Bengal or the Madras Preventive system. We find that in 1893-94 the amount of salt earth seized by the large preventive service now engaged was 687 maunds, representing 179 maunds of salt. It is absolutely impossible that if 222,192 maunds are yearly made illicitly and passed into consumption, so strong an establishment as now exists should only be able to seize salt earth representing 179 maunds of salt.

A reductio ad absurdum.

91. The truth is that the advocates of the Madras system have been going on a wrong scent. Some little illicit manufacture used to exist and still exists, but anything like the amount required to make good the 4 pounds short consumption per head never did exist.

Origin of the error.

The Bengal Government did not pretend to prevent the poor scratching up a little salt earth for their own consumption, was perfectly aware that this was done, and abstained from interfering partly on humanitarian and partly on perfectly sound financial grounds, namely, that the injury to the revenue was insignificant, and to prevent it would cost more than the increase of revenue to be expected. No such considerations have influenced the Madras officers. The preventive officers were urged to prosecute for every instance of scraping up salt earth, and if the Magistrates failed to award what were considered adequate fines, complaints reached us from Madras. The figures I have given above amply prove that all this severity served no useful purpose. An insignificant amount of salt has been seized, but the extensive illicit manufacture never did exist, for it exists now even more than it did formerly if the consumption per head in Orissa as compared with Madras be accepted as evidence on this point.

Needless and fruitless severity under the Madras system.

92. The difference in consumption can be accounted for by the habits of the people, which differ materially. Salt is, I am informed, given to cattle in Madras, though not in Orissa: this alone would account for a great disparity. We are, moreover, not comparing Madrassis with Uriyas, or even Ganjam Uriyas with Uriyas of Orissa, for a considerable portion of the population of the Gurjat consists of primitive tribes who have a prejudice against the use of salt which they think injurious. There are other minor causes to be sought for in the habits of the people of the two countries, which account for the disparity in consumption far more satisfactorily than it is accounted for by smuggling on a sale which I have shown either exists still or never existed at all.

The reason for the disparity in consumption of salt in Orissa and Madras admits of explanation other than illicit manufacture.

93. Among the minor errors that have been the result of applying the Madras salt system to Orissa, is the supposition that Karkatch salt, or salt made by the Madras method, could ever be accepted throughout Orissa and the Gurjat as a substitute for Punga salt made by the Orissa method. Yet an attempt was made to make such salt in the Balasore district, and the produce could not find a market at annas 4 a maund *plus* duty. At present such salt is not consumed north of Kendrapara, which is roughly in the middle of the Cuttack district and of the Division.

Karkatch or Madras salt not consumed throughout half Orissa and probably throughout the Gurjat.

94. A more serious difficulty is the inadaptability of the Madras preventive system to Orissa, in that it entirely ignores the important part that the District Officer in Bengal takes in administrative work. No department of civil government that is not purely technical can expect to work efficiently without the co-operation of the District Officer. The system in Madras is apparently different, but I am confident that what I have said is the case in Bengal. If there is any good to be derived from the Madras system in Orissa, of which I am not convinced, it is not likely to be attained till the salt establishment is subordinated to the District Officers and to the revenue authorities of Bengal. That there has been any perverse obstruction on the part of the Bengal officers, so far as my experience goes, I would emphatically deny; but the present

The impossibility of the Salt Department working satisfactorily in Bengal otherwise than by the co-operation of the District Officers.

abnormal relations have brought about collisions which I do not think it necessary to refer to at length, but which amply bear out my views.

Financial result of the Madras system unfavourable.

95. As to the financial result of the change, I am prepared to show that it has involved an actual loss of revenue.

96. From the statement it will be found that from 1883-84 to 1885-86 the net receipts are shown to give an average profit of Rs. 13,49,797 a year. From 1891-92 to 1893-94 these were Rs. 16,82,772 a year. During the latter period the duty was Rs. 2-8 a maund; during the former Rs. 2. To establish a comparison it will therefore be necessary to reduce the net receipts in the latter period by one-fifth, or 20 per cent. There is also the increase of population that has taken place in seven years from the close of the first period to that of the second. In Madras the increase is assumed to be 10·45 per mille per annum, which would justify an increase for seven years of 73·15 per mille per annum, or 7·315 per cent. per annum; but in view of the Madras rate of increase being high for Orissa and of the increase in population being a gradual one and not uniform throughout the seven years, I would take only 3 per cent. of the present income as derived from the increase of population. This added to 20 per cent. on account of enhanced duty necessitates a reduction of 23 per cent. of the present net revenue to justify a comparison with the revenue of the earlier period: this being done, it appears that the net revenue which would have been derived at the old Rs. 2 rate from the population of the earlier period would be Rs. 16,82,772 less 3,87,037 = 12,95,735, as compared with Rs. 13,49,797 formerly realised.

Inversely if the revenue of the earlier period be increased 25 per cent. on account of the rise of duty and 3 per cent. on account of increased population, the net income under the old system would be Rs. 13,49,797 + 3,77,943 = 17,27,740 at the present time. Whichever way the matter is looked at, the Madras system has shown a loss of revenue.

Conclusions and suggestions for administrative reforms.

97. I have shown that the change that occurred is based on an erroneous assumption which has been disproved by the Madras establishment's work.

That the system has injured Orissa by destroying a local industry.

That the system does not lend itself to work harmoniously with the Bengal system of civil administration.

That much petty harassment has been perpetrated in pursuit of a chimerical object.

That the main object of the change has not been attained after nine years trial, in that the consumption is actually less than it was before the new system was introduced.

That financially it involves a loss of revenue.

If these are considered, as I believe them to be, sound grounds for administrative reform, I would strongly advocate a return to the old system of salt administration in Orissa, or, if this cannot be done, at least the absorption of the existing establishment in the general scheme of administration in Orissa, and it being brought into subordination to the District Officers and the superior revenue authorities of Bengal, who might evolve any possible good that may be latent in the system as applied to Orissa. I am unable at present to detect any, though not a little evil is exceedingly obvious.

Statement showing the receipts, charges, and consumption of locally manufactured and imported Salt during the Administration of Bengal and Madras Systems.

98. During the year under report only the two factories Gurbai and Tua on the Chilka in the district of Puri were worked. The following table compares their work during 1893-94 and 1894-95:—

Year.	Quantity manufactured.	Quantity sold.	Number of pans worked.
1	2	3	4
	Mds.	Mds.	
1893-94 ...	15,422	23,963	565
1894-95 ...	2,10,626	38,885	614

The increase in the outturn is attributed to the season being favourable and larger number of pans being worked.

99. There are no mines in this Division. Laterite, sandstone and limestone were quarried from the hills for road metalling and building purposes.

IX.—TRADE AND COMMERCE.

100. What is usually regarded as the trade of Orissa is such portion of that trade as enters and leaves the Orissa ports; it includes much in the way of both exports and imports that does not rightly belong to Orissa, but which in the case of exports is drawn from places outside the Division, viz. the Tributary States and the district of Sumbalpur, and in that of imports what is destined for the former; nor does it take account of the land-borne exchange of locally produced commodities between Orissa and the adjoining States and the districts of Ganjam in Madras, Sumbalpur in the Central Provinces, and

Midnapore. In dealing with the sea and canal borne trade to and from Orissa, it is not possible to distinguish between what comes from and is destined for Orissa itself and what comes from or is destined for territory outside the Division.

101. As to the land borne trade referred to, no statistics whatever exist. From the above facts it will be recognised that we have not all the information that is required to deal with the divisional trade, and such statistics as are available do not represent exclusively the trade of the Division.

102. Still more impracticable is it to ascribe to each district that portion of the water-carried trade from the Orissa ports, as the produce of a district is by no means necessarily exported from the port of that district; the statistics supplied, it will be understood, refer to the trade to and from the Orissa ports, and are to be viewed subject to the above reservations.

103. The principal trade routes are those that start from the four ports of Chandbali including Dhamra, Balasore, False Point and Puri, the Coast Canal, the Trunk Road communicating with Ganjam on the south and Midnapore on the north, the Mahanadi and Brahmani rivers, and the Sumbalpur road. The sea-borne trade is fed by the canal system and the district roads, the latter also serving as feeders to the main lines of communication. According to its Circular No. 2 Statistics, dated 16th April 1895, Government has supplied statistics of the trade by country boats along the Hijili, Orissa and Orissa Coast Canal. In submitting these figures so supplied, the Collector of Balasore says: "I am, however, unable to reconcile the figures given in this statement (supplied by Government) with those supplied by the Executive Engineer and embodied in the section on inland and internal trade in the General Administration Report. Nor do I quite understand what is meant by the 'up-stream' and 'down-stream' 'import and export' traffic by these canals. The Hijili Canal does not at all enter this district. The Orissa Canal, by which I presume is meant the High Level Canal, passes through this district from Acquapada to Bhadrak. It appears to me that the up-stream traffic by this canal will all be import traffic as far as this district is concerned, and the down-stream traffic, export traffic. The Orissa Coast Canal, however, traverses the total length of the district, entering it from Midnapore on the north and from Cuttack on the south, and if it is possible to understand that there can be both up-stream and down-stream import and export traffic by this canal, I venture to think that these figures would be more intelligible if they are given separately for each canal, and I would suggest that they might be so given in future." The Collector of Cuttack has submitted the figures for his district without any remarks. Though I do not go the same length as the Collector of Balasore, the difficulty about reconciling the figures received from Calcutta with those compiled locally is one that yearly recurs, and can scarcely be due to anything but a difference in the way the information is collected and formulated in the two cases.

104. With these preliminary remarks I now come to deal with the subject in the usual manner.

105. The following table compares the value of the sea-borne trade, district by district, during the year under report with that of the preceding one:—

Name of Port.	Value of imports.		Value of exports.		Total value of trade.		Remarks.
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Cuttack	1,10,422	1,33,599	23,83,756	20,18,819	24,94,178	21,52,418	These are the figures of the Collector of Customs, Calcutta.
Balasore	50,70,791	63,21,375	36,01,509	31,26,761	86,72,300	94,48,136	
Puri	......	200	2,84,292	3,73,038	2,84,292	3,73,238	
Total ...	51,81,213	64,55,174	62,69,557	55,78,618	1,14,50,770	1,19,73,792	

106. There was thus an increase of Rs. 5,23,022, or 4·5 per cent., in the total value during the year over the preceding one. This increase is the resultant of a rise in the value of imports and a decrease in that of exports. The former is shown by all the districts, and the latter by Cuttack and Balasore, while Puri shows an increase in the value of exports. The fluctuations are explained below in their proper places.

CUTTACK.

107. The chief articles of export are rice, paddy, til and other seeds, hides, stick-lac, timber and jute, rice and paddy forming the bulk of such trade. The principal articles of import are piece-goods, kerosine oil and betelnuts. It has been shown that there was an increase in the value of imports and a decrease in that of exports. The increase in the value of imports was mainly due to the importation of salt from Madras and rice from Gopalpur in the Ganjam district.

108. To account for the decrease in the value of exports, the Collector says :—"The falling off in the gross value of goods exported was due to the fact that the Chandbali port in the Balasore district attracted the greater portion of the trade between Calcutta and Cuttack, as also to the Sumbalpur railway communication with Bombay and Calcutta. The decrease is in part also due to the high prices of rice prevailing in the district from April to December 1894." The first reason given would lead to an increase in the exports from Chandbali in the Balasore district, but the figures of that port actually show a decrease.

109. The following statement compares the sea-borne import trade of Cuttack during the years 1893-94 and 1894-95:—

21. Salt	11,275	60,215	......	6,215
22. Kerosine oil	6,000	350	20,950	350

112. With regard to the passenger traffic by the canals, there was a decrease in that on the Kendrapara Canal, while the High Level and Jajpur Canals showed an increase. The former was due to the smaller number of pilgrims visiting Puri, and the latter calls for no special remark. The Collector, however, says "that the increase in the traffic on the High Level and Jajpur Canals was perhaps due to better management and facilities in the transport service, in which the Executive Engineer of Acquapada and Jajpur Division took much personal interest during the year."

113. As regards the articles of trade, the Collector says the export of timber to Calcutta is declining owing to the introduction into Calcutta of Burma teak and other timbers. The export of hides is also declining on account of restrictions imposed by the Chiefs of the Tributary States, which are the chief source of supply. Jute is grown on lands irrigated by canals, but being of inferior quality is not much in demand. As to til seed and the like, they used generally to be brought from districts adjoining the Central Provinces, but they have now found a new outlet in the Bengal-Nagpur Railway.

BALASORE.

114. It has been shown before that there was an increase in the value of imports and a decrease in the value of exports. The former was due to the falling off of imports by the Coast Canal, and the latter to the small export of rice to Mauritius and of paddy to Bengal during the year under report. The decrease by the Coast Canal route is partly due to the reduction in the rate of freight of the sea-going vessels, and the more regular steamer communication between Chandbali and Calcutta. As regards the decrease in export of rice to Mauritius, the traders ascribe it to ships not being available when they were wanted, and to high freights.

115. The following statement compares the sea-borne import trade during the years 1893-94 and 1894-95:—

There was a decrease in the passenger traffic by sea. The Collector thinks this is due to more passengers préferring the Coast Canal route. But I ascribe it to the smaller number visiting Puri.

PURI.

118. The following table compares the sea-borne import trade of the district during the year under report with the preceding one:—

Article.	1893-94.		1894-95.	
	Quantity.	Value.	Quantity.	Value.
1	2	3	4	5
		Rs.		Rs.
Medicines	......	......	3 cwt.	200

119. The state of the import trade is due to tradesmen preferring the more circuitous but certain and regular route *viâ* Cuttack to the sea route, which is extremely uncertain, irregular and even dangerous, owing to the difficulty in landing on account of the high surf. It is scarcely safe for passenger traffic.

120. The following table compares the sea-borne export trade during the two years 1893-94 and 1894-95:—

Article.	1893-94.		1894-95.	
	Quantity.	Value.	Quantity.	Value.
1	2	3	4	5
		Rs.	cwt.	Rs.
Rice	66,600 cwt.	2,84,272	104,987	3,73,038
Empty soda water bottles ...	10 dozens.	20	......	......

The increase is due to a good harvest in the Puri district. It is remarkable that though the other districts enjoyed good harvests they show a decrease in rice exports.

121. As regards inland trade no statistics are available.

122. The chief articles of trade are said to be rice, pulses, oil-seeds, cocoanuts, jute, cotton, silk cloth, dried fish, tobacco, spices, betelnuts, timber, salt, kerosine and other oils, turmeric and chillies.

X.—ADMINISTRATIVE CHANGES.

123. The following are the changes that took place during the year under report:—

(1) The establishments of the certificate department of the district offices of Cuttack, Balasore and Puri were organized.

(2) The Puri Division of the Public Works Department was abolished and amalgamated with the Mahanadi Division, and the Cuttack Workshop Sub-division of the Puri Division was transferred to the Brahmini-Baitarni Division with effect from the 1st April 1894.

(3) In the district of Cuttack the police outpost at Balichandrapur was abolished, and the abolished one at Barachana was re-opened during the year.

(4) In Puri the jurisdiction of the abolished outposts were distributed among the existing ones.

(5) Honorary Magistrates Babu Jageswar Chandra of the Cuttack Bench and Babu Nityanand Das of the Puri Bench were vested with powers of a Magistrate of the first class and authorized to sit singly, the latter being also vested with summary powers.

124. There were no other changes during the year. But I think some changes are necessary, and submit the following for the consideration of Government:—

(1) As a question of administrative reform for which there is much to be said, I have to advocate the extension of the divisional boundaries so as to include the whole area populated by races speaking the Uriya language, or, at any rate, some definite areas adjoining Orissa where the Uriya language prevails. Orissa is a very small Division both in area and population, and there is no doubt that the Commissioner could find time to deal with a very material addition to his work.

(2) The areas that I refer to are the Sumbalpur district of the Chatisgarh Division of the Central Provinces with the Tributary States of Patna, Sonpur, Rarhakol, Bamra, Kalahandi, and the whole or part of the Ganjam district with the States of Kimidi and Gumsur.

(3) Among the reasons for this change are, as I have said, the uniting in a single Division and placing under the same laws and rules the whole local Uriya population, instead of having a portion of it forming an insignificant item of the Central Provinces, and another portion forming an equally insignificant item of the Madras Presidency. I am in possession of a map of India, dated 1841, in which, either on ethnological or political grounds, the Province of Orissa includes the two portions of territory that I have proposed to absorb in this Division.

(4) On political grounds it is desirable that the Superintendent of the Tributary Mahals should control the districts surrounding these States. Had he control over Sumbalpur, he could deal more efficiently with any disturbance in the States of Boad and Athmalik without soliciting the intervention of the authorities of another province, which intervention, be it ever so cordial, could not be so efficient as his own direct control.

We should then have these States, and those that I have mentioned as suited to be included in the Tributary Mahals of Orissa, hedged in by Sumbalpur on the north, the head-quarters subdivision of Angul district on the east, and the Khondmals sub-division of Angul district on the south.

So, with the States of Daspalla and Nayagarh, by annexing the whole or part of the Uriya-speaking district of Ganjam and its dependent states of Gumsur and Kimidi to Orissa, the Superintendent would be able to act directly from all sides in the case of such a rising as occurred last year in Nayagarh.

(5) But the advantage would not be confined to disturbed times. In the development of the country between the Bengal-Nagpur Railway and Orissa, it would be obviously advantageous to have the area to be dealt with under the same administrative control, thereby to obtain unity of action among the Tributary Chiefs. Possibly as things at present stand the time has not come for the change, but with the opening of railway communications between Sumbalpur and Cuttack the proposal would become easy of execution and would undoubtedly prove a beneficial reform: the head-quarters of the Sumbalpur district are very much nearer to Cuttack than to Nagpur. The time appears to have arrived to break ground in this direction and to lay the proposal before the Government for consideration.

(6) With regard to Sumbalpur the case is particularly strong. In volume XIX of the Gazetteer of India, page 177, it is stated that Sumbalpur, "though included in the Chattisgarh Division, forms no part of Chattisgarh proper either geographically or historically;" and in paragraphs 7 and 14 of the Administration Report of the Central Provinces, 1892-93, it is described as the Uriya country.

After the annexation of the district of Sumbalpur it was first attached to the Chota Nagpur Division and then transferred to this Division, doubtless for the reason given by Sir Henry Ricketts in No. XX, Selected Records of the Bengal Government, page 11, Sumbalpur, viz., that "the inhabitants are most of them Uriyas, and have no affinity or community of interest of any kind with the people of Chota Nagpur." The reason why the district was transferred to the Central Provinces cannot be ascertained in this office, as correspondence relating to Sumbalpur has been transferred to the Central Provinces. Geographically the map will show that Sumbalpur belongs rather to Orissa than to the Central Provinces.

(7) However, the strongest arguments both with regard to the Central Provinces and the Madras areas are ethnological and philological. Ethnologically the Uriya differs from the inhabitants of the Central Provinces on the one hand and the Madrasis on the other; they have retained a marked individuality in the face of political and other disintegrating forces, and any portion of the race that is forced into an unwilling combination with distinct races incurs the danger of having the national characteristics and aspirations sacrificed to those of the predominating portion of the population in the administration under which it is forced to live.

To site a single instance of this, I have only to refer to the order that has been passed directing that Hindi shall be the court language in an Uriya-speaking district.

For other instances of the fatal effects of not understanding the Uriyas on the part of the Administration, I would refer you to pages 53 and 57, 70 and 71, of Mr. Toynbee's History of Orissa. I would also refer to page 117 of Mr. John Beames' Comparative Grammar, to prove how easy it is to make fatal mistakes in dealing with a people otherwise than with an intimate knowledge of their idiosyncrasies.

The Uriya belongs to probably the most conservative of all the races of Eastern India, and such disregard to his interests as the above order implies would be, I am sure, extremely distasteful to him. They are, as represented in Orissa, a numerically small people, the population being less than four millions;

but they have contrived to spread beyond Orissa, or have always occupied those areas which I now propose to unite with Orissa. Philology more forcibly establishes the distinct claims of the Uriya to recognition as a separate race with a separate history and literature.

We have the authority of Mr. John Beames for this. He says: "At a period when Uriya was already a fixed and settled language Bengali did not exist. The inhabitants of Bengal spoke a vast variety of corrupt forms of Eastern Hindi. It does not seem probable that in educational matters the Uriya population is likely to get fair play either in the Central Provinces or Madras, where they form a minority of the provincial population in each case, though mustering strong in certain districts. The disposition to insist on uniformity throughout a province, and to ignore minorities, involves a risk of the Uriya language being starved educationally.

As an example of the sentiment that governs men in such matters, I may refer to the Bengali educational officers in Orissa regarding the Uriya tongue as a patois of that of Bengal, and desiring to substitute the latter for the former, whereas Uriya is demonstrably more archaic in form and possessed a literature some centuries before Bengali as now written existed. There appears a danger of a similar spirit manifesting itelf in Madras and the Central Provinces.

The Uriya language is rapidly supplanting the dialects of the tribes of the Tributary States, and it affords, Mr. Beames says, by reason of its having absorbed a non-Aryan element, a far better medium for civilizing these primitive races than any other language.

(8) The Uriya-speaking inhabitants of the Madras Presidency are confined to the districts of Ganjam and Vizianagram, Table D, "Population," Madras Administration Report, 1893-94; and to the States of the Agencies attached to those districts, all told, there are 1,288,727 persons talking Uriya under the Madras Government. The majority of these 797,132 are in the Ganjam district, nearly 81,000 more in the Ganjam Agency, or together 878,126, a total not far short of the population of Puri or Balasore districts. They are the preponderating element in the Ganjam district, being over 70,000, and more numerous than the Telingas. It is believed that the Uriya population is most numerous in the north, and perhaps it would be found that the majority of the Uriyas would be met with in a definite portion of the district.

(9) The population ratio in Sumbalpur is even more striking. We find from the Administration Report of the Central Provinces, 1893-94, Table I, C—Civil Divisions, page XI, Statistical Tables, that Sumbalpur is the only district in the provinces in which Uriya is spoken, and that its population is 796,413. We also find in volume 1 of the General Tables, Census of India, 1891, page 367, that in this district which contains the whole Uriya-speaking population of the Provinces, there are no less than 685,971 Uriya-speaking people, which gives these an overwhelming majority in this district.

(10) This Division could very conveniently take over the additional million and a half that are to be found in the two Provinces, or so much of them as may reside in compact areas that admit of separation.

BANKI.

125. Another question of boundary adjustment suggests itself in the case of Banki. I revert to the subject with some diffidence, as I find that the matter came under consideration in 1884, and was then decided in a manner adverse to the view that I am inclined to take. The question was then considered without any reference to what appears to me the most cogent argument, viz., the marked disparity between the work of the two districts of Cuttack and Puri. Cuttack is an extremely heavy district, whereas Puri is a very light one.

126. At a time when the expression "overburdened Collector" has become trite, we should, I think, be following the dictates of common sense in (wherever this may be possible) redressing such disparities as exist between two districts. I do not propose to burden this report with an elaborate statement of the work disposed of in each district, which can very easily be ascertained elsewhere. It is sufficient for my purpose to state the area and population of

the districts of Cuttack and Puri respectively. Cuttack has an area of 3,633 square miles; Puri an area of 2,473 square miles. The population of Cuttack was in 1892, 1,937,671; that of Puri 944,988.

127. This is, I think, enough to show that if a transfer can conveniently be made from the Cuttack to the Puri jurisdiction the change would be a good one. Geographically the present arrangement is absolutely indefensible. Banki is a narrow strip of land along the Mahanadi river, which adjoins the Khurda sub-division throughout its whole length, and it forms a spar to the Cuttack district. It will be obvious from a glance at the map that geographically Banki should form a portion of the Khurda sub-division of the Puri district

This was the view originally adopted, and when Banki ceased to be a Gurjat State and became British territory, a notification actually issued annexing it to the Puri district. On this a memorial was submitted to His Excellency the Viceroy and Governor-General in Council, protesting against Banki being brought under the regular system of administration, and to its being annexed to Puri district. The first part of the prayer was disregarded. The orders of the Bengal Government on the other question, viz., whether Banki should be annexed to Puri or Cuttack, will be found in your No. 1321J. of 15th March 1882. I have only to say that with the opening of railway communication to Khurda and Puri the only objection allowed by Government or relied on by the memorialists disappears, viz. the difficulty of access to Khurda and Puri. The Government in the letter quoted above decided to allow Act XXV of 1881, by which Banki was annexed to Cuttack, to stand for a year, after which a report on the subject was to be submitted. As occasionally happens in such cases, when the report was submitted in this office No. 549 of 17th May 1884, a change of officers had occurred. Mr. Smith, who was an advocate for the annexation of Banki to Puri (see his No. 115 of 25th January 1882), had gone and Mr. Larminie was Commissioner, and the matter seems to me to have been dealt with in a manner less exhaustive than it might have been. It was in fact shelved without a report from the Collector even being received. The old arguments, which will not survive the introduction of railway communication, were paraded, and the readiest way out of what promised to be a troublesome task was adopted, by recommending that things should remain as they then were. The main argument on which I rely—the relief of the Cuttack District Officers—seems to have escaped notice. The Government, in its No. 1075J.D. of 11th June, briefly acquiesced in the proposal to leave matters alone.

128. If the Government is of opinion that a *primâ facie* case has been made out for re-opening the question, a more detailed report will be necessary, and the larger question of adopting a natural boundary between Cuttack and Puri might be dealt with as has been done in the case of Cuttack and Balasore, where the river Baitarni has been adopted as the boundary. At present Cuttack includes a considerable area to the east of the Katjuri. The boundary is purely arbitrary and artificial; it would not be impossible, and it would be eminently sensible, to adopt the Katjuri and one of its branches, for it divides into many deltaic streams as a natural boundary, thereby relieving the Cuttack District Officer of crossing broad channels to reach outlying portions of his jurisdiction, and also reducing the amount of work that at present falls to him.

XI.—STATISTICAL ENQUIRIES.

129. The statistics collected showing the rainfall of the Division and mortality and births have been dealt with in sections 3 and 4 under heads "Weather and Crops" and "Public Health."

130. In the course of compiling rainfall statistics, it came to light that the figures as well as the stations of observation supplied by the District Officers differ in some instances from those published in the *Calcutta Gazette*. It is necessary that statistics on this important subject should be in accord in all official papers an enquiry will be made as to how the discrepancy arose.

131. It will have been observed from the figures showing the mortality of the Division, as given in Section IV, that there has been an increase throughout, the death-rate per mille being 33·5 against 25·8 in the previous year.

To whatever conclusions the increase may point, it is said by the Collector of Cuttack, Mr. Maude, that the increase itself is no doubt partly due to better registration. Stringent measures have been adopted in Cuttack to compel chaukidars to report deaths and births regularly.

132. The collection of vital statistics in municipalities seems to be defective. The figures supplied by some District Officers do not agree with those to be found in the annual municipal reports, while in Cuttack it is difficult to obtain any reliable figures. Attention will be paid to the matter, and measures taken for removing any laxity that may be observed in properly registering births and deaths in municipalities.

133. Besides the above and statistics of crop forecasts and prices-current which are usually periodically collected, enquiries were also made on the following matters:—

1. Registration of pilgrims visiting Puri.
2. Experimental crop-cutting.
3. Tallying of passenger traffic by sea-going steamers at Chandbali.
4. Recording of prices of common rice from 1840 to 1850.

The attempt to register pilgrims to Puri was made in compliance with Government order No. 5294M., dated 9th November 1894; but owing to difficulties which were found to beset the measure, the question has, under Government order No. 673M., dated 20th February 1895, been dropped.

Experimental crop-cuttings were undertaken under Government order conveyed in Director of Land Records and Agriculture's circular No. 48A., dated 13th December 1894. Cuttings of paddy, rabi and sugarcane were made, and the results were reported to that officer by all the districts.

The ascertainment of prices of common rice has been taken in hand under orders of the Director of Land Records and Agriculture. The enquiry is in progress, but so far as has been reported the attempt does not seem to be very successful.

134. The weekly crop and weather report prescribed by Government Circular No. 2Agri., dated 11th January 1889, has been discontinued under Government Circular No. 26Agri., dated 3rd December 1894. But this report was useful, especially during the monsoon period, when I am required to keep careful watch on the vicissitudes of the seasons.

XII.—CIVIL JUSTICE.

135. There was no change as regards the Civil Courts, their description, number and jurisdiction remaining the same as in the preceding year.

136. The total number of original civil suits disposed of by the District and the Subordinate Judges was 545 against 680 in the preceding year, showing a decrease of 135 suits. The suits are of the following description:—

	1894.	1895.
Money suits	603	478
Title suits	77	67
Total ...	680	545

137. Of the total number disposed of during the year under report, 144 were contested and 401 otherwise disposed of, against 121 and 559 respectively in the preceding year. There is thus an increase in the number of contested suits, though there is a decrease in the total number disposed of during the year under review.

138. As regards the civil work disposed of by the munsifs, the total number of cases for the Division is 14,428 against 13,779 in 1893, showing an increase of 649 suits.

139. The classes of suits disposed of during the year 1894 are compared below with those of 1895:—

	1893.	1894.
Money suits	11,805	12,278
Title suits	1,974	2,150
Total ...	13,779	14,428

There is thus an increase both in money and title suits.

140. Of the total number disposed of, 2,015 were contested and 12,413 otherwise disposed of, against 1,787 and 11,992 respectively in 1893. The increase was thus common to both the descriptions of suits.

141. The table below shows the number of suits of each kind and the number disposed of by each of the Munsif's Courts in this Division:—

NAME OF COURT.	NUMBER OF SUITS DISPOSED OF.		NUMBER OF UNIT SUITS DISPOSED OF.
	Money suits.	Title suits.	
	1894.	1894.	1894.
1	2	3	4
Cuttack	3,317	495	4,802
Kendrapara	2,128	189	2,645
Jajpur	1,969	371	3,082
Do. additional ...	207	132	603
Puri ...	2,574	654	4,536
Balasore ...	1,884	245	2,719
Do. additional ...	99	144	451
Total ...	12,278	2,150	18,728

142. The total number of witnesses examined by all the munsifs was 14,453 against 13,277 in 1893. There was an increase in the number of witnesses detained over two days, the percentage being 13·3 against 11·5 in 1893.

143. The total number of rent suits disposed of by Deputy Collector in 1894 was 4,372 against 4,680 in 1893, showing a decrease of 308. The following table compares the disposals in each district for the said two years:—

District.	1893.	1894.
Cuttack	1,766	1,767
Balasore	1,063	1,204
Puri	1,851	1,401
Total ...	4,680	4,372

144. The increase in Balasore is said to be due to disputes consequent on settlement proceedings in progress, and the decrease in Puri is said to be due to the fact that owing to his embarrassed condition the zamindar of Kothdesh, the largest estate in the district, brought few rent suits.

145. The divisional ratio per cent. of cases pending to cases disposed of is almost the same for the two years under review, being 8·62 in 1894 against 8·44 in 1893. Cuttack shows a decrease from 10·99 in 1893 to 7·41 in 1894, while Puri shows an increase from 4·8 in 1893 to 7·8 in 1894. This increase in Puri is ascribed to the district being under-officered for some time.

146. As regards the detention of witnesses for more than two days, no comparison can be made with 1893 as far as Cuttack is concerned, as the figures are not available for that year. In this respect Puri stands first, Balasore second, and Cuttack third during 1894:—

XIII.—CRIME.

147. The total number of offences reported during the year 1894 is compared below with that in 1893:—

	1893.	1894.	Increase or decrease.
1	2	3	4
Cognizable offences ...	8,333	7,945	—388
Non-cognizable offences ...	6,589	5,931	—658
Total ...	14,922	13,876	—1,046

148. There was thus a decrease of more than a thousand offences. But if the sanitary offences are excluded, there appears an increase in the number of cognizable offences as shown below:—

	1893.	1894.	Increase or decrease.
1	2	3	4
Cognizable offences ...	6,075	6,314	+239
Non-cognizable offences ...	6,589	5,931	—658
Total ...	12,664	12,245	—419

149. The increase in cognizable cases and the decrease in non-cognizable cases are mainly in Cuttack, and was due to agricultural depression which arose from the bad harvest of 1893, and was aggravated in parts by the unusually high floods, which not only did considerable damage to the crops, but destroyed the houses of many poor families. The high price of food-grains and scarcity of eatables drove the poor to commit petty thefts and burglaries. The straitened circumstances of the people prevented them from having frequent recourse to criminal courts to seek redress in non-cognizable cases. There was a slight increase in cognizable cases in Balasore, which is ascribed to better reporting, while no special reason is assigned for the decrease in the same in the district of Puri.

150. The following table shows fluctuations of crime class by class:—

Class of crime.	1893.		1894.		Increase or decrease of true cases.
	Cases reported.	True cases.	Cases reported.	True cases.	
1	2	3	4	5	6
Class I (offences against the State, &c.) ...	111	102	127	122	+20
" II (serious offences against the person) ...	197	187	180	163	—24
" III (serious offences against person and property.	636	597	760	720	+123
" IV (minor offences against the person) ...	126	118	118	108	—10
" V (ditto ditto property) ...	4,282	4,092	4,475	4,326	+234
" VI (other offences not specified above) ...	2,931	2,965	2,285	2,272	—693
Total ...	8,333	8,061	7,945	7,711	—350

151. The increase in class I is mainly due to an increase in rioting cases in Puri arising from disputes regarding ownership of land. Only two of them resulted in loss of life. It is to be noted that the figures include the remarkable case in Cuttack noticed in paragraph 26 of the Government Resolution on the Police Administration Report for 1893, as that case was pending at the close of that year. The case ended in conviction, and eight persons were sentenced to long terms of imprisonment.

152. There were eight cases relating to coins. In seven of them the charge was quicksilvering copper coins. In the eighth case the complainant discovered one counterfeit coin in a bag of Rs. 1,000 given by the accused, who was, however, discharged for want of evidence.

153. Class II shows a decrease of 24 cases, which is shared by all the districts and which calls for no special remarks. There were 17 murder cases,

none of which was committed by dacoits. Of these three were infanticides by mothers, and four were committed for ornaments on the persons of the victims. Conviction was obtained in only five out of the seventeen cases. Four persons in four cases were sentenced to transportation for life, and the accused in the remaining case was sentenced to capital punishment. In another case the High Court let off the accused, who had been sentenced to death. Only 25 per cent. of persons sent up for trial in such cases were convicted. Four out of the five persons convicted confessed their guilt. There were three cases of drugging, in one of which the accused was not traced out, and the other two ended in acquittal.

154. Under class III, 16 cases of dacoities were reported in 1894, of which three were declared false. The remaining 13 were investigated, against 12 of the preceding year. One of these cases was decided under section 412, Indian Penal Code, and of the remaining 12 cases, two were reported as true, one ended in acquittal, and ten in conviction. Out of 79 persons sent up, 48 were convicted and sentenced to long terms of imprisonment. Two of the cases only were committed by professional dacoits; in one of these no clue was found to the offenders, and in the other 11 out of 21 persons sent up were convicted by the Sessions Judge; of these eleven, seven were acquitted by the High Court. The judicial result in dacoity cases was satisfactory, the ratio of persons convicted to persons sent up being 60·7.

155. Three cases of highway robbery were reported from the district of Puri, in only one of which the offender was brought to justice and convicted. In this case a pilgrim woman was robbed, on the Jagannath Trunk Road, of Rs. 14-4-3 in cash by a postal runner. The accused was sent up and was sentenced to two years' rigorous imprisonment. The other cases under this head were of minor importance.

156. The following table shows cases of burglaries and theft reported during the year under report as compared with the previous year:—

	1893.	1894.	Increase.
1	2	3	4
Burglaries ...	881	1,031	455
Theft ...	3,194	3,499	
Total ...	4,075	4,530	

The increase in these cases was due to high price of food-grains prevailing prior to the last harvest, which led persons of the poorer classes to commit petty thefts.

157. The marked decrease under class VI occurred in sanitary offences in Cuttack and Puri, and in offences under Excise, Opium, Forest and Lodging-house Acts in Puri. The decrease in sanitary offences occurred mainly in Puri, where there was an abnormally large number of such cases in 1893 owing to the visit of a large number of pilgrims on the special festival known as the Nava Kalábar of the Jagannath. The decrease in excise cases in that district is ascribed to the abolition of the police outposts on the Gurjat frontier, while that in forest cases is said to be due to the deterrent effect of the prompt prosecutions in the preceding year. There was also a decrease in the number of cases under the Puri Lodging-house Act, which was due to a smaller number of pilgrims visiting Puri in 1894 than in the preceding year.

158. There were 30 bad livelihood cases during the year under report, against 33 in the preceding year. The Division is free from gangs of professional criminals. The percentage of convictions in cases investigated by the police fell from 56·02 in 1893 to 51·5 in 1894. The decrease in Balasore and Puri counterbalanced the better result of Cuttack, where the percentage is steadily increasing.

159. The following table shows the number of cases declared false, th number in which in consequence prosecutions were instituted, and the numbe in which convictions were obtained in 1892, 1893 and 1894:—

Particulars.	1892.	1893.	1894.
1	2	3	4
Number of cases declared false	231	272	236
Ratio per cent. of such cases to cases reported ...	3 1	3·1	2·8
Number of false cases in which prosecutions were instituted.	70	48	44
Ratio per cent. of such cases to cases declared false ...	30·3	17·6	18·6
Number of cases in which convictions were obtained ..	26	17	10
Ratio per cent. of cases convicted to cases prosecuted ...	37·1	35·4	22·7

160. Much deterioration is noticed in prosecuting for the institution c false cases. This is probably due to the reluctance of Magistrates to sanctio prosecution in false cases unless strong and clear evidence exists in support of conviction. Successful prosecutions under section 211, Indian Penal Code, n doubt deter the makers of false charges, but failure to secure convictions in suc cases may have the opposite effect.

161. The percentages of cases in which enquiry was refused by police t cases reported were 13·3 in 1892, 12·4 in 1893, and 15·8 in 1894. The varia tions are slight and call for no special remarks. The power under section 157 Criminal Procedure Code, does not appear to have been abused in any distric enquiry being refused in petty thefts of food-grains, fruits and vegetables, &c in which properties stolen were of trifling value and unidentifiable, and th offenders unknown.

162. Section 560, Criminal Procedure Code, does not appear to be resorte to as freely as is desirable. The attention of the District Officers has bee drawn to this matter from time to time.

XIV.—POLICE.

Rural Police.

163. The number of village chaukidars was 9,226 in 1894 against 9,26 in 1893. The decrease of 43 is due to the abolition of 54 chaukidars in th district of Cuttack and the appointment of an additional one in the district c Balasore and ten in the district of Puri.

164. In addition to these there is a large number of paiks, khundaits an rahadars, whose duties were originally akin to those of the chaukidars. The were at the last settlement allowed to hold their jagirs. But only 42 pail are said to have been employed on chaukidari duty in the district of Puri. C the 471 khandaits, paiks and rahadars in the district of Cuttack, the khandai do nothing, as the District Officer says. Similarly those in the district c Balasore appear to be of little use. It is perhaps owing to the different nomen clature or some such reason, that the functions of these khandaits and paiks hav been lost sight of, and they have been allowed to enjoy their jagirs, thoug they render little or no service in return.

165. While these khandaits and paiks enjoy sinecures, the chaukida are faring worse day by day. They are all under Regulation XX of 181 From the peculiar circumstances of the Province the provisions of the Beng Chaukidari Act have not yet been extended, and, except in the Governme estate of Khurda, the chaukidars are as a rule paid by jagirs or perquisit from the villagers. They are as a class paid very poorly, as is acknowledged c all hands. But as the matter is under consideration in connection with tl settlement of the Province, this is not the proper place to deal with the questic at length.

166. There was no instance of a chaukidar having been employed c menial services.

167. The following table compares the number of chaukidars punished departmentally and judicially during the years 1893 and 1894:—

Punished.	1893.	1894.
1	2	3
Judicially ..	95	112
Departmentally	266	232
Total ...	361	344

The increase in the punishments is mainly in the district of Cuttack, where it is said to be due to more stringent measures having been taken to compel them to report births and deaths for registration. One chaukidar of the district of Cuttack was convicted of a dacoity and sentenced to eight years imprisonment.

168. With this increase in punishments there is a decrease in the number of cases in which rewards were given to chaukidars, there being 116 cases in 1894 against 138 in the preceding year. Rewards were mostly given for detecting excise cases and arresting absconders. In one case a reward of Rs. 25 was given to a chaukidar in the district of Cuttack for resisting a gang of dacoits. Until steps have been taken to place the village chaukidar on a better footing, no better result can be expected from them in Orissa.

169. Under the present conditions no man of a decent caste can be expected to become a village chaukidar. Conservative as the Uriyas are, I seriously doubt whether men of the better castes will for some time to come readily come forward to be village chaukidars even when arrangements have been made to improve their position, as the caste system threatens to be an obstacle. There are some castes the members of which are outcasted for touching one of a lower caste. Now a chaukidar is expected to arrest people of all castes and creeds, and search their houses. It is thus not only the low pay and the position, but also the caste system, that deters men of the better castes from becoming chaukidars.

Town Police.

170. The constables have been replaced by chaukidars in the towns of Cuttack, Jajpur and Kendrapara in the district of Cuttack.

171. In the district of Balasore there was a mixed force of constables and chaukidars for the town of Balasore, while in the district of Puri no chaukidars were employed on town duty, though it is contemplated to replace a number of constables by a larger number of chaukidars on smaller pay.

172. As regards the chaukidars employed in the towns of the Cuttack district, it is too early to pronounce any opinion on the success of the measure.

173. As regards the conduct of the police force generally, Mr. Maude, the District Officer of Cuttack, and Mr. Sen, the District Officer of Puri, speak favourably; while Mr. De, the District Officer of Balasore, holds a contrary view with regard to the police of his district, though he confesses that his experience is short. I should be disposed to think that the police of Orissa do their ordinary police duties no worse than their comrades in the rest of the Province. They are far from blameless; but cheap moralizations on their imperfections become responsible officers of Government far less than irresponsible editors and agitators. I do not suppose that there is a single generalization on this topic that is not quite familiar to Government and its officers. Here as elsewhere, where the District Superintendent and the Magistrate devote themselves to encouraging good police work and punishing misconduct, I believe that the result is far from being so bad as is sometimes represented.

174. The Orissa police were again called out to perform quasi-military duties in kilia Nayagarh; the police of Angul, seasoned by Keonjhar experiences and entertaining a proper contempt for the savages they had to deal with, acquitted themselves well; the Cuttack police did not come out of it with discredit, but the Puri men betrayed the same timidity that characterized the Balasore force in 1891 in the earlier stages of the Keonjhar rising.

XV.—CRIMINAL JUSTICE.

175. The following table compares the work of Stipendiary Magistrates during the calendar year 1894:—

CASES BEFORE STIPENDIARY MAGISTRATES.

District.	Subdivision.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeal to total appeals.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 11 to column 10.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Cuttack	Cuttack sadar	8¼	1,987	2,592	69·1	6,244	2·4	81·3	642	6	241	3	·9	
	Jajpur	1	540	679	78 3	1,716	...	83·3	2[illegible]0	1	540	3	·4	
	Kendrapara	1	624	627	67 4	1,975	...	[illegible]	214	2	624	3	·9	
Balasore	Balasore sadar	3½	685	1,008	51·09	3,680	1·9	77 6	265	2	224	5	·7	4 persons died.
	Bhadrak	1¼	564	680	61 6	3,038	0·16	7[illegible]	200	...	451·2	5	...	
Puri	Puri sadar	4	642	1,189	67 4	3,052	1·0	75·6	381	6	23·5	3	1 5	
	Khurda	2½	622	888	74 5	1,644	·1	10 0	160	...	249·0	2	...	
	Total	21½	6,064	7,869	67·1	21,349	1·4	77·8	2,121	17	282·04	3·4	·8	

176. It will be seen that 6,064 cases were disposed of by 21½ Stipendiary Magistrates, each disposing of 282 on an average, against 287 in 1893. The slight decrease calls for no special remark.

177. As was to be expected, the subdivisions show a greater number of disposals than the sadar stations in every case except Khurda. This is easily accounted for by the great bulk of revenue and miscellaneous work being done at head-quarters. Khurda, the exception, proves the general principle, as owing to the subdivision being a Government estate, much revenue and miscellaneous work falls on the subdivisional staff.

178. Accepting the number of witnesses examined as a measure of the attention bestowed on judicial work, it is remarkable that the courts of the Balasore district take such a marked lead with an average of five against three in all other courts except Khurda, which stands at two. It would be more instructive if the number of cases in which witnesses actually deposed were given. The very small number of witnesses examined on an average in each case is due to no witnesses at all being heard in many cases, which fail at their earliest stages owing to defaults, compromises and such causes. The number of cases remanded six times or more is 17 for the whole Division in 6,064 cases; this does not call for remark. There is a slight improvement in the divisional percentage of orders confirmed in appeal; it was nearly 78 per cent. The only figures calling for remark are those of Khurda. The decisions of the courts of this subdivision seem to have been over-ruled in nine cases out of ten. The Magistrate will be asked to offer an explanation of this somewhat phenomenal state of affairs.

179. The following table compares the work done by the Honorary Magistrates and Benches:—

District.	Subdivision.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeals to total appeals.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 11 to column 10.
1	2	3	4	5		7	8	9	10	11	12	13	14
Cuttack	Sadar	2¼	278	447	31·9	615	10·9	42·8	11	...	123	2	...
	Jajpur	1	52	55	23·6	160	2·4	...	1	1	52	3	100
	Kendrapara	1	111	120	48·3	305	3·3	33 3	5	...	111	3	...
Balasore	Sadar	2	505	528	[illegible]	832	·4	65·6	2	...	253	2	...
	Bhadrak	2	178	273	53·1	538	...	66·6	...	...	89	4	...
Puri	Sadar	3	558	615	60·5	737	1·9	71·4	13	...	186	1	...
	Khurda	2	128	139	31 6	338	...	...	8	...	64	3	...
	Total	13¼	1,811	2,175	56·4	3,693	2·63	46·8	40	1	136·0	2	2·5

180. Thirteen benches and Honorary Magistrates sitting singly disposed of 1,811 cases against 2,162 in the preceding year, giving an average of 137 per court during the year, against 201 in 1893. The decrease is due to falling off in prosecutions for nuisances in Cuttack and in petty offences in Puri. Big cases cannot be made over to benches in consequence of the High Court ruling which requires that the *personnel* of the bench should not be changed during a trial; nor do I think that experience shows that Honorary Magistrates as a rule should be entrusted with important cases.

181. The number of cases disposed of by the honorary benches was largest in Balasore and smallest in Jajpur, whilst the average number of witnesses in each case was largest in Bhadrak and smallest in Puri Sadar.

182. Balasore has since the time of Mr. Cornish, who organized the bench system in that district, always shown good results; it continues to bear testimony to the wisdom of the late Magistrate's arrangements. Puri comes next, its subdivision, Khurda, however, showing as badly as it did in the matter of successful appeals. It is not, however, so bad as Cuttack at its best, and it appears to me that the unsatisfactory results in the most important district point to a lack of system. It can hardly be that the material available at Cuttack is inferior to what is to be found at such an exceedingly backward station as Puri. I once took up this subject and urged an increase in the number of Magistrates and the exaction of at least one sitting from each Magistrate in a week. I think the matter was dealt with by Mr. Walsh. An attempt was made to improve matters, but it appears to me that the Honorary Magistrates of Cuttack are still imperfectly utilized, and I must again invite the attention of the Magistrate to the subject.

183. Considering the trifling nature of cases entrusted to Honorary Magistrates and the leniency that generally characterises their sentences, it is a matter for wonder that appeals against their orders were successful in more than half the cases appealed, the orders being upheld in 46·8 per cent. of the appeals only. At Kendrapara a deeper depth is touched at 66·7 per cent. of successful appeals. Either the Cuttack benches fail in the quality as well as the quantity of their work, or the appellate court of that district is difficult to satisfy. In Balasore 66 and in Puri 71 per cent. of orders appealed were upheld.

184. The above facts form an additional reason for the Cuttack officers bestowing increased attention to this section of the judicial body.

185. It is noted that no appeals were preferred against the decisions of the special Honorary Magistrates, Raja Baidyanath Pandit, Babu Jogeswar Chandra Chandra of Cuttack, Babu Harish Chandra Ghose, Babu Nityanund Das, and Mr. Taylor of Puri. The number of cases decided by these gentlemen was not inconsiderable, Raja Baidyanath Pandit deciding 111 cases.

186. The following table gives the result of trials in the Sessions Courts during the calendar year 1894:—

	DISTRICTS.			TOTAL.
	Cuttack.	Balasore.	Puri.	
1	2	3	4	5
Number of cases committed during the year, including those pending from last year.	47	21	26	94
Number disposed of	43	20	23	86
Number in which conviction obtained ...	37	13	15	65
Of above in which sentence was modified or reversed by High Court.	2	1	1	4
Number of cases acquitted by Sessions Judge ...	4	6	7	17
Percentage of convictions to cases disposed of for 1894.	81·0	70·0	65·2	75·6
Percentage of convictions to cases disposed of for 1893.	70·27	76·9	75	73·3

The percentage of conviction for the whole Division was 75·5 against 73·3 in 1893. Cuttack shows considerable improvement, the percentage having risen from 70·2 in 1893 to 81·0 in 1894, while Balasore and Puri show decreases which do not, however, call for any special remark. No fault is reported to have been found with the committing Magistrates or the Police.

187. Under Government letter No. 4261J., dated 13th November 1894, Magistrates have been authorized to write off fines.

188. During the year 1894 there was a decrease in the total amount of fine imposed as compared with the year 1893, there being an increase in Cuttack and decreases in Balasore and Puri. The divisional closing balance has been slightly reduced, though Cuttack shows an increase. The decrease in the divisional balance is mainly due to the large sums written off in Balasore and Puri, for which no reason has been assigned.

189. The Divisional percentage of the number of times Honorary Magistrates actually attended to the number of times they were asked to attend rose to 75·0 in 1894 from 73·9 in the preceding year.

190. The percentage of the number of instances of absence without leave (column 7) to the number of calls (column 4) fell from 17·7 in 1893 to 14·0 in 1894. Thirteen out of 69 Bench Magistrates absented themselves without leave or notice; one of these, Babu Mathura Lal Bhagat, was found to have consistently absented himself throughout the year. After the close of the calendar year this gentleman reported that he had been ill, and did not fall in with the suggestion that he should retire. I think his case may fairly be excluded in the review of the work of the Magistrates collectively. The condition of his health should, I think, have attracted attention at a much earlier date than it did, and the case confirms me in the opinion that much personal attention of the Magistrate is needed to improve the working of the Honorary Benches of Cuttack.

191. I trust that it may be practicable, as was done in one district with which I am acquainted, to find out definitely on each bench day if the Magistrates whose turn it is to sit are able to do so, and where this is not the case, to impress some of the more willing Honorary Magistrates to take their places and save the entire failure of the sitting.

192. All the benches are said to have proved a great help. Though the work disposed of by them was not of the most important kind, it economized the time of the stipendiaries, who are not only better fitted by experience, but have greater leisure to deal with important cases.

193. With reference to the work of the Honorary Magistrates, Mr. Maude, the Officiating Magistrate of Cuttack says as follows:—"With Sadar Bench and two Honorary Magistrates sitting separately there is waste of power at head-quarters, specially as there is but one clerk to attend on them all, and the transfer of much work from the Court Sub-Inspector's office to the Magistrate's office, which has not been strengthened in proportion, has thrown a great burden upon the latter. What is wanted is more Honorary Magistrates or benches in the interior of the district with their own establishment. The service of Honorary Magistrates would thus be more fully utilized; parties to cases before them would benefit, as they would not have to come to a distance from home—a great inconvenience in the rains in this district; and relief would also be afforded to the over-worked criminal office at Sadar." As regards the convenience of the people, there is some truth and force in what the Magistrate says; but I do not think it would be practicable in this Division to find in the interior a sufficient number of Honorary Magistrates qualified to sit alone or to form benches. It would hardly be worth while to open such courts u-nce they could be uniformly distributed throughout the Division. Again, it wo necessary to allot to each such rural bench or single Magistrate a definit wrong diction, and to restrict his authority to a definite class of cases. The tion would have to be some well-recognized area such as a thana, and the tauzi to me doubtful whether, so restricted as to local and judicial juris amount of work done would be sufficient to justify the existence and the entertainment of an establishment. It would possibly be the payment best men would be doing less work than they did when sitting or subdivisional head-quarters. Then there would be a difficult liable to sale serving which it would not be easy to overcome. The latest o revenue, 38 or recall on the subject of Honorary Magistrates sitting singly d. The revenue

to the practice. The orders I refer to were, however, not general, but referred to specific cases in a single district. If these orders represent the policy of Government, an additional difficulty in carrying out Mr. Maude's proposals would be encountered.

XVI.—REGISTRATION OF DOCUMENTS.

194. The following table compares the number of documents registered and average per office in each of the three districts of this Division for the years 1893-94 and 1894-95:—

District.	Number of documents registered.			Average per office in the district.		
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.
1	2	3	4	5	6	7
Cuttack ...	11,943	9,933	9,154	2,986	2,483	2,483
Balasore ...	6,303	6,668	5,184	2,101	2,223	1,728
Puri ...	9,689	8,900	7,338	3,230	2,967	2,446
Total ...	27,935	25,501	21,676	2,793	2,550	2,168

195. All the districts show increase except Balasore. In Cuttack the increase is 20 per cent. over the figures of 1893-94, and is visible in both compulsory and optional registrations, and shared by all the offices of the district. The Collector attributes the increase mainly to the constantly increasing appreciation by the public of the benefits which they reap from the Registration Department. The increase is seen, in this district, chiefly under petty sales of lands below Rs. 100 in value, which mahajans and zamindars have purchased from impoverished cultivators. The Collector of Puri explains that the increase in his district is due chiefly to the benefit of registration being gradually appreciated by the people at large. In Balasore the decrease is under the head "compulsory" owing to the fact that more leases and kabuliyats were executed in the previous year to be produced as the best evidence of title in the settlement operations in progress in the district; but non-acceptance of these kabuliyats by settlement officers, when they found on local enquiry that they had not been voluntarily executed by the parties concerned, discouraged their execution and caused a considerable decrease under this head during the year under report. A small increase in this district under the heads "optional" and "other registrations" is attributed partly to the effects of the Full Bench ruling at page 623, Indian Law Reports, Calcutta, volume XIX, and partly to the failure of winter rice crops in parts of the Bhadrak subdivision.

196. The receipts of the department amounted to Rs. 31,403 and expenditure to Rs. 20,001 during the year 1894-95, as compared with Rs. 30,303 and Rs. 19,440 respectively of 1893-94, showing a surplus of Rs. 11,402 against 10,863 of the preceding year. It is satisfactory to note that the receipts an increase in spite of the reduction in the rate of minimum *ad valorem* —n 12 to 8 annas during the year. The small increase of Rs. 561 in the Number ure is due to the increased commission drawn by Sub-Registrars on the cluding le.

Number a The working of the department was satisfactory during the year Number in t. There was no addition made to the offices existing at the end Of above it.

reversed by Number of cas. offices of the Sub-Registrars of Balasore and Kendrapara were and that of the Sub-Registrar of Khurda by Mr. Stevenson, Percentage of co. The results of our inspections were duly communicated to the for 1894. of Registration and to the District Registrars.

Percentage of conv. for 1893.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

199. The total number of estates in the districts of Cuttack, Balasore and Puri was 6,318 during the year under report against 6,264 in 1893-94. The increase of 54 estates is due to partition of estates during the year.

200. With the increase in the number of estates the current demand rose from Rs. 18,57,264 in 1893-94 to Rs. 18,59,523 in 1894-95. This increase of Rs. 2,259 is the result of a decrease of Rs. 18 due to abatement of revenue under class II (temporarily settled estates) and an increase of Rs. 2,277 in the demand under class III (estates held direct by Government) in the three districts.

201. The increase was chiefly the result of the assessment of jagir lands at full rates, the settlement of waste lands, and the resumption of the commission paid to sarbarakars in Balasore.

202. The current collections from all classes of estates amounted to Rs. 17,52,315 against Rs. 18,16,873 last year. A decrease in the current collection is shown by the districts of Cuttack and Puri, while Balasore shows an increase of Rs. 434. This increase in Balasore was apparent, being due only to the tribute of killa Keonjhar having been paid there instead of at Cuttack as previously. The decrease of Rs. 67,031 in the district of Puri was mainly due to the default of the proprietors of the large estate Kothdesh under special circumstances brought to the notice of the Board of Revenue. Measures have since been taken for recovery of the arrears.

203. The arrear collections amounted to Rs. 29,966. The current and arrear collections together amounted to Rs. 17,82,281 or 94·1 per cent., against Rs. 18,42,933 or 97·6 in the preceding year.

204. The remissions amounted to Rs. 10,400, of which Rs. 9,962 were remissions of right, and the remainder on account of relinquishment of holdings and other causes.

205. The total balance amounted to Rs. 1,03,542 against Rs. 33,950, of which the sum of Rs. 2,685 was doubtful and Rs. 1,00,857 under recovery at the close of the year.

Road and Public Works Cesses.

206. Out of a total gross demand of Rs. 3,05,816, a sum of Rs. 2,72,306 or 89·04 per cent. was realized and Rs. 44 remitted, leaving a balance of Rs. 33,466 or 10·96 per cent. of the gross demand outstanding at the close of the year. The percentage of the total collections on account of both current demand and arrears to current demand was 100·68. The percentage of net balance on gross demand was lowest in Puri (2·09) and highest in Cuttack (16·65). Compared with the previous year, the collections show a falling off in all districts, the highest being in Balasore 1·90 per cent., which is said to be due to the non-realization of large current demands covered by certificates pending at the close of the year. In Cuttack the short collections are attributed chiefly to the unsatisfactory result of the collection work entrusted to kanungos. The falling off in Puri is small.

Remittance of land revenue and cesses by money-order.

207. A sum of Rs. 1,07,836 was remitted by 10,116 money-orders during the year under report, against Rs. 1,11,164 by 11,581 orders in the previous year. Thus there has been a decrease both in the number and the value of the orders, though the Puri district did not contribute to this. The system does not seem to have gained popularity at all. Some of the reasons for this are given by Mr. Maude, Collector of Cuttack:—

(*a*) Money-orders posted by remitters in due time not reaching the office before kist dates.

(*b*) Ignorance of remitters in properly filling up the form leading to wrong credits, and consequent bringing of defaulters on the sale list.

(*c*) False money-order credits brought to light in the course of the tauzi audits, creating a scare among illiterate zamindars.

No money-order was refused during the year.

No information is available with regard to transactions in the payment of rent to landlords by money-orders.

Operation of the Sale Law.

208. Out of 680 estates or shares of estates which became liable to sale for non-payment of Government revenue, 38 or 5·5 per cent. were actually sold. The revenue

demand of the estates sold was Rs. 4,601, and the arrears for which they were brought to sale amounted to Rs. 2,202. The amount of purchase money was Rs. 48,891, or about 10½ times the Government revenue. The number of estates exempted from sale was 642 with a Government revenue of Rs. 3,21,423. There were six appeals preferred against sales during the year, all being from the Cuttack district. Of these one sale was set aside with the consent of parties, and of the remaining five, three were dismissed and two were pending at the close of the year.

Working of the certificate procedure.

209. The total number of certificates filed during the year was 14,598 against 18,836 in 1893-94. In 7,566 cases payments were made on issue of notices, and in 7,234 cases on attachment of property, while in 796 cases recourse to actual sale was necessary.

In 17 cases demands were paid on issue of warrants against the person. Out of six cases in which the debtors were imprisoned, one was released on payment of the debt before the expiration of the term of imprisonment, and the rest without payment of their debts.

Settlements.

210. There were no minor settlements under the supervision of the Collectors, but the provincial settlement was in progress during the year.

211. The area to be dealt with in the Cuttack district is 2,286·63 square miles comprised in 4,883 villages inclusive of five permanently settled estates with an area of 173·92 square miles. The net area under resettlement in Cuttack is 2,112·71 square miles.

212. In Puri the area to be dealt with is 1,089 square miles including 104 square miles of Temple lands which have been surveyed on the application of the Temple authorities.

213. No cadastral survey or record-writing was done in Cuttack during the year. In Puri the ekrajat mahal maps of 1878 were revised and records written. The whole of the work of survey and record-writing has been done in both the districts with the exception of the Khurda maps and records, and a few scattered mahals comprising a few square miles in killas Aul and Bishunpur in Cuttack.

214. The area in Cuttack for which records were attested up to 31st March 1895 was 1,613·48 square miles contained in 3,541 villages, and that remaining was 673·06 square miles contained in 1,341 villages. In Puri records had been attested before 31st March 1894, and during the year under report the records of only 13 square miles of the ekrajat lands were attested; the remaining 91 square miles are still to be done.

215. The records of 45 villages were published in draft in Cuttack, but none in Puri. Settlement of rents was taken up in 41 villages in Cuttack for which soil maps were prepared, and the rents proposed showed a rise from Rs. 7,384 to Rs. 11,054. Experiments were also made in settlement of rents in pargana Dalijora on the ground of the rise of prices. Fifty-seven boundary disputes and four disputes under section 106 of the Bengal Tenancy Act were disposed of during the year.

216. The expenditure incurred in settlement (exclusive of survey) in both the Cuttack and Puri districts amounted to Rs. 1,38,744 during the year, the total expenditure from the beginning being Rs. 6,71,371.

217. The area under survey and settlement in the Balasore district, which is in charge of a separate Settlement Officer, is 1,733·11 square miles comprising 3,676 villages. Up to May 1895, the whole of this had been cadastrally surveyed and the khanapuri work finished: 315·73 square miles comprising 866 villages and 465,712 plots had been attested up to 1894. During the year under report 923·57 square miles, comprising 1,834 villages and 1,145,557 plots, were attested, leaving 493·81 square miles with 976 villages and 530,186 plots remaining to be done at the close of the year. Experimental assessment was made in 14 villages.

Land registration.

218. The total number of cases for disposal was 11,850, of which 7,824 or 66·02 per cent. were disposed of, leaving 4,026 cases pending at the close of the year. The number instituted during the year was 9,299 against 9,946, thus showing a decrease of 647 cases in the year under report. There was an increase in the institutions

in two districts, viz. Cuttack and Puri, aggregating 1,097; but the decrease in Balasore, amounting to 1,744 cases, more than counterbalanced this increase and led to a decrease for the Division. The increase in the districts of Cuttack and Puri is attributed to vigorous action taken under section 65 of Act VII (B.C.) of 1876. It is said that the need of effecting mutations has been specially brought home to the people by the settlement in progress. The decrease in Balasore is due to a large number of mutations having been registered during the previous year.

Separate accounts.

219. The number of separate accounts opened and closed during the year are shown below:—

	Number opened.	Government revenue.	Number closed.	Government revenue.
1	2	3	4	5
Under section 10, Act XI of 1859 ...	100	5,954	2	56
Ditto 11, ditto ...	1	21	...	...
Ditto 70, Act VII (B.C.) of 1876	7	988	...	...
Total ...	108	6,963	2	56

The number of separate accounts remaining open at the close of the year was 1,726 with a revenue demand of Rs. 1,22,646, against 1,620 with a revenue demand of Rs. 1,15,739 in 1893-94, thus showing a net increase of 106 accounts with a revenue demand of Rs. 6,907 during the year under report.

Partitions.

220. The total number of cases for disposal during the year was 65 against 71 in the previous year. The number instituted during the year was 4 against 11, showing a decrease of 7 cases. The disposals amounted to 10 against 10 in 1893-94, the cases pending at the close of the year being 55. Of these proceedings in 31 cases have been kept in abeyance under the Board's orders. Eleven partitions were confirmed during the year by this office.

Land acquisition.

221. The year opened with 981 cases pending from the previous year; 771 cases were instituted during the year, thus making 1,752 cases for disposal. The number disposed of amounted to 1,662, leaving 90 cases at the close of the year.

222. Proceedings for the acquisition of 556 acres of land for Government, Municipalities and District Boards were confirmed by the Board during the year under report. The Government revenue abated on account of this amounted to Rs. 105, the cost of acquisition Rs. 46,734, and the capitalized value of Government revenue Rs. 3,329.

223. Proceedings were taken in 1,561 cases for the acquisition of land for irrigation purposes, the area acquired and compensation paid in these cases amounting to 286 acres and Rs. 14,821.

224. In connection with the East Coast Railway 1,726 acres of land had to be acquired for 78 miles of the main line from Barkul to Naraj, at an estimated cost of Rs. 2,00,000. Of this, 1,656 acres had been acquired up to 1893-94 at a cost of Rs. 1,45,380. During the year under report only 48 acres more were acquired at a cost of Rs. 9,982, thus making the total quantity acquired 1,704 acres, and the total cost of acquisition Rs. 1,55,362. The average of cost per acre thus comes to Rs. 91·1, which is considerably under the average originally estimated, of Rs. 115·8 per acre. The services of the retired Deputy Collector, Mr. W. Taylor, entertained for the work of acquisition, were utilized till end of June 1894. On his services being dispensed with, the work devolved upon the Subdivisional Officer of Khurda, Mr. McPherson, who was given a temporary establishment. It was arranged that the compensation should be awarded by the Collector, as the Subdivisional Officer was not vested with the necessary powers.

The work which remained to be done at the close of the year was—the preparation of 296 final reports, and of final reports mile by mile for 53 miles; disposal of 532 cases, of which 502 pertain to loss of crops; and of 136 miscellaneous cases regarding construction of crossings and waterways.

225. No advances were made during the year under Act XIX of 1883.

Advances.

Advances to the extent of Rs. 9,146 were made under the Agriculturists' Loans Act, XII of 1884, as follows:—

Cuttack	...	... 2,767
Balasore	...	... 1,999
Puri	...	... 4,380

226. This Act has been only partially introduced into this Division.

Bengal Tenancy Act.

The rent receipt and account forms under the Act, as notified and finally approved by Government, were printed in vernacular during the year, and supplied to the different districts.

227. The following figures show the working of the Act in the Division during the year:—

Two notices under section 45 were served in Balasore and none elsewhere.

There were two cases under section 58 in the Puri district. In 1,548 cases rents were deposited under section 61 in Cuttack and Balasore.

This shows that recourse to the provisions of this section is had freely, owing to friction between landlords and tenants caused by disputes about nij-jote lands, that have arisen in the course of the provincial settlement.

Under section 80 there were 269 applications for registration of landlords' improvements. These were all in the Cuttack district, and 257 related to two estates under the Court of Wards. No application under this section seems to have been made by any zamindar.

The working of Chapter X of the Act is in charge of the Settlement Department.

228. The relation between landlords and tenants was on the whole good during the year, except in the Balasore district.

TRAINING OF YOUNG CIVILIANS IN SURVEY AND SETTLEMENT WORK.

229. Mr. J. F. Gruning, Assistant Magistrate and Collector of Cuttack, was deputed for training to the attestation camp of the Assistant Settlement Officer of Balubisi Cricle. During his stay there, from the 5th to the 16th February 1895, he was practically shown the various stages of work connected with attestation. He had previously acquired some knowledge of survey and khanapuri work in Balasore last year, and found no difficulty in making himself acquainted with the details of the work. While in the attestation camp of the Circle Settlement Officer, he decided a number of "badar" cases, attested lakhiraj bahal statements, &c., and ascertained the rents of tenants in some eight villages.

230. Mr. McPherson, the Subdivisional Officer of Khurda, is reported to have received a good training in survey and settlement operations in connection with the milan khasra work and the schools opened for the training of sarbarakars.

There were no other young Civilians in this Division.

XVIII.—WARDS' AND ATTACHED ESTATES.

231. There were no attached estates under the management of the revenue authorities of this Division during the year under report. Killa Patia in the district of Cuttack continued to be under the management of the Civil Court, as reported last year.

232. The assessed jama of this estate, including cesses and miscellaneous receipts, amounted to Rs. 10,527, and the total expenditure on account of management and other charges, including the allowance of Rs. 2,400 for the maintenance of the proprietor and his family, amounted to Rs. 4,512 only.

233. The decree-holders were paid Rs. 2,028 up to December last, but one of them having died and his heirs not having filed succession certificates, no payment was made to them, though Rs. 2,925 are in deposit to the credit of the decree-holders. The outstanding balance of the debt is Rs. 13,216 principal and Rs. 22,789 interest: total Rs. 36,005.

234. The following wards' estates were managed by the revenue authorities during the year under report; but the Shahabunder estate in the district of Balasore was released from the management of the Court on the 7th December last, when the ward attained his majority :—

Cuttack	...	1. Kanika. 2. Kujang. 3. Madhupur.
Balasore	...	4. Jamkunda. 5. Shahabunder.
Puri	...	6. Rorang. 7. Malighati.

235. The total demand of rent and cesses due in all estates was more than 6 lakhs of rupees, of which more than 2½ lakhs were arrears and more than 3½ lakhs current. The collections amounted to nearly 3¾ lakhs, being 104·4 per cent. of the current demand and only 59·6 per cent. of the total demand (current and arrear). The balances outstanding at the end of the year were more than 2½ lakhs.* The remissions amounted to more than Rs. 21,000. The main part of these remissions was granted in the Kujang portion of the Burdwan Raj Estate in the district of Cuttack.

236. More than Rs. 68,000 on account of land revenue were paid by the different estates under the Government management during the year, and a sum exceeding Rs 1,500 was paid to superior landlords, the balance of net revenue available being above 2½ lakhs.

237. All the wards' estates in this Division are free from debt.

238. The charges for management amounted to Rs. 67,377. Rs. 46,173 were spent for the maintenance of the proprietors and their families, more than Rs. 43,000 were spent on improvements, and a little less than 1¼ lakhs was spent on miscellaneous expenses. The total expenditure on all accounts was more than 3 lakhs. The surplus at the end of the year was a little over Rs. 40,000, the largest surplus being in the Kanika Estate.

239. The education of the minors was well looked after.

The Jamkunda minor having fallen into bad company, was sent home to reside with his mother, as was noticed in last year's report. He has since been brought to Cuttack and reads in the Ravenshaw Collegiate School.

The Rorang ward of Puri district is the only minor who has made exceptionally good progress. He is reading in the Ravenshaw Collegiate School and preparing for the Entrance Examination.

The wards of Shahabunder and Jamkunda are said to have received instruction on zamindari affairs.

240. The following principal facts may be noted in respect of the wards' estates in this Division.

241. The high floods of July 1894, which occurred at a time when paddy plants and seedlings were in full vigour, caused serious damage to the crops and houses of many of the tenants of the wards' estates in the Cuttack district. This disaster told heavily on those who had not fully recovered from the effects of the cyclone of 1893. Although there was time for raising fresh crops after the flood, the people had not seed for a second sowing, and to remove this difficulty the estates advanced money to procure fresh seed. A sum of Rs. 20,000 was sanctioned by the Board for the purpose of making advances to the tenants of the flooded parts of Kanika, and subsequently, out of this sum, Rs. 300 was sanctioned for granting gratuitous relief to distressed tenants. Rupees 9,552 were actually advanced as takavi loans, and Rs. 68 was distributed in gratuitous relief. Rupees 5,932 were also sanctioned by the Board for repairs to the embankments in the estates which had been damaged by the flood.

242. In the case of Kujang Rs. 12,000 were sanctioned by the Board for granting takavi loans during the year, of which Rs. 3,328 only were paid to the tenants of the villages where the damages by the flood were considered serious.

243. The Shahabunder estate in the district of Balasore was, as noted above, released during the year from the management of the Court. The ward at the time of release was in the third class of the Balasore zilla school.

244. The estate was under the Court's management from the 20th September 1889 to 6th December 1894. The properties left by the father of the late ward consisted of 20 mahals in the district of Balasore, with an aggregate Government revenue of Rs. 5,745, and eight mahals in the district of Midnapore, with an aggregate sadar jama of Rs. 324. He also left a masonry house and some lands in Calcutta, besides family dwelling-houses and a temple at Shahabunder; also moveables and cash to the extent of Rs. 10,821.

245. At the time of taking over charge of the estate, the accounts were in great confusion, and an inordinately heavy balance of Rs. 45,681 was out standing from the tenants on account of arrears of rent. By judicious management it was possible to realize the whole of this heavy arrear, except such portion of it as was barred by limitation. In spite of the costly litigation in which the estate was involved, and the large expenditure on the maintenance of the proprietor's family, there were, at the date of release of the estate, Rs. 21,819 invested in Government securities and Rs. 11,423 in cash, which was handed over to the proprietor. A new estate was also purchased for Rs. 1,399, and Rs. 6,116 spent in making additions to the family buildings and in improving the estate during the short time that the estate was under the Court's management.

XIX.—EXCISE.

246. The total excise revenue was Rs. 5,71,526 against Rs. 6,10,535 in 1893-94 and Rs. 5,60,977 in 1892-93, thus showing a decrease of Rs. 39,009 and increase of Rs. 1,054 as compared with the two preceding years. When compared with the year 1893-94, there is a decrease under all the principal heads, country spirit, ganja, bhang and opium, while tari, imported wines, charas, &c., show an increase. The decrease under opium, ganja and bhang more than counterbalance the increase under others, thus causing a deficiency in the divisional total.

247. The decrease under the head "country spirit" is shared by all the districts. The decrease in Balasore is only apparent, imported wines having been included under this head in the previous year. In Cuttack the decrease of Rs. 326 is attributed to a less prosperous condition of the people, owing to the poor crops in the preceding years. The decrease of Rs. 194 in Puri is ascribed to the cessation of the railway work and combination of the town vendors to raise the retail price.

248. The increase under "tari" is the resultant of a considerable increase in Puri, an increase in Balasore, and a small decrease in Cuttack. No reason has been assigned for the increase in Puri, while that in Balasore and the decrease in Cuttack call for no special remark.

249. The variations under "pachwai," rum, &c., and charas, &c., call for no remarks.

250. The decrease of Rs. 14,314 under the head "ganja and bhang" is shared by all the districts. In Cuttack the decrease is ascribed to the bad condition of the people owing to poor harvests in the preceding years; in Balasore it is said to be due partly to the bad condition of the people in the subdivision of Bhadrak, partly to the delay in the settlement of the shops, and partly to the high price of the drug. In Puri it is ascribed to the high price owing to the failure of the ganja crop in Rajshahi, and the combination of the town shop-keepers to raise the price, and to decrease in the number of pilgrims to Jagannath.

251. The decrease of Rs. 28,009 under the head "opium" is the resultant of an increase of Rs. 2,432 and Rs. 292 in the districts of Puri and Balasore respectively, and a decrease of Rs. 30,733 in the district of Cuttack. To account for this decrease the Collector says that the sale proceeds of 15 maunds of opium, sold by the Manager of Dhenkanal in 1892-93, were credited to Government in 1893-94, the figures for the latter being thus increased by the sum of Rs. 19,904; still the considerable difference of Rs. 10,829 has to be accounted for, but no reason has been assigned except that the condition of the people was not prosperous. In connection with this it may be noted that, with the approval of the Board, the supply of opium issued to each Garjat State was limited by the prices paid to the Rajas for opium shops, the legitimate consumption being assumed to be the same as that of shops paying similar prices in Mogulbandi. This limit was introduced as a check on cheap garjat shops

taking supplies beyond the local requirements and underselling the more heavily taxed shops of Orissa. I am not in possession of proper materials for forming an opinion as to how far this policy of limited supply to the Garjats is responsible for this fall in the opium revenue. The Collector of Cuttack will be requested to give his special attention to this subject and to submit a report. Enquiry will also be made from the Political side of my office as to the working of this policy. The step is naturally unpopular in the Tributary States; but this would be the case whether the amount fell short of the local requirements or whether the contraband sales alone were prejudiced. Managers of Wards' states, including the late Mr. Ricketts, think the rule acts harshly and prevents the supply meeting the legitimate local demand. Rajas and managers have the remedy in their own hands if they can raise the prices of their shops. This in some cases is said to have been done; but Mr. Stevenson mistrusted the accuracy of the information supplied, and there is an obvious danger of misrepresentation, though the chiefs are pecuniarily interested in supporting the present policy.

252. The rate per head of population of the total excise revenue from all sources was 2 annas 4·3 pies in 1894-95 against 2 annas 6·2 pies in the preceding year. But this is to be reduced when the supply of the exciseable articles to the Garjat estates are taken into account.

253. There was a decrease of 45 excise cases in the district of Puri. With reference to this, the Collector, Mr. Sen, says it is apparently due to two causes, viz, "(1) some of the frontier outposts were abolished, and (2) in cases in which fines were not realized rewards were less readily granted than had hitherto been the case, with a view to prevent fabrication of false cases. The measure thus taken for the prevention of fabrication of false cases, however, it is believed, made informants and others less willing to bring to light even true cases."

254. The final orders of the Bengal Government with regard to the Garjat ganja question have not yet reached this office. It is very well known to Government that the prevention of the cultivation of ganja in the 14,000 square miles that are covered by the Tributary Mahals of Orissa would be no easy matter, even were this area under the same executive control as British territory. The difficulty will be enhanced a hundredfold by the perversity of some and the weak executive authority of most of the chiefs. The former difficulty may be overcome by an appeal to the cupidity of some and by bringing other influences to bear on others; but the latter evil is not so easily met, nor does any adequate Government agency at present exist to enforce the wishes of Government or even to ascertain how far they are being carried out.

XX.—STAMPS.

255. The total revenue derived from the sale of stamps and court paper was Rs. 4,00,410 against Rs. 4,20,840 in 1893-94 and Rs. 3,70,549 in 1892-93, showing a decrease of Rs. 20,430 as compared with the former, and an increase of Rs. 29,861 as compared with the latter year. The table below shows the revenue derived from the sale of each kind of stamps in the year of report and the previous year.

Description.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Court fees	2,96,877	2,75,263	......	21,614
Stamps for copies	15,599	15,119	......	480
Impressed sheets	95,365	97,918	2,553	......
Receipt stamps	4,118	3,905	......	213
Notarial "	536	449	......	87
Hundi "	177	84	......	93
Court papers	8,168	7,672	......	496
Total ...	4,20,840	4,00,410	......	20,430

256. The falling off in the sale of court-fee stamps chiefly contributed to the net decrease of Rs. 20,430 during the year under report as compared with the preceding year. The decrease is noticed in the districts of Cuttack and Puri. In the former it is attributed to the smaller amount of process fees realized and to the smaller number of revenue and criminal cases instituted during the year on account of bad harvests,* and in the latter it is reported to be due to the falling off in the number of mutation and waste land cases in the Khurda khas mahal, which was abnormally large in the previous year, and also to the smaller number of rent suits instituted during the year as compared with the preceding year. Balasore only shows a slight increase under this head, due to the settlement operations which are in progress in that district. For similar reasons there was a slight decrease in the sale of stamps for copies and court papers. Non-judicial stamps (impressed sheets) show a small increase in the districts of Cuttack and Balasore. The Collector of Cuttack attributes it to the distressed condition of the people and consequent increase in the number of deeds of transfer and mortgages executed during the year. In Balasore the number of these deeds was also larger, which contributed to the increase in the sale of non-judicial stamps in that district. Puri only shows a small decrease under this head, which is accidental, and no special reason can be assigned for it.

* Though the harvests were good. The bad harvests referred to are those of previous years.

257. The number of cases of unstamped or insufficiently stamped documents detected by Civil Courts and Revenue authorities was 214 during the year under report against 119 cases detected in the previous year. The amount of duty and penalty realized was Rs. 1,573 against Rs. 976 in 1893-94. The Income-tax Assessor of Puri impounded 105 palm leaf bonds, all of which came from a single person. The duty and penalty levied on these documents amounted to Rs. 464. This shows that the practice of writing documents on palm leaves still prevails to a large extent in the interior, and most of such documents not being produced in Court, escape detection. I have invited the attention of the District Officers to this fact, and have asked them to adopt necessary measures for their detection.

258. The number of prosecutions instituted for breaches of the Stamp Law was 19, in which 22 persons were brought to trial, as against 13 cases in which 19 persons were brought to trial in the preceding year. Of the 22 persons brought to trial during the year under report, 14 were convicted against 12 in the preceding year. The fines imposed during the year amounted to Rs. 209, out of which Rs. 25 were disbursed as rewards.

XXI.—INCOME-TAX.

259. The financial results of the last two years are compared in the following statement:—

District.	1893-94.				1894-95.			
	Number of persons finally assessed.	Final demand.	Collection.	Percentage of collection on demand.	Number of persons finally assessed.	Final demand.	Collection.	Percentage of collection on demand.
1	2	3	4	5	6	7	8	9
		Rs.	Rs.			Rs.	Rs.	
Cuttack	1,083	23,598	23,421	99·2	1,093	23,982	23,893	99·6
Balasore	960	15,438	15,438	100	993	16,196	16,181	99·9
Puri	590	15,785	15,785	100	597	16,514	16,510	99·9
Total ...	2,633	54,821	54,644	99·7	2,683	56,692	56,584	99·7

The statement shows a divisional increase of 50 assessees and Rs. 1,871 in the final demands, the percentage of collection remaining the same.

260. All the districts show an increase both in the number of assessees and the amount of assessment. The increase is due to careful revision and increased activity in finding out new assessees.

261. The collections are very satisfactory, being more than 99 per cent., as in the preceding year. The falling off in Balasore and Puri is too small to call for any remarks.

262. The outstanding balance on account of tax, penalties and costs at the close of the year amounted to Rs. 285. This does not call for any special remark.

263. The population of the Division being 3,877,294, the average incidence of the tax during the year under report was Re. 1 to every 66 against 70 persons in the preceding year. The average number of persons assessed to each rupee of the tax in each district was as follows:—

	1893-94.	1894-95.
Cuttack	82	80
Balasore	64	61
Puri	60	57

As in the previous year, the incidence was highest in Puri and lowest in Cuttack, though the Collector of Puri says—"There are very few large traders, mahajans, middle class traders and money-lenders, who come under the scope of the Act, who do not keep regular accounts." I know nothing to justify the comparatively light incidence of the tax in Cuttack; indeed, I should expect to find it more heavily taxed than the other districts.

264. The following statement compares the number of objections filed during the year under report with those of the preceding one:—

District.	1893-94.				1894-95.			
	Filed.	Disposed of.	Pending.	Percentage of objections to assessment.	Filed.	Disposed of.	Pending.	Percentage of objections to assessment.
1	2	3	4	5	6	7	8	9
Cuttack	212	212	......	18·8	167	166	1	14·6
Balasore	135	135	......	13·8	124	124	......	12·4
Puri	137	137	......	23·	124	124	......	20·5
Total ...	484	484	......	18·5	415	414	1	15·9

265. It is satisfactory to note that there was a decrease both in the number of objections filed and the percentage of objections to assessments, though there was an increase both in the number of persons finally assessed and the amount of tax imposed. This good result is shared by all the three districts, and is said to be due to careful revision of assessment. The better condition of the people has perhaps partly contributed to it.

266. The amount of penalty imposed by the Collector in each district is compared below for the last two years, viz.—

District.	1893-94.	1894-95.
	Rs.	Rs.
Cuttack	428	495
Balasore	256	275
Puri	778	1,109
Total ...	1,462	1,879

267. Coercive measures were adopted in all the three districts; the variations are, however, too small to call for any remark. It may, however, be that there are some people who, as the Collectors of Cuttack and Balasore say, withhold payment in the hope of urging the fact later on as evidence of their inability to pay the tax.

268. No active opposition to the tax is reported, though it continues to be as unpopular as before.

XXII.—MONETARY ARRANGEMENTS.

269. The transactions in currency notes in the different districts of this Division as compared with those of the previous year are exhibited in the following tables:—

District.	Receipts.							
	Received in payment of Government dues.		Received from public in exchange for silver or other notes.		Received from Bank of Bengal or other Treasuries.		Total.

270. The receipts and issues show an increase and decrease respectively as compared with the previous year. Taking district by district, the result is that Cuttack alone shows a falling off in receipts, the decrease in issues being contributed by all the districts. The fluctuations are ascribed to the following causes.

271. The general agricultural depression and consequent slackness of trade in the Cuttack district, evidenced by a falling off in the customs receipts to an extent of no less than Rs. 10,000, is said to be responsible to a great extent in bringing about the fall in the receipts of that district. In Balasore and Puri the increase in the receipts was due to a larger supply of notes having been received in the former from the Bank of Bengal to meet the requirements of the Settlement Department, and to the expansion of the rice trade in the latter resulting in a larger receipt from the public in exchange for silver or other notes.

272. The decrease in issues in Cuttack is explained to be due to a great extent to the decrease in the survey establishment, to which a large number of notes were issued in payment of salaries during the previous year.

273. The decrease in issues in Balasore is attributed to merchants remitting money in coins instead of in notes, and in Puri the fact of a smaller number of pilgrims having visited the Temple is said to have operated in bringing about a decrease in issue in exchange for silver or other notes, sufficient to more than counterbalance an increase in the issue of notes in payment of Government dues caused by a demand for notes by public officers.

274. There was no prosecution under the Metal Tokens Act in any of the districts during the year.

275. A review of the transactions of the post office savings banks and payment and issue of money-orders will find a place in section XXXII of this report, under head "Post Offices and Telegraphs."

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

276. As was reported last year, the East Coast Railway continued under construction, though, during the year under report, its work was stopped for

want of funds. It has again been resumed, and it is hoped that the line up to Bhubaneswar will be completed some time next year. The foundations of the large bridge over the Madagni were completed during the year.

277. The proposed branch line to Puri has been resurveyed for fixing the alignment finally.

278. The Cuttack-Midnapore-Howrah Railway line has only been marked out, and no further steps seem to have been taken.

279. The Public Works Department was engaged in raising the flood embankment along the right bank of Baitarni river and in constructing a new embankment along the left bank of the Bura river to protect the canal and a large area inland from the action of flood. A large amount of work was done on the distributaries of the Jajpur Canal. The supply sluice and channel at the head of the Kendrapara Canal at Jagatpur were also completed.

280. The works of the Taldanda Extension Canal and its various distributaries and protective embankments, and the fixing of shutters of the Sone type on the Baitarni river, which were in progress in the previous year, were completed during the year under report.

281. The following table compares the area irrigated and the financial working of the Orissa Canals during the last three years:—

OT.	Area irrigated in acres.			Total demand including arrears (exclusive of miscellaneous demand).			Total collections.			Remissions.			Balance.			Percentage of collection	
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
				Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		
... ...	128,751	87,724	108,129	1,91,175	1,25,943	1,53,993	81,500	51,551	81,509	731	1,268	1,008	1,09,144	73,124	71,476	42·5	40·[illegible]
... ...	32,201	15,802	14,432	49,025	24,203	22,209	22,677	14,829	16,549	86	1	......	26,062	9,373	5,660	46·6	61·2
otal ..	160,952	103,526	122,561	2,40,200	1,50,146	1,76,202	1,04,177	66,380	98,058	817	1,269	1,008	1,35,206	82,497	77,136	43·3	44·2

The above figures show that the total area irrigated during the year under report was greater than that of 1893-94 by 19,035 acres and less than that of 1892-93 by 38,391 acres. Balasore alone shows a gradual decrease in the irrigated area. This decrease has been accounted for by the fact that the greater portion of the area commanded by High Level Canal Range III does not require canal water except in years of drought. Nearly the whole of the leases on that canal were taken during the drought of 1888. The term of these leases expired in 1892-93, and the rainfall during the last two years, being copious and well distributed, the lapsed leases were not renewed. Out of the total demand of Rs. 1,76,202, Rs. 98,058 were collected during the year under report, leaving a balance of Rs. 77,136 (after deducting the amount of remissions). There is improvement in the percentage of collection, both collectively and individually.

282. The collectorate record room, the additions to the Tulsipur inspection bungalow rendered necessary by its being converted into a circuit-house, the science class building in Cuttack, and the Burdand drain in Puri, were completed during the year 1894-95.

XXIV.—ROADS AND COMMUNICATIONS.

283. Except as noted below, the state of communications was good during the year under report. Laterite supplies a cheap and good material for metalling the roads, which are maintained on the whole in very good condition.

284. Owing to the high flood of July 1894, the tract below the Brahmini and Pattia weirs, bounded by the High Level Canal Range II and the Brahmini river on the south, and the Bura Kharsua on the north, was under water, and all communications by the Trunk Road were stopped for a couple of days, and the telegraphic communications between Jajpur and Cuttack interrupted. From the 31¾th mile to the 36th mile the road was submerged under some 10 to 15 feet of water, passing the causeway openings in the 33rd and 34th miles. Four breaches were made, and the metal on the above places was largely washed away. The damages were soon repaired by the Public Works Department.

285. The high floods of the Brahmini-Baitarni and the flood of the Mahanady made breaches in several embankments, stopping communication for some time. It was found necessary to cut the embankment in one place for the benefit of other embankments and neighbouring places. With a few exceptions, all the embankments are maintained by Government, and speedy measures were taken to repair the flood damages.

286. During the year under report, the miserable state of the road connecting the Trunk Road with Jajpur attracted my notice. This lies in the district of Balasore. On my impressing the necessity of maintaining it in good condition, the District Board of Balasore has promised to repair it during the current year.

287. The total outlay on original and repair works on district communications during the year under report amounted to Rs. 11,782 and Rs. 80,743 respectively.

288. The following is a summary of the works undertaken by the several District Boards during the year under report:—

Cuttack.—No new district road was started during the year. The District Board, however, spent Rs. 1,941 in completing a district road commenced in the preceding year, and Rs. 32,240 in repairing the existing roads. The Local Boards spent Rs. 7,910 in maintaining 179 village roads and Rs. 3,787 in constructing 14 new village roads.

Balasore.—One masonry bridge and three culverts were constructed by the Balasore District Board. The sum of Rs. 15,520 was spent on repairs of metalled and unmetalled roads, and the sum of Rs. 5,294 in maintaining village roads.

Puri.—The roads are in good order, and are said to be sufficient except in the north-eastern part of the district where communication is difficult, and it is equally so to make and maintain roads on account of the low nature of the country. The District Boards have of late directed their attention to the subject. The District Boards constructed one village road.

289. *Arboriculture.*—The District Board of Balasore alone spent Rs. 888 in planting trees on the sides of roads.

290. *Relief works.*—The District Board of Cuttack spent Rs. 382 on a new road, and the Kendrapara Local Board spent Rs. 2,664 on five village roads started as relief works.

291. The following table shows the lengths of metalled and unmetalled roads maintained by the District and Local Boards of this Division:—

Roads.	Cuttack.				Balasore.				Puri.			
	By whom maintained.				By whom maintained.				By whom maintained.

The figures exclude the ferry charges and allotments.

XXV.—WORKING OF THE PURI LODGING-HOUSE ACT.

293. The provisions of the Act were extended to the town of Bhubaneswar and its adjoining villages Kapileswar and Kapilprosad, under Government notification dated 5th February 1894, and to the village of Satyabadi under notification dated 7th April 1894, all these places being in the district of Puri. It was noted in paragraph 120 of the last year's report that the Act had not come into force in Jajpur in the district of Cuttack, and this was postponed till the 1st April 1895, under Government letter No. 5945M., dated 28th December 1894, for the sake of administrative convenience. The Act has since come into force in that town.

294. The funds derivable from the town of Bhubaneswar with its two adjoining villages and the village Satyabadi have been amalgamated with what is known as the Jagannath Road Fund, as distinguished from the Puri Lodging-house Fund, which consists of the proceeds from the town of Puri alone.

295. The subjoined table compares the receipts and expenditure of the several funds under the Act for the years 1893-94 and 1894-95, and gives the number of licensed houses and the number of lodgers to be accommodated:—

NAME OF FUND.	Receipts.		Expenditure.		Number of *chutties*.	Number of licensed houses.	Number of lodgers to be accommodated.
	1893-94.	1894-95.	1893-94.	1894-95.			
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.			
Puri Town Lodging-house Fund.	20,239	8,501	11,273	11,331	...	298	7,448
Chandballi Town Lodging-house Fund.	671	765	570	356	1	60	2,778
Amalgamated Jagannath Road and Trunk Road Lodging-house Fund—							
In Cuttack ...	3,742	2,818	1,037	2,762	23	331	2,959
In Balasore ...	2,249	2,307	2,162	2,615	35	164	2,623
In Puri ...	4,501	4,633	4,561	3,817	16	136	3,641
Total ...	51,402	19,024	19,603	20,881	75	989	19,449

296. The receipts of the Puri Town Fund fell to Rs. 8,501 during the year under report, from Rs. 20,239 in the preceding one. This decrease does not appear abnormal, when it is remembered that the year 1893-94 was one of special pilgrimage on account of the ceremony known as the Naba-kalebar, or the changing of the body of Jagannath, and that the receipts in 1892-93 amounted to Rs. 5,526.

297. The variations as regards the other funds do not call for any special remarks.

298. In all the districts the lodging-houses were regularly inspected by the Health Officers, and care was taken as to the cleanliness of the houses. The articles of food in the *chutties* and towns were examined by the Health Officer from time to time. No epidemic broke out in any of these places.

299. I have previously advocated the construction of free shelters for pilgrims at Puri and on the road between Cuttack and Puri.

The experiment was tried at Puri in 1894, where some cheap mud shelters were erected, but the Magistrate reports that they were not used. I do not think that this experiment is decisive; it is not unlikely that few were aware of the existence of such shelters; it is inconceivable that men would not make use of shelters in such weather as usually prevails in July, when the festival takes place.

300. The question of caste, I am assured, should not arise at Puri, where all castes except the very lowest, whose touch pollutes water, are for the time of

their stay sufficiently on a footing of equality that all may without prejudice eat *mahaprosad*, which is the chief article of consumption among pilgrims, together. There could therefore be no religious objection to their all making use of the shelters at Puri. On the road to Puri the case, I believe, is different. Religious equality does not commence till a stream is crossed about two miles before reaching Puri. For the remaining 51 miles between Cuttack and Puri caste prejudices on the subject of cooking and eating exist in full force. We are faced with the alternatives of either forbidding all cooking and eating in such shelters, which would deprive them of much of their usefulness, or driving away the better castes by their repugnance to eat or cook under the same roof as the lower castes. The inverse of this is more likely to occur, that the high caste man would establish himself in the building and would not admit men of inferior castes, whose poverty gives them the better claim to free shelter, the superior classes being able to afford to pay for accommodation at the roadside inns that are licensed for the purpose. In the present condition of affairs the lower castes would accept uncomplainingly the treatment of their betters that I have described them as likely to meet with, and I am unable to conceive any arrangements in the way of appointing a custodian to each shelter, which would get over the difficulty I have mentioned. I understand that the old sarais were not open to all-comers; there was a custodian who excluded persons of inferior caste.

301. The scheme of road-side shelters is beset with difficulties which may possibly be overcome by perseverance, but a free shelter at Puri itself seems perfectly feasible, and I can only attribute its failure to some defect in the arrangements, and I should wish to see it given a further trial.

XXVI.—EDUCATION.

302. During the year under report the total number of schools in the Division rose from 6,158 to 6,186, and the pupils from 97,767 to 98,927, giving an increase of 28 schools and 1,160 pupils. The increase in the number of schools is mainly due to that in primary and female schools. There was an increase in the number of pupils in all but middle English and middle vernacular schools; the former shows a decrease of two and the latter an increase of one.

303. In Cuttack there was a decrease of 36 schools and 418 pupils. The decrease is mainly in the lower primary schools. The District Officer says that no special reason can be assigned for it, nor does the Officiating Inspector of Schools, who has furnished me with a note, account for the decrease. The former, however, says that it is perhaps due to the increased poverty of the lower classes consequent on several bad seasons preceding the year under report. But this explanation is not satisfactory.

304. Balasore shows an increase both in the number of schools and pupils, the figures being 2,004 and 34,497 against 1,874 and 33,745 in the preceding year respectively, though there is a considerable decrease in the number and pupils in the upper primary schools. The decrease is said to be mainly due to the withdrawal of stipends from weak and inefficient schools under the District Boards.

305. There is an increase both in the number of schools and pupils in Puri, there being 1,198 schools with 17,042 pupils at the end of the year under report, against 1,164 schools with 16,216 pupils at the end of the preceding year. The increase is chiefly in lower primary education, for which no reason has been assigned by the Magistrate or the Officiating Inspector of Schools.

306. The system of payment by results in the case of lower primary education was followed in the three districts. As regards the mixed system of small stipends and large rewards according to the results of an annual examination, the Officiating Inspector of Schools says it "is undoubtedly the best system for securing stability on the one hand and efficiency on the other, but its introduction in Orissa with its vast network of primary schools would necessitate an outlay much in excess of the resources of the department." As regards the advance reward system, he says "the authorities in the Puri district would not introduce it unless the allotment for primary education was largely increased. The Cuttack Municipality, which had introduced the system, abandoned it in the middle of the year. The Balasore District Board introduced the system experimentally after the close of the year, and 156 schools have been selected to receive

advance payments." I am not in a position to offer any remarks, for the reasons given below.

307. The proportion of boys at school to boys of school-going age shows little variation as compared with the figures for the preceding year, Balasore standing first, Cuttack second, and Puri third.

308. The cost per head of pupils varied from Rs. 24-3 in Cuttack to Rs. 37-8 in Balasore for high English schools; from Rs. 9-6 in Puri to Re. 1-5 in Cuttack for middle English and vernacular schools; from Rs. 2-6 in Cuttack to Rs. 3-4 in Puri for primary schools; and Rs. 19-11-3 in Balasore to Rs. 75-1 in Cuttack for special schools. The variations are, I fancy, accounted for in the Education Department.

309. The following table compares the number of girls' schools and pupils attending them during the year under report with those of the preceding one in each of the three districts:—

District.	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Cuttack	48	1,125	52	1,295
Balasore	36	1,031	38	1,042
Puri	17	385	17	391
Total ...	101	2,541	107	2,728

It is satisfactory to note the increase both in the number of schools and pupils.

310. The Cuttack Female Orphanage School under the management of the Baptist Mission successfully passed one girl at the middle English scholarship examination. Eleven girls passed the middle vernacular, 14 the upper primary, and 33 the lower primary scholarship examinations. Female education is not looked upon with prejudice by the Uriyas. Though conservative to the backbone, the Uriya Brahmins, Karans and Khandaits used always to send their girls to read with boys in pathsalas up to the age of 9 or 10. Their education was of course elementary in character and of the old style. Very old ladies are still to be found who can read and write. Though the numbers of schools and pupils are increasing, little change is visible in the school-going age of girls. It will perhaps be long before higher schools will be required for the Hindu-Uriya girls, though early marriage does not obtain among the Karans and Khandaits.

311. The percentage of Muhammadans to the total number of pupils during the year under report is compared with that of the year before in the following table:—

	1893-94.	1894-95.
Cuttack	4·1	4·4
Balasore	2·1	1·9
Puri	1·1	1·3

The total number of Muhammadan pupils under instruction is reported to be 3,239 against 3,060 in the preceding year, showing an increase of 179 pupils. As Muhammadans form a very small percentage of the total population of the three districts, they do not appear to be lagging behind others in the race of progress.

312. As regards the education of aboriginal and backward races, there were 162 pupils against 190 in the preceding year. There is a decrease of 41 Sonthal pupils in Balasore against an increase of 18 Khond pupils in Cuttack. The decrease is ascribed to the failure of the *rabi* crops in the parts of the district bordering on the Subarnarekha.

313. There were seven special primary schools for the children of the low castes in Cuttack and Puri. Four low caste children are reported to have passed the lower primary scholarship examination in Puri. The Officiating Inspector says that none of them stood sufficiently high to be eligible for a scholarship. I think their case should have been treated as a special one.

314. In addition to the above there were private institutions as shown below:—

District.	Number of private institutions.	Number of pupils.
1	2	3
Cuttack	435	3,276
Balasore	134	868
Puri	811	5,143
Total ..	1,380	9,287

315. The number of institutions has risen from 1,257 to 1,380, and that of pupils from 8,531 to 9,287. It is curious to note that the district of Puri stands first in this respect, both as regards the number of institutions and that of pupils, though that district is very backward in matters of modern education. This fact does not appear to have been accounted for anywhere. I think it is due mainly to conservatism, or more accurately religious prejudice, being more marked in Puri, which is a centre of the Hindu faith, than it is elsewhere in Orissa, and that in that district what would correspond to church schools as distinguished from Boards' schools are more numerous.

316. In dealing with education it will not be out of place here to add a few words about the Ravenshaw College, the only institution of its kind in the province. On the 31st March 1895 there were 59 students on the roll against 68 on the corresponding date of the preceding year. At the B.A. examination held in 1894, 29 candidates appeared, of whom only 7 passed. At the F.A. examination, 5 passed out of 31. The result is not at all satisfactory. Though the College had an able Principal in Mr. Hallward, there appears to be something wrong with the institution to account for such poor results. If the evil admits of a remedy, I would strongly advocate that the remedy should be sought for and applied. The College is the only institution of the kind in Orissa, which, as a Division, is admittedly backward in higher education. The importance to the Uriyas of enabling them to hold their own against foreign competition possesses almost a political character; they do not identify themselves with the inhabitants of Bengal, and are desirous of qualifying themselves for service in their own country; their ambition is a laudable one, and a similar ambition on a more magnificent scale actuates the natives of the sister province, whom it would ill become to take exception to the application of the Munro doctrine to Orissa. For good or evil, the spirit that is embodied in that doctrine exists and gathers force in Orissa, and my desire to allow it ample scope must be taken as my apology for trenching on a subject which is not strictly within my province.

317. I have done my best, on the occasions on which I have presided at the prize distribution of the collegiate school, to inculcate a spirit of self-help among the Uriya boys, and to deprecate the too common idea that educational deficiencies will be overlooked for no better reason than that the candidate for employment is an Uriya, and to stimulate their self-esteem and encourage them to conquer success by merit rather than pilfer it by patronage, the latter having been too long the preferred method in Orissa. I will conclude this portion with a few remarks regarding my relation, as Commissioner and the Superintendent, Tributary Mahals, with the officers of the Education Department. As Commissioner, I am considered as the controlling authority in educational matters in the hands of the District Boards and Municipalities

on the one hand; as Superintendent, Tributary Mahals, the sole local authority over the Gurjat chiefs on the other hand. But few matters have been referred to me by the Education Department during the year. I do not recollect to have ever come across any case of the nature contemplated in rules 16, 21, 69, 71 and 92 of the rules made under clauses (*j*) and (*q*) of section 138 of the Local Self-Government Act, received with Government Circular No. L $\frac{2\text{-}B}{4}$ 6, dated 18th April 1890. It appears to have become the practice of the Education Department to keep everything for the Annual Report, from which I learn for the first time what educational officers think. This does not tend to improvement and progress. The Inspector's annual report comes to me for remarks through the Director of Public Instruction, and reaches me several months after the close of the year. I have no means of knowing what steps have been taken and how far the orders and wishes of Government have been carried out during the year. To make the point clear, I will refer to the remarks of Government in paragraphs 5, 13, 16, and 18 of its Resolution on the Report on Public Instruction in Bengal for 1892-93, received with its Circular No. 28, dated 24th November 1893. On its receipt I invited attention to those points, but I had no means to know whether they were given effect to until I got the Inspector's report with the Director of Public Instruction's No. 4094, dated 3rd August 1894, and that report was silent on these very points. I pointed this out to the Director of Public Instruction in No. 1252R., dated $\frac{18}{20}$th August 1894, and made some suggestions; but it is not yet known how they were received by him. The same course is followed by the local officers of the Education Department as regards the Tributary Mahals. Everything is kept for the Annual Report, which reaches me some months after the close of the year. Things will take an altogether different course if matters are brought to notice as soon as they come to the knowledge of the officers of the Education Department. The case is particularly strong with regard to the Tributary Mahals, where my influence as Superintendent is of necessity far greater than what any Educational officers can hope to exercise. It was avowedly for this co-operation between civil officers and those of the Education Department that these were reorganized under Government Resolution dated 30th September 1872, received with its No. 3521A., dated 30th September 1872, as will appear from Sir George Campbell's minute dated 19th September 1871, received with Government letter No. 2967, dated 28th September 1871. It was for this reason that the appointment of a Special Inspector was advocated in this office No. 726, dated 9th December 1891. I am not aware of any orders or rules contrary to the policy of 1872, but as a matter of fact it has passed into disuse in Orissa.

318. I have been in the habit, when inspecting District Boards' offices, of scrutinizing the allotments to education, medical and public works, as they now are, as compared with the sums originally allotted for these purposes. The grants for education and medical were fixed many years ago subject to trifling additions from time to time. I think I may say that I have invariably found these original grants exceeded by the present expenditure on schools and dispensaries, and the excess is not made good by an increase in the receipts from assigned sources of revenue, viz., pounds, funds, education, medical. The balance had to be made good, and this was done at the expense of public works. I suggested that a readjustment was necessary to bring the expenditure into conformity with the receipts under each head. I dealt with the matter in my District Boards' Report, 1893-94, and subsequently learnt that my suggestion was of doubtful validity. I venture to think that the problem is not solved by the above orders; the requirements of Public Works do not decrease; indeed they increase with the necessity for feeder roads to railways; and we see that education steadily increases and gives rise to increased expenditure, and it is the same with medical expenditure, though from a civilized point of view this can be hardly said yet to exist. Had the Civil Surgeon a number of hospital assistants patrolling the country, and establishing aided dispensaries and distributing grants in-aid to native practitioners or payments-by-results, I have no doubt that the demands under head "Medical" would bid fair to equal those under head "Educational" to the still further detriment of public works.

319. The problem of how to meet increased educational and medical requirements without prejudice to public works' necessities seems still far from

being solved, and yet it is one that calls for the most serious consideration if education is to continue to spread and if medical aid is to reach more than an insignificant fraction of the population.

XXVII.—DISPENSARIES AND HOSPITALS.

320. The subjoined abstract shows the number of dispensaries and hospitals in each district, their income, and the average number of patients treated.

District.	Number of dispensaries.	Income from—					Daily average of patients.		Ratio per cent. of out-door patients to total population.
		Government.	District Board.	Municipality.	Subscription.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
Cuttack	13	4,429	1,327	3,481	11,790	21,027	54·08	378·27	2·38
Balasore	8	659	2,481	800	6,869	10,789	17·90	145·88	2·84
Puri	6	2,538	1,561	4,492	2,274	10,865	36·09	110·72	2·08
Total ...	27	7,626	5,369	8,773	20,933	42,681	108·07	634·87	2·88

321. During the year under review there were 27 dispensaries and hospitals against 23 in the year preceding. The increase was due to the inclusion of two new dispensaries in Cuttack and two in Balasore. The total number of in and out-patients treated in each district during the past two years is shown below—

	Total number treated.				Total.	
	In-patients.		Out-patients.			
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
Cuttack ...	1,391	1,119	51,510	64,593	52,901	65,712
Balasore ...	801	608	27,955	28,303	28,756	28,911
Puri ...	1,155	1,051	16,936	19,147	18,091	20,198
Total ...	3,347	2,778	964,01	112,043	99,748	114,821

322. The total number of patients treated in all the 27 dispensaries and hospitals during the year was 114,821 against 99,748 in the previous year, showing a large increase of 15,073. The increase occurred in all the districts of the Division, but was conspicuous in Cuttack. There was a large increase among the out patients from 96,401 in 1893 to 112,043 in the year under report. The increase in all the three districts has not been explained by Collectors, but in Balasore, as to the decrease in the number of in-patients, the Collector writes as follows:—

"No explanation can be given of the decrease in the number of in-patients. It may be due to a decrease in the number of helpless pilgrims compelled to seek relief in the hospitals."

323. *Cuttack*.—The number of patients treated in the district increased in all the dispensaries except in that of Dharamsala. The total amount of cost was decreased in Gunja, Dharamsala and Lady Thompson dispensaries, while it was increased in all others as compared with the previous year. In-patients as well as out-patients are treated in the General Hospital, Lady Thompson,

Jajpur, Dharamsala and Kendrapara dispensaries, whereas in the rest only out-patients are treated. *The Collector remarks that the number of out-patients treated in the Cuttack Municipal Dispensary was the highest (i.e. 17,187), as was* the case last year. The Collector also states that it is satisfactory to note that there was a large reduction noticeable in the cost of diet of the in-patients treated in the Jajpur and Dharamsala dispensaries. It has been reported that major surgical operations were performed with good results in the year under report.

324. The public health of the district generally was inferior to that of the year before. Some serious diseases, such as cholera, dysentery, &c., are reported to have repeatedly visited the district.

325. The medical school attached to the General Hospital is reported to have shown good results in the year under report. In order to strengthen the staff of the school an additional Assistant Surgeon has been appointed.

Balasore.

326. There was some increase noticeable in the total number of patients in the Pilgrim and Chandbali Hospitals, and in the Raja Syamanand Dey Dispensary (shown as the town dispensary in the last year's return) and in the Jellasore Dispensary. The increase is said to be due principally to pilgrims. The decrease in the total number of patients in the Bhadrak Hospital and in Soro Dispensary is said to be due to the pilgrims taking the canal routes for their convenience and for economy of time and trouble.

327. The total receipts of the year show an increase which has been ascribed by the Collector to the following causes:—

"It is due principally to a donation of Rs. 1,500 made by the Raja of Mohurbhanj, and Rs. 50 by Rai Govind Bullabh Mohasaya Rai Bahadur, towards the improvement of the Pilgrim Hospital, and Rs. 300 by Raja Baikuntha Nath De Bahadur, on account of the pay of the Civil Hospital Assistant of the Raja Syamanand De Dispensary during the latter's absence on privilege leave."

328. The increase in total expenditure is said to be due to the inclusion of two new dispensaries noted above. It is noticeable that the expenditure is in excess of the receipts against Raja Syamanand De Dispensary. This is said to be due to the purchase of medicines and other things both for that institution and for Rani Srimati Dispensary.

Puri.

329. As regards the dispensaries at Pipli and Balianta, the Collector remarks as follows:—

"The dispensaries at Pipli and Balianta being very largely resorted to by the people of the district, Mr. Coxe proposed that they should be maintained at the expense of the District Board. He also proposed that in case the District Board fail to maintain the dispensary at Balianta it should be converted into a field hospital. The District Board have resolved to take over charge of the Pipli dispensary. The dispensary at Balianta will be maintained on the present footing at the expense of the Puri Lodging-house and the Jagannath Road Funds. Considering the great importance of the health of the Puri district, especially along the pilgrim routes, it is in contemplation to submit a general scheme for the medical provision of the district. It is hoped that if the matter be properly represented to Government some grant may be obtained from Provincial Funds."

330. The Banpur dispensary has hitherto been entirely maintained by Government. In order to lighten the burden to Government, and to make provision for a compounder and accommodation for in-door patients, Mr. McPherson, the Subdivisional Officer of Khurda, attempted to raise a subscription and got promises of a sum of Rs. 70, of which only Rs. 31 have been collected up to date.

331. In paragraph 150 of my last year's report, it was stated that the Satpara Dispensary was of little use; but in the year under report the Collector states that the dispensary is doing better. The daily average number of in as well as out patients is said to be ·64 and 10·2 respectively, against nil and 3·26 in the last year.

332. Besides the abovenamed dispensaries, there is a cholera hospital in Puri maintained by the municipality with the help of the Puri Lodging-house Fund. This hospital is opened during the festivals. It was open for 104 days, and 189 cases were treated during the year under report.

In its No. 170M., dated 14th January 1895, Government pointed out the inadequacy of the medical provision for Puri, and called for a special report. The matter is now under consideration.

XXVIII.—LIBRARIES.

333. There is no public library in this Division. The district and sub-divisional libraries are in good order. The books of the subdivisional library of Khurda required classification; this has since been done. After revision of the catalogues of the libraries in the Cuttack district under the Board's Circular No. 6 of May 1889, as reported last year, some of the superfluous books of the Jajpur library were sent to the new district of Angul under the Board's orders, and some of the useless books of the Kendrapara library were sold during the year under report.

334. In addition to these there are good libraries attached to the Cuttack College and the zilla schools of Balasore and Puri, containing standard works on science, language and other subjects. These are under the care of the Education Department, and the Collector of Puri says that the one attached to the zilla school is resorted to by Government officers.

XXIX.—MUSEUMS.

335. There is no museum in this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

MUNICIPALITIES.

336. *Cuttack.*—In this district there are three municipalities, Cuttack (Sadar), Jajpur and Kendrapara. The Civil Surgeon of the district is the Chairman of the first, and the Subdivisional Officers are the Chairmen of the other two.

337. The following figures give the number of meetings held and the average attendance:—

NAME OF MUNICIPALITY.	Number of members including Chairman.	Number of meetings.	Percentage of attendance.
1	2	3	4
Cuttack ...	18	21	50·3
Jajpur ...	12	18	53·6
Kendrapara ...	12	14	66·6

338. The most important municipality in this Division is the Cuttack Municipality. Of the 18 members or Commissioners, 12 are elected and 6 nominated by Government. All the members are said to have taken great interest in municipal affairs, except Munshi Abdul Gaffur. No meeting is said to have been adjourned for want of a quorum.

339. In the Jajpur Municipality, Babu Ganapati Das and Babu Abinash Chunder Nag are said to have put in the smallest number of attendances. The number of meetings adjourned for want of a quorum was two. The majority of the Commissioners of the Kendrapara Municipality are said to have taken a proper interest in municipal affairs. Only one meeting was adjourned for want of a quorum.

340. The receipt and expenditure of each municipality as compared with the preceding year are shown in the subjoined table—

NAMES OF MUNICIPALITIES.	RECEIPTS.		EXPENDITURE.	
	1893-94.	1894-95.	1893-94	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Cuttack ...	39,6?6	47,487	39,606	47,370
Jajpur ...	5,284	4,604	5,12?	5,189
Kendrapara ...	7,561	7,827	7,645	7,520

341. Of the total amount expended in the Cuttack Municipality, Rs. 2,997 were spent on original works and Rs 2,031 on repairs, &c. Much remains to be done in improving the road and drains of the town. The former have in my opinion deteriorated during the past year, and the latter have never been put into a satisfactory state. The immediate cause of the deterioration of the roads is that money has been spent in widening them, and the ultimate cause is lack of means. The main thoroughfares are kept clean, but the trenching arrangements, as has been reported by the Deputy Sanitary Commissioner, are defective.

342. In the Jajpur Muninicipality, of the total expenditure, Rs. 1,070 were spent on original works and Rs. 250 on repairs, &c. The sanitary charges are said to have been Rs. 2,074.

343. Of the total expenditure of the Kendrapara Municipality, Rs. 1,619 were on original works and Rs. 1,844 on repairs. The sanitary condition of the town is said to have been good. The Committee for the management of the municipal affairs is said to have worked satisfactorily. During the year under report taxes on certain offensive trades have been imposed, and the cart registration fee enhanced from Rs. 2 to Rs. 3.

344. *Balasore.*—In this municipality there are 18 members on the Committee, of whom 5 are official and 13 non-official. The number of meetings held during the year was 19, and the average attendance of members 7·63. The number of meetings adjourned for want of a quorum was two.

345. The total receipts and expenditure of the year under report were Rs. 15,794 and Rs. 16,047, against Rs. 16,0?5 and Rs. 14,770 respectively in the preceding year. There is some increase noticeable in expenditure as compared with that of the preceding year, which has not been accounted for.

346. *Puri.*—The Municipal Board of the town consists of 15 members, of whom 10 are elected and 5 nominated by Government. The number of meetings held during the year was 16, and the percentage of attendance 58·3 The number of meetings adjourned for want of quorum was one.

347. The total receipts and expenditure during the year under report were Rs. 35,386 and Rs. 38,014, against Rs. 40,654 and Rs. 39,216 respectively in the preceding year. The receipt shows a decrease which is said to be due to Rs. 5,000 taken as loan from Government in 1893 94 to carry out the Baradand drainage scheme, whereas in the year under report no such loan was incurred. The Baradand drainage scheme above referred to is said to have been finished, but it cannot be regarded as entirely completed till the necessary feeder drains are constructed.

348. As regards matters of sanitation it has been said by the Collector that many things remain to be done. The foremost requirement is the supply of pure drinking water, which among other things cannot be expected from a municipality of this status, with an income of Rs. 35,000 only.

DISTRICT BOARDS.

349. The statement below shows the number of members, number of meetings held, and the average percentage of attendance of the members of the District Boards in this Division during the year under report:—

Name of District.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Cuttack ...	21	13	42·8
Balasore ...	16	13	44·23
Puri ...	13	24	56·00

350. *Cuttack.*—The allotments made to the several Local Boards, and the amount expended by them, are shown below:—

Local Board.	Grant for village roads.	Expenditure on village roads.
1	2	3
	Rs.	Rs.
Cuttack (Sadar) ...	6,000	5,985
Jajpur ...	3,000	2,725
Kendrapara ...	3,000	2,987

351. From the above figures it would seem that the Sadar, Kendrapara, and Jajpur Local Boards of the district paid due attention to the village roads entrusted to them. The total amount allotted to the Jajpur Local Board was not wholly disbursed. The reason of this has not been given by the Collector, and his attention will be invited to the subject. The average attendance of members of the Cuttack Local Board is said to have increased during the year, whereas the attendance of the other two Boards shows a decrease. The Cuttack Local Board is said to have taken more interest in its business than before.

352. There are four sub-committees in the district. The Collector states that since the Boards were constituted there has never been such a large number of meetings of the Finance and Education sub-committees held before as in the year under report.

353. The receipts of the District Board during the year amounted to Rs. 1,19,314, and its expenditure Rs. 1,22,674, as compared with Rs. 1,19,218 and Rs. 1,15,945 (excluding adjustment of deposits and advance in both items) in the preceding year.

354. *Balasore.*—There was a decrease noticeable in the average attendance of the members of the District Board, it being 7·07 against 8·22 in the preceding year. This decrease is said to have been due to the death of a non-official member, to the transfer of an official member, and to the meagre attendance of two delegates of the Bhadrak Local Board.

355. There are four sub-committees attached to the District Board. The number of meetings held by them is 30, and the percentage of attendance in one sub-committee (Public Works and Ferries) is 46·6.

356. The branches of administration entrusted to the District Board are as follows:—

(1) Secondary schools (middle English and middle vernacular).
(2) Special schools (including madrasa and schools for aborigines).
(3) Ferries.
(4) District roads.
(5) Road-side drains.
(6) Examination of primary schools.
(7) Grant of scholarship and rewards.

357. The powers delegated to the Local Boards to carry out the clear wishes of Government are said to have been well exercised. The total receipts and expenditure of the District Board are Rs. 75,691 and Rs. 71,900, against Rs. 73,656 and Rs. 76,300 in the preceding year.

358. *Puri.*—As regards the working of the District and the Local Boards of this district, the Collector states as follows:—"The District and Local Boards of this district are, I believe, quietly doing a good deal of useful work. The members, generally speaking, take a fair amount of interest in the business that comes before them, and they seldom, if ever, oppose the Magistrate-Chairman in carrying out any really good piece of work. The great drawback of the district is that there are very few candidates for the membership of the Board available among the landed class."

359. The total receipts and expenditure of the Board are Rs. 60,696 and Rs. 50,647, against Rs. 57,737 and Rs. 56,472 in the preceding year. This shows a marked decrease in the expenditure of the Board in comparison with its receipts. The decrease has not been accounted for.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

360. The following table has been extracted from the prescribed form 32, and shows the employment of Muhammadans in both the grades of Government service (viz., with salary of above Rs. 100 and of Rs. 100 and under) and the percentage for each district:—

District.	Number of gazetted officers.		Number of Muhammadans holding gazetted appointments.				Ministerial officers.			Menials.			Percentage of Muhammadans to entire population.	Percentage of gazetted appointments held by Muhammadans to total number of employments.		Percentage of all employments held by Muhammadans to total number of all employments.
			Above Rs. 100.		Rs. 100 and under.			Muhammadans.			Muhammadans.					
	Above Rs. 100 salary.	Rs. 100 and under.	1893-94.	1894-95.	1893-94.	1894-95.	Total number.	1893-94.	1894-95.	Total number.	1893-94.	1894-95.		Above Rs. 100.	Rs. 100 and under.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Cuttack ...	23	1	1	1	1	1	268	28	32	465	141	140	2·7	4·3	100	22·9
Balasore ..	8	4	...	...	...	...	110	13	13	177	50	51	2·4	...	...	21·4
Puri ..	9	1	1	1	...	...	129	3	4	168	34	33	1·6	11·1	...	12·3
Total ...	40	6	2	2	1	1	507	44	49	810	225	224	2·3	5·0	16·6	20·3

361. The percentage of Muhammadans to the entire population in this Division is 2·3, while the percentage of gazetted appointments of above Rs. 100 held by them is five. Out of six gazetted appointments of below Rs. 100, Muhammadans hold one. In Cuttack and Puri the percentage of appointments held by Muhammadans in the grade above Rs. 100 was more than the percentage of their population, while in Balasore it was nil.

362. The percentage of all appointments held by Muhammadans to total number of all employés was above 20 per cent. in Cuttack and Balasore, while in Puri it was above 12. This shows that the Muhammadans have a fair share in Government appointments in all the districts in proportion to their numbers. The Officiating Collector of Puri, Mr. Ambica Charan Sen, remarks:—"The Muhammadans in this district generally belong to the cultivating class, and do not care for English education. Judged by their qualifications, they appear to have a fair share of the employments at the disposal of Government."

XXXII.—POST OFFICES AND TELEGRAPHS.

363. The following statement shows the number of inland money-order transactions during the year, exclusive of rent and revenue money-orders:—

Name of district.	1893-94.				1894-95.			
	Issued.		Paid.		Issued.		Paid.	
	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.
1	2	3	4	5	6	7	8	9
		Rs.		Rs.		Rs.		Rs.
Cuttack	37,031	8,94,675	97,404	14,85,527	36,285	8,34,539	115,007	16,44,596
Balasore	28,722	5,85,721	26,535	4,21,439	28,306	2,16,813	32,275	4,57,628
Puri	17,805	3,91,052	17,422	5,67,377	17,515	4,41,822	16,600	4,58,531
Total ...	83,558	18,71,448	1,41,361	24,74,343	82,106	14,93,174	163,882	25,60,755

364. It will be observed that there was a decrease both in the number and amount of the money-orders issued, while the reverse was the case in respect of money-orders paid. This result is explained to be due to general agricultural depression, owing to which more people had to resort to Calcutta and elsewhere in quest of employment; from thence they made remittances to their families at home.

365. The following statement shows the savings bank transactions in the last two years:—

Name of district.	Deposits. Number of accounts opened during.		Number of deposits made during.		Amount deposited.		Withdrawals. Number of withdrawals.		Amount withdrawn during—		Number of accounts closed.		Total number of accounts opened on 31st March.		Total amount in deposit on 31st March.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.

Balasore ...	319	293	2,034	1,873	65,693 0 0	64,941 0 0	892	1,067	53,072 0 0	70,860 0 0	171	184	1,396	1,505	2,18,380 0 0	2,18,556
Puri ...	196	126	1,074	1,029	37,251 0 0	25,756 0 0	461	497	24,186 0 0	21,388 0 0	92	119	684	691	1,07,255 0 0	1,12,773
Total ...	1,061	1,203	6,628	8,255	2,14,796 0 0	2,01,171 0 0	3,492	3,724	1,75,822 0 0	1,08,618 0 0	618	714	4,090	4,397	7,76,195 0 0	7,99,909

366. From the above figures, it appears that the amount of deposit fell off, while the amount withdrawn increased during the year. This result may partly be attributed to hard times, and partly to the fact that the interest was reduced from Rs. 3-12 to Rs. 3-2 per cent. per annum, and consequently, where an investment on Government security was wanted, depositors withdrew deposits and invested in Government paper.

367. Three new branch post offices were opened during the year, viz., one in Cuttack and two in Balasore. An equal number of branch offices were closed, viz., two in Cuttack and one in Puri. The number of post offices in the Division thus remained the same as in 1893-94.

368. One case of embezzlement of postal money by a postal peon occurred during the year in the Jajpur subdivision of the Cuttack district. The accused was convicted by the Sessions Court, and sentenced to three years' rigorous imprisonment with a fine of Rs. 15. The village postmaster of Balichundrapur in Cuttack, was also prosecuted for misappropriation of public money, but was acquitted for want of evidence.

369. There were no changes in the telegraph lines in the districts of Balasore and Puri. In Cuttack, one new line from Dharmasala to Jenapur was opened during the year. The new telegraph office which had to be opened at the Jenapur end of the line was combined with the post office there.

370. The system of revenue and rent money-orders has been dealt with in section 17.

XXXIII.—ZAMINDARI DÂK.

371. There was no change in the system of zamindari dâk during the year under report. The following table compares its working during the year under report with that of the preceding one:—

District.	Number of estates paying cess.		Percentage on sadar jama.		Receipts.		Expenditure.		Number of lines maintained.		Number of runners employed.		Number of overseers employed.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
			Rs. A. P.	Rs. A. P.	Rs.	Rs.	Rs.	Rs.						
Cuttack	1,593	1,593	1 0 0	1 0 0	9,323	9,620	7,995	8,169	28	33	78	84	3	3
Balasore	818	829	1 2 0	1 2 0	4,866	4,565	4,982	4,668	19	20	51	50	4	4
Puri	402	402	2 0 0	2 0 0	5,414	5,741	4,655	4,546	10	9	29	28	3	3
Total ...	2,813	2,824	1 4 0	1 4 0	19,603	19,926	17,632	17,383	57	62	158	162	10	10

372. Five new lines were opened in the district of Cuttack and one in the district of Balasore, while one line was closed in the district of Puri, as was part of a line in the district of Balasore. One post office in the district of

Puri was also abolished, as it was found not to be paying. In the district of Cuttack five additional runners were appointed to carry the dâk to the police and the kanungos, instead of its being carried by chaukidars, as was noted last year to have been the previous practice.

FAIRS.

373. The most important fairs of this Division are held in the town of Puri, the most conspicuous being the Rathjatra or the Car festival of the Jagannath. In each case necessary sanitary precautions were adopted by the municipality. There were a few deaths, but no epidemic broke out. As regards the other fairs in that district, necessary arrangements were made to keep the peace and for sanitation.

374. In the district of Cuttack all the fairs are of local interest and are of no great importance. No special sanitary arrangement was necessary for any of them, as they are almost all held in open fields having tanks and wells, and the visitors are local men.

375. In the district of Balasore a sum of Rs. 20 was spent for the sanitary requirements of a fair. There is no important fair in this district.

POUNDS.

376. The number of pounds and the receipts therefrom in each district are compared below for the last two years:—

NAME OF DISTRICT.	Number of pounds.		Receipts.	
	1893-94.	1894-95	1893-94.	1894-95.
1	2	3	4	5
			Rs.	Rs.
Cuttack ...	56	68	6,576	4,054
Balasore ...	42	51	3,746	3,256
Puri ...	23	24	1,761	1,964
Total ...	121	143	12,083	9,274

377. Though there was an increase in the number of pounds in all the districts, there was a fall in the receipts both in Cuttack and Balasore. To account for the decrease the District Officer of Cuttack says:—"This lower income was due to the introduction of the farming system under which the pounds were let out during the year, and the suppression of the khas management system which formerly obtained. The expenditure during the year amounted to Rs. 353 as against Rs. 4,961 in the previous year. The net income therefore amounted to Rs. 3,701 during the year under report, against Rs. 1,615 in the preceding year. From the point of view, therefore, of economy the farming system unquestionably has its advantages."

378. As regards Balasore the District Officer says "the financial result of the year's administration was not satisfactory," but does not assign any reason for it. He will be requested to supply the omission.

379. In the district of Cuttack all the pounds were farmed out, while in Balasore and Puri some were farmed and the rest managed directly.

380. The reports from Cuttack and Puri are silent as to the inspection of pounds. In Balasore they were inspected by the Chairman of the District Board and by an inspector specially appointed for the purpose. They were also inspected by the sub-inspector of schools and inspecting pandits when on tour in the course of their educational duties.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

381. Of the institutions named in my last report, none but the Orissa Association and the Puri Temple Repair Committee showed signs of their

existence. The Uriya is not addicted to forming institutions with political and social objects. Institutions like the Gorakhsani Sabha, the Landlords' Association, and the Sanatan Dharmarakshini Sabha were started more or less under foreign influence. The people soon tired of what was found to be a somewhat silly form of recreation, and they died of inanition. The Gorakshini poison, for instance, was inoculated in Orissa, but it did not take. The Uriya Hindu has far too much sense to want to quarrel with his Muhammadan neighbour, with whom he has lived on good terms for centuries, to please a handful of strangers. He has, I think, sufficient sagacity to see through the thin cloak of religion that covered a movement which was political in its object. Hindus and Muhammadans continue as before to share one another's festivities at the Durga Puja, the Muharram, and similar occasions.

382. It would not be surprising to find the landlords of Orissa exercising themselves greatly as to how the settlement will affect them; but for over two and a half years, during which I have been here, and throughout which period settlement has been progressing, I have heard nothing but the name of the Landlords' Association.

383. Similarily, nothing is now heard of the Congress movement, though delegates were at an earlier period selected on one or two occasions. Instances like these leave no room for doubt that very few, if any, of such institutions are of spontaneous growth.

384. The Orissa Association would scarcely have bestirred itself but for questions having arisen regarding the proposed water-rate rules, and bills to amend the Revenue Sale Law and the Public Demands Recovery Act. It appears to have behaved loyally and with moderation in dealing with these matters.

385. The Puri Temple Repair Committee is connected with a religious institution. It would otherwise have long ago ceased to exist. The Committee continued to collect subscriptions, and did some repair work.

386. The native press was represented by the same three papers as noted last year, viz.—

(1) *Utkal Dipika.*
(2) *Balasore Sambádabahika.*
(3) *Uriya and Naba Sambada.*

387. There was no change in the tone and the nature of questions dealt with by these publications; they are invariably loyal; and when, as in the case of the Utkal Dipika, in dealing with the suppression of Uriya as the court language in Sambalpur, the acts of Government are condemned, this is done with remarkable good taste and moderation.

388. As regards the periodical *Indradhanee* (Rainbow), it is now issued as a monthly magazine. Its controversy with *Bijuli* is over, the latter having disappeared.

389. Bengali papers have been in circulation for a long time, but they have not yet been able to influence the local press or the people.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

390. These matters have been separately dealt with.

XXXVI.—CONDUCT OF ZAMINDARS.

391. The District Officers have dealt with this matter intelligently, and I trust exhaustively. I do not think I can do better than quote from their reports:—

Cuttack.—" The relations between the zamindars and their tenants have on the whole been satisfactory. In a few instances, however, the zamindars have attempted to use the present settlement operations as a means of increasing their nij-jote lands in which no right of occupancy is recognised.

" Some complaints were made against the zamindars of Killa Aul and of taluk Panikoili, pargana Sargara, of exaction of illegal cesses. It having been found on enquiry with regard to Aul that the raiyats' complaints were not altogether unfounded, though there was not sufficient proof for a criminal prosecution, the Raja was warned, and the police were directed to keep an eye

on the proceedings of the zamindar. The petitions against the Aul zamindar contained also allegations, characteristic of the recklessness of the statements made by Uriya tenants, to the effect that the Raja was holding criminal and civil courts on his own motion and responsibility. This part of the charge was found to be quite unfounded.

"With regard to taluk Panikoili, the raiyats' complaints were very vague, and they were therefore called on to lodge specific charges against their zamindar, Raja Baikanthanath De, but they did not appear any more, and the complaints were probably due to the settlement work which is going on in pargana Sargara.

"There has also been some friction in killa Darpan between the Raja Baidyanath Pandit and his tenants, which, however, the Raja has, I believe, been trying his best to arrange. He has taken copies of the settlement khasras and khatians to assist him in making out a workable jamabandi, and will, I hope, be successful.

"The Assistant Superintendent of Survey reported that the Raja of Killa Sukinda tried to oppose his men in carrying on the survey of his killa, and rendered no help in the way of supplying the survey party with provisions. The Assistant Superintendent asked the interference of the Collector, and accordingly the local police were directed to assist the survey party in procuring their supplies, and an order was also issued to the Raja to make necessary arrangements by opening out shops in his killa, so that there would be no difficulty in obtaining provisions. Since these orders were passed, there has been no more complaint for want of provisions or of opposition by the Raja to the survey operations. Nevertheless, it is certain that by his wilful and groundless obstruction when the work was first taken up, the Raja has caused much delay and much extra expense to Government. As he was not asked to pay anything towards the survey, and the Assistant Superintendent did his best to ensure payment for all labour given or materials destroyed, there was no cause for objection, but it appears that the Raja was either entirely in the hands of his Dewan, who is a man of no education or position, or else wished to show, out of vanity, his power in his own killa.

"The affairs of Babu Balaram Brahmarbar, one of the big zamindars of Kendrapara, are in great disorder on account of a domestic dissension between himself and his brother with regard to their shares in the estates. The result was a recent riot which ended in the conviction of the accused and the subsequent prosecution of Babu Balaram Brahmarbar himself for not taking steps to prevent the riot. He has, however, been discharged for want of evidence. I believe the two brothers are now trying to settle their differences.

"There was no zamindar who was particularly conspicuous in doing works of public utility during the year under report. The Raja of Aul carried on some flood relief works, and Babu Bihari Lall Pandit, who is an inhabitant of this district, erected a Dharmasala at Puri, but the work itself is of course outside of my jurisdiction."

Balasore.—"The settlement operations have naturally caused some friction between zamindars and raiyats. The zamindars have attempted to substitute rent in kind for money rent, and to get raiyati lands changed into nij-jote, while the raiyats have tried to extend their right of tenancy in nij-jote lands. There are also family dissensions among some of the zamindars, such as the Miahs of Isufpur in Bhadrak town. There have been serious ruptures between rival claimants in certain zamindaris, *i.e.*, Banobatia and Ankura, resulting in riots. The offenders have been convicted and bound down to keep the peace.

"It is worthy of notice here that during the late apprehension of scarcity in the flood affected areas of Bayang and Kaima, Babu Hari Ballav Bose showed his generosity by the payment of Rs. 1,000 for the relief of the distressed. On the same occasion Babu Radha Charan Das, nephew of Babu Raj Narayan Das, supplied at very short notice 1,000 maunds of seed-grains which was required for sowing in the tracts in which the growing crops had been destroyed. In addition to all the trouble he took in collecting the grain, he charged only Re. 1 per maund. Thus his gift amounted to say little short of a donation of Rs. 1,000, and his act was the more generous and commendable as he had no estates in the affected area."

Puri.—"Generally speaking, the zamindars of the Puri district are uneducated, incapable of properly managing their estates, and without any desire to spend any portion of their income for the good of the public. They are generally divided among themselves by family disputes, and involved in debts in consequence. With few exceptions, however, they are not oppressive landlords.

"The estates of the Raja of Puri, as well as those of the Puri Temple, of which the Rani is the Superintendent, are in as mismanaged a state as ever. A competent manager has been appointed, but he is unable to effect any improvement owing to the interference of the Rani. The estates, it is said, are greatly involved in debt.

"The young Raja, though soon coming of age, has literally received no education, and will be quite incapable to manage the estates.

"The Raja of Parikud, though a landlord of small means, manages his properties very fairly. The misunderstanding between him and his raiyats, noticed in the last year's report, no longer exists.

"The jagirdar of Malud. The old jagirdar having died, his eldest son is now the head of the family. The jagir is still under attachment, and is being managed by the Collector as receiver in the interest of the creditors.

"The zamindars of Kotdesh (two brothers) are hopelessly involved in debt. The estates have been notified for sale for arrear of Government revenue.

"The Mahant of Emar-muth, who holds a large endowment property as well as zamindaris, manages the properties fairly well, but is devoid of any public liberality."

XXXVII.—GENERAL REMARKS.

392. This section is intended to embrace any points not otherwise dealt with. From my own experience, and from a perusal of the general remarks of the Collectors, I am of opinion that there is little to be said that has not been already dealt with in this report. The two events which do not fall under any prescribed heads are the visit of His Honour the Lieutenant-Governor to Orissa in April 1894, when various settlement camps were visited and instructions on the settlement work given, and a Darbar held in August by the Commissioner to confer the title of Rai Bahadur on Babu Gobinda Ballabh Rai Mahashoy and the title of Mahamohopadhya on Samanta Chandra Shikar Singha Hari Chandan Mahapatra, a member of the family of the Raja of Khondpara. The effect of darbars being held at Cuttack is good, as it enables the leading people to attend, which they could not do at Calcutta. On the other hand, the honours were not conferred, as is desirable, by the Ruler of the Province, and it would be best that such darbars should be held by His Honour the Lieutenant-Governor when on tour in Orissa.

393. If there remains another remark to be made, it is one of a not strictly local character, and that is to point out the very great tax on the time of officers involved in the preparation of the various annual reports that are at present required. The remark has no pretension to originality, and time was when the Government itself entertained the proposal to reduce official labour in this direction. As things at present stand, in matters criminal as in revenue matters, the same subject is dealt with in various reports. For example, Road and Public Works Cess appears in a special report in the Land Revenue Report and in the General Administration Report. I cannot but think that such a state of things admits of improvement, and that an economy of time and labour might very easily be effected with considerable relief to the establishment, which would admit of improved efficiency in other directions.

RESOLUTION ON THE REPORT OF THE AGRICULTURAL DEPARTMENT FOR THE YEAR 1894-95.

REVENUE DEPARTMENT—AGRICULTURE.

Darjeeling, the 14th October 1895.

RESOLUTION—No. 729T.—R.

READ—

Letter No. 900A., dated the 30th August 1895, from the Board of Revenue, Land Revenue Department, submitting the Report of the Agricultural Department for the year 1894-95.

The Tenth Annual Report of the Department of Land Records and Agriculture on the subject of agricultural enquiry, agricultural experiments, and agricultural improvements, which was due to Government on the 15th, was not received from the Board until the 31st August 1895. The delay was due to the serious illness of Mr. Bhupal Chandra Basu and to the illness also of Mr. Nagendra Nath Banerjee, Assistant to the Director of the Department of Land Records and Agriculture, Bengal.

2. *Emigration to Burma.*—There was a slight increase in the number of emigrants from Bihar to Burma, five batches, consisting of 304 persons (all apparently from the district of Shahabad), having emigrated during the year, as against only one batch of 10 men, 8 women, 7 children, and 7 infants in the previous year. The arrangement made with the British India Steam Navigation Company for the conveyance of "State emigrants" from Bihar (including Monghyr and Bhagalpur), Chota Nagpur, and Orissa on payment by Government of a subsidy of Rs. 2-8 per head, subject to a maximum of Rs. 1,000 per annum, continued in force during the year. The Managing Agents of the Company made the following remarks on the subject of last year's emigration:—

"The satisfactory point about last year's working has been that the original settlers have sent home for their families and friends to join them in Burma. The men that have emigrated have been entirely of the agricultural class. We find that Biharis cannot compete successfully with Madrasis in the labour markets of the towns, but they are evidently doing well as settlers."

3. *Silk experiments.*—Mr. Nitya Gopal Mukerji was still employed during the year on the work of promoting the distribution and use of healthy silkworm seed. Four new rearing stations were opened by professional rearers with his assistance in silk-producing districts, viz., two in Malda and two in Birbhum. At the eleven rearing stations, 4,920½ kahans of seed-cocoons were raised during the year, while the quantity sold amounted to 798½ kahans, or 2,388 ounces, as against 1,035, 1,900, and 2,134 ounces sold in the three previous years. Considerable attention has been paid to silk experiments by amateur rearers as well, and among them may be mentioned the Reverend Mr. A. Campbell and the Reverend Mr. J. A. Graham, who have founded seed-rearing houses at Pokhuria and Kalimpong, respectively. The prospects of silk raising at the latter station are affected by the difficulty of disposing of the seed raised there, so that the receipts from the sale of seed-cocoons appear to be precarious.

The total expenditure incurred on silk experiments during the year was Rs. 8,259, against Rs. 7,955 expended in the preceding year. The results obtained by these experiments, which have now been continued for many years, may be mainly summed up by saying that it has been established that disease can be to a great extent avoided by keeping the silkworms clean, giving them more air, and feeding them more frequently, and only with mature leaves, than is common among the rearers. If to this be added instruction in the use of a microscope to detect diseased moths, it is certain that the production of Bengal silk will become as abundant and lucrative as it has been in years gone by. A further report from the Director has recently been received, and it has been decided that Mr. Nitya Gopal Mukerji's special work should be brought to a termination. A reduced establishment of subordinates only will be entertained for a few months to wind up the experiments, in which Government has acted as a pioneer but cannot continue to spend the provincial revenues.

4. *Manure and Crop experiments.*—Agricultural experiments were carried on in the farms belonging to the Burdwan and Dumraon estates and in the Government farm at Sibpur, also in Government and wards' estates and by private individuals. The Director of Land Records and Agriculture writes:—

"The crops to which attention has been hitherto given in Bengal are—wheat, potatoes, and sugar-cane, and in a minor degree jute, paddy, oats, and English vegetables. From a perusal of the accounts of the experiments made last year, it will appear that, in spite of not infrequent failures, the merits of Naini Tal potatoes as compared with the local varieties have been brought home to a numerous body of agriculturists in different parts of Bengal * * * The distribution of Muzaffarnagar wheat to the tenants of the Dumraon Raj has also afforded a gratifying result."

The Board of Revenue remark on the discrepancy between the outturn of manure per bullock in the Dumraon and Sibpur farms. The statistics are obscurely recorded, but it would seem that each Dumraon bullock produced 43 maunds of manure in 120 days, while each Sibpur bullock produced 46 maunds in the whole year. The experiment should be continued, and the results recorded on a uniform basis.

Some improvements on the methods of cultivating sugar-cane have also been effected, as stated in last year's Resolution. Useful experiments were made in all three farms in methods of conserving cattle manure. It is as yet too early to make any deductions, but the experiments should be persisted in. Some new agricultural implements were tried, but with no very definite result. The method of planting sugar-cane in trenches is being adopted by raiyats in the neighbourhood of the Burdwan farm, its superiority to planting in shallow furrows having been fully demonstrated. An experiment tried last year yielded an increase in outturn of 22 maunds 12 seers of *gur* per acre and a net profit, after deducting cost of cultivation, of Rs. 109 per acre. The experiment of *ratooning* canes, which was commenced in 1887 and closed during the year under report, has shown that this method of cultivation gives a satisfactory outturn up to the fifth year, after which the yield rapidly lessens. A fine variety of paddy, obtained from Diamond Harbour, was found to yield a smaller outturn than the local coarse variety, but to give better financial results. The number of Burdwan raiyats who have adopted improved methods of cultivation increased to 81 in 1894-95, against 3, 4, 36, and 48 in the four preceding years. The site of the Dumraon farm was considered by the Agricultural Chemist to the Government of India to be unsuited for experimental purposes, and a new site, measuring about 31 acres, was selected near the railway station. The cultivation of sugar-cane in the small demonstration farm at Mainaguri in the Western Duars was satisfactory, the cultivators taking great interest in the method of making jaggery.

The criticisms made in paragraph 5 of last year's Resolution regarding crop experiments, to which exception has been taken in paragraph 48 of the report, were applied to the improvements attempted by private persons in wards' and other estates, and not to the efforts made by the Director and his Assistants in the direction of introducing new and improved crops.

5. *Veterinary Institution.*—Considering that the Bengal Veterinary Institution was in the first year of its existence, a fair measure of success was achieved. The total number of animals treated during the year was 662, which included 285 horses and ponies, 312 head of cattle, 53 dogs, and 12 sheep and goats. The daily average number of animals treated was 31. The number of operations performed during the year was 169. Twenty six students appeared at the first half-yearly examination of 1895, and twenty passed successfully.

Besides attending to his duties at the Bengal Veterinary Institution, Veterinary Captain Gunn, the Superintendent, visited during the year thirteen districts of the Province for the purpose of combating and investigating cattle-disease, and in order to make enquiries with regard to cattle-breeding.

6. *Miscellaneous.*—The Department prepared and published during the course of the year general forecasts of *rabi*, *bhadoi*, winter rice and wheat, and also special reports on the early and late cotton crops. Agricultural exhibitions were held during the year at Cossipore, Kalimpong, Khulna, Berhampore in

Shahabad, Tentanga in Bhagalpur, Jaygunge in Dinajpur, and Goalundo. Of these, the exhibitions held at the four first-named places were assisted by Government with grants of money. The annual fairs at Alipur and Falakata in the Western Duars were also held during the year, and were assisted with money grants.

7. The total cost of the Department (independent of the pay of the superior establishment and the expenditure on silk experiments) was Rs. 9,428, against Rs. 8,895 in the previous year.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette*, and that a copy of it, together with the report and the forwarding letter of the Board of Revenue, be submitted to the Government of India in the Revenue and Agricultural Department, and copy forwarded also to the Board of Revenue, Land Revenue Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1894-95.

REVENUE DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th October 1895.

RESOLUTION—No. 4614.

READ—

The Report of the Honorary Committee for the Management of the Zoological Garden, Calcutta, for the year 1894-95.

The total receipts of the garden, excluding the opening balance of Rs. 4,912, amounted to Rs. 41,533 against Rs. 43,193 in the previous year, and the expenditure was accordingly reduced from Rs. 43,521 in 1893-94 to Rs. 41,672 during the year under report. The decrease in receipts is chiefly due to reduction of income under the heads, "Entrance receipts" and "Rents." The entrance receipts in 1893-94, as stated in the Resolution on the last year's report, were abnormally large on account of the influx of pilgrims into Calcutta who visited the Garden. The decrease under "Rents" is accounted for by the fact that the Hermitage was under repairs during April and May 1894. The decrease in expenditure is attributed chiefly to the fact that no costly work under the head "Original construction" was undertaken during the year. The closing balance in favour of the Garden was Rs. 4,774.

2. The number of visitors who were admitted to the garden on payment of entrance fees amounted to 154,532, exclusive of a large number of students and children admitted free of charge. This number compares favourably with previous years, except the year 1893-94, in which, owing to the large influx of pilgrims the number rose to 162,449.

3. The following are mentioned by the Committee as being among the more important additions made to the garden during the year under report:—

(1) a consignment of rare and interesting animals consisting of a pair of Cape hunting dogs, one spotted hyæna, one large anaconda, and some other smaller mammals, received in exchange from Mr. Carl Hagenbeck of Hamburgh; they were found unsuited to the climate, and most of them died within a few months after their arrival;

(2) a series of Indian mammals presented by certain Chiefs, Nawabs and Maharajas in Central India, and obtained through the good offices of Captain Manners Smith, Political Agent, Nowgong.
(3) Some interesting animals presented by Captain Manners Smith, Political Agent, Nowgong.
(4) A fine tigress presented by the Raja of Gangpur in Chota Nagpur.
(5) A fine tame tigress presented by Mr. W. H. Grimley, C.S., Commissioner of Chota Nagpur.
(6) Four ourang-outangs, acquired—two by purchase and two on deposit. Of these only one survived.

4. The Lieutenant-Governor is glad to notice that the popularity of the Garden with the students and teachers of the schools and colleges of Calcutta continued undiminished. The Committee report that altogether a dozen passes were issued, and that they were availed of by over a thousand students with their teachers from various schools and Colleges.

5. Experiments on the efficacy of various alleged remedies for cures of snake-bite were continued during the year in the Joy Gobind Law Laboratory. Dr. Cunningham submitted to Government separately an interesting report, embodying the results of these experiments. A copy of this report was submitted to the Government of India for information, and communicated to the newspapers for publication.

6. The library hall was completed and furnished during the year. The Committee have again expressed the hope that public-spirited and enlightened gentlemen and noblemen will come forward to provide funds for books.

7. The thanks of the Lieutenant-Governor are due to the members of the Committee for their efficient management of the Garden.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Honorary Secretary to the Committee for information, and that it be published in the Gazette.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

REPORT ON THE WINTER RICE CROP IN BENGAL, 1895.

THE following is published for general information.

REV. DEPT.,
The 19th October 1895.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE BENGAL.

First forecast of the Winter Rice Crop in Bengal 1895 (*based on returns forwarded up to* 15*th September*).

N.B.—Returns have been received from all districts of these Provinces except Rajshahi.

Character of the season.—The following is a *resumé* of the rainfall, month by month, of the monsoon season of 1895:—

In the month of May, the rainfall in South-West Bengal in parts of North Bengal, in South Bihar, Orissa and Chota Nagpur was less than the normal but in the Rajshahi, Jalpaiguri, Darjeeling, and Pabna districts of North Bengal, in East Bengal, and in North Bihar was above the normal.

In June the rainfall was altogether abnormal. East and North Bengal received less than half the usual rain. In West and Central Bengal and in parts of Bihar the rainfall was short of the normal; but Chota Nagpur generally received the normal amount of rain, and in Orissa the fall was double the normal.

In July throughout Central and South-West Bengal, except Bankura, the rainfall was below the normal; it was also deficient in South Bihar, except, Shahabad, and in Orissa and in parts of Chota Nagpur. In North Bengal and North Bihar the rainfall in this month was in excess.

In August sufficient rain was received in Bihar and Orissa, but rain was deficient in South-West, East Bengal, North Bengal, except Darjeeling and Jalpaiguri, and in Chota Nagpur.

During the first half of September the rainfall was heavy in North and East Bengal and in North Bihar, but light elsewhere.

General rain fell during the third week of September, the falls being particularly heavy in Chota Nagpur, Bihar and Central and West Bengal. In the last week of September the rainfall throughout these Provinces was light.

Taking into consideration the whole monsoon season of 1895, the distribution of rainfall has been less favourable to the winter rice crop this year than last year. The failure of rain in the beginning of the season, when the rice crop was being sown, was felt notably in South West Bengal and in South Bihar. From July to the beginning of September, the rainfall in these Provinces was on the whole light. The rain in the third week of September benefited the crop in some parts of these Provinces. More rain was wanted at the end of September. Injury by floods is reported from Bogra, Dacca, Mymensingh, Faridpur, and Puri.

2. *Area cultivated.*—The total area estimated to have been cropped this year with winter rice in Bengal (except Rajshahi) will appear from column 7, page 13 of the appended returns to amount to 29,969,300 acres against 31,416,600

acres cultivated last year. There is thus a falling off of 4·6 per cent. as compared with the area sown in 1894, which may be attributed to insufficient rainfall during the sowing season. This decrease in area is especially noticeable in the districts of Burdwan, Bankura, Hooghly, 24-Parganas, and Murshidabad, in which districts the areas returned as cultivated with winter rice are 32·4, 37·9, 20·9, and 26 per cent. less, respectively, than the areas returned last year. An increase of 36·3 per cent. in the area cultivated this year over that of last year is reported from Rangpur, and is stated by the district officer to be due to the favourable character of the rainfall of this year. The figures returned for Burdwan, Bankura, and Rangpur, however, appear to be open to doubt.

3. *Character of the season.*—From the appended statement of district returns, it will be seen that out of the 44 districts from which estimates have been recieved, Dinajpur returns a bumper crop of 20 annas; Tippera and Saran return crops of 18 and 18⅔rd annas respectively, and 9 districts, viz., Rangpur, Pabna, Faridpur, Muzaffarpur, Bhagalpur, Balasore, Angul, and the Khondmals and Palamau, return an average crop of 16 annas or a little above 16 annas. From 22 districts, the crop is reported to vary from 12 to less than 16 annas, and from 10 districts, viz., Burdwan, Birbhum, Bankura, Midnapore, Hooghly, 24-Parganas, Nadia, Murshidabad, Jessore and Manbhum, it is reported to be less than 12 annas.

On comparing the estimates of this year, as received up to the middle of September, with those shown in last year's final report of the winter rice crop, it will appear that 11 out of the 44 districts, viz., Dinajpur, Jalpaiguri, Darjeeling, Rangpur, Pabna, Saran, Champaran, Muzaffarpur, Cuttack, Balasore, and Singhbhum report a better crop than that of last year; 3 viz., Darbhanga, Angul and the Khondmals, and Lohardaga report equal crops, and 30 worse crops.

The arithmetical mean of the anna-estimates of outturn returned by district officers, reckoned with reference to areas, gives a 15-anna crop for these Provinces as a whole, and allowing for a tendency on the part of district officers to underestimate, it is thought safe to estimate the crop as a whole at 16 annas. The short crop in the Presidency and Burdwan Divisions is balanced by crops above the average in North Bengal and North Bihar.

N. N. BANERJEI,
Assistant Director of Land Records and Agriculture, Bengal.

Countersigned.

W. C. MACPHERSON,
Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 11*th October* 1895.

Preliminary Forecast of the Winter Rice Crop for 1895 (up to the middle of September).

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan	Sadar	794,980	635,500	434,300	434,200	217,100	15	5	Burdwan, Satgachi, and Jamalpur have been partly benefited by the Eden canal water. On account of insufficient rain, there has been failure of cultivation in other thana jurisdictions. It is estimated that only one-half of the normal area is under cultivation.	It is difficult to believe that only one-half of the normal area has been cultivated.
	Kalna ...	276,480	224,000	128,000	128,000	96,000	12	5	Insufficient rainfall has been very unfavourable to the crop. The outturn is expected to be not even half of that of the last year, and one-fourth of the lands could not be cultivated.	
	Katwa ...	225,280	160,600	140,800	140,800	105,600	16	8	Owing to scanty rains about one-fourth of the lands could not be cultivated. Portions of the cultivated lands have been affected by deficient rainfall and late transplantation, which will decrease the year's outturn.	
	Raniganj	429,440	254,700	225,300	225,300	169,000	16	8	Both the decrease in area and outturn is due to late and insufficient rainfall. About one-fourth of the normal area has been left uncultivated.	
	District Total	1,725,080	1,283,800	928,400	928,300	587,700	15½	6¼

							Annas.	Annas.		
Birbhum	Sadar	709,120	900,000	413,000	413,000	413,000	18	10	There was not sufficient rain during the time of transplantation, and some of the high lands have not been cultivated. There has been some rain since, and this may improve the outturn, though it will not be much above 10 annas taken altogether.	
	Rampurhat ...	412,800		241,000	241,000	241,000	18	10		
	District Total ...	1,121,920	900,000	654,000	654,000	654,000	18	10		
Bankura ...	Sadar	1,229,440	428,800	364,800	364,800	301,700	18	10	The decrease in area and estimated outturn is due to the insufficient rain of the year, specially in June and July 1895.	The decrease of area appears to be extraordinary.
	Vishnupur ...	448,000	214,000	185,600	185,000	70,000	16	7		
	District Total ...	1,677,440	642,800	559,400	549,800	371,700	17¼	9¾		
Midnapore	Sadar	2,120,960	1,229,100	760,000	756,900	700,000	17	11	The large decrease in area at the Sadar, Tamluk, and Ghatal subdivisions is due to the deficiency of rainfall at the sowing time. In low lands, specially in Contai, a larger area than that of last year has been brought under cultivation this year. The outturn is for the same reason likely to be worse than that of last year.	
	Tamluk	390,400	279,600	264,300	239,500	179,600	14	12		
	Contai	543,360	456,300	416,000	315,000	400,000	14	10		
	Ghatal	238,080	146,500	131,800	122,000	85,800	15	6		
	District Total ...	3,292,800	2,111,500	1,572,100	1,433,400	1,365,400	15	10½		
Hooghly ...	Sadar	282,860	176,800	141,400	141,400	[illegible]2,900	16	6	The insufficiency of rainfall this year is the cause of the decrease in the area under crops. A little more rain in September may yet do some good.	
	Serampore ...	219,520	160,000	100,500	95,000	49,000	14	8		
	Jahanabad ...	258,560	167,700	83,800	80,000	75,200	16	6		
	Howrah	110,720	69,800	61,800	39,100	32,700	15	11		
	Ulubaria	215,680	128,000	108,800	90,000	67,000	16	8		
	District Total ...	1,087,340	702,300	495,300	445,500	276,800	15	8		

24-Parganas	Sadar	533,760	468,700	303,900	293,900	203,000	16	11	The decrease in the area is due to scanty rainfall during the sowing season. The outturn is expected to be worse than that of the last year owing to want of rain.
	Barasat	313,600	183,400	117,100	108,000	87,000	14	8	
	Basirhat	230,400	192,900	142,500	213,600	142,500	16	12	
	Diamond Harbour	266,880	300,000	286,500	247,000	246,100	14	13	
	District Total ...	1,344,640	1,145,000	849,900	857,700	678,600	15½	11	
Nadia ..	Sadar	497,920	362,800	65,200	65,200	65,200	12	10	The decrease in area sown this year in the Ranaghat subdivision is due to some lands not having been sown for want of rainfall for transplantation. The decrease in the estimated outturn is also due to scanty rainfall, though there is every probability of increase in the outturn if there be rains in September and October.
	Kushtia	382,060	278,400	28,000	28,000	28,000	12	7	
	Meherpur	634,880	462,600	24,400	24,400	24,400	12	10	
	Ranaghat	273,280	199,200	12,800	12,800	11,000	16	10	
	District Total ...	1,788,160	1,303,000	130,400	130,400	128,600	12½	9½	
Murshidabad.	Sadar	586,240	395,100	82,000	82,200	57,400	12	8	The decrease in the estimated area and outturn is due to the deficiency of rainfall during the year.
	Kandi	405,760	279,800	189,900	188,800	142,400	16	10	
	Jangipur	381,440	310,600	40,300	42,300	32,000	12	7	
	District Total ...	1,373,440	985,500	312,200	313,300	231,800	14½	9	
Jessore ...	Sadar	568,960	304,000	166,400	160,000	150,000	16	10	The decrease in the total area sown this year is due to want of seasonable rainfall at the time of sowing. The decrease in the outturn is due to insufficient rainfall. The increase of area in the Magura subdivision is, the Subdivisional Officer explains, owing to favourable rainfall during the sowing season, but want of rain later on dried up the plants.
	Jhenida	304,000	204,800	64,000	64,000	64,000	14	8	
	Magura	272,000	171,500	99,600	78,000	89,600	16	10	
	Narail	311,680	187,500	128,000	128,000	128,000	18	18	
	Bangaon	415,360	240,000	130,000	100,000	72,000	14	8	
	District Total ...	1,872,000	1,116,800	578,000	530,000	503,600	16	11½

							Annas.	Annas.		
Khulna ...	Sadar	1,006,336	293,400	228,600	228,600	228,600	17	13	The decrease in the year's area as compared with the normal area is in Satkhira alone, and it is perfectly certain that the area under winter rice in Satkhira is less this year owing to deficient rainfall. The Subdivisional Officer's estimate of decrease is 32,400 acres.	In the Census Report of 1891, the area of the district has been shown as 1,329,280 acres.
	Satkhira	814,643	299,5[illegible]0	232,400	232,400	200,000	17	10		
	Bagerhat	965,523	277,100	214,100	214,100	214,100	17	16		
	Area of boundary khals and rivers of the Sundarbans in this district.	317,440	......	......	......	......	......	......	The outturn is expected to be worse owing to want of seasonable rain.	
	District Total ...	3,103,942	870,000	675,100	675,100	642,700	17	13		
Rajshahi...	Sadar	381,760	386,700	196,300	1[illegible]0,500		18½			Return not received.
	Nator	383,520	402,100	249,300	189,700		16			
	Naugaon ...	355,920	297,100	224,300	223,500		16			
	District Total	1,491,200	1,085,900	672,900	612,700		17			

District	Subdivision								Remarks	
Dinajpur...	Sadar	2,080,640	1,377,600	1,090,400	1,003,400	1,005,400	12	20	The increase in the outturn is due to the proper distribution of rainfall of the year.	
	Thakurgaon ...	554,880	367,400	218,100	216,100	218,100	12	20		
	District Total ...	2,635,520	1,745,000	1,308,500	1,223,500	1,223 500	12	20		
Jalpaiguri	Sadar	1,072,000	557,500	312,400	281,800	307,400	14	15	The increase in area shown in column 4 is due to the opening out of the Duars. This year's outturn is expected to be better than that of the last year owing to seasonable rainfall.	The "normal area" shown in column 5 should be corrected.
	Alipur	823,680	447,400	170,600	157,900	151,700	13	15		
	District Total ...	1,895,680	1,004,900	483,000	439,700	459,100	13½	15		
Darjeeling	Whole district ...	744,960	189,400	67,800	69,100	69,100	14	14½	Owing to seasonable rainfall, the outturn is expected to be better.	
Rangpur ...	Sadar	730,240	486,800	365,100	260,000	365,100	14	16	The rainfall on the whole is satisfactory. Average outturn is expected. This year's favourable rainfall enabled the cultivators to cultivate a larger area than that of last year.	It is difficult to believe that the figures for area cultivated last year can have been correct, if this year's figures are correct.
	Kurigram	599,680	468,900	234,500	117,000	234,500				
	Gaibanda ...	486,400	371,200	281,600	234,700	253,000				
	Nilphamari ...	414,720	275,800	92,800	80,000	90,000				
	District Total ...	2,231,040	1,602,700	974,000	691,700	942,600	14	16		
Bogra ...	Whole district ...	927,343	421,000	250,000	300,000	300,000	18	12	The lateness of rain has much retarded the transplantation and sowing of the crop in proper time, and a sudden flood afterwards damaged those on the field. Transplantation is still going on, and the earlier ones look promising.	From the Census Report of 1891, it appears that the area of the district is 929,280 acres.
Pabna ...	Sadar	564,480	423,000	350,000	409,000	409,000	14	16	Seasonable rainfall promises a good average crop.	
	Siraiganj	612,480	429,500	300,000	216,200	216,200	17	18		
	District Total ..	1,176,960	852,500	650,000	625,200	625,200	15	16½

							Annas.	Annas.		
Dacca ...	Sadar	810,240	465,100	243,500	243,100	243,500	16	16	Owing partly to the scanty rainfall at the time of growing and partly to the sudden rise of the rivers, which has damaged the crop to a certain extent, the outturn on an average is estimated to be less than in the previous year.	
	Manikganj ...	312,960	234,200	202,200	180,000	180,000	14	8		
	Munshiganj ...	247,040	128,000	61,000	61,000	61,000	14	16		
	Naraingani ...	410,240	280,400	70,400	69,000	69,000	16	14		
	District Total ...	1,780,480	997,700	577,100	553,100	553,500	15	13¾		
Mymensingh.	Sadar	1,183,360	697,000	282,200	282,200	282,200	15	15		
	Netrakona ...	588,960	284,500	180,000	180,000	180,000	16	14		
	Kishoreganj ...	476,160	264,000	135,200	135,200	135,200	14	16		
	Jamalpur	834,960	627,200	304,000	304,000	304,000	16	16		
	Tangail	679,040	533,000	205,000	205,000	205,000	16	14	The outturn is worse than that of last year, as there was sudden rise of water after transplantation.	
	District Total ...	4,052,480	2,405,700	1,106,400	1,106,400	1,106,400	15⅖	15		

Faridpur...	Sadar	550,400	385,300	289,000	280,000	289,000	16	14	In Madaripur, which abounds in low lands, the crop is expected to be bumper, but in Sadar and Goalundo it is expected to be below the average owing to flood being lower and of less duration than last year, and to untimely and insufficient rainfall during sowing season, and damage done by early floods to some low tracts in thanas Kotowali and Ainpur.
	Madaripur... ...	636,160	416,800	324,000	320,000	324,000	20	20	
	Goalundo	273,920	205,400	187,000	187,000	187,000	16	12	
	District Total ...	1,460,480	1,007,500	750,000	737,000	741,000	18	16	
Backergunge.	Sadar	711,040	446,700	256,000	256,000	256,000	16	14	In Bhola, prospects of the crop are for the present not very good owing to deficient rainfall. The damage done can, however, be repaired by an average fall of rain to the end of October. Elsewhere a good crop may be expected.
	Patuakhali ...	787,840	320,200	224,000	224,000	224,000	16	16	
	Pirojpur	442,880	328,[illegible]00	236,800	236,800	236,800	16	16	
	Bhola	393,600	256,100	160,000	160,000	160,000	16	8	
	District Total ...	2,335,360	1,343,200	876,800	876,800	876,800	16	13½	
Tippera ...	Sadar	730,880	547,800	383,800	359,400	345,300	20	18	The decrease in the area sown this year is due to the fact that there were bumper rice crops last year and there is plenty of rice in stock, and therefore lands under this crop last year have this year been sown with jute. The crop is a good one, though not extraordinarily good like last year's.
	Brahmanbaria ...	492,160	353,900	2.9,700	250,000	250,000	18	18	
	Chandpur ...	371,200	265,600	192,000	192,000	192,000	20	18

DISTRICT.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Noakhali	Sadar	830,720	640,000	426,200	400,000	426,200	16	14	For want of sufficient rain at the time of transplantation, the outturn is estimated to be below the average.	
	Fenny	222,080	178,800	137,900	137,900	137,900	20	16		
	District Total ...	1,052,800	818,800	564,100	537,900	564,100	17	15		
Chittagong	Sadar	1,040,640	416,000	400,700	400,700	400,700	18	14	The decrease in the outturn is due to insufficient and want of timely rainfall this year.	From the Census Report of 1891, it appears that the area of the district is 1,640,320 acres.
	Cox's Bazar ...	599,680	90,600	85,200	85,200	85,200	18	14		
	District Total ...	1,594,841	506,600	485,900	485,900	485,900	18	14		

Patna ...	Sadar	392,960	998,500	109,700	108,600	109,000	14½	16	Deficient rainfall is the cause of the smaller area sown and lower estimate in Barh. In the other subdivisions the rainfall has been just enough for the purposes of this crop.	
	Barh	336,640		76,900	76,300	67,600	16	12		
	Bihar	507,520		225,500	225,500	225,000	17	16		
	Dinapore	91,520		33,300	33,300	33,300	16	17		
	District Total ...	1,328,640	993,500	445,300	443,700	423,900	16	15½		
Gaya ...	Sadar	1,219,200	917,900	496,000	496,000	496,000	16	12	The rainfall has been scanty at times and not uniformly distributed, and there has latterly been a prolonged break. Hence the estimated outturn is under the average.	
	Nawada	611,200	489,600	366,700	370,000	370,000	14	14		
	Jahanabad ...	337,840	321,000	208,000	210,000	210,000	18	16		
	Aurangabad ...	797,440	478,100	215,000	225,000	227,000	16	18		
	District Total ...	3,015,680	2,207,500	1,285,700	1,301,000	1,303,000	16	15		
Shahabad	Arrah	585,600	487,400	373,300	200,900	200,600	14	12	Owing to scanty rain at the beginning of the season, the area sown has been less than the normal, an outturn of 12 annas is expected if it rains in *Hathia*.	
	Buxar	426,240	217,900	126,000	128,000	128,600	16	16	If the rain continues favourable a 16-anna crop is expected.	
	Sasaram	955,520	382,500	242,500	241,500	241,000	16	12	Owing to scanty rainfall in *Asar* (June) last a smaller area was sown with winter rice.	
	Bhabhua	832,640	624,600	312,300	227,700	212,000	14	10	The outturn is estimated at 10 annas owing to scanty rainfall at the beginning of the season, which also accounts for the deficiency in the area sown. The prospect of winter rice is at present promising, and a few good showers now would give an average outturn.	The Collector should have returned 16 annas which denotes an average crop.
	District Total ...	2,800,000	1,712,400	1,054,600	798,700	782,200	15	12½

Monghyr ...	Sadar	997,760	698,200	279,000	279,000	279,000	16	16	In Begusarai a larger area has been sown owing to favourable weather. There has been rather scanty rainfall in Jamui, and the outturn there is estimated to be about 12 annas only. In the other two subdivisions, the season is favourable, and the outturn is estimated at 16 annas.
	Jamui	1,019,520	515,300	364,300	364,000	364,000	16	12	
	Begusarai ...	492,160	369,300	14,700	14,600	14,700	14	16	
	District Total ...	2,519,440	1,582,800	658,000	657,600	657,700	16	14	
Bhagalpur	Sadar	597,760	464,000	250,100	270,000	250,000	15	16	The prospects of the winter rice crop are good, but more rain is wanted in some parts of the district. Owing to the transfer of thana Bengorg from Supaul to Madhipura, there are differences in the figures against those two subdivisions.
	Banka	756,480	588,000	527,400	527,400	527,400	16	16	
	Madhipura ...	750,080	598,000	318,800	318,800	318,800	18	16	
	Supaul	600,320	447,000	202,000	202,000	202,000	15	20	
	District Total ...	2,704,640	2,097,000	1,298,200	1,298,200	1,298,200	17¼	16¾	
Purnea ...	Sadar	1,645,440	790,000	280,000	282,000	282,000	16	10	In the Sadar subdivision, the rainfall has been very scanty, and hence an outturn of only 10 annas or less is expected. Even if there be favourable rainfall hereafter, it will not exceed more than 12 annas. In the Kishanganj subdivision, an average outturn is expected if there be favourable rainfall hereafter. In the Araria subdivision, the rainfall has been well distributed: hence an average outturn is expected.
	Kishanganj ...	861,440	530,000	240,000	240,900	240,900	18	16	
	Araria	688,640	410,000	320,000	320,000	320,000	16	16	
	District Total ...	3,195,520	1,730,000	840,000	842,900	842,900	16¾	14	
Malda ...	Whole district	1,217,000	811,500	265,000	265,000	265,000	16	12	Owing to the deficiency of timely rainfall, the outturn is not expected to be more than 12 annas.
Sonthal Parganas.	Dumka	914,560	422,200	181,800	181,800	181,800	18	14	Sufficient rain did not fall to enable all lands to be transplanted, and the rains were not evenly distributed. Heavy recent fall of rain has probably saved all the rice that has been transplanted.
	Deoghar	610,560	165,100	69,100	69,100	65,000	16	12

							Annas.	Annas.		
Cuttack ...	Sadar	901,120	393,100	389,400	358,700	341,900	16	14	The area this year is less than in the last year on account of scanty rainfall at the time of sowing in the Sadar subdivision. The falling off from the normal area is due to the smaller area sown in Kendrapara and Sadar. The former is liable to floods, and the latter has had scanty rainfall. The outturn is estimated to be better than that of last year owing to timely rainfall after sowing.	
	Jajpur	706,500	320,700	288,000	288,000	288,000	11	16		
	Kendrapara ...	643,200	410,200	327,700	298,000	300,000	12	16		
	Banki	74,240	37,200	23,000	23,000	23,000	14	14		
	District Total ...	2,325,120	1,161,200	1,028,100	967,700	952,900	13	15		
Balasore ...	Sadar	741,120	448,000	409,600	353,100	353,100	15	16	The increase in the outturn is due to seasonable rain.	
	Bhadrak	581,120	389,100	300,800	300,800	300,800	13	16		
	District Total ...	1,322,240	837,100	710,400	653,900	653,900	14	16		
Angul and Khondmals.	Whole district ...	1,075,840	346,300	123,600	124,000	126,500	16	16	There has been regular and favourable monsoon rain, and the rice crop is expected to be full, or 16 annas. Entry in column 7 includes approximate area of new cultivation in Angul in 1895.	

Puri ...	Sadar	979,200	408,800	323,500	320,000	320,000	16	14	The increase in area in columns 4, 5, 6, and 7 is due to the fact that the Ekrajat lands of the Puri temple, which were omitted from last year's return, have been included in this return. The decrease of the estimated outturn is due to the entire crop of two large tracts in the Sadar subdivision having been washed away by high flood.
	Khurda	603,520	351,500	180,900	180,600	180,600	16	16	
	District Total ...	1,582,720	812,300	504,400	500,600	500,600	16	14½	
Hazaribagh.	Sadar	2,929,000	1,659,300	666,000	666,000	666,000	16	16	Owing to insufficient rains, the outturn is expected to be less than the average.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT—R. & P. W. CESS—No. 683T.—F.

Darjeeling, the 17th October 1895.

RESOLUTION.

READ—

The Report of the Board of Revenue on the Road and Public Works Cess operations for the year 1894-95.

THE Road and Public Works cesses were levied at the maximum rate of one anna in the rupee during the year under review in all the districts where the Bengal Cess Act IX of 1880 is in force, except in Backergunge, where they were only levied at the rate of ¾ of an anna. This was remarked upon in the Resolution on the report for 1893-94, and the Lieutenant-Governor is glad to see that the new District Board of Backergunge decided to levy the maximum rate during the current year.

2. The following statement exhibits the main results of the working of the Cess Act during the past two years:—

		1893-94.	1894-95.
		Rs	Rs.
1.	Current demand	82,35,859	83,21,993
2.	Arrear "	15,02,319	14,85,984
3.	Total "	97,38,178	98,07,977
4.	Deduct advance collections made in previous year	2,82,139	2,76,640
5.	Net demand	94,56,039	95,31,337
6.	Total collections	82,12,800	82,58,755
7.	Remissions	20,404	27,571
8.	Net balance (a)	14,82,876	15,17,286
9.	Percentage of total collections on current demand	99 6	99·2
10.	Percentage of current collections on current demand	84·6	84·8
11.	Percentage of arrear collections on arrear demand	80·4	77·9
12.	Number of revenue-paying estates assessed	2,16,865	2,22,130
13.	Number of revenue-free estates and rent-free tenures assessed	1,84,753	1,58,042
14.	Number of tenures assessed ...	13,24,266	13,48,052
15.	Number of recorded shareholders in estates	13,70,023	13,94,559
16.	Number of recorded shareholders in tenures	23,90,237	24,17,364
17.	Current demand of land revenue ...	3,81,14,964	3,81,98,931

3. The initial arrear demand for the year under review as given above is larger than the net closing balance shown for the previous year by Rs. 3,108, the difference being due to adjustment and correction of accounts, revaluation of rent-free lands with retrospective effect, revision of assessments and transfers of estates. The total collections show an increase of Rs. 45,955 over the figures of the previous year, but owing to the enhanced demand, the balance outstanding at the close of the year increased by Rs. 34,410.

(a) Excluding advance collections made during the year on account of future years.

4. The following districts succeeded in attaining the accepted standard of cess administration for the first class, and showed a percentage of current collections above 90, and of arrear collections above 80, during the year:—

District.	Percentage of current collections on current demand. Standard 90 per cent.			Percentage of arrear collections on arrear demand. Standard 80 per cent.		
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.
1	2	3	4	5	6	7
Darjeeling ...	99·6	99·9	99·8	100·	100·	100·
Jalpaiguri ..	99·3	91·6	99·5	100·	99·	100·
Puri ...	98·	97·9	97·3	90·4	93·1	91·
Hazaribagh ...	97·44	96·	96·1	100·	99·7	99·9
Malda	94·8	97·4	90·2	99·3	99·7	99·9
Bogra ...	94·74	91·9	94·8	100·	100·	100·
Mymensingh ...	93·5	93·1	92·	98·8	95·6	93·4
Nadia ...	93·4	90·	94·3	97·1	91·7	98·9
Noakhali ...	93·27	90 8	97·6	92·4	84·8	99·3
Balasore	93 1	95·4	93·8	82·3	71·3	92·2
Rangpur ...	93·02	93·	93·4	94·6	94·9	96·3
Birbhum	92·7	95·	94·7	89·3	95·1	95·6
Dinajpur ...	92·6	92 3	92·3	99·7	99·6	99·5
Chittagong ...	92·3	91·5	91 1	98 8	96·5	95·9
Bhagalpur ...	92·	89 2	91·5	89·5	80·7	80·
Khulna ...	91·2	90·5	88·1	90·2	85·5	84·4
Dacca ...	90·6	87·3	90·5	92·4	90·4	93·5

All of these except Balasore, Bhagalpur, and Dacca showed equally good results in the previous year. In arrear collections the standard has been attained by all the districts mentioned in the foregoing list, except Balasore, during all the past three years, while in current collections Bhagalpur, Khulna, and Dacca fell below it in one year. The results are creditable to the officers concerned.

5. Only one district (Singhbhum) is placed in the second class, *i.e.*, collected more than 90 per cent. of the current demand and less than 80 per cent. of the arrear demand. That arrear demand was mostly fictitious, so that for practical purposes Singhbhum may count as included in the first class.

6. In the districts of the third class mentioned below the current collections fell short of 90 per cent., but the arrear collections rose above 80 per cent.—

District.	Percentage of current collections on current demand. Standard 90 per cent			Percentage of arrear collections on arrear demand. Standard 80 per cent.		
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.
1	2	3	4	5	6	7
Manbhum ...	68·	92·4	59·2	98·6	99·5	99·9
Faridpur ...	74·5	76·	78 8	94·1	86·2	85·5
Patna ...	79·5	78·9	77·2	89 8	94·	89·4
Champaran ...	81·5	86·6	69·6	97·6	98·6	99·3
Monghyr ...	82·1	81·8	81·5	82·6	87·1	86·8
Midnapore ...	83 1	76·4	72·	91·9	89·	76·5
24-Parganas ...	84·	86·4	85·1	91·5	91·5	91·9
Jessore ...	84·5	77·5	77·9	93·2	89·	81·1
Lohardaga ...	84·5	82·3	88 8	100·	100·	100·
Backergunge ...	85 3	84·5	87·1	99·5	99·6	98·8
Pabna ...	86·4	87 1	89·2	88 2	95·	93·8
Rajshahi ...	87·1	84·2	82·	97·	89·1	92·6
Palamau ...	88 3	92·4	87·3	100·	99·8	99·9
Tippera ...	88·6	83·4	92·1	90·5	87·8	97·1

Midnapore is the only district which failed to reach the standard for arrear collections throughout the three years; but in current collections all the districts show short percentages throughout the period, except Manbhum, Palamau and Tippera for one year. Midnapore and Tippera, though still under the prescribed standard, show an improvement over the results of 1893-94. The districts of Manbhum and Palamau have fallen off during the year in respect of the prescribed standard of current collections, while the districts which show a material improvement as compared with 1893-94 are Midnapore, Jessore, and Tippera. The percentages are specially low in the first three districts mentioned in the table. The short collections in Manbhum are adequately accounted for by the fact of the Pachete Raja, whose property is being taken over as an encumbered estate, having fallen into arrear with his cesses. In Faridpur it is explained that the order to assess at the increased rate fixed at the revaluation was received too late to permit of the realization of the increased demand in time. Both in this district and in Backergunge there was distress from the floods of 1893, and this must have affected the collections. It is observed, however, that Backergunge shows an improvement over the previous year. In explanation of the short collections in Patna, it is stated that the opium weighments began after the close of the year, and thus the raiyats who pay their rents from what they get for their opium were unable to meet their landlords' dues within the year. This is an instance of the fallacy of using a general cause to explain a particular effect; and in any case it does not excuse the zamindars for delay in paying their cesses. The poor results in Champaran are attributed to default by some of the principal land-holders and zamindars; in Monghyr to floods and to the fact that a large sum (Rs. 7,474) collected on the 31st March could not be credited in the treasury, that day being a Sunday; in Jessore, which shows an improvement as compared with the previous two years, to the non-payment by certain Rajas, and the difficulty in realising cesses due from rent-free tenures; in the 24-Parganas, Pabna, and Rajshahi to the effect of the 15 days' grace allowed for payments; and in Lohardaga and Palamau to the fact that the last kist fell due on the 28th March, and no coercive measures could be adopted till after the close of the year. These two latter excuses, like the one noticed above, apply to all districts in all years, and afford no explanation of default in any particular year. It was observed in last year's Resolution that by a simple arrangement the amounts affected by the 15 days' grace might be eliminated from the returns, and a test of efficiency laid down to which no exception could be taken. The Board undertake to give effect to this in the current year; but they omit to explain why they have not done so in the year under review.

7. The districts of the fourth or lowest class, in which both the current and arrear collections fell short of the standards prescribed, were—

DISTRICT.	Percentage of current collections on current demand. Standard 90 per cent.			Percentage of arrear collections on arrear demand. Standard 80 per cent.		
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.
1	2	3	4	5	6	7
Saran ...	62·5	70·7	70·7	71·8	82·9	82·1
Hooghly ...	65·6	70·5	68·8	72·6	83·6	80·7
Muzaffarpur ...	68·5	72·1	77·1	78·5	76·4	82·3
Gaya ...	77·4	75·7	80·2	54·8	53·	68·5
Bankura ...	82·5	78·2	80·6	54·4	48·4	53·1
Cuttack ...	84·8	81·3	87·8	75·37	83·2	60·
Murshidabad ...	86·5	85·3	87·3	60·6	53·9	49·3
Darbhanga ...	87·3	86·7	86·	76·6	78·2	76·9
Purnea ...	88·7	86·4	81·1	73·2	99·1	99·1
Shahabad ...	89·5	89·2	93·2	52·1	67·6	71·8
Burdwan ...	89·9	89·1	88·6	43·8	56·1	50·7

Except for two years in Saran, Hooghly and Purnea, and one year in Cuttack in the case of arrear collections, and for one year in Shahabad in the case of current collections, all the districts mentioned in the foregoing table have fallen short of the prescribed standards during the three years. The districts of Muzaffarpur, Gaya, Darbhanga, Shahabad, Burdwan, Bankura, and Murshidabad were unfavourably noticed in 1893-94. None of these have yet attained the prescribed standard, though in the year under review, Gaya, Bankura, and Murshidabad show an improvement in both current and arrear collections. Muzaffarpur is better in arrear collections, but worse in current collections, while Darbhanga, Shahabad and Burdwan have fallen off in arrear collections and improved slightly in current collections. No specific reason is assigned for the bad collections in Saran, regarding which it is merely remarked that "the Collector has taken measures to improve collections in future by a more stringent working of the certificate procedure." The short collections in Hooghly are attributed, among other causes, to the fact that at the recent revaluation rent-free holdings paying cess up to Re. 1 per annum were included in the estates within which they were situated; and the holders were ordered not to pay cesses direct, but the zamindars did not receive notice in regard to these holdings, and were not aware what additional cess they had to collect and pay on account of them. The reasons ascribed for the poor results in Muzaffarpur are (*a*) that owing to the cadastral survey the raiyats attempted to reduce their rents and the proprietors refused to accept the diminished rent offered; and (*b*) that the money-lenders after a favourable harvest tried to recover from the raiyats sums lent in previous years. As the Board remark, the reference to the cadastral survey can scarcely be correct, as the collections in this district have all along been bad. In Gaya the failure of the 7-annas share of the Tikari estate to pay within the year, owing to the illness and death of the proprietor, the confusion in the cess accounts, and the tendency of the people to defer payment in consequence of the legal opinion that three years is the outside limit within which arrears of cess can be recovered, are said to have affected the collections. The last excuse, however, amounts to an admission that the collection of arrears is delayed till the arrears become barred. The collections suffered in Bankura, as a large number of petty rent-free tenures could not be traced. The reasons assigned for the bad collections in Murshidabad are the difficulty in tracing owners of rent-free tenures and their property, and the impracticability of taking coercive measures during the year. In Darbhanga and Burdwan it is explained that the majority of proprietors are not inclined to pay till their property is in imminent danger of sale for arrears. In Shahabad the poor results are ascribed to a late and deficient harvest and to the non-payment within the year of cesses by certain large zamindars, the last excuse indicating a want of activity in the Collector's establishment. The falling off in arrear collections in Cuttack is explained by the Collector to be due to the fact "that no certificates (for petty demands) were issued during the year, as under the Board's Circular order No. 1 of June 1889 they are to be issued once in two or three years only." The Board should have pointed out that this circular is misquoted by the Collector in two ways: it makes no reference to a delay of three years, and only authorises postponement of the issue of certificates till the next kist in some cases, and the next year in other cases, the object being to give the Collector discretion, in the case of petty demands, to allow them to accumulate before issuing certificates, so as to avoid harassing the people and imposing costs out of proportion to the sums due. It involves no such procedure as the omission to issue any certificates for small sums during one year rather than another; for the Collector should have issued them in 1894-95 for the small debts of 1893-94 not wiped off by payments in the second year, just as in 1893-94 he should have issued them for the small arrears of 1892-93. The Collector of Mymensingh appeared to have shared the same erroneous impression as that of the Collector of Cuttack, and to have added to it the idea that Board's Circular No. 1 of September 1887, which directs that certificates should not issue as a rule during the rains, added a further postponement of six months. It is obvious that by this interpretation all small arrears would run a great risk of being barred by the three years' limitation.

8. Arrears to the extent of Rs. 27,772 became barred by limitation in 10 districts, Gaya heading the list with Rs. 23,453, followed by Darbhanga (Rs. 1,628) and Muzaffarpur (Rs. 1,442). The omission to realize was due in Gaya partly to confusion in the cess accounts dating from 1889, which ought to have been detected long before this, and partly to lax supervision in the cess collection office, and in Darbhanga and Muzaffarpur apparently to the neglect to file certificates in time. In all these cases the explanation is unsatisfactory.

9. The following statement illustrates the working of the certificate procedure in the realization of the cases during the last two years:—

	1893-94. Rs.	1894-95. Rs.
Certificates pending from the previous year ...	39,294	36,672
Filed during the year	76,034	85,914
Total for disposal	1,15,328	1,22,586
Cancelled on objection	1,409	1,042
Struck off	4,115	6,406
Fully discharged	73,158	74,521
Pending at close of year	36,646	40,617
Sales effected	1,087	1,105
Sales set aside	62	32

The number of cases for disposal was larger than in the previous year; the number disposed of was also greater; but as disposals did not keep pace with institutions, the number pending at the close of the year was larger than in the preceding year. The largest number of certificates was filed in the districts of Hooghly (7,913), Gaya (6,883), Saran (6,097), Darbhanga (5,726), Muzaffarpur (5,210), Chittagong (5,164), and the 24-Parganas (3,567). Various causes, some of which are of no permanent importance, are assigned in the Board's report for the increase in the number of cases pending in several districts. The Commissioner of the Presidency Division hits a blot in the procedure where he remarks on the fact that the Deputy Collectors in charge of the Road Cess and Certificate Departments leave too much to their subordinates and do not watch cases themselves. The amendment of the Certificate Procedure Act has led to the framing of new orders, under which the issue of registered post-card notices will be more frequent; and this rule, combined with the revision of the Tauzi Procedure and the creation of the Arrear Collection Department, will necessitate a modification of the Board's circulars of September 1887 and June 1889.

10. The only district in which a complete revaluation was brought to a close during the year was Burdwan. Partial valuations and revaluations were completed in the districts of Bankura, Nadia, Khulna, Dinajpur, Jalpaiguri, Rangpur, Bogra, Dacca, Faridpur, Chittagong, Shahabad, Saran, Monghyr and Puri. The revaluation operations in Burdwan, which had extended over six years, resulted in a valuation of Rs. 66,37,823, against Rs. 62,47,486 at the previous valuation, giving an increase of 6 per cent., or nearly Rs. 19,000, in the annual demand. The increase in the year under review was, however, only Rs. 2,000, as the revaluation was not finished till November 1894. The total cost of the revaluation amounted to Rs. 63,730, or 3⅓ years' purchase of the increase obtained in the annual demand. The only districts in which the revaluation has resulted in a decrease were Chittagong and Saran. It is highly creditable to the Cess Deputy Collector of Monghyr, Babu Atul Chunder Kerr, that he should have finished the revaluation work in that district within a year, and with little or no harassment to the people concerned. Statement VII attached to the Board's Report shows that valuation or revaluation work was in progress in 18 districts when the year closed. In one of these districts, Bankura, the revaluation operations had been completed, but no completion report had been received.

11. Statement VI, appended to the Report, compares the gross rental in each district for 1894-95 calculated from the returns under the Cess Act, with the gross rental ascertained on the same basis when the road cess was first

introduced, and the gross rental of the preceding year. The results for the Province are as follows:—

	Rs.
Gross rental at first assessment	13,11,68,432
Ditto ditto in 1893-94	15,11,74,604
Ditto ditto in 1894-95	15,36,83,959

The increase up to date amounts to Rs. 2,25,15,527, or 17·1 per cent. on the rental when the road cess was introduced. Only five districts show a decrease of gross rental in 1894-95 as compared with the gross rental at the first assessment, the decrease being due in four cases to the transfer of portions of these districts to others, and in one case to diluvion.

12. The names of the Deputy Collectors whose work is favourably noticed by the Board will be communicated to the Appointment Department.

13. The Lieutenant-Governor's acknowledgments are due to the Board for their careful and efficient administration of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 21*st October*, 1895.

Burdwan.—Rainfall at Sadar nil. *Aman* crop is suffering badly for want of rain. Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16 seers a rupee.

Midnapore.—Rainfall at Sadar 2·12, Contai ·04, Ghatal ·35. Weather getting cooler. Prospect of *aman* paddy good in the Sadar subdivision. More rain wanted in the Contai, Tamluk and Ghatal subdivisions. Paddy is said to be withering in Ghatal. Indigo and *rabi* are being sown. Prices of common rice:—

	Srs.	
Sadar	16	per rupee.
Contai	24	
Tamluk	16	
Ghatal	14	

24-Parganas.—Rainfall at Sadar nil. Weather seasonable. Prospect of *aman* fair. There has been no rain this week, and some of the *aman* paddy is doing badly in consequence. Harvesting of jute completed in Diamond Harbour, but continues in other subdivisions. Ploughing and sowing of *rabi* crops going on. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	17	8	

Murshidabad.—Report not received.

Khulna.—Rainfall at Khulna nil, Bagerhat nil, Satkhira ·11. Weather cooler at night. Harvesting of jute is all but over. Cultivation of land for *rabi* crops has commenced in the Bagerhat subdivision. *Aman* doing well. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	16 to 21	0	per rupee.
Bagerhat	22	2	
Satkhira	16	0	

Dinajpur.—Rainfall nil. Weather cool. Standing crops good. *Bhadoi* is being reaped. Price of common rice 15 to 16 seers a rupee. No cattle-disease, and no complaint for fodder or drinking water.

Rangpur.—Average rainfall ·18. Weather hot during day, but cool early in the morning and late at night. Transplantation of *aman* finished. Steeping of jute still going on in places. Prospects generally favourable. Lands are being prepared for *rabi* crops. Rice selling from 12 to 14 seers per rupee. Fodder sufficient. Cattle-disease is gradually disappearing in the Nilphamari subdivision.

Pabna.—Rainfall nil. Weather hot at day, but cool at night. Prospects of *aman* paddy generally good. Land is being prepared for *rabi* crops. Common rice sells at Sadar 16 seers and at Sirajganj 15 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Price of common rice 17 seers per rupee. No cattle-disease.

Chittagong.—Rainfall nil. Weather cooler. Rain needed for *aman* crop. Lands being prepared for *rabi* crops. Water and fodder sufficient. Rice selling at 16 seers per rupee.

Patna.—Rainfall nil. Prospects of paddy fair, but a shower of rain would be beneficial both to the paddy and the *rabi* crops. Common rice sells from 17 to 21 seers per rupee. Condition of cattle good. Fodder and water sufficient.

Gaya.—No rain. Winter rice dying on high lands, and supply of water in reservoirs giving out. *Rabi* also suffering. Sugarcane—pressing has begun. Price of common rice at Sadar 14 seers against an average of 14¾ seers a rupee.

Champaran.—No rainfall at Motihari. *Rabi* being sown. Prospects of *aghani* generally good.

Darbhanga.—No rain. Weather cloudy. Rice on high lands suffering. Prospects otherwise favourable. Rain urgently needed both for paddy crop and for *rabi* cultivation. Prices stationary.

Bhagalpur.—Rainfall at Sadar ·04, Banka, Madhipura and Supaul nil. More rain wanted. Prospects on the whole seem to be fair. Price of common rice at Sadar 18 seers 15 chitaks per rupee. No cattle-disease. Fodder and water sufficient.

Purnea.—No rain. *Aghani* paddy on high lands is drying up for want of rain. *Rabi* sowings going on. Fodder and water sufficient. No cattle-disease. Common rice selling at 19 seers a rupee.

Cuttack.—Rainfall nil. Weather hot. Harvesting of *beali* nearly finished; average outturn of late *beali* estimated at 15 annas. *Sarad* in ear and attaining maturity. Rain wanted. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	22	5	per rupee.
Jajpur	29	8	
Kendrapara	27	14	
Banki	31	8	

Hazaribagh.—Rainfall at Sadar nil, Giridi ·29. Rain badly wanted in the Giridi subdivision. Prospects of paddy generally fair. *Rabi* sowings in progress. Fodder plentiful. Common rice selling at Sadar 16 seers and Giridi 14 seers per rupee.

General Summary.—There was little rain during the week. More rain is generally required. In the Burdwan and Presidency Divisions the winter rice crop is suffering severely for want of rain, and in parts of Bihar, especially in the Gaya district, the rice in the high lands is said to be withering. In parts of Bihar rain is also needed for the *rabi* sowings. Cattle-disease in the Nilphamari subdivision of Rangpur is abating. Elsewhere the cattle are in good condition. The price of common rice continues generally steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 22nd October, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen

CALCUTTA, *the 22nd October* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 19TH OF OCTOBER 1895.

WEATHER during the past week has been of a very uniform character over both the province and the Bay, especially the latter, where conditions characteristic of the withdrawal of the south-west monsoon have been maintained without a break; that is, fine and almost cloudless weather has prevailed in the north of the Bay and on the west coast as far south as Masulipatam, while in the south-west there has been daily rainfall. There was a slight change during the latter half of the week, which led to the area of lowest pressure being transferred towards the south-east of the Bay, and that was accompanied by general, though light, rain in Lower Burmah and a partial stoppage in Madras. The alteration was of little importance, and conditions soon returned to the normal state.

Over the province fine weather has been general, though there has been a noticeable difference between the eastern and western divisions, the contrast being greatest between Orissa and Chota Nagpur on the one hand and Assam on the other. Temperature has generally been above the normal in the south-western districts, while in the east, and especially in Assam and North Bengal, there has been a considerable defect.

It appears likely that the warmer weather in the west has been connected with the slight disturbance reported to have developed in North-Western India and to have moved towards the east.

At the beginning of the week pressure was in moderate excess, and gradients were steeper than usual from north to south. Northerly winds consequently prevailed over the whole area except in the west of Bihar. A moderate fall of pressure set in from the west, and the distribution soon became more uniform and more normal. This fall of pressure was followed by a few local showers in the western districts and by a considerable increase of temperature. The showers were most frequent in Chota Nagpur from the 13th to the 15th, and in South-West Bengal on the 15th and 16th. With the exception of a few showers in North Bengal towards the end of the week, this was practically all the rain that fell. None has been reported from Assam, East Bengal, Bihar, and Orissa.

After the moderate fall of pressure in the early part of the week, the distribution remained very steady, and being uniform, only light, variable winds prevailed. Generally the days were warmer than the average owing to the cloudless skies and the absence of rainfall, and the nights were cooler, the defect in the latter preponderating in the eastern districts, where mean temperature has been in defect.

Pressure.—As stated above, pressure fell moderately in the early part of the week, and remained almost unchanged afterwards. The difference from the normal in the means for the week is slight in all districts, being generally under ·02 inch.

Temperature.—Comparatively warm weather has prevailed in Orissa and Chota Nagpur, where the means for the week are high by about half a degree. In South-West Bengal and Bihar defect is small, in North Bengal it is nearly 1,° and in East Bengal and Assam about 1°·5.

Rainfall has again been scattered in some districts, and in others entirely absent. The average fall in Chota Nagpur is ·25 inch, in South-West Bengal ·16 inch, and in North Bengal ·11 inch. Elsewhere there has been none.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 19th of October 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·76
The total fall from 1st January to 19th October 1895	38·73
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·38

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 28th October 1895.

RESOLUTION—No. 344T—G.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Chota Nagpur Division for the year 1894-95 for general information.

2. His Honour desires to call the special attention of District Officers to the following passages in the Report:—

Paragraph 54.—Regarding the impetus given to coal-mining by the Jharia extension of the East Indian Railway. It does not appear that any special complaint has been heard on the subject of any dearth of labour.

Paragraph 59.—The remarks in this paragraph illustrate well the utility of railway statistics in correcting or confirming general impressions. It is noticeable that the imports of food-grains, as ascertained from railway statistics, greatly exceeded the exports.

Paragraph 70.—Mr. Grimley's views on the severity of the treatment which police errors frequently receive agree with those which the Lieutenant-Governor has already expressed on a subject which he considers of extreme importance.

Paragraph 198.—The Commissioner gives a valuable *resumé* of the chief administrative problems of the Division, to which may be added the Bill for introducing a modified Tenancy Act and commuting predial services for money payments.

The attention of the Public Works Department will be drawn to the description in paragraph 59 of the main roads in the Division and the effect upon them of the opening of railway communications.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR DIVISION FOR 1894-95.

No. 267J., dated Ranchi, the 9th July 1895.

From—W. H. GRIMLEY, ESQ., Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following report on the General Administration of the Chota Nagpur Division for the year 1894-95.

2. The reports of the District Officers were received in my office on the dates mentioned below:—

Hazaribagh	...	... 27th May 1895.
Lohardaga	...	... 31st " "
Palamau	...	... 3rd June "
Manbhum	...	... 3rd " "
Singhbhum	...	... 3rd " "

I.—CHARGE.

3. I was in charge of the Division throughout the year, except from the 4th September to the 2nd November 1894, when I was on leave, and Colonel A. Evans Gordon officiated as Commissioner.

(a) Division.

(b) Districts.

The districts were in charge of the officers mentioned below:—

Hazaribagh	...	Colonel C. H. Garbett throughout the year, with the exception of the last seven days, when he was on leave, and Mr. E. M. Konstam, C.S., officiated as Deputy Commissioner.
Lohardaga	...	Colonel A. Evans Gordon throughout the year, with the exception of two intervals, viz., from the 13th April to the 18th June 1894, when he was on leave, and Mr. C. Cuthbertson, C.S., officiated for him; and again from the 4th September to the 2nd November 1894, when he acted as Commissioner, and Mr. C. F. Manson, Deputy Magistrate, officiated as a Deputy Commissioner.
Palamau	...	Mr. W. B. Bright, C.S., throughout the year.
Manbhum	...	Mr. J. Windsor, C.S., from 1st April to 24th July 1894, and again from the 25th October 1894 to the end of the official year. During the interval Mr. C. H. Bompas, C.S., officiated as Deputy Commissioner.
Singhbhum	...	Mr. C. A. S. Bedford from the commencement of the year to the 24th May 1894, and again from the 16th July 1894 to the 27th March 1895. Mr. C. H. Bompas, C.S., during the remainder of the year.

(c) Subdivisions.

Giridih	...	Mr. W. H. Rattray, Deputy Magistrate and Deputy Collector, throughout the year, with the exception of the first 27 days, when he was on leave, and Babu Upendra Chunder Mukherjee, Deputy Magistrate and Deputy Collector, was in charge.
Gobindpur	...	Mr. N. Warde-Jones, Deputy Magistrate and Deputy Collector, throughout the year.

The reports of the several districts were submitted by the officers mentioned below:—

Hazaribagh	...	By Mr. E. M. Konstam, C.S.
Lohardaga	...	By Colonel A. Evans Gordon.
Palamau	...	By Mr. H. C. Streatfeild, C.S.
Manbhum	...	By Mr. L. F. Morshead, C.S.
Singhbhum	...	By Mr. C. H. Bompas, C.S.

The majority of the officers by whom the district reports have been submitted thus laboured under the disadvantage of having to submit reports for districts of which they either did not hold charge, or held charge for very short periods during the year.

II.—TOURS AND INSPECTIONS OF OFFICERS.

(a) Commissioner's tour.

4. My movements last cold season were subordinated to the requirements of the Native States, in which I made an extended tour; but, in spite of this claim on my time and a further interruption caused by the Camp of Exercise and inspection of the Chota Nagpur Mounted Rifles, which were held in the middle of February to suit the convenience of General Lance, I was able, by marching rapidly, to make the customary inspections of all the courts, offices, and other public institutions in each district. The time thus spent on tour was 134 days, including a short tour of 16 days made by Colonel Gordon when he was acting as Commissioner during my absence on leave.

5. I visited Purulia in April, while journeying to and from Calcutta, to give evidence before the Ganja Commission, and again in August when I visited the jail and the dispensary, drove round the Madhab bandh to observe the progress of its construction, and inspected the Deputy Commissioner's cutcherry, besides enquiring into a variety of local matters that demanded attention, in particular the unauthorised grant of certain leases of Government land for building sites, and the petition of two sons of the Raja of Pacheto for the protection of his estate under the Encumbered Estates Act. The Raja, a very old gentleman, owns the largest and richest property in Manbhum. The petitioners themselves are quite elderly, and their earnest endeavours to rescue their ancestral estate from the inevitable ruin that awaits it, if the present form of mismanagement continues, have my fullest sympathy and support.

6. Colonel Gordon when officiating as Commissioner left Ranchi on the 21st September and proceeded *viâ* Purulia and Chakradharpur to Chaibassa, where he inspected the several branches of the Deputy Commissioner's office and the other public institutions. On the 30th September he went to Giridih and inspected the subdivisional office and the sub-registry office, the distillery and the charitable dispensary. He left Giridih on the 2nd October, and reached Gobindpur by rail the same day, and at once commenced the inspection of the subdivisional office, which he finished on the following day. He left Gobindpur on the 3rd, and returned to head-quarters *viâ* Asansol and Purulia on the 6th.

7. On my return from leave I took over charge at Purulia on the morning of the 2nd of November, and setting out the next day by nightfall got as far as Thulin on the banks of the Subarnarekha, the river of the golden streak, that pursues its sinuous course and seems to be everywhere in the south-eastern parts of Chota Nagpur. Except the undulations of the road there was nothing to arrest the eye until, on approaching Jaipur, the castle-like habitation of the local zamindar came prominently into sight, the dilapidated remnant of a feudal age. I beguiled the tedium of the journey by counting the oft-recurring strings of carts laden with merchandise that passed by, finding in their number some justification of the support I had given to a scheme for a steam tramway as far as Ranchi. The line would traverse the Manbhum and Lohardaga districts and be fed from the marts of Palkot, Lohardaga, Khunti, Ranchi, Bundu, Thulin, Jhalda, and other trade centres, as well as affording a convenient outlet for the surplus products of the Jushpur and Sirguja States. It would, moreover, convert Ranchi, with its dry and temperate climate, into a sanitarium in those months of the year, from July to October, when the heat and moisture of the plains are most oppressive. It would also prove an incalculable boon to travellers who have now to perform the journey of 74 miles from Ranchi to the railway in a cart, a sort of attenuated bathing machine, dragged by coolies at the rate of three miles an hour. There is a project ready to hand which only requires the help of the financier and organiser to bring to completion.

8. Fourteen miles from Jaipur the road winds through Jhalda, a straggling village with some pretensions to being a town, as it can boast a municipality, dispensary, police-station and school, besides several lac factories which send their produce to Mirzapore, and a large serai and camping-ground for carts. I spent the night at Thulin, and the journey thence to Ranchi, a distance of 39 miles, occupied the whole of the next day. After crossing

the river the road begins to rise gradually until it attains the level of the plateau some 17 miles from Ranchi. Midway between Thulin and this spot there are three causeways much out of repair, which are a source of considerable inconvenience, not to say danger, to the public in the rains when there is a rapid flow of water. By diverting the road a little, two of these obstacles might be avoided at no great cost. The road winds through a valley with hills on both sides, which, being fairly well-wooded, give a pleasing variety to the landscape, and this is maintained until Rajadera, the head of the pass, is reached, so called from the Raja of Chota Nagpur pitching his tent there when journeying to Pachete on the occasion of his marriage.

9. On the 14th November, as soon as all arrangements were complete, I set out for a tour in the Tributary States. It is no light task preparing for such a journey, seeing that, with the exception of the tents which are borne on elephants, everything is carried by coolies banghy-fashion in covered baskets. Local men are not to be relied on, and the coolies are usually brought from the district of Hazaribagh and engaged for the whole season, quite a small army being required to transport all the impedimenta necessary for a journey of three months' duration. The road we traversed was constructed some years ago and runs through a continuous expanse of undulating country, patches of cultivation ripe for the sickle alternating with long stretches of scrub jungle or the red rocky soil of the upland. Owing to the friable character of the soil the road in places was in very bad condition, but it is a difficult road to maintain properly, and to keep it metalled is beyond the resources of the Road Cess Committee. Except on the first day when troops of villagers from the neighbouring hamlets passed by on their way to market, forming a series of quaint pictures of rustic life in their primitive ornaments and garb of simplicity, the wayfarers were few, and the all-pervading sense of silence and solitude peculiar to Chota Nagpur continually impressed us with the idea that we are travelling far away from civilisation.

10. We marched about 16 miles a day, halting at Mandar, where there is a police-station, and at Kuru, where the road bifurcates, one branch going to the south-west to Lohardaga and the other to the north-west to Palamau. We took the former and reached Lohardaga, 48 miles from Ranchi, on the third day. At Kuru I received a visit from Thakur Radhanath Sahi, a broken-down zamindar of Kairo, whose estate is under the Encumbered Estates Act. He was in great distress of mind, as his efforts to prevent the diminution of his ancestral property by the sale of a portion had proved futile, and appealed to me for assistance. At Lohardaga I visited the Munsif's cutcherry, the thana, and the dispensary.

11. The road after leaving Lohardaga turns sharply to the south, and is simply a fair-weather road, following the level of the country with its numerous ascents and descents, and crossing bridgeless streams. Our progress was occasionally impeded by droves of pack bullocks from Jushpur or Sirguja with their tinkling bells. The next halting places were Ghagra and Goomla, where the Bara Lal from Palkot with his son came to pay me a visit of ceremony. They accompanied me to the next encampment at Raidih. The Baraik of Goomla also put in an appearance, and on my taxing him with an accumulation of arrears of subscription to the Lohardaga dispensary complained that owing to the people having become Christians—the term is synonymous with non-payment of rent—he was reduced so low that he could not afford to pay.

12. The march from Goomla to Raidih was rather a trying one, as the road was rough and made deep dips into the beds of rivers and scrambled up the ridges on the opposite bank in a very irregular fashion, necessitating frequent descents from the dog-carts to ease the strain on the horses, but on we went steadily, but surely, until our destination was reached. We were late in arriving, but the beauty of the spot where the camp was pitched was some compensation for the discomforts of the journey, for Raidih is most picturesquely situated on rising ground beneath the shelter of encircling hills on three sides and with the valley of the river Sunk which separates the Lohardaga district from Jushpur territory on the remaining fourth. Here we found Mr. Schurr, the District Superintendent of Police, who like myself was on a tour of inspection. The next morning we crossed the Sunk; but as it was in high water owing to the lateness of the rainy season, it became necessary to

make a detour and approach the river through the bed of a nala in order to find a safe ford, but, thanks to the arrangement made by the Raja of Jushpur, we reached the opposite bank without any mishap. I entered Jushpur on the 21st November, and from that date until the end of December was marching though the Native States of Jushpur, Sirguja, Udaipur, Gangpur, and Bonai.

13. On the 5th January I arrived at Chakradharpur in the Singhbhum district, and the next day drove into Chaibassa accompanied by Father Haghenbeck, the Superior of the Roman Catholic Mission at Ranchi, who was on a visit to the brotherhood at Chaibassa. The road which was completed a year or two ago was in excellent order. The public offices and courts had already been inspected by Colonel Gordon in September, so I confined my attention to the jail, dispensary, and zilla school. I also attended the distribution of prizes at the Anglican Mission school by the Right Reverend the Bishop of Chota Nagpur, gave interviews to the chief Mankis of the district, as well as to the Raja of Seraikella, the Thakur of Kharsawan, and the Thakur of Kera, discussing with them important matters connected with the administration of their States. I also decided a forest boundary question and a dispute about a ferry, and along with the Deputy Commissioner and District Superintendent of Police examined the rules and forms for chaukidari assessments. On the 9th I left Chaibassa accompanied by Mr. Bedford, the Deputy Commissioner, and he remained with me during the next three days, when I visited Seraikella, Dugni, and Kandra up to the banks of the Subarnarekha which separates Singhbhum from Manbhum. The contrast between the roads in these two districts is remarkable, and much to the disadvantage of the former, partly owing to the poverty of the road fund and partly to the fact that the road passes through the Seraikella State, where it does not receive the same amount of attention as a district road. At Chandil, some six miles from the Subarnarekha, I was met by Mr. Windsor, the Deputy Commissioner of Manbhum, who accompanied me to Balrampur, Adardih, and Barrabazar, the head-quarters of Messrs. Watson and Company, and Purulia. At Chandil I received a visit from the son of the Patkum zamindar, who was anxious for the protection of the Encumbered Estates Act to be extended to his father's property. At Barrabazar I discussed the ghatwali commutation question with Mr. Mathewson, Messrs. R. W. Watson and Company's Manager, and other matters in connection with the zamindari of Barrabhum, of which they are the proprietors, but was specially engaged in enquiries connected with coolie emigration. At Purulia I inspected Mr. Saubolle's depôt, against whom certain charges of wrongful detention had been made, and I pointed out to the depôt-keeper in what way the orders of Government should be complied with regarding opening out the front wall.

14. The next week I spent in Calcutta with the permission of His Honour the Lieutenant-Governor, where I had much to do in connection with the arrangements for the Camp of Exercise and Rifle Meeting of the Chota Nagpur Mounted Rifles. On the 27th January I returned to Purulia, and reached Ranchi on the 31st, halting on the way at Bamnia, Thulin, and Jonha. The place last-mentioned is in the midst of hills about 21 miles from Ranchi and not very far from the Hundrughag water-falls, where the Subarnarekha dashes through a rocky chasm from the plateau to the valley below between the Hazaribagh and Lohardaga districts. While at Jonha a woman besought my interference on behalf of her son, who some months before, she said, had been fuddled with drink and carried off to Assam. She produced a letter from him, in which he stated the circumstances of his recruitment, and piteously bemoaned his fate and asked that steps might be taken to procure his return. I enquired into the case, but it was asserted that he was over age. A few months later, however, the mother came and said he had been allowed to return.

15. The Camp of Exercises, Rifle Meeting, and Annual Inspection of the Volunteers took place from the 10th to the 18th February, and for the rest of the month work at head-quarters detained me. On the 4th March I set out for Palamau accompanied by Surgeon-Lieutenant-Colonel Comins, the Inspector-General of Jails, halting *en route* at Chandwa and Manka. After descending the Chandwa ghat the road passed through the Auranga valley near the coal-fields of that name and at no great distance from the Karanpura and Hutar coal-fields, all of which only await the advent of a railway to be profitably worked. These

valuable mineral stores, together with the coal-bearing rocks of Bokaro, Ramgurh, and Daltonganj, would be capable of development and doubtless afford a rich reward to persons enterprising enough to carry a railway to the spot. This would be possible by continuing the Jharia extension line from its terminus at Gutariya through the Damuda and Auranga valleys in a direction almost due west as far as Daltonganj and thence on to Mogulserai.

16. Besides inspecting the public courts and offices at Daltonganj I visited the jail, the dispensary, and the police lines, and had interviews with the principal zamindars of the district, who to show their loyalty came in to see me from far and wide. They were much concerned at the transfer of Mr. Bright, who, as their first Deputy Commissioner, may be said to have made the district, and, as a mark of their appreciation of the interest he had taken in their welfare and in the advancement of the district, they had decided to make a public garden on the land round the well which was constructed in honour of Sir Charles Elliott's visit to Daltonganj. The visit to the jail was instructive, as Dr. Comins explained to the jailor the proper mode of husking paddy, and of giving a supply of pure water to the cook-room. The jail has still more land around it than it can possibly require, and the sterile portion of it might be given up to the town which is sadly in need of additional land for building sites.

17. On reaching the dispensary the Assistant Surgeon, Babu Raj Mohun Banerjee, who takes much interest in eye diseases, was on the point of operating for cataract on an elderly man who had lost the sight of one eye and was nearly blind in the other and had come a great distance for the purpose. He performed the operation very skilfully, removing the lens, and when it was over, the man was able to distinguish objects, but it would take a week or two for his complete recovery. These operations for cataract, which are numerously performed throughout Bengal, are a great boon to the people, and would be more valuable if each dispensary had a supply of spectacles on sale to the public. The initial outlay would soon be recouped, and possibly spectacle-makers might be induced to take back what remained unsold. It is true that many of the patients would not be able to afford the luxury of spectacles, but there are others who could easily do so; for example, the patient above mentioned, who was a well-to-do baniah. Rai Thakurai Bhagobat Dyal Singh Bahadur had liberally offered Rs. 3,000 for adding a female ward to the dispensary, and was not to be outdone in generosity by his *fidus Achates*, Thakurai Gobind Prosad Singh, of Ranka, who had offered to build and endow a dispensary at his own place of residence.

18. Mr. Giles, the Deputy Inspector-General of Police, was at Daltonganj at the time of my visit, and we went together to the police-station, and it was a novel sight to see the men who were drawn upon the parade-ground perform their drill and physical exercises in an efficient manner, a matter heretofore much neglected in this district, but they have recently had the benefit of a smart officer to instruct them who had been brought in from another district. I was glad to find that greater attention is being paid to drill and discipline in the police force generally, as laxness in this respect is apt to generate a habit of carelessness in the more important functions of a police officer.

19. I examined the work of Mr. Sunder, the Settlement Officer, and his staff, discussed the form of jamabandi, and gave instructions on various points connected with the survey and settlement operations. I also advised the Deputy Conservator of Forests, Mr. Trafford, on the line of action to be taken under rules for the management of the protected areas. I went round the town with Mr. Bright and inspected the public roads, latrines and trenching ground, which were all in fairly good condition.

20. The return journey to Ranchi took longer than the coming, as the road was heavy after a storm and led up-hill for a considerable portion of the way. I reached Ranchi on the evening of the 12th. On the 17th the Political Chiefs and principal zamindars came in to attend a darbar, and for the next week I was engaged in disposing of various important questions connected with the Native States. On the 26th I went to Hazaribagh and inspected the public offices and courts, the dispensary, the jail, and reformatory I also went round the town and saw the drainage, the roads and trenching ground, besides paying a visit to the coolie depôts situated on the Barhi road about

two miles away. I also enquired into the working of the rural police and inspected the police reserve, being well pleased with the smart way in which the men were put through their exercises by Inspector Campbell. I was glad to find that the Raja of Padma, who for the last few years had been holding aloof and shutting himself up at home, came in with his son to see me, and I took occasion to advise him to put the management of his large property on a better footing, as there is some danger of its going to ruin through neglect, and I further counselled him to improve his village and make the raiyats better pleased with him by constructing reservoirs for irrigation and pucka darri wells for drinking purposes. He seemed to be impressed by what I said, but how long the impression will last remains to be seen. On the return journey from Hazaribagh I examined the causeway under construction across the Damodar. Very little progress had been made.

21. My inspection embraced every department, both on the Revenue and Criminal side, and was not confined to the registers, but included an examination of correspondence and records of cases in order to see whether business was disposed of with proper regard to its importance and with sufficient promptitude. Care was also taken to ascertain whether the defects pointed out at previous inspections had been rectified, and that punctuality was observed in attending office. The Hazaribagh office is a model of neatness and order, thanks to the constant supervision exercised by Colonel Garbett, and I also had occasion to compliment Mr. Bright and his clerks on the state of efficiency in which I found his office.

(b) Tours of District Officers.

22. The tours of the District Officers were not confined to the cold-weather months, and were in all cases either equal to, or in excess of, the periods fixed for their respective districts. The longest period spent in the interior was 122 days by the District Officer of Lohardaga. The number of days spent by Colonel Garbett in the interior of Hazaribagh was exactly 120 days. The tours of the other Deputy Commissioners were—Manbhum 101, Singhbhum 109 and Palamau 114 days.

23. Colonel Garbett's tour was spread over seven months of the year, viz. from September 1894 to March 1895, and he visited every part of the district. He travelled over and inspected 426 miles of road, inspected 22 police-stations and outposts, a large number of ghatwali roadposts, 20 pounds, 67 outstills and ganja and opium shops, and a large number of primary and other schools; examined the registers of 26 chaukidari tahsildars and compared a large number of receipts granted to assessees with their counterfoils and with entries in the shiahas; visited the Government villages in Koderma, Korgali, and Kharagdiha, the Dhanwar Court of Ward's estate and six encumbered estates. In the Government estates he inspected a large number of bandhs or irrigation reservoirs constructed during the past and the previous years and selected sites for similar improvements in the current and succeeding years. In the wards' and encumbered estates he examined the accounts of the tahsildars and compared the receipts granted to several hundred raiyats with their counterfoils and the entries in the shiahas. In September and February he visited Giridih, and there made inspections of the subdivisional office, the court of the Munsif, the sub-registry office, the sub-jail, the dispensary, the distillery, and the ganja golahs. He also inspected the office of the Manager of the Dhanwar Court of Wards' estate at Pachamba. In January he visited Chatra and there inspected the several branches of the office of the Munsif-Magistrate, the Chatra middle vernacular school, the charitable dispensary, the Sub-Registrar's office, and the municipality. Throughout his tour Colonel Garbett devoted a good deal of his time to making enquiries into income-tax and chaukidari assessments, the outturn of the crops, the material condition of the people, state of public feeling, conduct of zamindars, and police and many other matters. His tour was well planned and his diaries were full and interesting.

24. In Lohardaga, with the exception of April, May, and September, the tour of the Deputy Commissioner was distributed over all months of the year. In June Colonel Gordon spent two days in inspecting certain wells constructed with corrugated iron rings by Mr. Cooke, of Palandoo. In July he spent 10 days on a short tour through Rantu, Mandar, Angara, Mahilon, Khunti,

Messra, and Ormanjhi. At Mandar and Khunti he inspected the police-stations. At Angara he inspected the outstill and selected a site for a new cart serai. At Messra he endeavoured to bring about an amicable settlement of a dispute between the zamindar of the place and his brother. In August Colonel Gordon spent five days at Basargarh, Rantu, and Pithoria. In October Mr. Manson when officiating as Deputy Commissioner spent eight days in visiting Lohardaga and inspecting the several public offices and institutions of the place. In November Colonel Gordon visited Silli, Rahey, Bundu, and Tamar, and thence proceeded to Chakradharpur to attend the volunteer meeting there. On his way back from Chakardharpur he made enquiries regarding three notorious sardars, who, he was told, were still clandestinely collecting *chanda* and holding meetings on market days at Kochang. He then visited the Jeria estate, which is now managed under the Court of Wards, and supervised the revision of jamabandis of several villages by the Manager. Between the 4th January and 8th February 1895 he toured through the south and south-western portions of his district. On the 23rd February he visited Lohardaga and there inspected the Revenue and Criminal sides of the Munsif's office, the Registration office, the municipality, dispensary and other public institutions, and returned to head-quarters on the 15th March, on which date and on the 16th, 28th, and 29th he made short excursions in the neighbourhood of Ranchi. In the course of his tours, besides making the usual inspections of police-stations and outposts, schools, and excise shops, Colonel Gordon inspected a large number of district roads and made enquiries into the state of the crops, public health, income-tax assessments, chaukidari collections, *chanda* movements, relations of landlords and tenants, and compared the receipts given to the raiyats of Government Court of Wards' and encumbered estates with their counterfoils. He made a prolonged tour and visited the greater portion of his district.

25. In Palamau Mr. Bright's tour was spread over eight months of the year. In April he spent three days in the inspection of *khanapuri* work in the Palamau Government estate and of the Manatoo road. In June he visited Mohuadand in the extreme south of his district and spent ten days in trying on the spot a serious case which originated in the religious antagonism between Hindus and Muhammadans in connection with cow-killing. In September he spent eight days in inspecting the attestation work of the Assistant Settlement Officer of Palamau, and the outstills, schools, police-stations, and outposts which lay on his route. In October he was out ten days visiting Chatterpur and Patan, making the usual inspections of roads, outstills, ghats, and police-stations. In November he spent 17 days in camp in inspecting the Sirguja road, the attestation work of the Assistant Settlement Officer and the schools, thanas, outstills, and other excise shops at Gurwah and Bisrampur, and in visiting the Majhiwan attached and the Punjri-Kullan ward's estate. In December Mr. Bright spent 27 days in touring through Manatu, Nowajaipur, Shahpur, Saraidih, and Namoodag. He then visited Majhiwan a second time with a view to meet the sub-manager of encumbered estates who had been ordered by the Board to take over charge of the estate and to check the jamabandis; but on the night of the 24th December he received news of a serious riot which had occurred 20 miles south of Daltonganj, and this necessitated his proceeding by forced marches to the spot. He reached the place of occurrence on the morning of the 26th. Having finished the enquiry into this case, he returned to head-quarters though Gurwah. In January Mr. Bright spent 24 days in camp touring through Ranka and Untari to the Sirguja border. In February he spent 15 days in the interior and visited Latiahar and the tuppeh of Seemah. Besides doing the usual inspections of schools, police-stations, and outposts, roads, crops and outstills, a good deal of Mr. Bright's time was occupied during the three last-mentioned trips in supervising the attestation work of the Assistant Settlement Officer of the Palamau Government estate, examining the receipts granted to the raiyats of the Government Court of Wards and encumbered estates and making income-tax and chaukidari enquiries. Mr. Bright visited almost all parts of his district and made a very useful tour.

26. In Manbhum Mr. Windsor was out on 98 and Mr. Bompas on 3 days, thus making between them a tour of 101 days, which were spread

over all the months of the year, except *April*, May, September, and October. In June Mr. Windsor spent four days in visiting Raghunathpur and inspecting the municipality and the public offices and institutions of the place. In July he was out nine days on a visit to the subdivision of Gobindpur, where he inspected the several branches of the subdivisional office, the sub-registry office, the sub-jail, the dispensary, the school, the thana, and the office of the Tahsildar of the Nagarkiari ward's estate. In August Mr. Bompas went to Jhalda, chiefly with a view to select Commissioners for the Jhalda Municipality. In November Mr. Windsor visited Barrabazar and on his way there noticed that Messrs. R. Watson and Company had definitely abandoned indigo, which was formerly the source of constant friction between their employés and the raiyats, and that the latter had sown mustard and other crops round their houses where formerly they were forced to cultivate indigo. At Barrabazar he inspected the criminal, revenue, and civil sides of the Munsif's office, the dispensary, the thana, the sub-registry office, the excise shops, and the coolie depôts. On his way back from Barrabazar he visited Balrampore, where he inspected the outpost. The place is said to be rapidly rising in importance owing to the opening of the Bengal-Nagpur Railway. On the 17th November Mr. Windsor again started from head-quarters and proceeded along the Chass-Goolbera Provincial road, now maintained by the District Road Committee with a Government grant, towards the western portion of the Gobindpur subdivision inspecting *en route* the police-station, cattle-pound, excise shops, and coolie depôts at Chass. Here he found that the cart serai, which had previously been in existence, had fallen down, though the so-called lessee paid Rs. 135 during the year under report and continued to levy black mail from cartmen who halted at the roadside or in a mango tope. He then visited the Nowagarh encumbered estate and inspected the office of the Tahsildar at Phuluatand. He next visited Kutrass, Rajganj, and Topechansi. The village of Kutrass has grown in importance owing to the opening of the railway and the settlement of coal lands. At Rajganj Mr. Windsor inspected the police-station, and at Topechansi the police-station and dispensary: this latter is maintained jointly by the zamindars of Nowagarh and Kutrass. From Topechansi Mr. Windsor proceeded to Gobindpur, where he halted two days and then returned to head-quarters. On the 6th December Mr. Windsor again left head-quarters and proceeded to Gobindpur to complete his tour in the subdivision. This time he visited Chirkunda, Nirsha, Poddardih (Pandra), Samandpur, Gobindpur, Tundi, and Jheria. At Chirkunda and Nirsa he inspected the police outpost and station. At Poddardih he inspected the school, dispensary, and hostel, all of which are maintained by the zamindar, Babu Madhusudan Singh. The dispensary is said to be doing very good work and to have already gained very great popularity in the neighbourhood. The hostel is attached to the school and gives accommodation to 50 boys, all of whom are boarded and fed at the zamindar's expense. At Samandpur he inspected the accounts of the Tahsildar of the Pandra half encumbered estate. At Gobindpur he completed his second inspection of the several branches of the subdivisional office and the lock-up, the dispensary, police station, and the sub-registry office. At Jheria he found that the zamindar, who was a ward of the Court till the 4th December 1893, had received a large bonus by the settlement of coal lands; but instead of utilising the sum in the payment of the debts incurred by him since that date had spent the greater portion of the same, together with the income of his estate, in useless and unproductive pursuits. People have flocked into Jheria from all quarters, and the zamindar being young and wanting in strength of mind, advantage has been taken by schemers and speculators. In January 1895 Mr. Windsor was away 25 days and proceeded to the south and south-western of his district. He visited the temporarily-settled estate of Mahta, and there inspected the irrigation bandhs which were being excavated at the cost of Government. He then proceeded to Baghmundi, Hensla, and Patkum. From Chandil he accompanied me to Barrabazar. Later on he proceeded to Koilapal and Dhodl[illegible] the extreme south-east of his district. In February he spent 20 days in camp in visiting Jaypur and Jhalda, Jhapra, and Raghunathpur. At Jhalda he inspected the municipality, police-station and sub-registry office, and examined the accounts of the Tahsildar of the Jhalda ward's estate. At Raghunathpur he inspected for the second time the several branches of the office of the Mu[illegible]

the municipality, dispensary, thana and school, and made enquiries into certain petitions regarding the exclusion of Nanduara from the municipality. From Raghunathpur he paid flying visits to Gourangdih and Santuri, and there inspected the police, thana and outpost and the excise shops. In March he was out on four days only, visiting Hura and some other villages on the east of his district Mr. Windsor thus made a very extensive tour and visited all parts of his district. Throughout his tour, besides making usual inspections of roads, police-stations and outposts, excise shops and schools, he made enquiries about income-tax assessees, the state of the crops, condition of the people, the state of public feeling, conduct of zamindars, and the relations between landlords and tenants. His tour was well arranged and his diaries were always full and interesting.

27. In Singhbhum Mr. Bedford spent altogether 109 days in the interior of his district, and his tour was distributed over eight months of the year. In August, September, and October he spent six, nine, and seven days, respectively, in inspecting the Chakradharpur thana and in disposing of questions connected with the Chakradharpur bazar, the railway and the establishment of a Bench at Chakradharpur. In November he was out on 28 days, during which he was chiefly occupied in touring through pargana Dhalbhum and the Seraikella Political State. At Ghatsilla he inspected the Manager's office, the police-station, the excise shops and the school, and disposed of on the spot appeals from the decision of the Forest Settlement Officer of Dhalbhum. In Seraikella he settled many questions between Babu Gangaram Singh of Icha and the Prodhans of his elaqua, and inspected the office of the Raja and the roads and schools within the State. In December he again visited Chakradharpur in connection with various matters regarding the Chakradharpur bazar, and met His Excellency the Viceroy and Governor-General of India on the 14th December 1894. In January and February he visited Porahat and the Kolhan and made the usual inspections of the roads, schools, and excise shops and the reserved and protected forests. He also made enquiries regarding income-tax assessees, and discussed matters connected with the settlement of the Kolhan estate with the Settlement Officer, Mr. Craven. Between the 1st and 3rd March he inspected the office, hajat, and dispensary of the Thakur of Khursawan.

(c) Tours of Subdivisional Officers.

28. In the Giridih subdivision the tour of the Subdivisional Officer, Mr. Rattray, was spread over seven months of the year. In June he spent eight days at Kharagdiha for the purpose of holding a local enquiry in connection with a dispute about the possession of Gadi Lataki. In October he visited Mohoshmunda and Teladih and spent eight days in holding enquiries into certain complaints made by the raiyats of those places regarding the cultivation of poppy, which had lately been extended to that side of the district In November he spent 20 days in visiting Barakar, Palganj, [illegible], [illegible]pur, Dumri, Choochanda, Madhuban, and Pertand. In December he toured through the Serampur estate and spent 21 days in visiting important places in that Gadi. In January he passed 18 days in camp in the northern portion of his subdivision, and in February and March he remained out on nine and six days, respectively. He thus completed the prescribed number of 90 days. In the course of his tour Mr. Rattray inspected police-stations and outposts, schools, excise shops, and cattle-pounds, and made enquiries regarding the state of the crops, health of the people, the condition of the roads, relations between landlords and tenants, income-tax assessments and the working of the Chaukidari Act.

29. In Gobindpur Mr. Warde-Jones made a prolonged tour of 154 days and visited all parts of his subdivision. The repressing of riotously-inclined persons, he says, was an important item of his curriculum. A portion of his time was also taken up in the inspection of sites and buildings for the storage of explosives for blasting purposes required in coal mines which are rapidly increasing in the subdivision.

Inspection of district offices and treasuries—
(a) By Commissioner.

30. The district offices and treasuries at Hazaribagh, Ranchi, Palamau, and Purulia were inspected by me once during the year. The district office and treasury at Chaibassa were inspected by Colonel Gordon in September 1894.

(b) By Deputy Commissioners.

31. All the district offices and treasuries were twice inspected by the respective Deputy Commissioners chiefly in September and March. The inspection made in March 1895 by Colonel Gordon of the Lohardaga office was partial, as my inspection of it was being made simultaneously with his.

Inspection of subdivisional offices and treasuries—
(a) By Commissioner.

32. Both the Giridih and Gobindpur subdivisional offices and sub-treasuries were inspected by Colonel Gordon in September and October 1894.

(b) By Deputy Commissioners.

33. Colonel Garbett inspected the subdivisional office and sub-treasury at Giridih twice during the year, viz., once in September 1894 and again in February 1895. The office of the Munsif-Deputy Magistrate of Chattra was inspected by him once in December 1894.

34. The Gobindpur subdivisional office and sub-treasury as well as the office of the Munsif-Magistrates of Raghunathpur and Barrabazar were inspected twice by Mr. Windsor. The inspections of the subdivisional office and treasury were made by him in July and December 1894; those of the Munsif-Magistrate's office at Raghunathpur in June 1894 and February 1895; while those of the office of the Munsif-Magistrate of Barrabazar in November 1894 and January 1895. The office of the Munsif-Magistrate of Lohardaga was twice inspected by the Deputy Commissioner of Lohardaga, viz., once in September 1894 by Mr. Manson, and again by Colonel Gordon in February 1895. The results of these inspections were on the whole fairly satisfactory.

III.—WEATHER AND CROPS.

35. The past year was on the whole much warmer than its predecessor. It commenced with very hot dry weather, which was followed by seasonable and copious rain. In Hazaribagh the average monthly mean temperature was 78·4° against 77·7° in the preceding year, and the maximum in the shade registered on the 28th and 29th May 1894, the hottest days in the year, was 108·6° against 102° on the 15th April 1893. Ranchi was generally a degree cooler than Hazaribagh, and in Palamau the maximum was just over 114°, and in Chaibassa nearly 4 degrees higher. In Manbhum in 1893 the temperature only once rose to 100° in the month of April, whereas in the same month in 1894 it was 100° or more on no fewer than 17 days. In May again the heat became more intense, and on the 28th rose to 113°. The cold weather was unusually warm. The rainfall was above the average, and, except in Lohardaga, on the whole more evenly distributed. The average quantities registered are given below:—

YEAR.	Hazaribagh	Lohardaga.	Palamau.	Manbhum.	Singhbhum.	Division.
1	2	3	4	5	6	7
1892-93 ...	47·75	59·38	48·49	49·69	48·65	52·19
1893-94 ...	66·41	60·49	59·34	63·21	63·81	62·68
1894-95 ...	64·42	64·54	61·24	61·58	55·44	61·44

In Hazaribagh rain fell in every month of the year, and after the setting in of the monsoon on the 19th June the weather was continually cloudy up to the 21st of October, on which day over two inches of rain fell. The heaviest rainfall in any one month was 17·68 inches in July against 22·81 inches in the corresponding month of the preceding year; the heaviest rainfall on any one day was 3·82 inches against 4·69 inches in the previous year. In Lohardaga the rainfall in April and May was deficient, but it was abnormally heavy in July and August, when the quantities registered at Ranchi were 17·25 and 22·29 inches, respectively. In Palamau the rains commenced early and continued very evenly and lasted much later than usual; the monsoon broke early in June, and there was constant soaking rain until July. August also was a very wet month. The rains almost invariably came from the south-west, and hardly ever from the east, thus indicating that the district was much more

affected by the Bombay monsoon than that coming from the Bay of Bengal. In Manbhum the rainfall in April and May was less than half an inch. The regular rains set in from the 6th of June, but the fall that month was much below the average. In July and August it was abnormally heavy, and the quantities registered were 24·39 and 22·57 inches respectively against 13·01 and 10·20 inches in the corresponding months of the previous year. It was heaviest on the night of the 2nd August, when the quantity registered was 5·75 inches. The largest quantity, 79·01 inches, was registered at Gobindpur. In Singhbhum the rainfall was generally less than in the preceding year, but it was so fairly distributed during the months when the crops were on the ground that throughout the greater part of the district the outturn of all kinds of crops was excellent. The excessive rain in July and August did some damage to the early bhadoi crops, Indian-corn, marua, urid, and barai, but this loss was more than compensated for by the excellent outturn of the gora and winter rice. The continued rainfall in October and November retarded the sowings of the rabi crops, which also suffered from the want of sufficient moisture in December and January. The outturn of oilseeds and wheat in the Division was about 13 annas as in the preceding year, while that of mohua 14 annas as in 1893-94. The outturn of sugarcane was on an average 12 annas, the best results being obtained in Hazaribagh, where the yield was about 16 annas. In the Hazaribagh district the weather at the setting in of the rains was exceedingly favourable to the bhadoi, and a bumper crop was expected throughout the district, but the heavy and almost incessant rainfall, constant cloudy weather and want of sunshine in July and August prevented hoeing and weeding, stunted growth, caused the young plants to rot, and reduced the average yield to about 11 annas. The winter rice was, however, a particularly good one, and its average yield was 16 annas against 15 annas in the previous year. January and February showers improved the prospects of the rabi, and the average outturn was 14·7 annas against 11·5 annas in 1893-94. The yield of the oilseeds and wheat was 14 annas each against 13 and 11 annas respectively in the preceding year. Poppy suffered from excessive rain, and its outturn was only about 12 annas against 13·6 annas in the preceding year. Mohua, sugarcane, and tobacco yielded a 16-anna crop. In Lohardaga the bhadoi at first gave promise of a 14-anna crop, but was subsequently damaged by the August and September rains, by which the actual outturn was reduced to 12 annas. The abundant rainfall in August and September and the prolongation of the monsoon to a late period materially benefited the winter rice, the outturn of which was 16 annas against 14 annas in the previous year. The outturn of the rabi crops was between 10 and 11 annas, while that of the oilseeds was 11 annas against 11 and 10 annas respectively in the previous year. The outturn of wheat was 10 annas against 7 annas in 1893-94, and that of cotton 10 annas against 12 annas in 1893-94. Sugarcane yielded only 6 annas against 8 annas in 1893-94. In Palamau, as a natural consequence of the abnormal rainfall, the bhadoi harvest was a bad one so for as marua, makai, and other crops, which get speedily water-logged, were concerned, but the gora rice was splendid and yielded an outturn of 20 annas. The winter rice was also the finest yet seen in the district, and yielded an average outturn of 19 annas. The sowing of the rabi, and especially of the wheat crop, which is generally grown in the beds of *ahras*, was very much retarded, as owing to the prolongation of the monsoon rains they took a much longer time to dry, and at one time it was feared that there would be no good rabi crop in the district. The rainfall in January and February, however, very much improved prospects, and the rabi crop, especially wheat and gram, was one of the finest ever grown in the district. Unfortunately the linseed crop was seriously injured by *hurda* or rust, and this attacked the wheat also, so that the outturn of the latter was eventually only about 15 annas. In Manbhum the maize was somewhat damaged by the excessive rainfall of July and August, and the winter crops also suffered a little. Mohua yielded an outturn of 14 annas and sugarcane 12 annas, but the short outturn of all these crops was amply compensated for by the rice crop. The winter

rice in this district, taken as a whole, was very good everywhere, and excellent in certain parts, so that the outturn can be safely put down at 16 annas for the whole district. Mr. Windsor was of opinion that in some parts the cultivators reaped as much as an 18-anna crop; the outturn of the rabi crops was not less than 12 annas all round. Of special crops the outturn of lac was very good. In Singhbhum the bhadoi crops, chiefly gora rice, marwa, Indian-corn, gondli, and urid, yielded an outturn of 14 annas against 13 annas in the previous year; the winter rice yielded 14·5 annas against 14 annas, and the outturn of the rabi and special crops was 15 annas against 9 annas in the previous year. The early and late cotton yielded 14 and 15 annas, respectively, and the wheat crop 14 annas against 9 annas in the previous year. Mr. Bompas writes:—"In fact, allowing for the invariable under-estimation of outturn when reported in annas, I think it may be safely said that there was a full average outturn of bhadoi and rabi crops and a bumper harvest of winter rice."

IV.—PUBLIC HEALTH.

36. The year 1894 was decidedly unhealthy. Not only did cholera rage in an epidemic from in almost all the districts, but there was a very large increase in the number of deaths from fever and bowel-complaints. The following table shows the death statistics:—

DISTRICT.	Total number of deaths reported in—			Ratio per mille in—		
	1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7
Hazaribagh ...	40,300	28,286	46,053	34·61	24·29	39·55
Lohardaga ...	42,309	24,757	36,189	37·47	21·93	32·05
Palamau ...	23,292	16,923	26,369	39·03	28·35	44·18
Manbhum ...	30,078	21,534	33.843	25·20	18·04	28·36
Singhbhum ...	10,554	9,155	14,290	19·34	16·78	26·20
Total ...	146,533	100,655	156,744	31·65	21·74	33·86

The year 1892 was considered to be particularly unhealthy, but the death-rate then was much lower than in the past year. Some portion of the increase in the death-rate may no doubt be attributed to the gradual improvement in the reporting of mortuary statistics, but the very marked difference in the death-rate of the past year as compared with that of 1893 must be largely due to the unhealthiness of the past year. In Hazaribagh cholera accounted for 2,780 deaths against 38 in 1893 and 2,341 in 1892. There were two small outbreaks in March in different parts of the district, but in June the disease broke out in a virulent form in thanas Burhi, Gawan, and Giridih. Later on it affected the Sadar thana, notably the Ichak outpost, where it prevailed for five months, from July to November. The thanas in the south-west were next visited. In Lohardaga the disease was confined to thanas Chainpur and Tamar, where the total number of reported deaths was 102 against 11 in the preceding year. The disease, however, prevailed in its worst form in the Palamau district from May to September, inclusive, and caused no fewer than 6,665 deaths. On the first outbreak a special medical practitioner was sent out to Gurwah, and shortly afterwards the Hospital Assistant and compounder were deputed to Ranka and Bhownathpur. I sent an urgent telegram to Government for medical aid, and some Special Hospital Assistants were deputed to the district. These arrived on different dates and were deputed to different places as news came in of bad

outbreaks. The area affected was, however, far too scattered to be efficiently dealt with, and the superstition of the people, their habit of flying into the jungles on an outbreak occurring, and their dislike and distrust of European medicines, made it an entirely hopeless task to effectively cope with the disease. At the same time all efforts to deal effectively with the outbreak in particular villages were impeded by the fact that the chaukidars, naturally enough, fled with the other villagers, and returning only when it was considered safe, reported the occurrence of the outbreak only after it was over. In July the disease spread to the town of Daltonganj, and in spite of all efforts made to stamp it out, prevailed till August. The deputation of Hospital Assistants to check the disease prevailing over such a large area was not particularly efficacious. Being few in number they could do very little real good, though their presence no doubt conveyed an assurance to the people that they were being cared for by a paternal Government; for, while the total number of deaths from the disease amounted to 6,665, the number who obtained medical aid was only 476, and of these only 193 recovered. In Manbhum there was an outbreak of the disease which lasted for the greater portion of the year, and was specially severe in the Purulia, Manbazar, Barrabazar, Chass, and Gobindpur thanas. It raged in an epidemic form and carried away 2,728 persons against 400 in the previous year, though all possible measures were adopted to cope with the disease and arrest its progress. In Singhbhum the disease broke out in April and prevailed almost throughout the district till August and attacked the district jail and caused 873 deaths against 71 in the previous year. As regards the epidemic in Hazaribagh the Civil Surgeon of the district, Surgeon-Captain Nott, writes as follows:—

"A general consideration of the history of the various outbreaks led me to the conclusion that the disease arose in many different centres, and that it was not one epidemic taking origin from one extraneous source and passing over the district. Its spread from each centre may with confidence be put down to the general insanitary state of the villages in this district and the consequent pollution of the extremely defective water-supply."

In Hazaribagh the mortality from fever rose from 22,806 in 1893 and 31,013 in 1892 to 35,663 in the year under report, and the total number of deaths from bowel-complaints was 767 against 337 and 662 in the two preceding years. In Lohardaga fever accounted for an increase of 6,344 deaths in 1894, the number reported being 20,126 against 13,782 in 1893. The disease was most prevalent in the latter part of the rainy season, and is attributed to the abnormal rainfall of the year. The deaths from bowel-complaints rose from 1,698 in 1893 to 3,144 in 1894. The mortality was greatest in the months of July to November, inclusive. In Palamau the number of deaths from fever was 16,312. In Manbhum fever accounted for 25,764 deaths and bowel-complaints 572 deaths against 15,936 and 335 respectively in the previous year. In Singhbhum 10,899 deaths were due to fever against 7,376 in the previous year. The Division enjoyed almost perfect immunity from epidemic small-pox, and the number of deaths from this cause was very small in all the districts, viz. 137 in Hazaribagh, 14 in Lohardaga, 51 in Palamau, 157 in Manbhum, and 10 in Singhbhum. In the Gobindpur subdivision influenza, which broke out towards the end of 1893-94, and lasted up to middle of May 1894, was responsible for much sickness and some deaths, and Mr. Warde-Jones reports that fever was distinctly bad in the subdivision, probably owing to the prolongation of the rains to the cold weather. The sanitary condition of the Division was much the same as in the previous year.

V.—MATERIAL CONDITION OF THE PEOPLE.

37. The people of this Division are mostly agricultural, and hence their material well-being largely depends on seasonable rainfall and favourable out-turn of the crops. A succession of good harvest, accompanied by good prices, has materially improved the condition of the agricultural classes in all parts of the Division. The condition of non-agriculturists has not equally improved, except in such part of the Division as are within easy reach of the tea gardens, the railways, and the coal, mica and other mines, where they can command high wages.

38. In Hazaribagh the bulk of the poorer classes are said to largely depend on the bhadoi and the mohua crops. The mohua crop of 1894-95 was a full one, and mohua was abundant and cheap all over the district throughout the year. The bhadoi crops unfortunately partially failed, and their average outturn was only about 12 annas. The rice crop, however, was a bumper one, and there has been a succession of more or less good rice crops during the past few years. There was thus a corresponding improvement in the material condition of the people so far as it depended on the crops. In the neighbourhood of the trade centres, such as Chatra, Hazaribagh, and Giridih, and of the great coal and mica mining industries at Karharbari, Serampur, Koldiha, Koderma, Gowan, and Goongi, the people were fairly well to do and received high wages. But apart from the special circumstances noted above, and apart from agricultural influences, the condition of the people of the district as a whole was poor. Colonel Garbett remarks:—"I believe that very little general accumulation is going on. What wealth there is is confined to a comparative few; and as regards the bulk of the people the margin between bare sufficiency and actual want is very narrow. Emigration has been a great god-send to the district, and it has doubtless in years of poor harvest staved off a great deal of stress and suffering. One good result it has had is that it is gradually breaking down the abominable kamia system."

39. In Lohardaga the expansion of the excise revenue is considered by the Deputy Commissioner as a sure test of the improved condition of the people. The condition of the landless labourers has not, however, been considered satisfactory, notwithstanding that there has been an appreciable rise in the prices of labour, for the rise is said to be by no means commensurate with the rise in the prices of food-grains. The landlords as a class are also reported to be not well off, for they are improvident to a degree, and almost without exception indebted to the grasping mahajans. Their strained relations with their tenants have also resulted in injuriously affecting their own circumstances as well as the condition of their tenants.

40. In Palamau the partial failure of the bhadoi crops somewhat pinched the ordinary labouring classes, but in the case of the ordinary agriculturists this failure was more than compensated for by the excellent winter rice crop and the excellent rabi crops. Mr. Bright has left the following remarks under this head:—"The year has been one of pretty fair comfort, allowing in many cases something to save. The extraordinary rise in the value of lac and the great increase in the production has undoubtedly brought a large quantity of extra money into the district, and has poured rupees into the hands of Bhuinyas and other semi-aboriginal tribes whose special business lac growing used to be. So profitable has this business now been that other castes have now taken to it, and the zamindars are now obtaining very acceptable increases to their revenue. Nothing is more noticeable than the extraordinary expansion of this branch of trade during the last three years, and so much money is required that the treasury is over and over again obliged to refuse to change notes of high value into cash required for the lac trade."

41. In Manbhum, too, the excellent rice crops, coupled with a satisfactory lac season, served to materially improve the condition of all classes of people, and the non-agriculturist labourers found ample employment in the railways and the coal mines of the district.

42. In Singhbhum the increase in the trade in wood and sabai grass brought many thousands of rupees into the district, and there was ample work for those who wished for it, and the owner of a pair of bullocks and a *sagar* (country cart) could make what was for him a handsome income during the cold weather. The part of the Kolhan bordering on the Keonjhar State is, however, reported to have suffered in sympathy with the famine prevailing in that State; for some time after the expedition the country had to feed a number of extra mouths; dacoities were frequent and property was insecure. This, however, was a passing trouble. The Singhbhum Kols are, however, too improvident to ever become a really wealthy peasantry, but with good crops, good wages, a secure tenure and a light assessment their lot is not an unenviable one, and compares favourably with that of the Bengal raiyat, who, though more thrifty, generally spends the savings of years on a marriage or a law-suit.

VI.—EMIGRATION AND IMMIGRATION.

43. The number of emigrants recruited and registered under Act I of 1882 during the past three years in the districts of Hazaribagh, Lohardaga, Manbhum, and Singhbhum is given below:—

District.	1892-93.	1893-94.	1894-95.
1	2	3	4
Hazaribagh	1,429	1,962	1,838
Lohardaga	3,065	3,072	2,864
Manbhum	6,708	7,046	7,075
Singhbhum	...	...	212
Total ...	11,202	12,080	11,984

As might be expected, the generally excellent harvests during the past year served to reduce the number of emigrants from Lohardaga and Hazaribagh. The figures against Lohardaga, Manbhum, and Singhbhum, however, do not indicate the amount of actual emigration from these districts, for they include a large number of coolies recruited in the adjoining Tributary States.

44. Besides the coolies recruited and registered under Act I of 1882, there is a large number of emigrants recruited every year under the free-labour system. The exact number of such emigrants cannot be ascertained, but from returns obtained from contractors it appears that in 1894 altogether 13,064 free coolies and dependants left the four districts of Hazaribagh, Lohardaga, Manbhum, and Singhbhum, against 8,932 and 8,259, respectively, in the two preceding years. The figures for the different districts are given below:—

District.	1892-93.	1893-94.	1894-95.
1	2	3	4
Hazaribagh	928	1,164	1,185
Lohardaga	1,551	971	965
Manbhum	5,588	6,263	9,889
Singhbhum	197	534	1,025
Total ...	8,259	8,932	13,064

45. As regards Palamau Mr. Bright remarks that he found that a good number of people had lately left for the tea-gardens in Assam, but he could see no reason for considering that the number was very unusual. No coolies were registered in that district, and the only rest-house which was at one time opened at Daltonganj remained closed for most part of the year.

46. In Hazaribagh six emigrants were prosecuted and convicted under section 162 of Act I of 1882 for desertion after registration, and one case was instituted in which a female under 14 years of age was kidnapped by two

women aided by a man. On conviction the former were sentenced each to eighteen months' rigorous imprisonment and the latter to one year's rigorous imprisonment.

47. In Lohardaga the Deputy Commissioner mentions two typical cases illustrating the abuses inherent in free emigration. In one a girl while being escorted to her uncle's house at Ranchi was joined by four young men who were proceeding to Ranchi with a view to emigrating to Bhutan. On the way the chaukidar of a village named Nagri and an ex-chaukidar of the same village charged the uncle with having illegally enticed away the whole party with a view to sell them as coolies, and eventually took possession by force of the girl and the four young men whom they subsequently sold for Rs. 50 to a garden sirdar. The chaukidar and ex-chaukidar were subsequently prosecuted and sentenced to one month's rigorous imprisonment and a fine of Rs. 25 each, or in default of payment to a further rigorous imprisonment for two months. In the next case a girl was taken to Calcutta on the pretence of giving her work by a man by whom she was seduced and there sold as an emigrant. She was traced to Assam and brought back from there, and the accused sentenced to one year's rigorous imprisonment and a fine of Rs. 25, or in default of payment to a further rigorous imprisonment for three months. The number of cases coming to the Court is, however, no index to the actual number of cases in which emigrant coolies are fraudulently recruited. Colonel Gordon writes:—"The poor Kols, from among whom the majority of the coolies are recruited, find the cost of coming to Court almost prohibitive, with little or no chance of any trace being found of their missing relations, and even in cases where any trace is obtained, there is usually a tendency with the complainant to underestimate the age of the abducted people with a view to bring the case under the purview of the penal law, and on this account most of the cases fail."

48. In Manbhum there were 69 searches made at Purulia for missing wives, children, and relatives, only eight of which were successful. In case of enticement and fraud the names and residences are generally changed, and no clue is therefore found.

49. In Singhbhum in the beginning of the year there were some bad cases of kidnapping, but the present Officiating Deputy Commissioner thinks that matters have since become quieter. Mr. Bompas writes:—"Kols and Sonthals have a way of hammering *arkatis*, which forms a useful check. Along the line of rail, however, cases will always crop up, and they are more likely to be heard of at Purulia than at Chaibassa. The only new trick of which I have heard is the engagement of coolies for a short term of work at Jalpaiguri, under pretence of which they are taken to Dhubri and put on contract for Assam. This may have important results, as I learn that some of the Jalpaiguri planters intend to take action in the matter, and being more or less behind the scenes, they could no doubt make out a strong case."

50. Emigration if rightly carried on is no doubt capable of doing immense good to those parts of the country where there are more men than lands. It is also a great help to the people when they suffer from scarcity or famine. Mr. Myers, a well-known recruiter, brought away from Keonjhar several hundreds of famine-stricken wretches at the beginning of the year, and no doubt in their case emigration proved a most useful resource to many who would otherwise have been reduced to very great extremity. In Hazaribagh one of the greatest good effects produced by emigration is the breaking down of the *kamia* system, by which people of the poorer classes bound themselves to life-long slavery by taking the loan of a few rupees. On the other hand, the drain of the population by the constant flow of emigration is no doubt causing inconvenience in some parts of the district where labour is now almost unobtainable for agricultural operations, road making and other purposes. The duty of inspection of depôts and rest-houses was on the whole performed fairly, and the wants of the coolies properly looked after as regards the supply of blankets, latrine arrangements and care of the sick. The necessity of frequent and unexpected visits to depôts has been strongly impressed on the District Officers as a means of detecting abuses and irregularities connected with emigration. Naturally the most effectual check on malpractices in the case of emigrants under Act I of 1882 is the system of registration in the district of recruitment, under which each person is given an opportunity of declaring his wish to emigrate before some constituted authority, or of making known his

objections or grievances. As this system has been rejected by Government in the case of non-Act emigrants as being prejudicial to the principle of free emigration, other means have been devised for securing the same end, namely, the inspection of emigrants either at the depôt in which they are lodged, or at certain points on the railway route from the depôt to their destination, and this frequent scrutiny is intended to do for free emigrants what registration does for those recruited under the Act, but it must be admitted that great care and circumspection are required in carrying out these arrangements, lest they should hamper the operations of the labour market with unnecessary restrictions and expense, for it should be accepted as an axiom that restrictions which tend to hinder the free flow of emigration and enhance its cost should be introduced with great caution, and only adopted as an extreme measure in order to avoid the charge of subjecting the movements of a "free" emigrant to greater control than a person recruited under the licensed system.

There was no appreciable immigration in any of the districts.

VII.—PRICES OF FOOD AND LABOUR.

51. The generally good harvests of the past year have not been attended with a corresponding fall in prices. In Hazaribagh, Manbhum, and Singhbhum, with the exception of common rice, the average price of all the principal staples in the last fortnight of March 1895 was somewhat higher than in the corresponding period of the preceding year. In Lohardaga the average price of wheat and salt was much the same as in the previous year; that of grain was higher, while that of common rice was somewhat lower. In Palamau the average price of all the staples ruled higher in the last fortnight of the past year than in the corresponding period of 1893-94. The following table compares the average prices of wheat, common rice, gram, and salt in the several districts during the last fortnight of March of the past three years:—

District.	1892-93.				1893-94.				1894-95.			
	Wheat.	Common rice.	Gram.	Salt.	Wheat.	Common rice.	Gram.	Salt.	Wheat.	Common rice.	Gram.	Salt.
1	2	3	4	5	6	7	8	9	10	11	12	13
	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.
Hazaribagh	9 13⅓	13 0	13 10¾	10 0	13 0	15 0	17 5	9 8	12 5¼	16 10¾	16 5¼	9 9½
Lohardaga	11 0	13 0	9 0	9 4	11 0	17 0	14 0 to 15 0	9 0	11 0	18 8	12 0 to 13 0	9 0
Palamau ...	15 12	16 15	19 2	8 0	16 14	15 12	21 15	8 6½	15 3	15 3	18 9	8 7
Manbhum	12 0	12 8	14 0	10 8	13 0	15 5½	15 0	10 5½	12 5⅓	21 5½	14 13½	10 0
Singhbhum	12 0	14 0	12 0	9 0	12 0	13 0	14 0	9 0	12 0	14 0	12 0	8 0
Divisional average ..	12 1[illegible]	13 14¼	13 8[illegible]	9 5[illegible]	13 2[illegible]	15 3[illegible]	16 10[illegible]	9 3[illegible]	12 9[illegible]	17 2¼	14 15[illegible]	9 0[illegible]

In Hazaribagh wheat was sold in the latter half of March 1895 in the Hazaribagh and Chatra markets at 11 and 12 seers per rupee against 12 and 13 seers respectively in the corresponding period of 1894. In the Giridih mart the prices of wheat and gram remained stationary; common rice sold at 17 and 18 seers in the Giridih and Hazaribagh marts against 15 seers at both marts in the previous year. There was no rise in the price of salt in Hazaribagh and Giridih; in Chatra it fell from 9½ seers to 9¾ seers per rupee.

In Lohardaga wheat sold at 11 seers and gram at 12 to 13 seers per rupee against 11 and 14 to 15 seers, respectively, in the previous year. Very little wheat and gram is grown in the district, the demand being mostly met by importation from other districts; the prices therefore vary according to the quantities imported each year. Common rice sold at 8½ seers against 17 seers in the previous year. In Palamau the price of wheat shows a rise of nearly 10 per cent., and this in the face of the fine crop of the year can be accounted for only by the fact of there having been increased exportation from the district. In Manbhum the fall in prices is no doubt due to the abundance of the rice

harvest and also to the fact that there was not much grain exported from the district. In Singhbhum at the beginning of the year prices of all sorts of food-grains ruled much higher than those of the previous year in consequence of the demand for export to Keonjhar, where famine prevailed. There was no change in wages of labour, skilled or unskilled, in Singhbhum, while in Hazaribagh and Lohardaga wages remained almost the same as in the previous year, except that in Giridih common masons could not be had for less than six annas per diem against five annas in 1893-94, while at Chatra the wages of a gharami came down to two annas per diem from three annas in the preceding year. In Palamau there was a noticeable rise in the wages of all kinds of labour, especially in the town of Daltonganj, where good masons and blacksmiths could not be had for less than ten annas and twelve annas per diem, respectively, against six and eight annas in the proceding year. The fact is, labour of all kinds is at a premium at Daltonganj, where the number of amla, pleaders, mukhtears, and others is always increasing with the demand for labour of all kinds, while the bazar proper with its shop-keepers, mechanics, &c., has remained almost stationary. In Manbhum the wages of common mason increased from five to six annas per diem, and those of coolies and gharamis by three pies each. This increase is due to the increased demand in the town of Purulia. Superior masons, carpenters, and blacksmiths are seldom employed on daily labour, especially as there are very few of them to be locally had. In the Gobindpur subdivision wages of all kinds of labour have slightly increased and would have further increased on account of the Jharia extension of the East Indian Railway and the new collieries opened in the subdivision, were it not for the importation of labour from Bihar and the North-Western Provinces.

52. The following table shows the average wages of labour as they prevailed in the several districts during the last fortnight of March in the last three years:—

Class of labourers.	Hazaribagh.			Lohardaga.			Palamau.			Manbhum.			Singhbhum.		
	Daily wages in—			Daily wages in—			Daily wages in—			Daily wages in—			Daily wages in—

VIII.—MANUFACTURES AND MINES.

53. The manufactures are few and unimportant. Lac is grown in all parts, but factories for the manufacture of shell-lac exist only in Lohardaga and Manbhum. In Lohardaga the lac industry is said to be steadily increasing, and the quantity of shell-lac manufactured during the past year was 6,000 maunds against 4,000 maunds in the preceding year. The quantity reported as manufactured in 1893-94 in that year's report was wrongly shown by the Deputy Commissioner

(a) Manufactures.

to be 33,018 maunds. The value of the manufactured article in the past year amounted to Rs. 1,32,000 against Rs. 88,000 in 1893-94. In Manbhum altogether 47 factories were at work during the past two years for the manufacture of shell-lac. They are situated at Illu, Jhalda, Raghunathpur, Chass, and Gobindpur, where button and shell-lac were manufactured. Owing to the heavy rains of the past year the cultivation and outturn of the raw produce were not nearly as good as in the preceding year, but this was more than compensated for by the high rise in the value of the manufactured article. The quantity of shell-lac manufactured fell far short of the quantity in the previous year, the figures being 6,926 maunds against 9,500 maunds, yet the value of the quantity manufactured in 1894-95 was Rs. 73,230 higher than that of the previous year. Indigo was manufactured only in Manbhum, but out of nine factories existing in the district the work of the four factories in Patkum was suspended during the year, owing probably to the bad financial condition of the Patkum Indigo and Trading Company. The five indigo factories of Burrabhum worked as usual, and owing to the timely and copious rainfall there was an increase both in the quantity and value of the indigo manufactured. The outturn during the year was 103 maunds and the value Rs. 20,570 against 66 maunds and Rs. 17,522, respectively, in the previous year. Tea plantations exist in Hazaribagh and Lohardaga In the former four out of six gardens were worked during the year, with the result that 76,795 pounds of tea were manufactured against 92,658 pounds in 1893-94. The average yield per acre of mature plants was 128 pounds against 138 pounds in the previous year. In Lohardaga the total area under tea in 17 gardens which have furnished returns was 1,913·5 acres against 2,320 in 23 gardens in the preceding year, and the total quantity of tea manufactured was 222,047 pounds against 357,678 in 1893-94. The average yield per acre of mature plants was 116 pounds against 154 pounds in the preceding year. The year was not favourable for the growth of tea owing to the excessive heat and absence of rain in the early part of it. Owing to the dryness of the climate, and the soil being not sufficiently deep or rich, the prospects of the tea industry in Chota Nagpur are gloomy. Another disadvantage which is coming upon the Chota Nagpur gardens with slow but certain strides is the increased value and dearth of labour owing to the efflux of coolies to the labour districts. Chota Nagpur tea can never compete with the Assam, Duars, and Darjeeling tea. Tusser cloth is manufactured at Raghunathpur in Manbhum, and the value of the manufactured article in the past year is estimated at Rs. 24,320 against Rs. 23,600 and Rs. 22,500 in the two preceding years. Tusser cocoons, catechu, and sabai grass are abundant in the jungles, and large quantities of them are annually exported to other districts. Large quantities of the cocoons grown in the Division find their way to the silk factories of Murshidabad. Hides are also collected from all parts of the Division and exported to other parts of the country, especially Calcutta. The blacksmith at Katras who, it was reported last year, turned out good guns, took out a license during the year, and carried on his work almost in the same way as before. The Jhalda blacksmiths manufactured swords and sword-sticks as usual and exported them to several places in and outside the district. In Singhbhum in pargana Dhalbhum there are a number of soap-stone quarries, the property of the Dhalbhum encumbered estate, leased to individuals. Soap-stone bowls and plates are manufactured in them, and some of the quarries are said to have been worked underground as far deep as 298 feet. Work is carried on in them in the crude native fashion.

(b) Mines—
(1) Coal mines.

54. The principal mines in the Division are situated in the Giridih and Gobindpur subdivisions. In the latter the opening of the Jharia extension of the East Indian Railway has given a powerful impetus to the coal mining industry, and people from all parts of the country have now flocked to the subdivision for the purpose of securing mining concessions from the zamindars. Several new collieries are reported to have already sprung up, and they are said to have worked tolerably well during the past year. The Katras coal-fields were worked on a small scale, and in Jharia although some coal-bearing villages were settled during the year, there is stil a very great rush. Some of the companies and individuals who hav

obtained concessions have already commenced work, though on a small scale. In Hazaribagh the coal-pits in the Sadar subdivision, especially those at Ramgarh on the Damuda valley and along the banks of the Bokaro river, are worked superficially, and the coal dug out of them is issued locally for brick-burning and other purposes. Some of this coal also finds its way to parts of the Lohardaga district. The following table gives the output in tons and the average number of work-people employed in the coal mines of Giridih and Gobindpur during the past three years:—

	Output in—			Average number of work-people employed in—		
	1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7
Giridih ...	563,976	562,037	571,363	7,563	7,613	8,263
Gobindpur ...	73,576	65,226	128,686	2,112	2,207	4,822

(2) Mica mines.

55. The mica mines worked in the Division are all situated in the Giridih subdivision of the Hazaribagh district in the northern portion of pargana Kharakdiha. The greater number are in the Koderma Government estate both inside and outside the reserved forests, and the rest are scattered over portions of Gadis-Gawan, Domchanch, Khosmi, Musnudi, Byria, Dorunda, and Satgawan. The mica mines in the Government estate have all been leased out in accordance with the instructions contained in the Government resolution of the 5th December 1888. The greater number of the mines situated in the private Gadis are worked by Messrs. Christian and Company. During the past year 19 new mines belonging to the Government were leased out at an annual rental of Rs. 1,560-5-6. The current demand of rent due to the Government amounted to Rs. 10,731-0-9, the whole of which, with the exception of Rs. 50, together with the outstanding balance of Rs. 137-8 of the previous year and an advance collection of Rs. 38-9-11 for the current year, or an aggregate sum of Rs. 10,857-2-8, was realised during the year. The total output of all mica mines worked in the district was 4,849 maunds against 3,086 maunds and 25 seers in the previous year. The average number of work-people employed in mica mines was 3,718 against 1,962 and 1,209 in the two preceding years.

(3) Copper mines.

56. The work in the Baragonda copper mines has been practically stopped since the past three years, and the Sub-divisional Officer of Giridih reports that there is no immediate prospect of the operations being renewed. In the Rajdoha mine in Singhbhum, where mining was commenced in some old workings, operations are at present at a standstill for want of funds.

(4) Gold mines.

57. Two syndicates are now carrying on prospecting operations at Rugudih and Thurumba in Sonapet in Lohardaga. Each has received a square mile of land for the purpose of mining from the Sonapet Proprietory Gold Mining Company. No gold or indication of gold has yet been found. In Manbhum the Western Patkum Gold Prospecting Syndicate still continues its operations, but the capital is coming to an end. In Singhbhum the Bengal Gold and Silver Mining Company were at work at Somij and continued to sink trial shafts. Though gold is said to exist here, paying ore has not yet been found. The Company, however, issues a hopeful annual report.

(5) Tin mines.

58. The work in the tin mine at Narango has been stopped.

IX.—TRADE AND COMMERCE.

59. There has been a remarkable change in the trade routes of the Division since the opening of the Bengal-Nagpur Railway, while further changes are expected on the completion of the Jharia extension of the East

Indian Railway and its branches. The former intersects the Manbhum and Singhbhum districts from the north-east to the south-west, and the people on both sides of it have now become fully alive to its importance and advantages, and have given up the slow methods of conveying their goods by means of pack-bullocks and bullock carts. The Jharia extension has already given a stimulus to the trade of the Gobindpur subdivision, and is expected in the near future to attract a large portion of the trade of the north-eastern part of the Hazaribagh district. The Ranchi-Purulia road, which passes through the important mart of Jhalda, has increased in importance as a feeder road of the Bengal-Nagpur Railway, owing to the trade of Lohardaga and the south-eastern portion of Hazaribagh being now diverted to it. The portion of the Grand Trunk road which lies within the Gobindpur subdivision and has hitherto served as a feeder road to the railway station at Burrakur is likely to be less frequented as a trade route when the Jharia extension of the East Indian Railway with its branch lines is completed. The Purulia-Burrakur road and the Chaibassa-Purulia road *viâ* Chandil and Balrampore, which, previous to the opening of the Bengal-Nagpur Railway, were important trade communications, have now almost ceased to be used, and little local traffic is now carried on through them. The Manbazar-Purulia, the Chass-Purulia, and the Burrabazar-Balrampore roads are also rising in importance as feeder roads to the Bengal-Nagpur Railway. The portion of the Chass-Raghunathpur road between Chass and Dubra and the first section of the Gobindpur-Jhapra road are also much used as feeder roads to the Anara station. The Kashipur-Adra road has also for the same reason become important. In Palamau and South Lohardaga the trade is much hampered by the difficulty of communications, especially during the rains. In the former the completion of the Sirguja-Gurwah and the Daltonganj-Hosseinabad roads will, it is expected, remove much of the inconvenience now felt by the people. Gurwah is the chief trade mart in Palamau, where the surplus produce of the whole district as well as of the Sirguja Tributary State is brought for sale. It has also a large export trade of ghi to Benares and Gaya. Lac, resin, cocoons, hides, catechu, oilseeds, and cotton are also exported from Gurwah to Calcutta, Benares, Mirzapur, and Gaya, while rice and other food-grains, tobacco, blankets, piece-goods, and salt are brought to Palamau for local consumption. In Hazaribagh the principal trade centres are Hazaribagh, Chatra, and Giridih, while in Lohardaga the chief trade marts are Lohardaga and Ranchi. The road connecting the two last-named places has now been bridged nearly the whole way, but as it is only gravelled and not metalled the heavy cart traffic which is carried on over it renders it very heavy during the rains. In the absence of any regular agency for the collection of trade statistics it is impossible to state even approximately the quantities of the different articles of trade imported into, or exported from, the Division. The Bengal-Nagpur and the East Indian Railway authorities have furnished the Deputy Commissioners of Singhbhum, Manbhum, and Hazaribagh with statistics of the rail-borne trade of those districts. These, however, show that the exports through the railways were by no means large; on the other hand they indicate that the quantities of articles imported were comparatively much larger than the exports. It was at one time thought that Chota Nagpur being mostly a rice-growing country, rice must always form one of the chief articles of export, but the statistics furnished by the Railway authorities do not support this, for two out of the three districts for which statistics have been furnished, viz. Hazaribagh and Singhbhum, have imported large quantities of it, while the quantities exported were comparatively very small. In Hazaribagh the quantity of rice imported through the two railway stations of Giridih and Moheshmunda was 1,04,242 maunds against 3,063 maunds exported, while in Singhbhum the quantity imported was 76,976 maunds against 5,562 maunds exported. In Manbhum alone did the exportation of rice through the railway exceed its importation, the figures given being respectively 1,27,218 and 54,810 maunds. Salt, wheat, gram, cotton twists, tobacco, European and country piece-goods, and sugar are always supposed to be largely imported into the Division, and this is borne out by the statistics furnished by the railways. The only articles of which the exports appear to be large are oil and mustard seeds. The Deputy Commissioner of Manbhum says that

there was a large falling off in the exports of rice from that district in consequence of the very good yield of the rice crop elsewhere during the past year. The statements furnished by the railways do not include lac, timber, hides, horns, and sabai grass, large quantities of which are always exported from the Division. The quantity of lac exported from Manbhum is said to have largely decreased during the year in consequence of deficient production on account of heavy rains, but the deficiency in production has been very nearly compensated for by the high prices realized both from the raw and the manufactured article. The quantity of stick-lac exported from the district was only 32,000 maunds against 50,500 maunds in the previous year, yet the value of the quantity exported in 1894-95 was Rs. 7,20,000 against Rs. 8,90,000 in 1893-94. Again, though the quantity of shell-lac exported during the past year was 6,926 maunds against 9,500 maunds in 1893-94, the price obtained in the past year was Rs. 6,83,375 against Rs. 6,10,195 in 1893-94. In Palamau the trade in lac was extraordinarily brisk, and in view of its increasing importance the European Managers of Messrs. Jardine, Skinner and Company's shell-lac factory at Imamganj made a tour through the district to enquire into its capabilities. In Singhbhum the opening of the railway has given a great impetus to the timber trade; but the forests along the line are getting worked out, and timber contractors are going further and further into the Political States. The trade in sabai grass is increasing, and will no doubt continue to do so as the demand is practically unlimited. The following statement gives the statistics of the rail-borne trade of the three districts of Hazaribagh, Manbhum, and Singhbhum. It shows that the imports are mostly larger than the exports:—

X.—ADMINISTRATIVE CHANGES.

60. The principal administrative changes during the year were (1) the amalgamation of the civil, criminal, and revenue process-serving establishments; (2) the opening of two new sub-registry offices at Barhi in Hazaribagh and at Hosseinabad in Palamau; (3) the introduction of the system of taking thumb impressions of executants for identification in registration offices; (4) the appointment of an Honorary Magistrate at Ranchi with third class powers empowered to sit singly; (5) the abolition of the Gurwah Bench in Palamau; (6) the re-investment of the Munsif at Daltonganj with extended powers; (7) the return of Kaithi as court character in Hazaribagh, Lohardaga, and Palamau; (8) the abolition of five outposts and one thana in Hazaribagh, Lohardaga, and Manbhum; (9) the conversion of seven outposts into thanas in Hazaribagh and Lohardaga; (10) the transfer of portions of thanas Jageshur, Tandua,

and Kharakdiha to the jurisdiction of the police-stations of Goomia, Mandu, Burkagaon, and Dhanwar in Hazaribagh; and (11) the extension of the civil jurisdiction of the Special Sub-Judge of Manbhum to Singhbhum.

61. All the Deputy Commissioners, with the exception of the Deputy Commissioner of Lohardaga, are unanimous in stating that the amalgamation scheme of process-serving establishments has so far been working smoothly and efficiently since its adoption. Colonel Gordon writes:—"The scheme has not as yet been attended with satisfactory results. The experience of the half-year (ending 31st December 1894) has shown beyond doubt that under the amalgamated system there has been a marked falling off in the punctuality of process-serving." I have already pointed out to him that he himself should personally look into the matter and insist on greater punctuality by keeping a list of the process-serving peons who are habitually unpunctual and taking serious notice of their shortcomings. With proper support and control there is no reason why the scheme should not have the same success here as elsewhere.

The opening of the new registration offices at Barhi and Hosseinabad has been a great boon to the people living in the neighbourhood of those places. The Gurwah Bench latterly consisted of Magistrates, who neither by character, social position, nor education were fitted for their appointments. It had accordingly ceased to enjoy the confidence of the public. Its abolition has been a decided gain to the administration. The curtailment of the powers of the Munsif of Daltonganj had caused great inconvenience to the people of Palamau. The vesting him with Small Cause Court powers up to Rs. 100 has served not only to save the people from the trouble of a journey to Ranchi for the prosecution of petty small cause court suits, but has increased the number of institutions of such suits. The restoration of Kaithi as court language has undoubtedly been a reform in the right direction, for the Nagri character impeded work and benefited no one. Kaithi is much more familiar to the amla and the people at large, and the return to it was a distinct advantage. The investment of the Special Sub-Judge of Manbhum with powers to try cases arising in Singhbhum has really been a source of great relief to the Deputy Commissioner of Singhbhum, and will lead to the disposal of outstanding civil suits which it was impossible for the Deputy Commissioner to deal with without neglecting his other work.

XI.—STATISTICAL AND OTHER ENQUIRIES.

62. Vital statistics are collected through the agency of the police, though the results are sometimes open to question, being contrary to general experience. An example of this is the Hazaribagh return, which shows a preponderance of males in respect both of births and deaths. On the whole, however, there has been some improvement in reporting these statistics. In the beginning of the year Dr. King, the Director of Geological Survey of India, made a traverse inspection of the belt of metalliferous rocks in the vicinity of the Bengal-Nagpur Railway between Chandil and Monaharpur, which satisfied him that there was ample evidence of the existence of reefs or veins of quartz occasionally auriferous enough to warrant development. The rocks belong to the transition series, probably to the Dharwar subdivision, which in Mysore is seamed with auriferous reefs. This inspection was followed by the deputation last cold season of Mr. Anderson, a mining geologist, to examine certain portions of Chota Nagpur and to report upon them in such a way so as to make it clear to the public whether or not prospecting might be usefully undertaken. To quote Dr. King, "the geologist will of course not necessarily be able to indicate payable auriferous reefs, but he should be able, after a fair survey of the country, to show whether there are any favourable tracts or zones in which specially metalliferous reefs occur." The report of Mr. Anderson has not yet been received, so I am unable to say whether he has been able to do all that was expected of him; but when I found him at work in the southern part of the country in January last, he seemed to me, from the limited resources and appliances placed at his disposal for carrying on the important investigations entrusted to him, to be engaged in task of making bricks without straw, and I am glad to learn that more extended means have since been made available to him.

XII.—CIVIL JUSTICE.

63. On an average 7¾ Judges, Subordinate and Small Court Judges (not including Munsifs) were employed in the Division against 7¼ in the preceding year. They disposed of 210 ordinary and 392 Small Cause Court cases against 317 ordinary and 967 Small Cause Court cases in the previous year. With the exception of the Deputy Commissioners of Hazaribagh, Palamau, and Singhbhum, by whom 23, 1, and 8 ordinary civil suits were respectively disposed of during the year, none of the Deputy Commissioners tried any regular or Small Cause Court cases. The majority of the ordinary civil suits and all the Small Cause Court cases were thus disposed of by the two Special Subordinate Judges. Of the cases disposed of, 243 were contested and 359 otherwise disposed of. The number of title suits was only 125 and suits for money and moveables 477 against 206 and 1,078, respectively, in the previous year. No reason has been assigned for the decrease which is very marked. The number of miscellaneous cases of a judicial nature and execution cases disposed of was 295 and 568, respectively. The number of witnesses examined was 2,557, out of whom 203 or 7·9 per cent. were detained for more than two days. The number of witnesses examined in the previous year was 3,478, of whom 314 or about 9·02 were detained for more than two days. The number of suits pending at the close of the year was 277, or about 46·01 per cent. of the number disposed of. The Judicial Commissioner tried only 35 miscellaneous and 2 execution cases. The miscellaneous and execution cases disposed of by the several Deputy Commissioners are given below:—

District.	Miscellaneous (judicial) cases	Execution cases.	Total.
1	2	3	4
Hazaribagh ...	38	49	87
Lohardaga ...	23	1	24
Palamau ...	19	4	23
Manbhum ...	62	28	90
Singhbhum ...	19	12	31

The amount of original civil work done by the district officers, especially the Deputy Commissioner of Lohardaga, was small.

64. Altogether 9¾ Munsifs were employed in the Division against 10½ in the previous year, and they tried 2,915 ordinary and 3,079 Small Cause Court suits against 4,140 ordinary and 1,122 Small Cause Court cases in the previous year. There was thus a large increase in the total number of cases disposed of by the Munsif, the average number disposed of by each being nearly 615 against 406 in the preceding year. Of these cases disposed of, 1,617 were contested and 4,377 were otherwise disposed of; 4,721 were suits for money and moveables, and 1,273 were title suits against 1,391, 3,871, 4,107, and 1,092, respectively, in the previous year. The number of miscellaneous and execution cases tried by the Munsifs was 830 and 4,622, respectively. The total number of witnesses examined was 9,828, of whom 1,314 or about 13·3 per cent. were detained more than two days. The total number of witnesses examined and the average percentage of detention over two days in 1893-94 were 8,996 and 11·6, respectively. As regards the detention of witnesses the worst results are

shown against Babu Durga Charan Sen, Munsif of Raghunathpur, about 32·2 per cent. of the witnesses examined by whom were detained over two days, and after him come Babu Sasi Bhusan Sen, of Lohardaga, with a percentage of 20·0, and Babu Sasi Bhusan Chatterji, of Purulia, with a percentage of 16·8. The last-named officer has very heavy work to do, as he is also Munsif of Chaibassa.

65. Rent suits in Chota Nagpur are disposed of both by Munsifs and Deputy Collectors, and the total number of officers of both classes employed during the past year was 19½ against 23¾ in the preceding year. The number of rent suits disposed of was 4,792 against 5,002 in 1893-94, while the average number disposed of by each officer was 245·7 against 208·4 in 1893-94. About 50 per cent. of the rent cases were disposed of in Manbhum, the officers of which district on an average tried 480 cases each against 353 in the previous year. The number of witnesses examined was 8,793, of whom 403 or about 4·6 per cent. were detained over two days against 8 per cent. in the previous year. As in the case of civil suits in the matter of detention of witnesses the Munsif of Raghunathpur heads the list with a percentage of 19·2.

65A. Altogether 533 appeal cases were disposed of during the year, 84 of which related to money or moveables and 220 to titles. The number of appeals in rent suits was 229. The decisions of the lower courts were confirmed in 253, modified in 129, and reversed in 85. The rent appeals were decided entirely by the Judicial Commissioner. The percentage of confirmation was 47·4.

66. The appointment of a Special Sub-Judge for the trial of civil suits appertaining to the districts of Hazaribagh, Lohardaga, and Palamau has served to remove the general complaint which existed of the delay in the decision of such suits and appeals. The appointment of a Munsif for Manbhum and Singhbhum has so far worked smoothly, though some inconvenience is said to be felt by the subordinate staff. In Singhbhum the civil jurisdiction over Porahat and Kolhan was transferred from the Commissioner to the Judicial Commissioner.

XIII.—CRIME.

67. The total number of cognizable and non-cognizable cases reported during the past calendar year was 8,266 and 3,425, respectively, against 8,544 and 4,088 in the previous year. There was thus a decrease under both heads, which was shared by all the districts except Lohardaga and Palamau, where there was an increase in cognizable cases. The incidence of crime in the Division was one case to every 396 persons against one case to every 371 persons in the previous year. The incidence of cognizable crime in 1894 was one case to every 807 persons against one in 790 in 1893. The contrast between Singhbhum, where the incidence was as high as one in 547, and the other districts of the Division, in none of which it was higher than one in 823, is striking. This is attributed to the scarcity which prevailed in parts of the Kolhan adjoining Keonjhar in the early parts of the year. The same cause existed in 1893 and led to an epidemic of crime. The state of things in 1892 was different, and but for the exceptional circumstances in Singhbhum in 1893-94, Chota Nagpur would have maintained the high position it formerly occupied as being the least criminal of all the Divisions in Bengal.

68. Out of the 8,266 cognizable cases reported during the past year, 383 were declared false against 361 in 1893. The incidence of true cognizable crime was one true case to every 587 persons against one in every 565 in 1893. The incidence varied from one true case to every 432 persons in Singhbhum to one true case to every 701 persons in Palamau. Out of 7,833 true cases reported during 1894, conviction was obtained in 3,520, or about 44 per cent., against 43·1 per cent. in 1893. The percentage of the number of cases in which conviction was obtained to the total number investigated by the police was 53·5 in 1894 against 52·8 in the previous year. The number of persons sent up for trial was 8,072 in 1894 against 7,952 in 1893, and the number convicted was 4,691, or 58·1 per cent. of the number sent up, against 58·4 per cent. in 1893. The following table compares the number of cognizable cases reported

from the several districts during 1893 and 1894, exclusive of sanitary offences:—

District.	1893.	1894.
1	2	3
Hazaribagh	1,697	1,564
Lohardaga	1,457	1,744
Palamau	745	822
Manbhum	1,939	1,512
Singhbhum	1,135	1,057
Total ..	6,973	6,699

The number of cognizable cases brought to trial in each district and the proportion in which conviction was obtained during the past two years is shown below:—

District.	Cases decided in—		Cases convicted in—		Percentage in—	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
Hazaribagh ...	1,186	1,046	869	723	73·2	69·1
Lohardaga ...	1,135	1,443	709	925	62·4	64·1
Palamau ...	442	441	337	318	76·2	72·1
Manbhum ...	1,426	1,443	971	1,028	68·0	71·2
Singhbum ...	760	647	644	526	84·7	81·2
Total ...	4,949	5,019	3,530	3,520	71·3	70·1

The following table shows district by district the number of persons brought to trial and the number convicted during 1893 and 1894:—

District.	Persons brought to trial in—		Persons convicted in—		Percentage in—	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
Hazaribagh ...	1,786	1,581	1,155	943	64·6	59·6
Lohardaga ...	2,347	2,619	996	1,268	42·4	48·4
Palamau ...	706	715	474	431	67·1	60·2
Manbhum ...	2,045	2,030	1,234	1,241	60·3	61·1
Singhbhum ..	1,068	1,127	791	808	74·06	71·6
Total ...	7,952	8,072	4,650	4,691	58·4	58·1

The following are some of the most noticeable features in connection with the criminal history of the several districts during 1894:—Under class I there were marked decreases in the number of cases in Hazaribagh and Manbhum and an appreciable increase in Palamau. In Hazaribagh there was decrease of 14 true cases, chiefly under "Other offences against public justice" for which no special reason can be assigned. In Palamau there was an increase of 14 cases, chiefly under the head of Rioting. There were 14 cases under section 107 of the Criminal Procedure Code, so the increase in rioting cases cannot be said to be due to want of vigilance on the part of either the Magistracy or the Police. One of the rioting cases here was rather serious. In this about 400 armed Hindus collected at Mohuadand and threatened to assault the Muhammadans as it was rumoured that the latter intended to sacrifice kine. The Deputy Commissioner, Mr. Bright, took very prompt action in the matter and sent up 18 persons for trial, 17 of whom were ultimately convicted and one died. Another case occurred at Hutar, 16 miles from Daltonganj, which a Police Sub-Inspector magnified into a "revolt." As a matter of fact, the villagers

forcibly opposed his entrance into the village under the impression that his alleged object of enquiry into a dacoity was only a pretext for gaining a footing in the village for the zamindar's amla with whom they were fighting. The Sub-Inspector's report was found to be grossly exaggerated, and all the persons sent up were acquitted by Mr. Bright. In Manbhum there was a decrease of 13 cases, mostly under the head of Rioting, due to prompt preventive action taken by the local officers. Under class II there was an increase of 23 true cases in Hazaribagh, chiefly under cases of attempt at suicide and criminal force to public servants, for which no reason has been assigned. There was a satisfactory decrease in Lohardaga and Manbhum and only a slight increase in Palamau and Singhbhum. In Lohardaga there were ten cases of true murder against only five in the preceding year. In Palamau there were nine cases of murder and culpable homicide against four only in 1893, while in Manbhum there were only five cases of murder against ten in the previous year. Taking the Division as a whole, there were altogether 281 true cases under this class against 285 in the previous year. Under classes III and V, serious and minor offences against property, there was a very marked decrease, as the total number of true cases reported was 2,074 and 3,075, respectively, against 2,231 and 3,307 in the previous year. This decrease is contributed chiefly by the three districts of Hazaribagh, Manbhum, and Singhbhum. In Lohardaga and Palamau there was an appreciable increase in burglaries, which show 412 and 191 true cases, respectively, against 352 and 137 in the previous year. The increase is attributed to better reporting of crime, and in Palamau also to the prevalence of the cholera epidemic, owing to which a large number of people are said to have left their homes, leaving nobody in charge of their property. In Manbhum there was a remarkable decrease in burglaries and thefts, a result attributed to good harvests, but there were nine true cases of dacoity against ten in the previous year. It is believed that these dacoities were committed by colliery coolies and other bad characters belonging to an organised gang. Judicial results in these cases were very poor, as out of 47 persons sent up in six cases 40 were acquitted and 7 only were convicted, and of these latter, 6 were acquitted on appeal, so that eventually there was only one person brought to justice. In Singhbhum there were 318 true cases of house-breaking against 268 in 1893 and 150 in 1892. The number of cattle thefts increased from 45 in 1892 and 70 in 1893 to 107 in the past year, while the number of ordinary thefts increased from 256 in 1892 to 445 and 385 in 1893 and 1894, respectively. As already noticed, the remarkable increase in cases against property in this district during the past two years was due to the prevalence of scarcity in certain parts of the Kolhan in the beginning of the year.

69. The statistics of non-cognizable crime are given below:—

DISTRICT.	Number of cases instituted in—		Number of cases actually tried in—		Persons tried in—	Persons convicted in—	Percentage of convictions.	Persons tried in—	Persons convicted in—	Percentage of convictions.
	1893.	1894.	1893.	1894.	1893.			1894.		
1	2	3	4	5	6	7	8	9	10	11
Hazaribagh ...	1,008	864	790	703	816	362	44·3	607	234	38·5
Lohardaga ...	960	852	610	631	950	368	38·7	1,101	401	36·4
Palamau ...	492	418	266	270	417	156	37·4	467	119	29·2

Singhbhum ...	538	419	387	240	496	224	45·1	366	157	42·9
Total ...	4,088	3,425	2,920	2,605	3,967	1,626	40·09	3,639	1,402	38·5

There was a decrease everywhere in the institutions. Colonel Garbett and Mr. Bright attribute the decrease in Hazaribagh and Palamau to the prevalence of cholera. The former writes:—"With the pestilence raging and deaths occurring all round them, and the terror of themselves or some members of their own families being the next victims always before them, it was not likely that people would leave their homes, temporarily desert their families and expose themselves to the chance of being attacked with cholera in going to and fro for the purpose of airing petty grievances in the courts." Mr. Bright reports

that owing to the prevalence of cholera at head-quarters in July and August, people shunned the town and courts like the plague, while "for days and days together the court compound presented a most deserted appearance, and it was not until the cholera had ceased in September that people began to frequent the courts again." No special reason has been assigned to account for the decrease in Lohardaga and Singhbhum. In Manbhum the Deputy Commissioner thinks the decrease is possibly attributable to more careful examination of complainants before issue of process. This explanation does not seem to be correct, as the proportion of cases tried to cases instituted was actually higher than in the preceding year, and the percentage of convictions was even worse than it was in 1893. The District Superintendent of Police attributes the decrease to better harvests.

XIV.—POLICE.

70. The recommendations of the Committee appointed for the revision of police establishment were partially given effect to, with the result that there was a net increase of 75 in the strength of the force employed in the Division. There was a decrease of two and four head-constables respectively in Manbhum and Singhbhum and of 29 constables in Hazaribagh. On the other hand, there was an increase of five Sub-Inspectors, five head-constables, and 23 constables in Lohardaga, two Sub-Inspectors, four head-constables, and 45 constables in Palamau, 13 constables in Manbhum, and five Sub-Inspectors and eight constables in Singhbhum. The general conduct of the force was on the whole good. In Hazaribagh ten Sub-Inspectors and 69 head-constables were punished during the year against three Sub-Inspectors and 61 head-constables punished in 1893. Most of the punishments were, however, awarded departmentally. In Lohardaga one head-constable and two constables were dismissed, one Sub-Inspector and six head-constables were reduced, two head-constables were suspended, and eight Sub-Inspectors, 14 head-constables, and 26 constables were punished departmentally with fines. The number of superior officers punished in this district was thus 9 against 18, and of head-constables and constables punished 51 against 94 in the previous year. Colonel Gordon says that there was a deplorable tendency towards extreme severity in dealing with departmental offences and also a tendency towards assuming that police officers are always guilty unless they can prove themselves innocent and unnecessary harshness in dealing with or considering such explanations as were offered by them regarding charges preferred against them. Undue severity and absence of sympathy in punishing trifling offences or of magnifying them into offences of a more serious character has a bad effect on the discipline of the force, for both officers and men lose confidence in their work when they are in a chronic condition of dread. Discipline is necessary, but to be effective it must be tempered with kindness and sympathy.

In Palamau two head-constables and three constables were dismissed, 13 Sub-Inspectors, 15 head-constables, and 37 constables were punished departmentally, and five constables were punished judicially against five constables dismissed, two head-constables degraded, two constables suspended, and three Sub-Inspectors, 14 head-constables, and 28 constables fined in 1893. In Manbhum two constables were dismissed, one head-constable and one constable were reduced, one head-constable and one constable were suspended, three Sub-Inspectors, four head-constables and 31 constables were punished with fines against, five constables dismissed, two head-constables and one constable degraded, and five Sub-Inspectors, seven head-constables and 43 constables fined in the previous year. In Singhbhum one head-constable and three constables were fined judicially, while five head-constables and 29 constables were punished departmentally against three constables fined judicially and two Sub-Inspectors, 11 head-constables and 14 constables punished departmentally in 1893.

71. I have commented so freely in previous reports on the want of special detective ability which prevails in the Chota Nagpur Police, chiefly in connection with burglaries and dacoities, that very little remains to be said on this subject. The materials of which the police is composed and the conditions under which they have to work—unsympathethic foreigners among an alien and aboriginal people—remain much the same as before, and nothing has occurred to justify any sort of conclusion that there has been any satisfactory advance

made of conducting enquiries or in the attendant results. I may, however, observe that while in this respect there has possibly been no deterioration, in matters of discipline a marked improvement is noticeable. The punishments are fewer, and no flagrant instance of a breach of good conduct has occurred. This state of things is, in my opinion, attributable in some measure to more stringent rules of discipline and drill which have been introduced under the orders of the Inspector-General of Police. If the superior officer is careless in these respects the rank and file soon take their cue and become equally lax and inefficient. A smart District Superintendent who will wear the uniform of his corps when on duty and is ready to give the right word of command will be more likely to instil a habit of prompt obedience into his men than one who is indifferent to such matters. The improvement in the appearance and physique was very noticeable at Daltonganj, where I had the good fortune to be present on the parade ground at the time of Mr. Giles' inspection of the police force. The men had lately undergone some training at the hands of an officer who knew his drill, and their attitude and movements were in marked contrast to their form and bearing in previous years.

72. Colonel Gordon has recorded the following remarks on the conduct of the police in his district:—

"After carefully watching the work of the local police, I have invariably found them to be deficient in detective acumen and energy, as is evidenced by their failure in detection of many serious crimes and of a great majority of theft and burglary cases, and generally by the low percentage of convictions obtained in police cases on comparison with results shown by their brother officers in the regulation districts. I am nevertheless of opinion that the working of the police during the year under review shows, on the whole, an improvement on the previous year; and when the scheme of reorganisation which has been partly carried out shall have been completed, I feel no doubt that the results of the police work will still further improve. In noticing the work of the local police, I cannot of course speak in terms of praise, but I must say that there were several instances of good services which I have considered it my duty to mention in the departmental report for the past year."

73. As regards the work of the Palamau Police, Mr. Streatfeild quotes the following remarks recorded by the late Deputy Commissioner, Mr. Bright:—"Generally speaking, I think there has been an improvement. Inspections have been made with proper regularity, and now that there are two Inspectors, supervision can be more strict. At the same time there is much room for improvement."

74. Mr. Morshead quotes the following remarks of Mr. Windsor as regards the conduct of the Manbhum police:—"The general conduct of the force was fairly good during the year 1894. The District Superintendent of Police has not been able to mention any specially meritorious work by any officer. Speaking generally, the police of the district are on a dead level of mediocrity. There has been no specially good work done, but, on the other hand, there have been no instances of seriously bad conduct." It must be remembered, however, that they had the disadvantage of being under the supervision of an officer who was for a long time in bad health, and this must have impaired the efficiency of the force.

Rural police.

75. Act V (B.C.) of 1887 is in force in the districts of Hazaribagh, Lohardaga, and Palamau, in the greater portion of Manbhum and in pargana Dhalbhum in Singhbhum. In Hazaribagh there were 1,323 chaukidars employed under the Act against 1,220 in the previous year. During the past year the Act was introduced in 219 new villages for which 125 new chaukidars were appointed. Some difficulty was found in introducing the Act on account of the number of small and scattered villages, too small to provide statutory chaukidars of their own and too much isolated to be formed into unions for the purpose. The assessments were collected regularly and the chaukidars were paid their salaries most punctually. The number of chaukidars employed under Regulation XX of 1817 was 1,357 against 1,482 of the previous year. Under existing circumstances nothing can be done to improve their condition. The chaukidars as a body behaved well and proved very useful during the year. In Lohardaga there were altogether 2,104 chaukidars employed against

2,098 in the preceding year. Of those employed in 1894, 1,732 were enrolled under Act V (B.C.) of 1887 and 372 under Regulation XX of 1817. During the past year a proposal was made by the Deputy Commissioner for increasing the pay of the chaukidars employed under Act V (B.C.) of 1887, in which he recommended a graduated scale of pay, but this could not be given effect to for want of funds, and I have accordingly pointed out to the Deputy Commissioner the necessity for a general revision of assessments. This is now being done, and as soon as the revision is made the proposed increase will be given effect to. As regards the quality of the work done by the village chaukidars in Lohardaga, Colonel Gordon writes that, considering the inadequate salaries now received by them, no better service could be expected of them. In Palamau the number of chaukidars enrolled under Act V (B.C.) of 1887 was 1,094 against 1,100 in 1893, and the number enrolled under Regulation XX of 1817 was 211. The further extension of the Rural Police Act is probably impracticable owing to the wild nature of the country and the intense dislike of the people to cash payments. Mr. Bright very properly attached very great importance to the regular payment of all chaukidars, and I was glad to find that there was a marked improvement in this respect. In Manbhum the work of making assessments under Act V (B.C.) of 1887 in thanas Raghunathpur, Chas, Jhalda, Para, and Gourangdi in the Sadar subdivision and in thana Nirsha in the Gobindpur subdivision was concluded within the past year, and the Act has been brought into operation in these jurisdictions with effect from 1st January 1895. The only portion out of the area covered by the Notification No. 3863J. of the 15th August 1893, to which it now remains to be introduced, is thana Topechanchi, where, except a certain area around Katras, the circumstances of the people are said to be such as to make it undesirable to introduce it. The chaukidars in this district are almost invariably low caste men, and their position is considered rather as a degrading than an honourable one. The chaukidars under Regulation XX of 1817 are paid irregularly, but complaints to this effect are seldom made by them. In Singhbhum there was no change in the number of chaukidars enrolled under Act V (B.C.) of 1887, which remained unaltered at 455, but the chaukidars under Regulation XX of 1817 decreased from 165 to 161. In the Monoharpur and Chakradharpur thanas the chaukidars are still under the old regulation. Their pay is small and their work in keeping with their pay. The opening of the railway and the consequent development of trade of all kinds throughout the district demand an improved rural police machinery in those thanas. The question of introducing Act V (B.C.) of 1887 will be taken into consideration. Two chaukidari tahsildars in Singhbhum were prosecuted and convicted for embezzlement during the year.

Road patrols.

76. There was no change in the ghatwali police force of Hazaribagh, which consisted of 113 sirdars and 345 digwars. They were stationed at 113 road posts along main roads and in jungly tracts for the prevention of crime and protection of travellers. The force is a most useful one and a valuable adjunct to the regular police force of the district. The men patrol along the main roads and guard most of the wild passes, and it is very probable that but for them violent crimes on travellers would be of much more frequent occurrence than they are. The conduct of the force was fairly good during the year under review. In Lohardaga there are 114 ghatwals employed on patrol duty who receive Rs. 3 per month, but the men are inclined to be remiss in the performance of their duties and do not attend with alacrity to the wants of travellers who may require their aid. The annual assessment under Part III of Act V (B.C.) of 1887 in this district is not sufficient to meet the annual expenditure, and hence a proposal made by the Deputy Commissioner of Lohardaga to increase the pay of the ghatwals to Rs. 4 each per month has been negatived, and the Deputy Commissioner has been directed to take steps for the revision of the assessments. In Palamau there were on the 1st January 1894 43 ghats and 73 ghatwals; but as the funds were not sufficient to meet all necessary expenditure, it was decided to reduce the number of ghats to 39 and number of ghatwals to 66. The ghats are all situated in thick jungles in dangerous parts of the roads by which the people are accustomed to travel. In Manbhum the rank and file of the ghatwali police force number 1,772 sardar ghatwals,

village sardars, and tabedars who are remunerated by lands and are located in road posts erected along the main routes and jungle tracts. Their services are, however, not considered by the District Officer to be of much use, as they cannot be entrusted with the simplest investigating duties; some of them are also said to have become refractory and troublesome. A proposal is now before the Government for the commutation of their services. In Singhbhum the ghatwals are employed in six ghatwali posts in pargana Dhalbhum, where they hold service lands. Their conduct during the year was fairly satisfactory. The ghatwali police force of all the districts require to be thoroughly looked after, controlled and inspected by the regular police in order to keep them up to the mark. I have myself seen them when marching through the districts absent from their posts, but I would not on that account condemn the system. There can be no doubt that if properly looked after and controlled they can be of much use in the difficult jungly tracts through which the desolate roads pass in this Division. Constant and regular supervision is necessary to keep them up to the mark, and where this has been the case, they have given little trouble to the District Officer. The unsatisfactory state of things in Manbhum may, to a certain extent, be attributed to the compromise of 1883-84, which, while it rendered the sardar ghatwals liable to pay to the zamindar the entire rent assessed on all excess mal lands, has given them no power to enforce payment from the subordinate ghatwals and tabedars.

XVI.—CRIMINAL JUSTICE.

77. The working of the criminal courts is shown below:—

District.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to persons disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeal to total appeals.	Number of cases A disposed of.	Number remanded more than six times.	Average cases disposed of per officer.	Average of witnesses examined per case disposed of.	Ratio per cent. of column 11 to column 10.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

	Honorary	7	573	711	62·3	669	8·2	47·05	...	...	81·8	1·1	...	
Singhbhum ...	Stipendiary	4	810	1,324	59·7	3,238	7·2	80·6	442	16	202·5	3·9	3·6	
	Honorary	1	211	220	92·7	115	...	...	...	...	211·0	0·5	...	
Total ...	Stipendiary	31½	6,363	9,062	54·4	23,735	4·5	74·4	2,303	98	202·0	3·7	4·2	
	Honorary	13	1,458	1,834	58·9	2,343	13·4	60·0	52	11	113·1	1·6	21·1	

The average number of Stipendiary Magistrates employed was 31·5 against 32·25, and the number of criminal cases disposed of by them 6,363 against 6,533 in the previous year, the average for each officer being 202 in both years. The number of cases disposed of by each officer is not large, but it must be recollected that many of the officers had also to try civil and rent suits. The largest average number of criminal cases 239) was disposed of by the Stipendiary Magistrates of Lohardaga and the smallest (164) by those of Palamau. The number of witnesses examined by Stipendiary Magistrates was 23,735, which gives an average of 753 to each officer and nearly 4 to each case. The average number of Honorary Magistrates and Benches employed was 13 against 16 and of cases tried 1,458 against 1,478, the average number tried by each court being 113 against 92 in 1893. The number of witnesses examined by Honorary Magistrates and Benches was 2,343 against 3,345 in the previous year, or on an average 180 for each court and 1·6 witnesses per case. Among Stipendiary Magistrates the largest number (408) of disposals fell to the share of Mr. Rattray

Subdivisional Officer of Giridih, and after him to Babu Nobin Krishna Banerjee at Purulia (399 cases), Mr. C. F. Manson (396 cases), and Babu Jadu Nath Chatterjee (382 cases) at Ranchi. The largest number of witnesses (1,512) was examined by the Subdivisional Officer of Giridih, and after him come Babus Upendra Chandra Mukerjee and Nobin Krishna Banerjee with 1,494 and 1,322 respectively. The proportion of witnesses detained over two days was highest in the case of the late Babu Niranjan Bhattacharjee (28·3) and Mr. C. Cuthbertson (26·3). Out of 673 cases in which appeals were preferred, in 501, or about 74·4 per cent., the decisions were confirmed against 69·6 per cent. in the previous year. Taking the districts separately Singhbhum comes out best with a percentage of 80·6, and after it Lohardaga and Hazaribagh with percentages of 77·3 and 72·9 respectively. In Hazaribagh the percentage of decisions confirmed was over 75 in the cases of all Stipendiary Magistrates, except Babu Kedar Nath Mukherjee, Deputy Magistrate at head-quarters (66·6), Mr. Rattray, Sub-divisional Officer of Giridih (62·6), and the two Sub-Deputy Collectors, Mr. R. C. Gupta (66·6), and Babu Surendra Lal Mitra (44·4). In the majority of cases the percentages exceeded 80. In Lohardaga the percentage of confirmation exceeded 75 in the cases of all officers except the Deputy Commissioner, Colonel Gordon, and Mr. Manson. In the case of the former the percentage has been only 58·3, while in that of the latter it is 70. In this district the best results are shown against Babu Krishna Kali Mukherjee, all the 14 appeals against whose decisions were confirmed. In Palamau the percentage exceeded 75 in the case of the Deputy Commissioner, Mr. Bright. In the case of all other officers it was either 69·04 or 60·0. In Manbhum the best results are shown against Messrs. Bedford and Bompas and Babu Nobin Krishna Banerjee, Deputy Magistrate and the Munsif of Raghunathpur, all the appeals against whose orders were confirmed. The percentage against the Subdivisional Officer of Gobindpur, Mr. N. Warde-Jones, is very low, being only 42·1. In Singhbhum the percentages exceeded 75 in the cases of all officers, except Babu Bipin Bihary Banerjee, Deputy Magistrate, and Babu Srish Chandra Mazumdar, Sub-Deputy Magistrate.

Of the 13 independent Honorary Magistrates and Benches employed in the Division the largest number of cases (222) was disposed of by the Bench at Purulia, and after it comes the Chaibassa Bench with 211 cases. Among independent Honorary Magistrates the largest number (117) of cases was tried by Kumar Jagat Mohan Nath Sahi Deo of Ranchi, and after him comes Babu Woodhub Chandra Roy with 91 cases. The following Benches and Honorary Magistrates deserve special mention for having discharged all the witnesses who appeared before them without detention for a single day :—

Hazaribagh Bench.
Kumar Jagat Mohan Nath Sahi Deo of Ranchi.
Babu Woodhub Chandra Roy of Ranchi.
Rai Bhagbat Dayal Singh Bahadur of Palamau.
Mr. C. H. Maseyk of Purulia.
Rai Raj Chandra Das Bahadur of Chaliama.
The Bench at Jhalda.
Mr. A. Campbell of Pokhuria.
,, H. C. Veasey of Kumardubi.
The Bench at Chaibassa.

The number of appeals from the decisions of the Bench and Honorary Magistrates was very few, being only 45 or about 3·1 per cent. of the number of cases decided. Out of these 45 cases, in 27 or 60 per cent. the decisions were confirmed against the same percentage in the previous year—a result which is on the whole satisfactory and creditable to all the Benches and Honorary Magistrates concerned.

78. Colonel Garbett, the Deputy Commissioner of Hazaribagh, has recorded the following remarks regarding the working of the two Benches in his district :—

"I have again to report favourably regarding the working of both Benches. Most of the Magistrates of both Benches take considerable interest in their work, and having acquired considerable experience render invaluable assistance to the Stipendiary Magistrates. The attendance of the Hazaribagh Bench Magistrates was remarkably regular, and there were only two absences during the whole year. In the Giridih Bench there were 92 absences out of 339 calls, but all the absences appear to have been unavoidable and were occasioned by press of business."

79. In Lohardaga a new Bench was established at the town of Lohardaga with third class powers and commenced its sittings from the 3rd July 1894

Babu Woodhub Chandra Roy was formerly attached to the Ranchi Independent Bench, but since August 1894 he has been authorised to sit singly. Kumar Jagat Mohan Nath Sahi Deo was at the same time vested with first class powers, which he exercised up to the end of October last, after which he unexpectedly absented himself and did not return to work. He left a heavy file of partly-heard cases which caused very great inconvenience both to the parties and to the Courts. The Ranchi Bench is formed for the most part of efficient men whose attendance, though not good, has been fair except in the case of the total absentee, Mr. Binning, whose name has been removed from the list of Honorary Magistrates. In Palamau the Garwah Bench was abolished in July, as the principal members comprising it resigned. In Manbhum the attendance of some of the members of the Purulia Bench was very satisfactory and indicated that considerable sacrifice was made by them for the public good. The attendance of other gentlemen was, however, not good. In the Gobindpur subdivision, with the exception of the Reverend Mr. A. Campbell of Pokhuria and Mr. Veasey of Kumardubi, none of the Honorary Magistrates did any work. In Singhbhum the attendance of Babu Shib Chander Ganguly and Sadhu Manki, who sat on the Chaibassa Bench on Wednesdays, was not good. The former suffered from ill-health and the latter lives 15 miles from Chaibassa. The Reverend Luther Daud Singh, Captain Manki, and Joseph Captain sat on every Saturday, and their attendance was satisfactory. The Bench tried only petty nuisance cases. In future it is proposed to make over to the Bench cases of a more interesting nature.

Out of 2,355 A cases disposed of, 872 or about 37 per cent. were disposed of on the day of first hearing, 557 or about 23·6 per cent. after one remand, 295 or 12·5 per cent. after two remands, 228 or about 9·5 per cent. after three remands, 146 or about 7·2 after four remands, 92 after five remands, while 165 or 7 per cent. were disposed of after six remands. Out of the 109 cases remanded more than six times, 75 appertain to the Lohardaga district, the Deputy Commissioner of which says that the remands in his district were beyond the control of the Magistrates concerned owing to the paucity of officers. My experience, however, is that the frequency with which remands occur in the subordinate courts is a sure indication of laxness of supervision on the part of the District Officer over the proceedings of the subordinate courts. A careful and regular scrutiny of the list of pending cases will generally ensure the prompt disposal of cases.

RESULTS OF SESSIONS TRIAL.

80. The following statement shows that in sessions cases there has been a marked improvement in the percentage of average convictions which in 1894 was 73·07 against 64·1 in 1893 and 67·3 in 1892:—

	District.					Total.
	Hazaribagh	Lohardaga.	Palamau.	Manbhum.	Singhbhum.	
1	2	3	4	5	6	7
Number of cases committed, but pending at commencement of year.	4	3	2	7	...	16
Number committed during the year ...	..	16	13	13	5	47
Total number for disposal	4	19	15	20	5	63
Number disposed of	2	15	13	18	4	52
Number in which conviction was obtained ...	1	13	11	11	2	38
Number in which sentence was modified or reversed by High Court.	...	1	1	1	...	3
Number of cases acquitted by Sessions Judge ...	1	2	1	7	2	13
Number of cases otherwise disposed of ...	...	...	...	...	...	...
Percentage of cases resulting in conviction to cases disposed of.	50 0	86·6	84·6	61·1	50·0	73·07

The following statement shows that the percentage of the total number of persons convicted in each district on the total number committed was comparatively much higher in the past year:—

DISTRICT.	Number of persons committed.		Number of persons convicted.		Number of persons acquitted.		Percentage of convictions.		Percentage of acquittals.	
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11
Hazaribagh	40	19	8	9	13	9	20·0	47·3	61·9	50·0
Lohardaga	63	35	23	23	40	12	36·5	65·7	63·5	34·2
Palamau	11	18	4	13	4	2	36·3	72·2	50·0	13·3
Manbhum ...	57	33	8	14	38	18	14·03	42·4	82·6	56·2
Singhbhum ...	7	12	2	8	2	2	28·5	66·6	50·0	20·0
Total ..	178	117	45	67	97	43	25·2	57·2	68·3	39·0

The Judicial Commissioner made special arrangements for the more prompt disposal of cases, and hence this marked improvement in the results. The percentage of acquittals in Manbhum and Hazaribagh is still high. The Deputy Commissioner of Manbhum attributes this to the length of time which elapses between commitment and trial. In Hazaribagh no new cases were committed for trial during 1894, but two dacoity cases pending from the previous year were disposed of during the year, one of them resulting in the conviction of nine persons. Eight cases triable by the Sessions Court were taken up by the Deputy Commissioner under sections 30 and 34 of the Code of Criminal Procedure; in six of these 11 persons were convicted and in two four persons were acquitted or discharged. In Lohardaga the Deputy Commissioner tried nine cases under the special powers referred to above against 15 in the previous year. In Palamau the results of sessions trial were very satisfactory, as 12 out of 13 cases tried ended in conviction by the Sessions Judge, though in one case the conviction was subsequently set aside by the High Court. The Deputy Commissioner of Palamau disposed of six cases under his special powers under sections 30 and 31 of the Code of Criminal Procedure. In Manbhum the Deputy Commissioner disposed of seven such cases under his special powers.

XVI.—REGISTRATION OF DEEDS.

81.

DISTRICT.	Deeds registered in 1893-94.	Deeds registered in 1894-95.
1	2	3
Hazaribagh ...	6,277	6,157
Lohardaga ...	5,524	6,309
Palamau ...	1,392	1,519
Manbhum ...	14,865	13,974
Singhbhum ...	654	597
Total ..	28,712	28,556

There was a decrease of 156 in the total number of deeds registered in this Division. The decrease in Hazaribagh is not of sufficient importance to need special explanation. In Lohardaga the increase of 785 or 12·44 per cent. is said to be due (1) to the normal development of the registration system, (2) to the indebtedness of the people of the district, and (3) to the reduction of the minimum *ad valorem* fee from 12 annas to 8 annas. In Palamau the increase of 127 is specially due to the opening of the sub-registry office at Hosanabad. Mr. Streatfeild writes that the establishment of this office as a permanent institution in the district has conferred a real boon on the people of that part of the district. The total receipts were Rs. 3,041 against Rs. 3,256 in 1893-94. The falling off is said to be partly due to the registration of a large number of security bonds without fees. In Manbhum the large decrease of 891 in the number of deeds is said to be due to the fact that owing

to the good outturn of the crops the poorer classes had little occasion to procure money by selling their petty holdings. In Singhbhum registration has developed from year to year since 1888-89 up to the past year, but is still insignificant, and will no doubt continue to be so for a long time. The fluctuations in the district are therefore seldom very large. The registration offices were generally in fair order, and the work more or less up to date at the time of my inspection. I may again single out Babu Aghore Nath Chatterjee, the Special Sub-Registrar of Purulia, as deserving of very favourable mention in this respect.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

Land Revenue.

82. The following table compares the demand and collections of land revenue during the past two years:—

ISTRICT.	NUMBER OF ESTATES.		DEMANDS.						COLLECTIONS.					
			1893-94.			1894-95.			1893-94.			1894-95.		
	1893-94.	1894-95.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	Total.

* Includes demands and collections on account of Tributary States.

There has been an increase of seven in the number of estates. Four of these are owing to the resumption of four villages in the Koderma Government estate in Hazaribagh on the death, without male issue, of a maintenance-holder, and three to the permanent settlement of three small plots of land out of the area acquired by Government for the cutcherry compound in the town of Purulia in Manbhum.

83. The increase in the current demand as compared with the preceding year amounts to Rs. 2,226, out of which Rs. 1,130 are contributed by Hazaribagh, Rs. 29 by Lohardaga, Rs. 1,021 by Palamau, and Rs. 46 by Manbhum. In Singhbhum the demand remained unaltered. The increase in Hazaribagh is owing mainly to the resumption of four villages already mentioned and to the second instalment of increase in the rasadi jama in the Kharakdiha estate falling due in the year of report. In Lohardaga the increase of Rs. 29 is owing to the settlement for building purposes of some plots of upland of the Barkagurh estate in the town of Ranchi. The increase in Palamau is due to 16 villages of the Palamau Government estate coming under khas management, and in Manbhum to the permanent settlement of the three plots of land in the town of Purulia already mentioned.

84. The percentage of collections in Hazaribagh is 99, the same as in the preceding year. In Lohardaga the percentage has slightly increased from 90·4 in 1893-94 to 90·6 in 1894-95. In Palamau it has decreased from 94·8 to 93·06. In Manbhum the entire demand was collected against 97·6 per cent. the year before. In Singhbhum the collections amounted to 96·8 per cent. against 100 per cent. in 1893-94. Errors were discovered in the jamabandis of certain villages of the Burkagurh Government estate in Lohardaga, and as the demand of rent payable by each raiyat was not ascertained till as late in the year as the 10th March, the collections fell short. In Palamau the deficiency is thus explained. In the previous year the thikadars paid up unusually well in prospect of the expiry of their leases and in hopes of their renewal, but in the year of report they generally believed that their villages would be taken under khas management. Moreover, the 28th March, the last kist day, was a gazetted holiday, and the last day of the year a Sunday, and hence a large amount of

rents payable by jagirdars and thikadars was credited into the treasury on the 1st and 2nd April. In Singhbhum the greater portion of the unrealised balance was nominal, being the rental of lands taken up for the Bengal-Nagpur Railway. Rupees 809 on this account were remitted during the year of report and Rs. 844 have been remitted since its close.

Operation of the Sale Law.

85. There were eleven estates in default in Hazaribagh, including four remaining over from the preceding year. In three the sale day had not arrived when the year closed, and the remaining eight all were exempted, except one which was sold as there had been as many as nine instances of default. In none of the other districts was there any sale of estate under Act XI of 1859.

Roads and Public Works Cesses.

86. The following table shows statistics of the Road and Public Works cesses:—

District.		Demand.			Collection.				Balance.					
		Current.	Arrear.	Total.	Current including, previously paid in advance.	Arrear.	Advance for future years.	Total.	Current.	Arrear.	Total.	Deduct remission.	Net arrear.	Percentage of net balance on gross demand.
1		2	3	4	5	6	7	8	9	10	11	12	13	14

	Public Works cess ...	4,737	89	4,826	4,697	11	..	4,708	40	78	118	68	50	...
	Total ...	9,475	177	9,652	9,394	21	...	9,415	81	156	237	137	100	1·0
	GRAND TOTAL ...	3,38,709	30,354	3,69,063	2,87,093	30,103	5,323	3,22,519	51,616	251	51,867	902	50,965	13·8

There are differences of Rs. 6 and Rs. 321 between the figures in column 3 of the above statement representing the total arrear demand of the Road and Public Works cesses in the districts of Hazaribagh and Manbhum and the figures shown in column 13 of the statement given in the previous report. The difference of Rs. 6 in Hazaribagh is owing to the correction of a mistake in the assessment of an estate, while that of Rs. 321 in Manbhum is owing to the demand on account of jungles in pargana Barabhum held by Messrs. Robert Watson and Company for the years 1891-92, 1892-93, and 1893-94 having been added under the orders of the Commissioner.

87. The total current demand of cesses in the Division rose from Rs. 3,28,467 in 1893-94 to Rs. 3,38,709 in 1894-95, giving an increase of Rs. 10,242. In Lohardaga the demand remained unaltered; in Palamau and Singhbhum the fluctuations are small. The chief increases in the total demand come from Hazaribagh and Manbhum. In Hazaribagh the increase of Rs. 998 is the result of a decrease of Rs. 317 and an increase of Rs. 1,315. The decrease of Rs. 317 is in respect of cesses on lands and represents the reduction allowed under the orders of the Board of Revenue in the assessment of Gadi Nowdiha, while the increase of Rs. 1,315 was obtained from the year's valuation of mines under Chapter V of the Cess Act. In Manbhum out of the increase of Rs. 9,306, Rs. 4,196 represent the increase from the revaluation of eight revenue-paying estates, Rs. 5,011, the assessment of certain coal mines and quarries newly opened during the year, and Rs. 99, the increase in the assessment on jungles.

88. The collections of the arrears amounted to Rs. 30,103, or 99 per cent., and of the current demand to Rs. 2,87,093, or 85 per cent. The percentage of collections during the preceding year was 90·8 in the case of current and 90·9 in the case of arrear demand. The falling off in the collections of the current demand was due mainly to the inability of the Rajah of Pachete to pay up his dues to the extent of Rs. 21,867.

89. Of the arrears outstanding, the greater portion is due on account of the March kist, regarding which no coercive measures could be adopted within the year. Rupees 14,490 out of the arrears outstanding in Lohardaga were realised up to the date of submission of the district report. In Singhbhum the net arrear, after exclusion of the amount remitted, amounts to Rs. 100 only.

90. No revaluation was undertaken during the year.

Land acquisition.

91. In Hazaribagh there was no fresh case of land acquisition: the Burrakar wire tramway case still remains pending. In Lohardaga the two pending cases were disposed of during the year, but two fresh institutions are pending. In Palamau all the preliminary stages, including the preparation of land plans, were finished in respect of the area required for extending the Japla road. In Manbhum the proceedings for the acquisition of land for the enlargement of the Madhab bandh have been concluded. The appeal against the award of the Civil Court in the Subarnarekha bridge case is still pending before the Judicial Commissioner. The award of compensation in the case relative to the land for the quarters of the Assistant Engineer, Bengal-Nagpur Railway, was made on the 15th March last, but of the three parties interested, two have accepted the award and received payments, while the third, the Rajah of Pachete, has not accepted the tender or filed a petition for reference to the Civil Court. The award in the case for the Public Works Department subordinates' quarters was made in February 1895, but the Rajah of Pachete, who is a party in this case also, has not come forward, and the amount of compensation has been placed to his credit in the treasury. The proceedings in connection with the case of a catch-water tank at Chandil have been stopped under orders of the Consulting Engineer. As to the land required for the rifle range for the Chota Nagpur Mounted Rifles at Purulia, the general notice under section 9 of the Act has been issued. The two projects in connection with the railway in this district, namely, the Jharia extension and the Chanch branch, were in charge of the Special Deputy Collector, Babu Sasi Bhusan Sen, who works also in Burdwan and Hooghly. The work in connection with the Jharia extension was taken up by the Special Deputy Collector in December 1892. It has now nearly been completed, but additional work in connection with it, namely, the Damuda branch of the extension, ten miles long, and three large sidings, aggregating four miles in length, have recently been received. The total amount of the estimate for the Jharia extension is Rs. 1,12,121 on 33 miles at Rs. 3,397 per mile, and the total amount awarded during the year was Rs. 77,464 for the same mileage, or at the rate of Rs. 2,347 per mile. There are still nine cases for disposal in connection with this project, and the award in these amounts to about Rs. 832. There will thus be a saving of Rs. 33,825 out of the amount estimated. Of the sum of Rs. 77,464 awarded in this project, Rs. 63,201 have been paid. The remainder could not be paid on account of difficulties regarding the apportionment of compensation. All the cases in connection with the Chanch branch have been disposed of. The acquisition of land in connection with this project was commenced in November 1893. The cost of acquisition was estimated at Rs. 2,366. The awards made have amounted to Rs. 1,184. The saving effected is therefore Rs. 1,182. The cost of land for the railway projects was estimated at Rs. 50 per bigha (standard) of paddy land, Rs. 20 per bigha of cultivated high land, and Rs. 10 per bigha of waste land or 20 years' purchase of Rs. 2-8, Re. 1, and As. 8, respectively, less cost of collection at 10 per cent. and Government revenue of the land. Compensation has been awarded at Rs. 40 per bigha of paddy land, Rs. 10 per bigha of upland, and Rs. 5 per bigha of waste land or 20 years' purchase of Rs. 2, As. 8 and As. 4, respectively, less cost of collection at 10 per cent. and Government revenue of the land, and there has been no reference to the Civil Court. The average actual cost of land per bigha, including houses, tanks, and trees, is

Rs. 21-1 or Rs. 63-12 per acre. Of the compensation awarded per bigha as stated above, Rs. 7 and Re. 1 have been allowed to the raiyats per bigha of paddy land and upland, respectively. The remainder has been awarded for the proprietory interest. The Special Deputy Collector reports that it is always exceedingly difficult to secure to the raiyats a share of the compensation, and he found it impossible to secure them a larger share than the aforesaid amounts. The zamindars invariably oppose the allowing of any portion of the compensation to the raiyats, specially as the compensation is awarded on the basis of rent and not the rack-rent of land under the law, the land is treated as one claim, and all the interests are valued together in a lump. If an attempt is made to make separate valuations of the proprietory interest and the occupancy right and to award the total as the value of the land, the zamindars would agree to the total only as the value of the land and oppose the apportionment. If a reference is made to the Court on this ground, the raiyats do not appear, and the whole amount goes to the zamindar. The reason why the zamindar appears in Court and the raiyats do not is that the zamindar is interested in all the land in a village, and the raiyat only in his own holding. Under the circumstances the best course which the Land Acquisition Officer could adopt in the interests of the raiyats was to induce the zamindars to consent to a portion of the compensation being given to the raiyats, by representing to them that it was not only just that they should get a share, but that the zamindars would probably lose as much, if not more, if they went to court and even if the raiyats did not oppose them. In some instances the raiyats, at the instance of their zamindars, came ready with petitions asking that the whole of the compensation might be given to the zamindars, but the Special Land Acquisition Deputy Collector deprecated such measures and secured to the raiyat a share of the compensation, however small, in every case. The work remaining to be done in connection with the Railway projects in Manbhum is expected in give the Special Deputy Collector sufficient work during the current official year.

92. In Singhbhum the work of acquiring land for the Ranchi-Chaibassa road and the inspection bungalows was completed. Some additional land was acquired at Chakradharpur for the rifle range of the Bengal-Nagpur Railway Volunteer Corps. In this district, as also in the districts of Hazaribagh, Lohardaga, and Palamau, the work in connection with the land acquisition cases was done by the ordinary district staff. In Manbhum also all works except the railway projects were done by the district staff.

Survey.

93. The survey of the Government khalsa villages in the Palamau estate continued during the year. Up to the 31st March 1895 174 villages with an area of 181·4 square miles were traverse-surveyed and demarcated, while 359 villages with an area of 245·4 square miles were cadastrally surveyed. The work has progressed satisfactorily, and is likely to be completed by the 15th of October next, unless it be decided to demarcate the boundaries between the khalsa and jagirdari villages. The total cost on the survey operation up to the 31st March 1895 amounted to Rs. 35,706.

94. The survey of the Kolhan was begun on the 1st November 1894. The original programme was that 804 villages covering an area of 1,423 square miles were to be surveyed in season 1894-95, but this was not found practicable as there was much sickness amongst the sub-surveyors and line-cutters. Up to the end of March 1895 622 villages with an area of 938 square miles were traverse-surveyed, and the plots of 156 villages comprising an approximate area of 160 square miles were supplied to the Settlement Department.

Settlement.

95. In Palamau the records of 271 villages were received from the Survey Office, 91 with terij, milan-khasra, &c., and 180 were without them, leaving 128 village records still due. The records of 225 villages covering an area of 147·7 square miles with 7,280 tenants and 87,264 plots have been attested. Besides this, the khatians of 151 records were checked, and status figures tabulated for 4,715 holdings in 162 villages and 37 boundary disputes were disposed of. Of the holdings above mentioned, 2,746 or 58 per cent. were found to be held by settled and occupancy raiyats, and 1,863 or 39 per cent. by non-occupancy raiyats. The total cost of settlement up to the end of the year amounted

to Rs. 8,779. Mr. Sunder joined his appointment as Settlement Officer of the Palamau estate on the 17th November 1894, and took up the settlement work proper with Babu Rameshwar Proshad as his assistant. At first the terij, the milan khasra, and other papers were prepared by the Survey Office establishment; but as it was found that this work greatly interfered with the field inspection of the Assistant Superintendent of Survey, it was transferred in January last to the Settlement Officer. By that time, however, a great portion of the work had been done, terij having been prepared for 70 out of 210 villages, milan khasra written for all but 47 and crop statements filled up for all but 48 villages. At first the progress in the attestation work was not satisfactory. Since March last there has been considerable improvement, and it is expected that if the Settlement Officer works up to his present programme the settlement will be completed by the 31st March next.

96. In Singhbhum Mr. J. A. Craven assumed charge of the settlement of the Kolhan estate on the 6th February 1895 and commenced field operations with effect from the 13th idem with 70 trained amins. The training of local men as amins was proceeded with at the same time, and at the end of March last 113 amins were at work in 116 villages. The total area measured up to March was 25,512 acres comprised in 66,134 plots. The daily outturn of work per amin was about 20 bighas, equivalent to 6·6 acres, which is very poor. This is partly due to the men being naturally slow workers and most of them being quite new to the work, partly to sickness, and partly to the difficulty of finding men in the villages willing to chain. There were 114 boundary disputes reported up to the close of the year. These were all made over to the village headmen for decision. The number of cases disposed of by them within the year was 58. There was no opposition against the operations and no excitement anywhere, and it seemed that the people were quite prepared for resettlement of their holdings.

XVIII.—WARDS AND ATTACHED ESTATES.

97. The number of private estates under Government management is shown below:—

District.			Number of wards' estates.	Number of encumbered estates.
Hazaribagh	...	...	1	12
Lohardaga	...	...	1	26
Palamau	...	...	2	6
Manbhum	...	...	3	6
Singhbhum	...	...	...	3
	Total	...	7	53

Six new estates* were taken under management during the past year.

* Hazaribagh—
Dhurguli and Nawadih.
Lohardaga—
Sahijona and Bonnaidoga.
Palamau—
Namudar (six annas) and Majhiwan.

98. In Lohardaga, Barenda, Bakronda, Hatikursi, and Hurhuri, and in Manbhum Pandra ½ all encumbered estates were released from management. The Hensla encumbered estate in Manbhum was cleared of all debts during the year, but has been brought under the Court of Wards during the minority of the proprietor. Except in the case of the Pandra ½ estate and the new estate of Nawadiha, the demands on account of Government revenue and cesses, aggregating Rs. 65,460, were paid in full during the year. The Pandra ½ estate was released on the 20th February 1895, and Rs. 7,074 on account of the instalment of the Government revenue and cesses which fell due in March last has been shown against it as a balance. The Nowadiha estate was brought under management towards the close of the year, and the balance on account of cesses remained unpaid for want of funds. Out of Rs. 68,078 due to superior landlords on account of rents and cesses, Rs. 59,143 were paid. The balance remained unpaid, partly because the parties to whom the amount was payable did not come forward to take payment, partly because the superior landlords refused to take payment, and partly because there were not sufficient funds available.

99. The demands, collections, and balances of rents and cesses due to the estates are shown below:—

District.	Demands.			Collections.			Balance.	Percentage.			Remissions.
	Arrear.	Current.	Total.	Arrear.	Current, including advance for future years.	Total.		Current collection on current demand.	Total collection on total demand.	Of gross collections on current demand.	
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				
Hazaribagh	43,835	1,55,432	1,99,267	19,700	1,41,198	1,60,898	38,095	85·0	80·7	103·5	9,453
Lohardaga ...	79,317	1,22,596	2,01,913	37,949	84,525	1,22,474	77,421	69·9	60·6	99·9	2,106
Palamau ...	4,811	22,029	26,840	3,069	16,771	19,840	6,712	76·1	73·9	90·06	288
Manbhum ...	52,825	1,34,725	1,87,550	32,217	97,709	1,29,926	53,188	72·5	69·2	96·4	4,404
Singhbhum	1,82,216	87,301	2,69,517	44,740	37,727	82,467	1,83,587	43·2	30·5	94·4	3,512
Total	3,63,004	5,22,083	8,85,087	1,37,675	3,77,930	5,15,605	3,59,203	70·4	58·2	98·7	19,763
Total for 1893-94 ...	3,69,717	5,35,431	9,05,148	1,40,700	3,65,414	5,05,114	3,75,141	68·5	55·8	94·3	23,206

The collections were satisfactory in Hazaribagh and Lohardaga, being either over or nearly 100 per cent. of the current demands. In Manbhum and Singhbhum they were fair, being either above or nearly 95 per cent. of the current demands. In Palamau the collections were bad, and the reason alleged is that the establishment was chiefly occupied during the collection season in getting the affairs of the new estate Majhiwan into order. About three-fourths of the annual demand of this estate are payable in kind. In Manbhum the collections would have been better had not much of the time of the manager been taken up by the Begunkudar succession case. In Singhbhum the collections were about 94·4 per cent. on the total current demands against 84·1 per cent. in the previous year, and would have been much better but for the fact that the raiyats of pargana Ambicanagore (Dhalbhum estate) withheld payment in consequence of the negotiations for the sub-lease of the pargana to Rajah Sir Surendra Mohun Tagore, Kt. In Hazaribagh the percentage of total collections on the current demand of the Dhanwar ward's estate was 102·3 against 98·7, and of the encumbered estates 104·1 against 102·4 in the preceding year.

100. The following statement shows the extent to which the debts due by the estates have been paid:—

District.	Debts due at the commencement of the year.	Debts ascertained and accrued during the year.	Total.	Payments.	Amounts provided in the scheme for payment.	Reductions by compromise or otherwise	Balance due at the close of the year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	4,21,681	1,27,763	5,49,444	44,056 670(a)	46,041	...	5,05,889
Lohardaga ...	2,26,764	1,20,374	3,47,138	49,110	46,219	28,192	2,69,836

(a) Antique figures indicate payment of debts by rents assigned.

In Hazaribagh no debts are due by the Dhanwar ward's estate. In the encumbered estates there was a slight deficiency of Rs. 1,886 in the amount of debts paid. In five estates the aggregate payments since the dates of assumption of charges have exceeded the provisions in the schemes by Rs. 13,338, while in five others they have fallen short by Rs. 18,606 in consequence of the non-realisation of anticipated increments in their assets by

resettlements and unforeseen expenditure incurred in litigation. In Lohardaga the payments exceeded the estimate by Rs. 2,891, while in ten estates the aggregate payments since the dates of assumption of charge were in excess of the provisions of the scheme by Rs. 19,602, in two they were in accordance with the schemes, and in twelve they fell short by Rs. 43,629, chiefly because the contemplated sale of portions of some of them in order to liquidate debts has not yet been accomplished.

In Palamau the deficiency of Rs. 4,894 is due to the failure of the Raja of Ramgurh to pay in time his promised contribution to the Gurwah estate. In Manbhum the payments exceeded the estimate by Rs. 26,556, and the aggregate payments in four estates from the dates of assumption of charge exceeded the provisions in the scheme by Rs. 43,686, while on the other hand in three others they fell short by Rs. 10,135. The excess payment of Rs. 43,686 includes Rs. 32,818 paid in advance on account of the Jhalda ward's estate, while the deficiency of Rs. 10,135 includes a sum of Rs. 4,999 by which the payments have fallen short in the Nagarkiari ward's estate. In Singhbhum the payments exceeded the estimates by Rs. 1,418, and the aggregate payments in two estates are in advance of the schemes by Rs. 3,130. In the Dhalbhum estate there was a deficiency of Rs. 12,684 in the total payments, but this was due entirely to the inability of the agents or assignees of certain creditors to whom payments were due to produce the necessary powers-of-attorney or proofs of the transfers of the debts. The estate had an actual cash balance of nearly Rs. 18,000 at the close of the year.

101. The following statement shows the expenditure incurred in the several districts from the funds of ward's and attached estates on schools, dispensaries, maintenance of buildings, and on works of improvement:—

District.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings, and other improvement of property.	Improvement of land and property.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	1,111	265	681	8,105
Lohardaga	570	27	540	161
Palamau	.	...	31	200
Manbhum	1,166	286	1,084	1,570
Singhbhum	761	191	1,950	100
Total ...	3,608	769	4,286	10,136

In Hazaribagh the Dhanwar ward's estate spent Rs. 1,094 as subscriptions to schools. It contributed towards the maintenance of a high school at Giridih and a middle vernacular school at Kharakdiha, and utilised the saving effected by the conversion of the middle English school at Dhanwar into an upper primary school, in the establishment of a number of lower primary schools in different parts of the estate. It maintains no dispensary, but subscribes Rs. 20 per mensem to the charitable dispensary at Giridih. The Bursote encumbered estate contributed Rs. 5 each to the Burhi school and dispensary and Dorunda estate Rs. 12 to the Giridih high school. The sum of Rs. 681 was spent in repairing the dwelling-houses of the proprietors of the Asko, Chackmanjo, Dighi, Dorunda, Marafari, Pursowan, and Satgawan encumbered estates. Rupees 8,105 were spent on the construction of, and repairs to, certain bandhs and irrigation reservoirs in the Dhanwar ward's estate and in the construction of sheds for a market at Dhongali. In Lohardaga the Badla and Nagra encumbered estates paid yearly subscriptions of Rs. 6 each to the middle English school at Lohardaga. A contribution of Rs. 10 per month was paid by the Siri encumbered estate for the maintenance of the Basorgarh English

school in which the two sons of the proprietor have been placed for their education. A sum of Rs. 125 was spent from the funds of the Bassia encumbered estate for the construction of a school-house at Raikera. The Jeria ward's estate contributes Rs. 40 per month towards the maintenance of a middle English school newly started at Jeria. The Kairo, Nagra, Bethal, and Badla encumbered estates paid subscriptions amounting to Rs. 27 to the charitable dispensary at Lohardaga. The sum of Rs. 540 was spent in the construction of a dwelling house for the proprietor of the Burhadih encumbered estate and in the repairs to a temple at Hesog belonging to the Siri estate. The sum of Rs. 161 was spent in repairing a bandh at Murma in the Badla encumbered estate. In Palamau none of the estates paid any subscriptions to schools and dispensaries. Rupees 31 were spent in repairing a bhandar house in the Majhiwan ward's estate. Rupees 200 were spent in the Namoodag encumbered estate in the construction of a well for the supply of good drinking water. In Manbhum in 1893-94 there was a very large outlay from the funds of the Jeria ward's estate for the construction of a dwelling-house for the proprietor and for expenditure on works of improvement. The estate was released in December 1893. The expenditure during the past year was chiefly incurred in effecting the annual repairs to the dwelling-houses of the proprietors whose estates are now under management as well as to the school-houses in the estates. Rupees 1,236 were spent by the Begunkudar ward's estate in the construction of a road from Begunkudar to Jhalda and in repairing two bandhs or tanks, and Rs. 224 by the Hesla encumbered estate in the construction of a drain and in repairing a tank. In Singhbhum the Dhalbhum encumbered estate contributed Rs. 761 as subscriptions to schools, Rs. 191 towards the maintenance of the charitable dispensary at Chaibassa, Rs. 1,950 in repairing the manager's quarters, tahsil cutcherries, and the dwelling-house of the proprietor. It spent Rs. 100 in the construction of a well at Bahragora. In Hazaribagh a sum of Rs. 7,905 was spent from the funds of the Dhanwar ward's estate in the construction of new and the repair of old bandhs or irrigation reservoirs; also Rs. 100 were spent in repairing the roads in the town of Dhanwar. No agricultural improvements were undertaken in any of the encumbered estates for want of funds. In Hazaribagh the material condition of the tenantry in the Dhanwar ward's estate as well as in all the encumbered estates was fairly good. The bhadoi crop was damaged by excessive rainfall, but the loss was more than compensated for by the good outturn of the winter rice and poppy crops. In Lohardaga the condition of the agricultural population was good. The rainfall in August and September, though injurious to the bhadoi crop, was very favourable to the winter rice, which yielded a 16-anna crop. The outturn of the rabi crops was not equally good, as it was estimated only at 10 annas of an average crop. The strained relations between the landlords and tenants of most of the estates continued, and no improvement in this respect is expected until the predial services renderable by the tenants are commuted to money rents. In Palamau the year was a fairly prosperous one, and the tenantry had little to complain of.

In Manbhum there was a bumper rice crop in most of the estates, though the Indian-corn and sugarcane suffered to some extent owing to excessive and continued rainfall. The relations between landlords and tenants were generally satisfactory in all the estates under management. In Singhbhum the material condition of the tenants was fairly prosperous and the relations between them and their zamindars fairly satisfactory. The eldest son of the lunatic proprietor of the Dhanwar estate resides at Bankipur and studies under a tutor specially entertained for the purpose. He is by no means brilliant, but on the contrary dull and morose, and is studious only so long as he is kept beyond home influence. The second son attends the Giridih high English school, and his progress during the year was satisfactory. In Lohardaga the Jeria ward and his second brother are being educated in the Ranchi zillah school, and did fairly well in the last annual examination. In Manbhum the Begunkuder ward is said to have made some progress under the tuition of the mistress appointed for her. The succession suit instituted by the junior widow of her late husband was dismissed by the Sub-Judge of Manbhum in May last, and she has now been confirmed in her possession of the estate. An appeal is likely to be preferred by the junior widow to the High Court on behalf of the

spurious child set up by her. The Jhalda minor's age is 18, and was ordered to attend the Manager's office twice a week, but his frequent and continued absence from the station has prevented his making any progress.

102. The Chota Nagpur Encumbered Estates Act was passed with the object of making provision for the prevention from ruin of members of the land-holding class belonging to ancient families whose estates owing to the indebtedness of the proprietors were rapidly passing into the hands of money-lenders and traders who were aliens to the country and entirely out of sympathy with the people, their customs and institutions and peculiar system of land tenures. The disappearance of these old families who had held their land from time immemorial carried with it in many cases the extinction of the peasantry, or at any rate the lowering of their status and curtailment of their privileges, and therefore these simple folk infinitely preferred the light yoke of the feudal proprietors to which they were well accustomed to the uncertain and heavy burdens which an unfriendly alien sought to impose upon them. It was considered that the passing away of these ancestral properties into the hands of outsiders might involve grave political consequences, and this led to the passing of Act VI of 1876, which has stood the test of 19 years, and though it has certain inherent defects, may be said to have worked fairly well and to have given general satisfaction. The landlords like it because it affords them a means of escape from their embarrassments without any very great loss of prestige, and an opportunity for incurring fresh debts without any immediate serious consequences; for, notwithstanding their disability under the law to enter into contracts—and to their honour it must be said—one of the first things they do on the restoration of their estates is to renew the engagements they have made during their period of disability. Numerous instances can be given of this, so that the chief object of the law in restoring the fortunes of the ancient proprietors is not always attained, but the property and the tenants are nevertheless indirectly benefited by the substitution of good and orderly management for disorder and confusion, and now and then improvements may be possible, though these occasions are rare, as the first duty of the management is the freedom of the estate from debt. The estates are often so much involved that the management has little opportunity or means of undertaking any improvements likely to be of permanent benefit. In some parts of the Lohardaga district in which there has been great tension between the raiyats and their landlords, the protection afforded by the Act has been much prized by the latter, as it has enabled him to transfer the difficulty of collecting his rents to more effective hands.

XIX.—EXCISE.

103.

District.	Number of shops.		License fees.	Duty.	Distillery fee.	Total revenue of—		Remarks.
	This year.	Preceding year.				This year.	Preceding year.	
1	2	3	4	5	6	7	8	9

Druggists' licenses ...	3	3	3	...	...	3	4	
Miscellaneous	...	...	...	...	...	272	225	
Total ...	1,30[illegible]	1,273	8,92,905	92,845	584	9,86,606	9,08,501	

Financially the results were fairly successful, for there has been an increase in the receipts from all sources except ganja and opium. The total demand for the year was Rs. 9,86,606 against Rs. 9,08,501 in the previous year, showing an increase of 8·6 per cent. This increase is partly due to keener competition among the abkars and partly to the good harvest of the year. The bulk of the excise revenue in the Division is derived from country spirits, which contributed Rs. 8,23,775 or 84·5 per cent. of the year's receipt. Ganja contributed 7·7 per cent. and opium 5·9 per cent. The decrease under opium is mainly due to the issue of a smaller quantity of the drug from the Manbhum treasury to the opium vendor of the Gangpur Tributary State. The revenue from ganja shows a net decrease of Rs. 248, due to the consumption of a smaller quantity of the drug in the districts of Lohardaga, Palamau, and Singhbhum. The outstill system prevails throughout the Division except in a small area in the Giridih subdivision, where owing to the existence of a large mining population the distillery system is maintained. The two sanctioned pachwai shops in Hazaribagh remained unsettled during the year. The difficulty of settling them is due not so much to the non-consumption of the liquor in the district as to the practice of home-brewing by the Sonthals. During the year four of them were for the first time prosecuted and convicted for manufacturing pachwai illicitly. The result was that a large body of Sonthals assembled together and loudly protested against these convictions and drew up a petition to Government praying for the privilege of brewing pachwai in their homes which is enjoyed by other aboriginal tribes in the Division. The matter is now under the consideration of Government. I consider that the Sonthals and other aborigines of the district should be allowed the same privileges as regards pachwai as their brethren enjoy in the districts of Lohardaga, Manbhum, and Singhbhum. So far as can be ascertained from old records and other sources the Sonthals are by no means new in Hazaribagh, but have been resident there a very long period.

104. There were altogether 451 cases detected in the Division during the year for the infringement of the Excise and Opium laws. Out of these, 73 cases were detected in Hazaribagh, 189 in Lohardaga, 76 in Palamau, 35 in Manbhum, and 68 in Singhbhum. The police detected 251 cases and the Excise officers 200. Over 73 per cent. of the cases in Lohardaga were purely pachwai cases, while cases of illicit distillation and sale of country spirits were very few (only 7) in number, and cases of smuggling of illicit opium were altogether absent. It is difficult to understand why it should be easier to detect the unlawful manufacture of pachwai than cases of illicit distillation of country spirit. The licensed vendors of this as well as the district of Hazaribagh cannot complain of severe treatment when there were only six prosecutions in one district and two in the other for breaches of the conditions of their licenses.

XX.—STAMPS.

105.

District.	1893-94.				1894-95.			
	Receipts from stamps of all kinds.	Miscellaneous receipts.	Duty and penalty.	Total.	Receipts from stamps of all kinds.	Miscellaneous receipts.	Duty and penalty.	Total.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh	1,01,381	1,267	614	1,03,208	99,732	1,267	783	1,01,728
Lohardaga	1,24,402	1,730	627	1,26,759	1,17,960	1,530	519	1,20,009
Palamau	29,087	367	242	29,696	30,472	330	531	31,333
Manbhum	1,57,358	2,038	516	1,59,912	1,63,636	2,077	607	1,66,320
Singhbhum	17,822	465	58	18,345	17,365	442	52	17,859
Total ...	4,29,990	5,867	2,057	4,37,914	4,29,165	5,646	2,432	4,37,243

The gross revenue of the Division amounted to Rs. 4,37,243 against Rs. 4,37,914 in the previous year, and the total charges incurred to Rs. 10,659 against Rs. 10,791 in 1893-94, as detailed below:—

		1893-94.	1894-95.
		Rs.	Rs.
Hazaribagh	...	2,210	2,109
Lohardaga	...	2,650	2,797
Palamau	...	733	711
Manbhum	...	4,343	4,763
Singhbhum	...	855	279
Total	...	10,791	10,659

The net revenue thus amounted to Rs. 4,26,584 against Rs. 4,27,123 in the previous year, showing a decrease of Rs. 539, which is mainly attributed to the falling off in the institution of civil and rent suits in the district of Lohardaga.

106. The following table shows the number of cases in which deficient stamp duty and penalty were levied under sections 34 and 37 of the Indian Stamp Act during the past two years:—

District.	Number of cases.	
	1893-94.	1894-95.
1	2	3
Hazaribagh	84	89
Lohardaga	72	68
Palamau	43	59
Manbhum	57	50
Singhbhum	7	10
Total ...	263	276

There has been a net increase of 13 cases owing to the stricter observance of the Stamp Law in the districts of Hazaribagh and Palamau. There were 31 criminal prosecutions for infringement of the provisions of the Indian Stamp Act against 18 in the preceding year. The number of persons brought to trial was 37 against 13. The fines imposed amounted to Rs. 216 against Rs. 92 in the previous year.

XXI.—INCOME-TAX.

107. The administration of the income-tax has been fairly successful. The final demand was Rs. 93,264 assessed on 4,437 persons against Rs. 87,243 on 4,350 persons in the previous year, an increase of Rs. 6,021 and 87 assessees, shared by all the districts, except Singhbhum, where there was a decrease of Rs. 1,016 and 52 assessees, due to the exemption of persons improperly assessed during the previous year. The aggregate demand, including arrears, penalties, and costs, &c., amounted to Rs. 97,630 against Rs. 91,074 in the previous year. The gross collections were Rs. 94,609. Excluding Rs. 425 on account of excess collections and advance payments, Rs. 1,367 on account of arrears, and Rs. 1,172 on account of penalties, costs, &c., the net collections amounted to Rs. 91,645 against Rs. 85,116 in the previous year. The balance outstanding at the close of the year was Rs. 3,446.

108. The number of persons originally assessed was 4,508, of whom 526 or about 11·7 per cent. filed petitions of objection against 13 per cent. in the preceding year, while the percentage of objections rejected to those preferred was 75·5 against 67·9. The amount remitted on objections was Rs. 2,773, which

represent 2·4 per cent. of the amount (Rs. 96,037) originally assessed against 3·8 per cent. in the preceding year. Of the Rs. 2,773 remitted, Rs. 2,627 represent remission allowed by Collectors and Rs. 146 remission allowed by the Commissioner. Of the 4,508 persons originally assessed, 71 were exempted on revision, and the percentage of exemption was 1·44 against 2·2 in 1893-94. The majority of the assessees who paid tax during the year belonged to class I, their incomes ranging from Rs. 500 to Rs. 750. The highest amount of tax (Rs. 4,308) was paid by an assessee in Manbhum on a bonus derived from the leasing out of sub-soil rights.

109. No serious complaint against the tax or the mode of its assessment reached me from the districts of Hazaribagh, Lohardaga, Manbhum, and Singhbhum, and the people are not likely to complain, as they seem to be on the whole taxed fairly. In Palamau, however, the late Deputy Commissioner, Mr. Bright, during his cold-weather tour, made a considerable number of local enquiries and found some hard cases. This was especially the case with *ahirs*, who are peculiarly liable to lose their income by loss of cattle from disease. The levy of the tax on purely pastoral sources should be made with very great care, and only where the income is well over the minimum assessable income. It is said that some of the Palamau *ahirs* have left the district for Sirguja for fear of tax—a result which, if true, is to be deplored. Much of this bad result in Palamau is undoubtedly due to the inexperience of the new assessor who was perfectly new to the work, and naturally enough made many mistakes in assessment. He is, however, reported to be a hardworking officer who is likely to turn out fully up to the average of assessors. The scheme of employing one assessor in the two districts of Manbhum and Singhbhum has financially proved a success in reducing the percentage of charges, though it will take time to satisfactorily gauge its influence on administraton.

XXII.—MONETARY ARRANGEMENTS.

110. The following table gives the statistics of receipts and disbursements in the district treasuries during the last two years:—

Treasury transactions.

District.	Receipts.		Disbursements.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	18,16,747	13,52,004	17,02,914	13,99,605
Lohardaga	16,22,689	15,13,702	15,37,817	15,97,120
Palamau	6,02,963	6,38,647	6,31,235	6,35,160
Manbhum	15,97,781	17,95,046	15,71,654	17,81,876
Singhbhum	7,10,277	7,70,721	7,17,777	8,31,949
Total ...	63,50,457	60,70,119	55,29,380	62,45,710

In Hazaribagh the transactions in the district treasury during 1893-94 were abnormal, owing to the sale of a number of villages belonging to the Karharbari encumbered estate. In Lohardaga the fluctuation in the receipts is owing to the transfer of a lakh of rupees from the currency chest into the treasury during 1893-94. It is also partly due to the falling off in the stamp revenue. The increase in the disbursements in this district is owing to the increase in the military expenditure and in the remittances sent out to other treasuries. In Palamau the increase in the receipts is chiefly due to increase in the revenue from Excise, Stamps, Post Offices and the District Road Fund. The figures representing treasury receipts and disbursements in this district for 1893-94 shown in the previous report were incorrect. The table above shows the correct figures. In Manbhum the increase in the transactions is owing mainly to large remittances having been received from different treasuries to meet the demands of the contractors working on the Jharia line and

to payment of supply bills. It is also partly owing to increase in the receipts under heads "Post Office," "Stamps," "Excise," and "Cesses." As Manbhum is centrally situated with reference to the adjoining districts and has railway communications, the Accountant-General keeps there, for the sake of convenience, a reserve stock in silver for remittances elsewhere on occasions arising.

111. The following table compares the transactions in currency notes:—

District.	Receipts.		Issues.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	3,86,755	3,58,470	3,46,990	4,23,020
Lohardaga	3,62,140	4,61,765	3,59,260	4,54,000
Palamau	2,96,388	4,01,745	2,99,180	2,92,550
Manbhum	5,21,645	9,84,325	4,85,945	9,20,585
Singhbhum	2,40,395	2,65,983	2,61,582	2,58,745
Total ...	18,07,323	24,72,288	16,17,957	23,48,900

There has been considerable increase in the transactions in the district of Manbhum. The increase in receipts is due to the briskness of the trade in lac, which brought into the district a large number of currency notes. The increase here in the issues is chiefly due to the increase in remittances made to the reserve treasury by reason of the accumulation of a large number of currency notes. Such remittances amounted to Rs. 4,70,970 in the past against only Rs. 1,65,990 in the preceding year.

Savings Bank.

112. The following table shows the transactions in the Postal Savings Bank:—

District.	1893-94.		1894-95.	
	Amount deposited.	Amount withdrawn.	Amount deposited.	Amount withdrawn.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	65,024	39,117	61,088	50,772
Lohardaga	53,241	42,445	59,202	4 6243
Palamau	22,534	9,237	23,976	13,310
Manbhum	76,131	63,951	71,464	64,850
Singhbhum	33,654	23,837	43,494	40,458
Total ...	2,40,584	1,78,588	2,49,224	2,16,633

In Hazaribagh and Manbhum the decrease in the deposits and the increase in the withdrawals are probably due to the reduction in the rate of interest from $3\frac{3}{4}$ to $3\frac{1}{8}$ per cent. The increase in the transactions in the remaining districts merely indicate that the advantages of the Savings Bank are becoming better known and appreciated.

Money order.

113. The following table exhibits the money-order transactions:—

District.	1893-94.		1894-95.	
	Issued.	Paid.	Issued.	Paid.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	6,48,560	5,88,336	6,64,913	6,71,612
Lohardaga	7,78,157	3,84,853	7,61,917	4,23,180
Palamau	2,24,969	1,51,290	2,01,246	1,54,254
Manbhum	6,76,776	3,08,617	7,32,859	2,86,641
Singhbhum	5,14,690	2,18,521	5,59,771	2,45,167
Total ...	28,43,152	16,51,617	29,20,706	17,80,854

There has been a considerable increase in the amount of money-orders paid in the districts of Hazaribagh and Lohardaga. It is owing to large remittances in favour of coolie recruiters and agents working in those districts. The decrease in the amount of money-orders issued in the district of Lohardaga is said to arise from the fact that the people remit currency notes in registered covers. No special reason can be assigned to the fluctuations in other districts.

Banking Association.

114. The Chota Nagpur Banking Association in Hazaribagh with its head-quarters at Hazaribagh and branch offices at Giridih and Chatra continued to work during the year. The nominal capital of the Association, which is registered under Act VI of 1882, is Rs. 50,000, divided into 5,000 shares of Rs. 10 each. The paid-up capital at the close of the year was Rs. 38,110 and the amount in the reserve fund Rs. 22,665, making a total of Rs. 60,775. The business of the Association is chiefly confined to money-lending and cashing and issuing bank cheques. The total income of the year amounted to Rs. 26,984 and the expenditure to Rs. 17,924, giving a net profit of Rs. 9,060, out of which Rs. 5,716 were distributed amongst the share-holders as dividends and Rs. 3,344 carried to the reserve fund. The amount of loans granted was Rs. 94,042. The deposits received amounted to Rs. 2,09,360 and the refunds of deposits to Rs. 1,65,449. There is no other Banking Association in the Division.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

115. The Jharia extension of the East Indian Railway was completed during the year, and the the line opened for coaching and goods traffic with effect from the 24th May 1894. The Chanch branch is still under construction, and will probably be opened during the current year. Another branch leaving the Katras line at Jhariajoha and going down to the Damuda river was started a few months ago, and the rails are now down as far as the village of Jharia through which it passes. The object of this new branch is to tap the southern portion of the Jharia coal-fields. The Bengal-Nagpur Railway Company kept better time than previously. Since the 23rd April last they have added one "up" and one "down" train to run from Asansol to Purulia.

116. Thirty-seven bandhs or irrigation reservoirs were constructed, repaired, or improved in the Government estates in Hazaribagh at a cost of Rs. 1,767. Two pucca wells and two pucca basins for two natural springs were also constructed in them at a cost of Rs. 801 for the supply of good drinking water.

117. In Lohardaga three tanks in the Government estates were improved during the year at a total cost of Rs. 1,125, and Rs. 431 spent in purchasing corrugated iron rings for the protection from fouling of certain natural springs and in filling up ditches in Government villages.

118. In the Palamau Government estate Rs. 805 were spent during the year in the construction of wells and village lanes, and Rs. 2,465 in the construction of 17 irrigation reservoirs.

119. In Manbhum Rs. 2,500 were specially sanctioned by the Board of Revenue for expenditure on the project of the Baghmundi Mahta-Balarampur feeder road which passes through the temporarily-settled Government estate of Mahta and includes the construction of some bandhs, four of which lie within the Mahta estate. The entire amount was made over to the Road Committee of the district and was spent by them in the re-excavation of the four bandhs in Mahta referred to above with embankments, culverts, and irrigation outlets. A further sum of Rs. 3,000 was spent in this district in the re-excavation of three other bandhs in the temporarily-settled estates of Mahta and Kailapal. The enlargement of the Madhub bandh in the town of Purulia in this district undertaken by the Municipality was completed during the year of report at a total cost of Rs. 12,760.

120. In Singhbhum Rs. 1,718 were spent in completing the wells in certain Government villages started in previous years and in the partial construction of three new wells in certain others. The sites of these wells were generally selected at places where during the weather the scarcity of water is severely felt both by resident raiyats and travellers. Two new bandhs were also constructed and five old ones repaired in the Government villages in this district during the year at a total cost of Rs. 1,375.

XXIV.—COMMUNICATIONS.

Public Works Department road.

121. The following roads in the Division are in charge of the Public Works Department:—

(i) Giridih-Dumri road.
(ii) Grand Trunk road.
(iii) Bogodar-Hazaribagh road.
(iv) Burhi-Hazaribagh road.
(v) Hazaribagh-Ranchi road.
(vi) Ranchi-Purulia road.
(vii) Ranchi-Chaibassa road.
(viii) Chord line between Aimandih and Churra in Manbhum.

The Giridih-Dumri road in Hazaribagh is in fair condition, but the surface of the stone causeway across the Burrakar river on the 9th mile of the road is very rough and needs repairs, as do the crests of the two ramps leading to to the causeway. The large rock boulders at the head of the Burrakar ferry crossing and in the bed of the river cause much damage to the ferry boats every year. Last year an attempt was made to remove the rock boulders by blasting, and half the work was done. The Grand Trunk road which passes through the districts of Hazaribagh and Manbhum has a metalled surface 9 feet wide in the middle of a crest 30 feet wide. The Deputy Commissioner of Manbhum reports that this road is not in as good condition as it was some years ago. It has been cut up in places, and 2 miles of it between Nirsa and Gobindapur are very bad. The Bogodar-Hazaribagh road, 32 miles long, has a crest 23 feet wide, 9 feet of which are gravelled in the centre. The 31st mile of this road near Hazaribagh should be metalled with quartz, as the present gravelled surface cannot resist heavy traffic, and during the rainy season this portion of the road becomes almost impassable. The metalled surface of the Burhi-Hazaribagh road needs renewal in several places. In other respects the road is generally in fair order. The Hazaribagh-Ranchi road has been metalled throughout and is in fair condition. A stone causeway at the place where the road crosses the Damuda river is being constructed, but the benefit which it will confer on the traffic is uncertain; if it be a fact that it will only be serviceable for about three months in the year when the water is low. When completed, it will facilitate traffic between Ranchi and Hazaribagh and Hazaribagh and Gola. The large rock boulders here, too, at the heads of the ferry crossing and in the bed of the river need be blasted and removed as they caused greater damage here to ferry boats than at the Burrakar crossing. The Ranchi-Purulia road, the Ranchi-Chaibassa road and the Aimandih-Churra road were in fairly good order. The third section of the Ranchi-Chaibassa road from Chakradharpur to Bandgaon was opened out for traffic and two culverts on the first section of it were renewed during the year.

District roads. Original works.

122. In Hazaribagh Rs. 2,169 were spent during the year in the construction of five inspection bungalows and one roadside well.

123. In Lohardaga a project for the construction of the Bero-Toto road, 35 miles long, was taken in hand at an estimated cost of Rs. 12,638. Nearly the whole of the earthwork was executed during the year, and the bridges were under construction when the year closed. The expenditure on this project up to the 31st March amounted to Rs. 4,603. The approaches to four unbridged rivers in this district, namely, two on the Ranchi-Palkot road and two on the Lohardaga-Sambalpur road, were rendered easy at a total cost of Rs. 960. An inspection bungalow with kutcha-pucca masonry walls and terraced roof and outhouses was also constructed at Jeria on the 33rd mile of the Ranchi-Palkot road in this district at a cost of Rs. 1,399. The zamindar of Biru, Babu Gajraj Singh, in this district opened out about 80 miles of road within his zamindari, which is very rocky and hilly. This has been a great boon to the people of this part of the district, and the liberality and public spirit of Babu Gajraj Singh in providing the community with roads cannot be too highly commended.

124. In Palamau a 20-feet bridge of masonry abutments and sâl timber roadway over the Okraha nala on the Daltonganj-Moharajganj road was constructed during the year at a cost of Rs. 1,019. Thirty-five culverts, namely, 17 on the Daltonganj-Moharajganj road, 17 on the Daltonganj-Ranchi road, and one on the Daltonganj-Hariharganj road, were also constructed at a total cost of Rs. 4,418. The first section of the Garwah-Sirguja road, for which a special grant of Rs. 13,000 was made by Government from the Provincial revenue, was constructed up to the 9th mile. The expenditure on this road during the year amounted to Rs. 6,085. The Committee also provided the staging bungalow at Manka with an outhouse at a cost of Rs. 351, and the ferry on the Amanat river on the 16th mile of the Daltonganj-Sherghati road with a boat at a cost of Rs. 141. The construction of the proposed extension of Daltonganj-Hosseinabad road to the banks of the Sone at Dangwar could not be taken in hand owing to the land acquisition proceedings not having been completed. Rupees 1,890 was made over by the Committee to Collector for the acquisition of land for this road.

125. In Manbhum Rs. 1,306 were spent during the year towards the construction of the Bengal-Nagpur Railway feeder road from Balarampur to Bagmundi, the total estimated cost of which is Rs. 17,056. The total amount spent on this road up to the close of the year amounted to Rs. 2,958. Another feeder road from Chandil to Bundu is in contemplation and has been partially surveyed.

126. In Singhbhum the total expenditure on account of original works amounted to Rs. 5,084, namely, Rs. 2,546 in gravelling heavy portions of roads, Rs. 166 in cutting the ramps of nalas on the Chaibassa-Amda road, Rs. 366 for a diversion on the Chaibassa-Subarnarekha river road, Rs. 1,038 in completing the Hari nala bridge on the Chaibassa-Bend road, and Rs. 368 on other petty works.

Repairs of district and village roads.

127. In Hazaribagh there are altogether 46 district roads, 35 out of which aggregating 544 miles in length were repaired during the year at a cost of Rs. 29,945. Thirty-four village roads aggregating 187 miles in length were also maintained at a cost of Rs. 7,515. In Lohardaga Rs. 11,096 were spent on the repairs of 23 district roads and Rs. 6,218 on that of village roads. In Palamau the sums spent on the repairs of district and village roads amounted respectively to Rs. 9,437 and Rs. 80. The district roads repaired here were 16 in number. In Manbhum Rs. 14,524 were spent on the Chass-Goolbera and the Purulia-Burrakar Provincial roads transferred by Government to the charge of the Road Committee of the district on an annual grant of Rs. 13,000. A further sum of Rs. 22,572 was spent by the Road Committee in maintaining 406 miles of other roads. In Singhbhum 430 miles of district and 51 miles of village roads were maintained during the year at the cost of Rs. 4,941 and Rs. 227 respectively.

Arboriculture.

128. In Hazaribagh 750 new trees were planted to fill up gaps in existing avenues and 4,442 old ones maintained on the road-sides. The total expenditure under the heading amounted to Rs. 2,275 in the past against Rs. 682 in the preceding year. The

nursery at Hazaribagh continued also to be maintained. It contained 2,507 plants when the year closed.

129. In Lohardaga 1,449 seedlings of mango, jack, karanj, teak, jamun, &c., were planted along different roads to fill up gaps, and the existing roadside trees attended to throughout the year, and 1,550 bamboo gabions of approved type and some of ordinary kind were supplied to plants. From the nursery at Ranchi 1,027 seedlings were raised during the year. The total expenditure on arboriculture amounted to Rs. 1,499.

130. In Palamau the total number of roadside trees was 1,700 in the past against 1,400 in the preceding year, and the number protected by substantial bamboo gabions was 933 against 408. The Road Committee's nursery here contained 200 seedlings.

131. In Manbhum the work done under this heading was generally restricted to the maintenance of the nursery seedlings and young trees in the Town Hall compound and filling up gaps in the avenues in some of the station roads at Purulia.

132. In Singhbhum varieties of young plants were brought from the Botanic Gardens at Sibpur and planted along the roadsides. These grew up well.

Ferries.

133. The following table shows the receipts from the ferries in the Division during the last two years:—

District.	Name of ferry.	Receipts. 1893-94.	Receipts. 1894-95.
1	2	3	4
		Rs.	Rs.
Hazaribagh ...	Damodar ...	500	651
	Burrakar ...	851	870
Palamau ...	11 Sone ferries ...	946	1,350
Manbhum ...	Hijooli ...	618	522
	Chinakuri ...	168	309
	Telkupi ...	2	4
	Sarisakuri ...	5	11
	Manikai ...	53	43
	Total ...	3,143	3,760

The new boat which was purchased at a cost of Rs. 457 for the Burrakar ferry in Hazaribagh was brought into use. Both the ferries in this district worked with fair regularity, but the farmer of the Damodar ferry had to be fined for delays on three occasions in crossing the mails. There has been no accident at either ferry. In Lohardaga and Singhbhum there was no public ferry. In Palamau the 11 Sone ferries fetched Rs. 1,350 during the past against Rs. 946 during the preceding year, while the six ferries in Manbhum fetched Rs. 889 against Rs. 846.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

134. The Act is not in force in this Division.

XXVI.—EDUCATION.

135. The following statement compares the number of schools in the Division and pupils during the past two years:—

Public Institution.	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Secondary Instruction.				
High English schools	7	1,303	8	1,372
Middle " "	32	2,130	36	2,373
" vernacular	30	1,865	31	1,815
Primary Instruction.				
Upper primary	110	5,234	129	5,903
Lower "	1,886	52,147	2,058	54,168
Special or technical	44	311	47	395
Female	136	3,633	166	3,813
Total of public institutions ...	2,245	66,623	2,469	69,8[illegible]9
Private Institution.				
Advanced—				
Teaching Arabic or Persian	27	350	33	367
" " Sanskrit	13	147	13	122
Elementary—				
Teaching vernacular only or mainly	84	594	64	472
" Koran only	3	89	4	117
Other schools	...	...	1	21
Total of private institutions ...	127	1,880	115	1,099
Grand Total ...	2,372	67,803	2,584	70,938

These figures speak for themselves and show that while public institutions have increased there has been a decline in the number of elementary private schools giving instruction in the vernacular. The increase in the number of high schools is owing to the opening of a new school of this class in the town of Purulia.

136. The results of the last Entrance examination were excellent, as out of 63 candidates 50, or nearly 80 per cent., passed against 53·6 per cent. in the previous year. In the Chaibassa school all the three candidates who appeared in the examination passed, one being placed in the first division, one in the second, and the last, an aboriginal Christian boy, in the third division. The two other boys have obtained Government scholarships, one taking the first place in the list of successful candidates in the Division, and thus securing a second grade junior scholarship of Rs. 15 per mensem. This satisfactory result in a school situated in an out-of-the-way place like Chaibassa reflects very great credit on the head-master, Babu Kedar Nath Sen, M.A. All the six candidates who appeared from Palamau passed, viz., one in the first, three in the second, and the rest in the third division. The school is doing well under the present head-master. Out of the 17 boys who competed from the Hazaribagh

and Giridih schools ten passed. Of the ten candidates who appeared from the Ranchi zilla school in Lohardaga, nine were successful. This excellent result is most creditable to the head-master, Babu Kesab Lal Basu. In Manbhum out of 27 candidates sent up 22 were successful.

137. The number of middle English schools has increased from 32 to 36 and their pupils from 2,130 to 2,373. The increase of four in the number of schools is the result of the opening of three new schools in Lohardaga, the conversion of two middle vernacular schools, one in Palamau and the other in Manbhum into middle English schools, and the abolition of one school in Hazaribagh. Of the 36 middle English schools which existed in the Division, only 21 sent up 62 candidates for the last middle scholarship examination, of whom 25 from 16 schools were successful.

138. There has been an increase of one school and a decrease of 50 pupils in the middle vernacular class. Of the 31 middle vernacular schools, 13 are departmental, 12 aided, and the rest unaided. The departmental schools are thus distributed,—4 in Hazaribagh, 4 in Lohardaga, one in Palamau, 3 in Manbhum, and 5 in Singhbhum. Of the 12 aided institutions, one is in Lohardaga, 9 in Manbhum, and 2 in Singhbhum. The number of candidates who competed for the middle vernacular examination was 103, of whom 57 passed.

139. Upper primary schools have advanced from 110 to 129 and their pupils from 5,224 to 5,903. The increase of 19 schools is the result of increases of 7, 8, 6, and 1 schools in Lohardaga, Palamau, Manbhum, and Singhbhum, respectively, and a decrease of 3 in Hazaribagh. The number of candidates who competed in the upper primary scholarship examination was 208, of whom 71 or 34·1 per cent. passed against 42·6 per cent. in the previous year.

140. Under the lower primary class there were 2,058 schools with 54,160 pupils against 1,886 and 52,147 pupils in the previous year. The increase of 172 schools and of 2,021 pupils was the result of increases of 6 schools and 33 pupils in Hazaribagh, 188 schools and 3,506 pupils in Lohardaga, 14 schools and 241 pupils in Palamau, and of decreases of 21 schools and 535 pupils in Manbhum and 15 schools and 1,226 pupils in Singhbhum. The gain in Lohardaga is satisfactory. One thousand five hundred and two candidates competed in the last lower primary examination, of whom 711 or 47·3 per cent. were successful against 42·5 per cent. in the previous year.

Female education.

141. The number of girls' schools advanced from 136 to 160 and the number of pupils from 3,633 to 3,813. This increase is the result of increases of 39 schools and 760 pupils in Lohardaga and 3 schools and 54 pupils in Palamau, and of decreases of 1 school and 18 pupils in Manbhum and 19 schools and 509 pupils in Singhbhum. In Hazaribagh the number remained unchanged, but the number of pupils declined from 1,048 to 941. Thirteen girls competed in the last upper primary scholarship examination, of whom 6 passed and 1 only obtained scholarship. By far the best upper primary girls' school in the Division is the Ranchi Bengali girls' school, from which 2 girls competed in the last upper primary scholarship examination, both of whom passed, one being placed in the second and the other in the third division. This is the more creditable inasmuch as both girls passed the lower primary scholarship examination in the previous year, and had thus only about eight months to go through the upper primary course, which ordinarily takes other pupils two years to finish. In the lower primary scholarship examination 63 girls competed, of whom 56 were successful and 7 obtained scholarships. Six of the girls passed from the Ranchi Bengali girls' school, viz., 5 in the first and one in the second division.

142. As regards the progress of female education in Palamau, Mr. Bright has recorded the following remarks:—"Female education is, of course, in its infancy, and there is a good deal of feeling against it. The theory put forward —and there is much in its favour—is that at present education of the females makes them less useful at home, as it makes them disinclined to content themselves with the quiet household duties, which form so important a part of the home-life of a native woman of this country. No doubt this should not be so, but it is undoubtedly a fact, and this drawback can only disappear when education has spread much more widely than it has at present in this

district." With a view to encourage female education he has, however, arranged for special rewards, both to successful teachers and pupils, but he is afraid that it will take time before it becomes popular.

Special or technical education.

143. The number of technical schools has advanced from 44 to 47 and their pupils from 311 to 395. This increase is shared by Lohardaga, Palamau, and Singhbhum. In Manbhum there was a decrease of 2 schools, while in Hazaribagh the number remained unchanged. The roll number of the Ranchi industrial school on the 31st March last was 29 against 27 in the previous year. The school credited into the Lohardaga treasury on account of sale-proceeds of manufactured articles Rs. 1,516 against Rs. 1,139 in the previous year. It continues to be efficiently managed and supervised under its Superintendent, Mr. D'Silva, and Secretary, Babu Raicharan Ghosh. During the past year two pupils were sent from the school to the Sibpur College to finish their training there.

Expenditure.

144. The cost of education during the past two years is compared below:—

Class of schools.	1893-94. Expenditure from—			1894-95. Expenditure from—		
	Provincial revenue.	Municipal fund and private sources.	Total.	Provincial revenue.	Municipal fund and private sources.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Secondary	27,383	52,551	79,884	30,103	53,895	83,998
Primary	48,862	72,769	1,21,631	52.801	86,787	1,39,588
Female	6,269	9,074	15,343	5,877	7,958	13,835
Special	7,240	2,019	9,259	8,227	1,991	10,218
Scholarships	6,942	502	7,444	6,128	526	6,654
Buildings	4,283	1,608	5,891	3,437	2,402	5,839
Furniture and apparatus ...	876	149	1,025	1,817	384	2,201
Miscellaneous	9,045	524	9,569	8,768	15,672	24,440
Superintendence ...	37,881	288	38,169	40,256	273	40,529
Total ...	1,48,731	1,39,484	2,88,215	1,57,414	1,69,888	3,27,302

There has been an increase of Rs. 39,087 in the total educational expenditure. The increase is due to grade increments and increase in the pay of teachers, additional primary grants of Rs. 3,000 and Rs. 2,000 in Lohardaga and Manbhum, repectively, and sanction of special grants for repairs of buildings and purchase of furniture, &c. It is satisfactory to note that while the contribution from Provincial revenues has been raised by only 5·8. per cent., that from municipal and private sources has increased by 21·8 per cent.

145. An important feature in the educational reports is the continued increase in the number of primary schools which are especially wanted in a country where the population is mostly agricultural, and the addition of 191 schools following on that of 89 in the previous year shows a result which must be regarded as extremely satisfactory, having regard to the opposition which schools receive from parents whose children's services are required for tending cattle and tilling the ground. There has also been a further advance in female education, but from a school-master's point of view the matter for most congratulation is the unqualified success of the boys in the zilla schools at the Entrance examination, a result which the head-masters very naturally plume themselves on as testimony to their excellent system of teaching. During my tour last cold season I had occasion to pass through a portion of the Raigurh State, and was much struck by the superiority of their village schools over those in Chota Nagpur and other parts of Bengal. The school-houses are altogether much cleaner and neater and the walls are ornamented with coloured drawings of animals and plants, the work of the boys and

masters, and by the excellent plan adopted some knowledge of the fauna and flora of the country was imparted under the guise of practical instruction in the art of drawing. The boys are also carefully trained in physical exercises and drill, *kusrat* and *kawayat*, and the performances they exhibited on the play-ground were of no mean order. On my arrival the boys were drawn up in line outside the school, and after telling off by numbers sang "God save the Queen" in a manner which did more credit to their loyalty than their musical attainments.

The aboriginal boys of the Ranchi Anglican Mission have come very much to the front in the matter of foot-ball and hockey. They lately had the pluck to enter into competition in the latter game with the European clubs in Calcutta for the Beighton Challenge cup, and though they were beaten it was only by a very narrow margin. The Revd. E. H. Whitley, who conveyed the Ranchi team to Calcutta, provided object lessons for them in the shape of visits to the mint, a P. and O. vessel, the Zoological Garden and a trip down the river. A course of instruction of this kind cannot fail to be beneficial.

XXVII.—DISPENSARIES AND HOSPITALS.

146. There are dispensaries in the towns of Hazaribagh, Chatra, Burhi, and Giridih in the Hazaribagh district, at Ranchi and Lohardaga in Lohardaga, at Daltonganj in Palamau, at Purulia, Jhalda, Raghunathpur, Barrabazar, Gobindpur, Pandra, Jheria, and Topechanchi in Manbhum, and at Chaibassa in Singhbhum. No new dispensary or hospital was opened during the year.

147. The total income of these dispensaries amounted to Rs. 19,195 made up of Rs. 8,285 from municipal funds, Rs. 8,308 from private subscriptions, and Rs. 2,602 supplied by Government, against Rs. 7,252, Rs. 9,288, and Rs. 1,748, respectively, from the same sources in the previous year. The Government contribution consists of the diet expenses in police cases and the cost of registers and forms. The in-patients and out-patients numbered 1,311 and 52,221, respectively, against 1,386 and 50,543 in 1893-94, the daily average being 53·71 in-patients and 443 out-patients against 60 and 418·85 in the previous year. The average cost of diet per in-patient was about the same as last year, namely, one anna and nine pies. The total expenditure was Rs. 18,178 against Rs. 16,903 in 1893-94.

148. The dispensaries at Hazaribagh and Chatra are managed by the municipality, and those at Burhi and Giridih by local committees. A second grade Civil Hospital Assistant on Rs. 35 was in charge at Hazaribagh, except from 24th January to 16th May 1894, when a second grade Assistant Surgeon performed the duty. Rupees 1,218 represent both income and expenditure. One hundred and thirty-seven in-patients and 4,878 out-patients were treated against 155 and 4,123, respectively, in the previous year. Eleven major and 146 minor operations were performed during the year against 16 and 198 in 1893-94.

149. A local native doctor was in charge of the dispensary at Chatra throughout the year, who received Rs. 35 a month from municipal funds and Rs. 10 per month from Government for looking after police patients of four police-stations. The total income of the dispensary was Rs. 1,049 against Rs. 801 in 1893-94. During the year 22 in-patients and 4,426 out-patients were treated against 25 "in" and 4,182 "out" patients in the preceding year. The number of minor operations was 109 against 77 in 1893.

150. The Burhi dispensary was in charge of a local native doctor throughout the year, who was in receipt of a monthly salary of Rs. 30, half of which is contributed by Government. The total income amounted to Rs. 1,161 and the expenditure to Rs. 1,086. There were 2,137 out-patients against 1,791 in 1893-94. No indoor relief was given in the dispensary, but 76 minor operations were performed against 57 last year.

151. The dispensary at Giridih was in charge of the Assistant Surgeon in medical charge of the Giridih subdivision, who receives an allowance of Rs. 20 per mensem from the dispensary fund. The total income of the dispensary amounted to Rs. 1,747 and the total expenditure to Rs. 910. The number of out-patients treated was 7,479 against 6,057 in 1,893. No indoor

relief was given, neither have any arrangements yet been made for opening an indoor ward. One major and 174 minor operations were performed against one major and 130 minor operations in the previous year. Besides this dispensary, there are four other private dispensaries in and about the town of Giridih, three of which are maintained by the East Indian Railway Company, the Bengal Coal Company, and the Raniganj Coal Association for the benefit of their employés. The fourth, which is open to the public, is managed by the Scotch Mission at Pachamba. There is also another private dispensary at Hazaribagh which is supported by the Dublin Mission. It has a large highly-educated European staff, and affords a large amount of assistance, especially to the aboriginal and other low-caste inhabitants.

152. In Lohardaga the total income of the charitable dispensary at Ranchi was Rs. 2,523, the major portion (Rs. 2,048) of which was contributed by the local municipality, Rs. 401 by private subscriptions and endowments, and Rs. 74 by Government. Out of Rs. 74 contributed by Government, Rs. 54 were for the diet expenses of in-patients in police cases and Rs. 20 for registers and forms. The total expenditure was Rs. 2,523 against Rs. 2,611 in the previous year. One hundred and seventy-seven in-patients and 4,688 out-patients were treated against 175 and 5,122, respectively, in 1893-94. It was a healthy year in Ranchi, hence the decrease in the number of out-patients. The dispensary is in charge of an Assistant Surgeon on Rs. 100 a month, and is daily visited by the Civil Surgeon of the district. The salary which the Assistant Surgeon receives is beyond the means of the Municipality, and is very high compared with the salaries paid in Purulia and Hazaribagh, where the medical officers in charge receive Rs. 55 and Rs. 35, respectively. More money is required for roads, which are in a shameful state of disrepair, and I have called upon the Municipality to appoint an officer on a lower salary and to increase the expenditure on road-making.

153. The Lohardaga dispensary is in charge of a Civil Hospital Assistant. The income and expenditure amounted to Rs. 678, of which Rs. 214 was contributed from municipal funds, Rs. 186 from private sources, and Rs. 278 by Government. There was a decrease in the expenditure of Rs. 149 under the head of medicines. The out-patients numbered 2,209 against 1,646 in the previous year, the increase arising chiefly from the prevalence of malarial fevers. The subscriptions are still largely in arrears. The Municipal Commissioners have ceased to use the dispensary building as an office.

154. In Palamau the Daltonganj dispensary was in charge of the Civil Medical Officer there. The number of "in" and "out" patients treated in the dispensary was 177 and 4,306 against 155 and 4,442, respectively, in 1893. The number of major operations was 99 against 79 in the preceding year. The income of the dispensary amounted to Rs. 1,921 and the expenditure to Rs. 1,437. The financial condition of the institution is satisfactory, and a proposal to place it in charge of the local Municipality is under consideration. Lately Rai Bhagwat Doyal Singh Bahadur of Chainpur has made the munificent offer of Rs. 3,000 to build and endow a female ward, and this addition to the hospital will greatly increase its usefulness, as there is only one very small room at present for female patients. Thakurai Gobind Prosad Singh of Ranka has also offered to build a hospital at Ranka and to maintain it at his own expense up to Rs. 1,000 a year. This institution, if started, will be of the greatest possible benefit to the people of that part of the district which is notoriously fever-stricken.

155. In Manbhum the Purulia, Jhalda, and Raghunathpur dispensaries were maintained by the respective municipalities and the Barabazar dispensary by local subscriptions. The financial condition of this last-named dispensary is not satisfactory. Subscriptions are still largely in arrears. The defaulters have been addressed by the Deputy Commissioner to pay up their dues. Its abolition, however, will be severely felt, as this is the only institution of its kind in the south of the district. The Pandra and Jharia dispensaries are maintained respectively by the zamindars of those two parganas, the Topechanchi dispensary jointly by the zamindars of Katras and Nowagarh, and the Gobindpur dispensary by private subscriptions. The last two dispensaries are on the Grand Trunk road. The zamindar of Katras wanted to remove the Topechanchi dispensary to Katras, but this could not be permitted, as its

situation on the Grand Trunk road makes it a boon to travellers. The following statement gives statistics of the Manbhum dispensaries :—

District.	Name of Dispensary.	Income from— Municipal grant.	District Board grant.	Government.	Private subscriptions, endowments, &c.	Total.	Expenditure.	Total number treated. In-patients.	Out-patients.	Total.	Daily average number of in-patients.	Daily average number of out-patients.	Cost of diet per in-patient.	Remarks
1	2	3	4	5	6	7	8	9	10	11	12	13	14	1[illegible]
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.						Rs. A. P.

	Barabazar	...	...	410	479	889	765	..	1,399	1,399	...	10·54	...	
	Total ...	2,931	...	583	3,445	6,959	6,835	677	19,959	20,636	25·48	142·42	0 1 4	1

156. In Singhbhum 121 in and 2,139 out patients were treated in the Chaibassa dispensary against 95 and 1,855, respectively, in the previous year. The increase both in the outdoor and indoor patients was due to the excessive sickness and the prevalence of cholera during the year. Two major and 62 minor operations were performed in the dispensary. The total income during the year amounted to Rs. 1,938 and the expenditure to the same amount. Out of the total receipts Rs. 239-0-7 were paid by the Government.

Leper Asylums.

157. The Lohardaga leper asylum is in charge of the Revd. O. Gemsky. It provides home for (1) lepers, (2) untainted children of leprous or syphilitic parents, and (3) for other incurables. There are 23 inmates in the asylum for lepers in the beginning of the year, of whom four died and one left the asylum. Only three lepers asked for admission during the year, so there are 21 lepers in it at present. In the children's home there are now seven boys and six girls. The expenses of both the leper asylum and the children's home amounted to Rs. 1,790. In the asylum for other incurables there were 18 inmates in the beginning of the year, of whom two died and one left the asylum cured. Six persons got admission during the year. The total expenditure of the asylum for other incurables amounted to Rs. 714 during the year. This is an excellent institution and is doing much benevolent work.

The Purulia leper asylum is on a much larger scale and is also well managed and proving a most useful institution. There were 142 males and 107 females in the asylum during the year. Segregation of sex is strictly observed, and untainted boys and girls are kept apart from their parents and relations. Sufficient care is taken of all the inmates. The total expenditure of the institution was Rs. 12,850, out of which Rs. 100 were contributed by Government.

Lady Dufferin's Fund.

158. Mrs. Grimley is still the Honorary Secretary of the Committee for the Administration of the Marchioness of Dufferin's Fund and looks after the management generally. In the Hazaribagh branch the services of Miss Shornalata Mitter, who has passed the Vernacular Licentiate examination at the Campbell Medical School, were entertained during the year. The probable income of the branch is about Rs. 85 per month, which is quite sufficient to cover present expenditure, the main items of which are (1) lady doctor's salary of Rs. 50 a month, and (2) house-rent allowed to her Rs. 12 per month. Until the financial prospects of the branch improve, and it is seen to what extent the inhabitants of the town and district appreciate the help afforded them, it has been decided not to spend money in constructing a hospital. Arrangements have therefore been made to rent a bungalow which is conveniently situated near the local dispensary. The lady doctor since her arrival in September 1894 has treated a considerable number of out-patients and has done much good by attending zanana ladies at their homes, and is likely to become extremely useful and popular.

159. As in previous years, the Ranchi Committee entertained the services of a trained midwife and nurse on a monthly salary of Rs. 30 and a fixed house allowance of Rs. 3 per mensem. She was also allowed half the fees earned by her in attending cases of accouchement and sick-nursing. During the past year the Committee decided to construct a zanana hospital at Ranchi on the standard plan which was furnished to them by Government. The construction of the building has been completed since the close of the year. Suitable quarters have also been built for the accommodation of a lady doctor or nurse to be placed in charge of the hospital. The construction of the hospital and nurses' quarters has cost Rs. 4,002-14-2. Altogether 38 cases were attended by the midwife during the year, out of which 20 were cases of sick-nursing and 18 cases of labour. As in previous years the midwife discharged her duties ably and satisfactorily. The Palamau branch was started in the year 1890, but it is still regarded by the general public of that backward part of the country with apathy. The present midwife in Daltonganj joined her appointment in September 1893, and since then she is working well. During the year she attended 14 cases, out of which 2 were complex cases, and as remuneration for her labour she received a sum of Rs. 63.

XXVIII.—LIBRARIES.

160. The district libraries are in good order. In Hazaribagh the classification of books into subjects was too much elaborated in certain cases, and I gave instructions for reduction in the number of subjects. In Lohardaga there are yet a number of useless books which might be sold as waste paper. There are two semi-public libraries in the town of Hazaribagh—one for the European and the other for the native residents of it. Both are supported by private subscriptions and donations. At Ranchi also there are also two similar libraries. The library for the European community here attached to their club contains a fair collection of books. The library for the native community has improved during the year of report, and 60 new and valuable books were purchased for it. The number of subscribers rose from 35 in 1893-94 to 52 in the year under report, and the amount of subscriptions from Rs. 171 to Rs. 182. At Daltonganj in Palamau a new reading club was established by the Bengali residents. There has been no addition to the number of books in the Purulia public library, and the proposal to purchase for it well-selected books from the donation paid by the zamindar of Jharia appears to have been shelved.

XXIX.—MUSEUMS.

161. Nil.

XXX.—LOCAL SELF-GOVERNMENT.

162. The Local Self-Government Act III (B.C.) of 1885 is not in force in this Division, nor are the people prepared for it. For the management of local affairs there exist Municipal, District Road and Education Committees at the head-quarters of each district and Branch Road Committees at Giridih and Gobindpur.

Municipalities.

163. Municipalities exist in the head-quarters stations of all the districts, and there are other municipalities at Chatra, Lohardaga, Jhalda, and Raghunathpur. The elective system is in force only in Hazaribagh, Chatra, Ranchi, and Purulia. The Chairmen in every instance are appointed by Government. The following statement gives the population of the towns and the constitution of the municipal bodies:—

Name of Municipality.	Population within municipal limits.	Date of establishment.	Number of Commissioners— Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans.	Natives.
1	2	3	4	5	6	7	8	9	10
Hazaribagh	16,672	1st April 1869 ...	5	10	15	4	11	5	10
Chatra	10,783	Ditto ...	5	10	15	2	13	...	15
Ranchi	20,306	Ditto ...	4	8	12	5	7	5	7
Lohardaga	7,110	1st July 1888 ...	10	...	10	2	8	...	10
Daltonganj	5,195	Ditto ...	9	...	9	2	7	...	9
Purulia	12,128	26th July 1876 ...	6	12	18	3	15	3	15
Jhalda	4,890	1st April 1888 ...	9	...	9	...	9	...	9
Raghunathpur	6,216	Ditto ...	9	...	9	...	9	...	9
Chaibassa	6,850	1st April 1875 ...	12	...	12	4	8	2	10
Total ...	90,150		69	40	109	23	87	15	94

The Ranchi Municipality is likely soon to have an accession of three to the number of its Commissioners. Jhalda and Raghunathpur have been shorn of their purely agricultural portions, but the curtailment of Lohardaga and Ranchi is still hanging fire.

164. The Deputy Sanitary Commissioner, Western Circle, inspected all the municipalities, except Chatra and Daltonganj, and his notes contained many valuable suggestions regarding sanitary improvements, and the Commissioners of these municipalities, except Ranchi and Lohardaga, have taken prompt measures to give effect to them in so far as the funds at their disposal permit. The matters to which attention was called in Ranchi were (1) the covering of drains and encroachment on roads, (2) the erection of private latrines fronting public highways, and (3) the removal of spill-water round wells, but very little has been done to remedy the defects although seven months have elapsed since they were pointed out, and very little will be done until the Deputy Commissioner, who is Chairman, takes the initiative in executive matters instead of leaving them to be dealt with by the Commissioners at a meeting, who, however excellent they may be as a consultative body, are, by natural habit and force of circumstances, slow to move in enforcing the penal clauses against their friends and neighbours. In Lohardaga there are many matters connected with sanitation which do not require the immediate outlay of municipal funds, in which improvement is urgently called for, and can be effected if the Municipal Commissioners are but alive to a proper sense of their duties. For instance, the Deputy Sanitary Commissioner's inspection note shows that there are many private well-privies in the town which are contaminating the water of wells used for drinking and other purposes, but puroper steps have not yet been taken to fill them up. The Deputy Commissioner's attention has again been called to this matter.

165. My inspection of the Hazaribagh, Daltonganj, and Purulia Municipalities satisfied me that they are all well managed. The general condition of the roads in all of them, especially in Hazaribagh, was good. The roads in the Ranchi Municipality are much inferior to those of Hazaribagh and Purulia, and some of them appear to be utterly neglected. A new overseer has recently been appointed with an increased salary, and an improvement in their condition may now be looked for.

The Commissioners of the Jhalda Municipality are reported to take very little interest in their work, and the affairs of the Municipality are chiefly looked after by the Vice-Chairman, who is also the Rural Sub-Registrar of the place.

Road Committees.

166. The following statement shows the constitution of the District Road Committees, the number of meetings held during the year and the average attendance at those meetings:—

NAME OF ROAD COMMITTEE.	NUMBER OF MEMBERS—			Number required to form quorum.	Number of meetings held.	Number of meetings in which there was no quorum.	Average attendance at meetings.
	Official.	Non-official.	Total.				
1	2	3	4	5	6	7	8
Hazaribagh ...	8	16	24	6	3	...	9·6
Lohardaga ...	4	8	12	3	7	...	4·0
Palamau ...	4	12	16	4	10	1	5·1
Manbhum ..	5	13	18	3	14	...	6·9
Singhbhum ...	4	8	12	3	9	...	5·7

In the majority of the District Boards nearly a third of the total number of members attended at each meeting, thus indicating that the majority—mostly non-officials and aliens—do not interest themselves in their work.

167. The Branch Road Committee at Giridih in Hazaribagh held four meetings, in two of which no quorum was obtained. The average attendance of members in these meetings was 3·75 against 3 in the preceding year. No meeting was held by the Branch Road Cess Committee at Gobindpur, as there were no funds placed in their hands for allotment. Mr. Morshead, the Officiating Deputy Commissioner, reports:—"The estimates are drawn up by the District Engineer here and passed by the Chairman of the District Road Committee. The Chairman of the Branch Committee appoints contractors to carry out the estimated works. After the contractor's work is checked and passed by the District Engineer the bills are passed by the Chairman and Vice-Chairman of the Branch Road Committee according to the amount of bills for payment."

Education Committees.

168. Education Committees exist at the head-quarters station of each district, and are composed of official and non-official gentlemen, who, as a rule, evince a certain amount of interest in matters connected with local education.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

169. The number of gazetted appointments in the Division carrying salaries exceeding Rs. 100 per mensem was 47, and the number of Muhammadans holding such appointments was two. The proportion therefore is much smaller than last year, when it was one in nine. There were four gazetted appointments with salaries of Rs. 100 and under, none of which were held by Muhammadans. The total number of ministerial appointments in the Division was 367, of which 36, or nearly 10 per cent., were held by Muhammadans. The total number of menial appointments was 497, of which 169, or 33 per cent., were held by Muhammadans. In the previous year the number of ministerial and menial appointments in the Division was 369 and 596, of which 36 and 185, respectively, were held by Muhammadans. The decrease in the total number of menial appointments held by Muhammadans is chiefly due to the amalgamation of the civil, criminal, and revenue process-serving establishments. The total number of appointments of all classes in the Division was 916, of which 212, or 23·1 per cent., have fallen to Muhammadans. The percentage of the total number of Muhammadans on the total population of the Division is only 5·9. My remarks last year regarding the difficulty in securing suitable Muhammadan candidates for employment are still applicable. Considering the proportion of educated Muhammadans to educated Hindus, the percentage (23·1) of appointments held by Muhammadans is fair. Most of the Muhammadans in the Division are low class men who do not care to educate their children for superior service.

XXXII.—POST OFFICE AND TELEGRAPH.

Post Office.

170. The opening of three new post offices in the Hazaribagh district increased the total number of offices from 27 to 30. The Imperial lines cover 198 miles, and the mails were carried with sufficient regularity, and there was no occasion to prosecute any one under the Post Office Act. In Lohardaga the number of Imperial post offices increased from 17 to 19, one by conversion of the Khunti zamindari dâk office, and the other by the creation of a new office at Ambatoli. There has been an acceleration of the Gobindpur mail, which is now despatched twice a day.

Telegraph.

171. There has been no change in the number of telegragh offices which are to be found at the following places only in this Division:—Ranchi, Hazaribagh, Chaibassa, Purulia,

and Gobindpur. The amount of business done is shown by the following figures:—

	Messages received.		Messages transmitted.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
Ranchi ...	4,081	3,584	3,987	3,882
Hazaribagh ...	2,242.	2,168	2,456	2,168
Purulia ...	3,138	4,150	2,884	3,667
Chaibassa	810	1,499	1,051	2,000

The Gobindpur figures have not been given. It appears from this that while the Ranchi and Hazaribagh transactions have declined, the business has materially increased in Purulia and Chaibassa, more especially in the latter place; and as there is a likelihood of the improvement continuing, the time seems to have come for converting the Chaibassa office from a third to a second class station. The decline in coolie recruiting will account for the decrease in Ranchi and Hazaribagh and for some of the increase in Purulia and Chaibassa.

XXXIII.—ZAMINDARI DÁK, FAIRS, AND POUNDS.

Zamindari dák.

172. The statistics of revenue and expenditure of the zamindari dák funds in the several districts are given in the following table:—

District.	Demand.	Collection.	Remission.	Balance.	Expenditure.		
					Cost of head-quarters establishment.	Cost of lines, dák office, &c.	Total.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	7,559	7,385	...	174	302	6,251	6,553
Lohardaga ...	5,924	5,924	...	...	123	5,454	5,577
Palamau ...	5,915	4,705	34	1,176	147	6,177	6,324
Manbhum ...	7,706	7,706	...	...	299	6,507	6,806
Singhbhum ..	2,705	2,632	...	73	...	3,013	3,013
Total ...	29,809	28,352	34	1,423	871	27,402	28,273

The total demand of dák cess in the Division amounted to Rs. 29,809 in the past against Rs. 25,673 in the preceding year, the total collection to Rs. 28,352 against Rs. 24,654, and the total expenditure to Rs. 28,273 against Rs. 27,223. The increase mainly pertains to Palamau, where the assessment of the cess in 1893-94 was proportionately reduced under the provisions of section 10 of Act VIII (B.C.) of 1862, owing to the existence of a heavy surplus to the credit of the fund at the close of 1892-93. This accounts for the apparent increase in 1894-95. In three districts, Hazaribagh, Lohardaga, and Manbhum, the current demands have been fixed for five years with effect from the year 1893, while in other two, Palamau and Singhbhum, owing to special circumstances the assessments are made annually.

173. The following table shows the dák lines and offices maintained:—

District.	Length of lines in miles maintained.	Number of dák offices maintained.
1	2	3
Hazaribagh ...	431	4
Lohardaga ...	377	8
Palamau ...	354	17
Manbhum ...	280	15
Singhbhum ...	168	5
Total ...	1,610	49

In Palamau two dák muharrirs were appointed during the year in place of the guru postmasters, who could not manage their work properly. The allowance of guru postmasters in this district was also raised during the year from Rs. 5 to Rs. 10 per mensem.

Fairs.

174. In Hazaribagh 22 fairs were held at different places during the year against 16 in the preceding year. In two of these, namely those at Hosir and Surujkund, the estimated average daily attendance of persons was 10,000. At four others, namely, Mirzaganj, Kisgo, Chatra, and Burkuttu, the average ranged from 7,000 to 2,000. Of the rest in eight the average was 1,000 each. In the other eight it was less. All the fairs, however, with the exception of Chatra, were little more than market gatherings, and required no special sanitary arrangements. At Chatra, where the fair lasted nine days, temporary latrines were erected and sweepers employed at the expense of the zamindar, the Raja of Padma, under the supervision of the Police and the Municipal authorities. It is the great cattle fair in the district, and cattle from different parts of the province are brought to it for sale. At this fair the drinking water was obtained from wells and tanks. At others it was obtained from rivulets and streams. No disease in epidemic form broke out in any of the gatherings.

175. In Lohardaga the fair at Jagannathpur, at a distance of about six miles from Ranchi, was held as usual on the car festival day of the Hindus, and was attended by about 10,000 people. The principal articles brought for sale were brass and copper utensils, fancy articles, and sweetmeats.

176. In Palamau the usual fair was held at Daltonganj in February, and continued for about a month, but was not so well attended as in previous years, probably because it clashed with a large fair in the neighbouring district of Shahabad. The Daltonganj fair is a very useful institution, as it gives the

people of the district an opportunity of purchasing brass and other utensils and articles which are not obtainable at other times of the year. Sports were held at this fair and prizes given for vegetables, &c. The usual conservancy arrangements were made, and there was no outbreak of disease of any kind. The cattle fair at Harhanj in this district was held during the year in the usual way, and was also very largely attended.

177. In Manbhum there were no fairs worth the name. Some religious gatherings were held at different places at different times. The biggest amongst these were those held at Telkupi near the Damudar, Jhari-buri near Chirkunda, and Bero near Raghunathpur.

178. The annual *mêla* at Chaibassa in Singhbhum was, as usual, held in the month of December, and lasted 25 days. Shop-keepers came to it from the neighbouring districts, and the gathering was a fairly good one. The Government grant of Rs. 200 was spent on the construction of corrugated iron sheds at the *mêla* site. There was no outbreak of sickness here.

Pounds.

179. The following table gives the statistics of receipts and expenditure of pound funds in the several districts during the past two years:—

District.	Receipts.		Expenditure.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Hazaribagh	3,525	3,549	1,010	846
Lohardaga	3,359	2,832	1,150	1,195
Palamau	5,047	5,097	630	1,041
Manbhum	3,262	2,897	72	118
Singhbhum	940	679	278	265
Total ...	16,133	14,050	3,140	3,501

180. In Hazaribagh one new pound was established during the year and an abolished pound re-opened. These, with the 28 pounds at the close of 1893-94, were at work during the year of report. Two of the pounds appertain to municipalities, and the figures given in the table above represent the receipts and expenditure in respect of 28 Government pounds, 17 of which were managed direct and 11 were farmed out. No demand in respect of any pound remained unrealised in this district, and no complaints were received against pound-keepers. In Lohardaga two new pounds were established during the year. Both of these were farmed out. The 22 pounds which were in existence in this district since the preceding year were managed khas.

181. In Palamau the number of pounds remained unchanged, and they were all held khas, except the Daltonganj municipal pound, which was farmed out by the Municipal Commissioners.

182. In Manbhum there were 35 pounds in the past against 36 in the preceding year. Three of these were municipal pounds. Five of the Government pounds were held khas and the rest farmed out. Most of the pounds here were inspected by the Deputy Commissioner and the Subdivisional Officer during their cold-weather tours.

183. In Singhbhum there were altogether 11 pounds at work against 8 during the preceding year. Six of these were managed direct, three were farmed out, one was under management of the Thakur of Kera and one was a municipal pound.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS AND PUBLIC FEELING.

Social Institution.

184. The Kyasth Sabha at Hazaribagh, which is a branch of the Kyasth Sabha at Patna, held one sitting to elect delegates for the last Kyasth Conference at Benares. Several delegates were elected, but only one of them joined the Conference. The object with which the Society was first started a few years ago was the betterment of the condition of Kyasths generally by reforms in social matters; the curtailment of marriage expenses, which in these days of scarcity of husbands tells heavily on poor Kyasths, was a subject to which the Society specially addressed itself, but the results achieved fall very much below the end aimed at. The movement is one which must benefit all classes of the native community, as it would not be difficult to give instances of families taken from most ranks in life who have been ruined or reduced to great straits by lavish expenditure in connection with marriages. The recent circular of Government on the subject may in some measure advance the cause, but the real effort, however, must come from within, and it will be useless for Government officials to preach economy unless the influential leaders of Indian society in each district are prepared to take up the question spontaneously and to work heart and soul in setting an example to others who look to them for guidance. The Gorukshini Sabha at Hazaribagh displayed no activity during the year beyond maintaining a small pound at Ichak. In Palamau there is a Gorukshini Sabha at Hariharganj, but entirely unconnected with any political aim of any kind.

Political Institution.

185. The Congress Committee at Hazaribagh, with its branches at Giridih, Ranchi, and Purulia, is the only political institution in the Division. The Committee held two meetings at Hazaribagh, and from it originated the memorial which was submitted to Government praying for the construction of a road from Ghutaria, the terminus of the Jharia Branch of the East Indian Railway, to Topechanchi on the Grand Trunk road. Four delegates to the Congress of 1894 were elected, but none attended. The Branch Congress Committee at Purulia held one meeting and sent a delegate to the Madras Congress.

State of public feeling.

186. Regarding the state of public feeling in Hazaribagh, Colonel Garbett writes:—"There is not very much to be said on the subject. Public opinion, as we understand it, does not exist in the district. The district is too much shut off and its people too ignorant and untutored to care for matters occurring outside their villages, which do not directly concern them. The above remarks do not of course apply to places like Giridih, Hazaribagh, and Chatra, where there are always a number of educated men, who take in newspapers and keep themselves acquainted with current topics, etc. Nothing occurred during the year under report to excite general interest or attention. The comparatively few who have to pay the income-tax dislike the measure, but the public generally know and care nothing about the matter. In a few places some petty discontent is occasionally expressed in connection with the Chaukidari Act V, not, however, because the assessments are oppressive, but because the grumblers have to pay something where they paid nothing before, and to pay punctually where before they paid irregularly or not at all according to their own sweet will. In the Government estates I found some mild discontent existing in connection with the village forests declared protected. These forests are all of very small area, and so the Government raiyats have hitherto had the freedom of them, and the restraints now imposed are felt to be irksome. When, however, the raiyats find that they can easily get all they reasonably require from the forests, and realise that the forests have really been protected in their own interests, they are certain to appreciate that measure. Some little excitement was caused in the course of the year amongst the Sonthals of Giridih subdivision owing to two of their number being convicted and punished for brewing pachwai for home consumption. A few score of them started to lay their grievances before the Subdivisional Officer, but returned from Pachamba after apparently interviewing the missionary at that place. A petition was subsequently put in by them praying to be allowed to brew pachwai for home consumption, and the matter has been reported for the orders of Government. Agitation in connection with kine-killing is practically non-existent. At Chatra, Ichak, Giridih,

Hazaribagh, and perhaps a few other places, a certain amount of interest seems to be still felt in cow protection, but the interest felt and evinced is fitful and spasmodic. The people generally have no thought about the matter, and would care nothing about it if left alone by outside agitators. As developed so far in the district, the movement is a kindly and perfectly innocent one, but of course it contains elements of danger and requires to be watched."

187. In the Lohardaga district the raiyats are still in the transition stage of endeavouring to free themselves from the shackles of feudal servitude to which their system of land tenure has long bound them; but though there has been no renewal of the agitation of 1890, it is not dead yet, but only dormant, while both landlords and tenants are awaiting the action of Government in the matter and may have a fresh revival at any time. Where the tension is great between the opposite parties, the raiyats deposit their rents in the treasury, but this procedure recently received an unexpected check owing to the action of the Deputy Commissioner in challenging on behalf of the zamindar their right to make the deposit. It became necessary to explain to him that neither he nor the zamindar was authorised to intervene at the time of deposit, and that the right of deposit was that of the tenant, and that so long as the latter made the declaration required by law, his deposit must be accepted. Cases of commutation have not been numerous, but in the few that have come before me I have generally restricted the services to those specified in the Commissioner's proclamation of 1890, though there is a tendency in the revenue courts to disregard the terms of the proclamation as not having legal sanction. Seeing, however, that the conclusions arrived at and set forth in the proclamation were the result of a careful examination of the conditions of service in Chota Nagpur and of case-law bearing on the subject by an officer specially deputed for the purpose, and that they were fully adopted by the Commissioner and acquiesced in by the Government, they seem to me to be entitled to as much weight as if they had been established after judicial enquiry, and this view I have given expression to in my decision on appeal. The *chanda* movement, which received a severe check last year, is not entirely extinguished, although there has been no trouble or agitation worth mentioning.

188. In Palamau in April 1894 at the *Id* a very serious unlawful assembly took place in the southernmost part of the district. Misled by a false rumour that the Muhammadans of that part intended to sacrifice cows in the bazar, the Hindu jagirdars collected a large crowd, who came armed with guns to overawe the Muhammadans and to prevent cow sacrifice. Fortunately no actual breach of the peace occurred, but for nearly the whole of the day the village was in possession of the mob. A number of the ringleaders were convicted and bound down to keep the peace on heavy sums in addition to imprisonment. Referring to this incident Mr. Bright writes:—"This was a typical case in which the new section of the Police Act would have prevented undoubted hardship. Nearly all the inhabitants of that particular *dehat* are Christians, who had neither part nor lot in this quarrel. If it had been necessary to impose preventive police, as it would undoubtedly have been if a breach of the peace had occurred, it would have been very hard on the Christians to have had to pay for a matter with which they were in no way concerned."

In the early part of the year the curious ploughman begging movement spreading through Shahabad and Gaya rapidly passed into Palamau. There was a subsequent attempt to revive a similar movement and to get people to go to Gaya and Benares on pilgrimage, but it met with no response. The story of the movement is this:—All ploughmen were obliged to give their cattle three days' rest and go round the neighbouring villages begging. With the proceeds three wheaten cakes were prepared, one for the ploughman himself, one for his cattle, and the third to be buried under their stall.

189. In Manbhum the people do not interest themselves in public affairs, but the Manbazar and Begunkudar succession cases created some stir, especially the latter, in which the object of the suit was to establish the legitimacy of a child whom the revenue authorities had declared to be supposititious, the estate at the time being under the Court of Wards. In Mr. Windsor's opinion, not I fear, without foundation, the general feeling among the cultivating and labouring classes is a hatred and fear of the coolie recruiter.

190. In Singhbhum some anxiety was felt as to the light in which the Kols might regard the settlement operations, but they are evincing not the least opposition. Mr. Bompas is of opinion that on matters that do not concern the district, public opinion cannot be said to exist.

191. Speaking generally, the public feeling in Chota Nagpur is confined to a very small section of the people, viz., the educated few who are for the most part aliens to the country. The masses are very seldom affected by any thing which does not directly concern them, and are indifferent in matters of general interest. Their interests are centred in their fields, their cattle and their homes, and they do not love litigation for litigation's sake, but are naturally a contented race and wish to be let alone in the free enjoyment of their customary privileges; they will work cheerfully at the proper seasons for cultivation, but dearly delight in leisure, and the observance of holidays, feast, and festivals of all nations and creeds; they are no mean musicians in their simple way, and are devoted to dancing on the village play-ground; like the Irish peasantry they would cheerfully witness the extinction of the whole race of landlords and have no liking for middlemen of any kind, not even an *arkati*, but prefer direct dealings with a hakim who lends a willing ear to their grievances.

Public Press.

192. The only papers published in the Division are the *Dharwak* printed at the Fukhurea Mission in the Gobindpur subdivision of Manbhum, and the *Gharbandhu* printed by the German Lutheran Mission at Ranchi. Both of these papers have in view the religious and moral improvement of the Christian converts belonging to the two Missions.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

193. There were five Sub-Deputy Collectors and two kanungoes employed in the Division. Of the former, two were employed in Hazaribagh, one in Lohardaga, one in Manbhum, and one in Singhbhum. Of the two Sub-Deputy Collectors in Hazaribagh, one was stationed at head-quarters and the other at Giridih, but both were transferred from the district at the beginning of the year, and the latter only was replaced by a Sub-Deputy Collector from the Gobindpur subdivision in Manbhum. In Lohardaga Babu Jadu Nath Chatterjee was employed as a Sub-Deputy Collector from 1st April to 11th May 1894, when he was promoted to a Deputy Collectorship. Babu Srish Chandra Mozumdar, the Sub-Deputy Collector of Singhbhum, was transferred to this district in January last and employed in trying criminal cases at head-quarters. In Manbhum the Sub-Deputy Collector was in charge of the sub-treasury at Gobindpur.

194. Of the two kanungoes, one was employed in Lohardaga, chiefly on surveys and measurements in connection with land acquisition work, in miscellaneous enquiries into cases arising out of land disputes and settlements, &c., in Government estates and in making enquiries into cases under the Land Improvement Loans Act, and the second was employed in Palamau on general duties, especially in connection with the Palamau Government estate. During the past year one of his principal duties consisted of the collection of rents from the raiyats of certain villages, which were brought under khas management.

195. A statement showing the character of officers employed in the Division is annexed.

XXXVI.—CONDUCT OF ZAMINDARS.

196. The attitude of the zamindars generally is one of loyalty to Government and of good feeling towards the district officials. The chief zamindars in Hazaribagh are those of Dhunwar, Serampur, Gawan, Palganj, and Ramgurh. The zamindar of Dhunwar is a lunatic, and his property is under management of the Court of Wards. Gawan, Palganj, and Koonda are thoroughly loyal, and comply with orders and instructions promptly and cheerfully. The zamindar of Serampur omitted to attend, for some unaccountable reason, the darbar arranged to be held for the presentation of a khillat to him. The zamindar of Ramgurh, Rajah Ram Narain Singh, is difficult to move, and is not amenable to

reason. Considerable difficulty was experienced in getting him to make proper arrangements for the supply of *rasad* for troops moving through the district, and it was not until he received a peremptory warning from Colonel Garbett that he gave his manager, Mr. Bowman, a free hand in the matter. Even then he did as little as possible to assist his manager, and but for the latter's strenuous personal exertions, there would have been trouble. The Rajah, however, is not actuated by ill-feeling or disloyalty, but is old and in bad health, and weak and too ready to listen to bad advisers.

The zamindars in Lohardaga, with few exceptions, show no ability in managing their estates, but as a class are involved in debts, and even the benefits conferred by the special enactment, the Chota Nagpur Encumbered Estates Act, cannot help them in many instances in which they are found to be hopelessly insolvent.

In Palamau there was some ill-feeling stirred up by some designing *mahajans* between Rai Bhagawat Dayal Singh Bahadur of Chainpur and some of his raiyats, but after careful enquiry by Mr. Bright nothing was found to show that the Rai Bahadur was in any way to blame. The Rai Bahadur has made a gift of Rs. 3,000 for the establishment of a female ward for the dispensary at Daltonganj. Babu Kishen Bux Rai of Nawa-Jaipur is involved in debt. He has been attempting to set his affairs in order, and if a loan, for which he is negotiating, can be successfully raised, his estate should, in a few years, be once more free of embarrassment. The affairs of Babu Bisambhar Nath Sahi of Sonepur are reported to be going from bad to worse, and nothing but the appointment of an experienced and trustworthy manager can be of any avail. Thakurai Gobinda Prosad Singh of Ranka continued to maintain the middle English school at Ranka, paying all expenses beyond the Government grant. He has also offered to establish and maintain a dispensary at Ranka. The native zamindars in Manbhum are, with a few exceptions, involved in debt. They are reported to be going on tolerably well with their raiyats. The zamindar of Jaipur is said to be inclined to be oppressive. The Jharia zamindar came into the possession of a fine property a year ago, but by extravagant expenditure and foolish coal settlements he is trying hard to reduce himself to pauperism. The proprietor of the Pandra half estate, which was under protection of the Chota Nagpur Encumbered Estates Act, has got his estate released by paying off the balance of his debts. Babu Bunwari Lal Singh, zamindar of Nowagurh, managed his affairs personally and with tact. The relations between the zamindar of Tundi and his eldest son are unsatisfactory. The second son who lives with the father stands in the way of reconciliation. The affairs of the Pachete Raj are in a chaotic state of confusion. It has lately been decided to bring it under the protection of the Chota Nagpur Encumbered Estates Act. Regarding Messrs. Watson and Company, the patnidars of Barrabhum, Mr. Windsor has recorded the following remarks:—"Messrs. Watson and Company and the ghatwals are of course still a trouble. The Barrabhum compromise, which was intended to bring peace on the earth, has instead brought a sword. It has assisted Messrs. Watson and Company in their policy of aggrandisement and made the ghatwals believe that Government is their enemy and is in league with the patnidars. Mr. H. Mathewson (the present manager of Messrs. Watson and Company), though naturally he insists on the rights which the compromise gave him, is not unjust or oppressive in his methods, and of course he is not responsible for the state of things that exist in Barrabhum. Indigo has been given up and disputes between the Company and its non-ghatwal tenants are partially brought to an end thereby." In Singhbhum the only revenue-paying estate, Dhalbhum, is under management of the revenue authorities under the Encumbered Estates Act. The Thakurs of Kora and Anandpur and Babu Jugmohan Singh of Bandgaon have conducted themselves to my satisfaction.

XXXVII.—GENERAL REMARKS.

197. The history of Chota Nagpur and its people must ever be a fascinating subject to those engaged in its administration, though it has failed to attract much public interest except in connection with events of a stirring nature. The Kol rebellion of 1833, when the aboriginal inhabitants attempted

to shake off the yoke of the immigrant Hindus who had encroached on their possessions, the revolt of the native troops in 1857 at Ranchi, Purulia, and Chaibassa, accompanied by the plundering of the district treasuries, and carrying in its train the downfall of the Porahat Raja and other families of importance, the scenes of anarchy and spoliation that ensued as the mutineers spread themselves over the country gathering recruits as they went, the retribution that awaited them when the rebels to the number of 3,000 were completely routed by a small body of Sikhs, the periods of unrest among the Kols during a succession of years in the latter part of the present century culminating in the agitation in 1890, the successive outbreaks and resistance of authority committed by the Korwas, a predatory semi-savage tribe of hill robbers, in 1878 and 1883, repeated with varying atrocities in 1889 and 1893, the Koira rebellion against the Bonai succession in 1878, the excitement among the Gohandahs of Kharsawan, and the disturbance committed by the Gond Chiefs and their adherents in 1889, all these stirring events, with their episodes of treachery, tenacity of purpose, heroism and devotion, may possibly have awakened for the moment some interest in the outer world, but it was evanescent, and the incidents and those who stayed their force are but little remembered. The recent appearance, however, of a remarkable work by Mr. J. F. Hewitt, a former Commissioner of Chota Nagpur, entitled "The Ruling Races of Pre-historic India," may perhaps serve to break the spell and to direct public attention once more to this interesting country. By a study of the local customs, social laws and institutions, religious, ritual and mythic stories and other relics of vanished races, the author traces all forms of national government to the primeval village communities of the forest races of Southern India, and shows that it was emigrants from thence who carried their rules with them as they advanced, and he gives an account of the primitive village, its origin, its development into the city, the province and the state, its methods of record for ensuring the permanency of the national traditions, and the preservation of their laws and customs. We are taught by his researches that Chota Nagpur is the home of a system of village organisation which was introduced by the Kolarian and Dravidian tribes who entered the country long before Aryan invaders, to whom the foundation of village communities is popularly ascribed. The organisation is still maintained almost intact in that portion of the Lohardaga district known as the Five Parganas, but in others the old institutions have been more or less wiped out. A variety of tenures exist, bhuinhari, khuntkati, puttidari, talukdari, and zamindari, the origin and cause of which can be clearly traced to ancient times, and the study of them must serve to throw a flood of light on the revenue system of the country which may be said to have been founded and consolidated by the early Dravidians. It is therefore to Chota Nagpur, the nursing ground of these organisations, that we may look for materials and assistance when seeking to investigate the origin and growth of the land tenures connected with the system of revenue administration pertaining to the rest of Bengal.

198. It was remarked in the official review of the work of this Division last year that my report did not contain many suggestions for administrative reform, and in explanation of this circumstance it may be said that I have hitherto not regarded the pages of an annual report as the proper place for propounding such measures. However, I have never hesitated to introduce or suggest reforms which appeared to be beneficial to the country, or to oppose them when they have seemed unsuited to the primitive people with whom we have to deal, and that some progress has been made on the administration and development of this backward territory was clearly demonstrated in the report of the last year. The following are some of the many important matters that have engaged my attention during the past year:—The jagirdari question in Palamau, regarding which a special report was submitted, which awaits the orders of Government; the amalgamation of the process-serving establishments; the preparation of rules for the management of protected forests, as well as rules for the administration of the Forest Department; the improvement of the system of collections under the Rural Police Act; the commutation of ghatwali tenures and the management of ghatwali jungles in the Manbhum district; the protection of the great Pachete estate; the acquisition of land around jails for cultivating cereals; the amendment of the

Revenue Sale Law and the Public Demands Recovery Act; the survey and settlement of the Palamau and Kolhan Government estates; the re-arrangement of police-stations, and it may be said that nearly all of these subjects involve proposals for introducing reforms of a far-reaching nature into the administration.

199. I am happy to be able to record that the Chota Nagpur Mounted Rifles under my command has made a still further distinct advance both in strength and efficiency. The increase has been from one on the 31st March 1892 to 35 on the same date in 1893, to 55 in 1894, while the present stength is 85, not including honorary members. The experiment of holding a camp of exercise was made in February last, when there was a large muster of voluntoers at Ranchi, many coming from the distant districts of Palamau, Hazaribagh, Manbhum, and Singhbhum, and others from more remote places in the Native States. The programme consisted of drill, parades, skirmishing manœuvres and a rifle meeting, at which the valuable cups and prizes offered were competed for with great keenness. The inspection by General Lance, which terminated the proceedings, included the execution by the Volunteer Corps of field operations in the open country in combination with the men and officers of the 11th Bengal Infantry stationed at Doranda which were carried out in a very effective manner.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1894-95.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 26th October 1895.

RESOLUTION—No. 4676.

READ—

Report of the Board of Revenue on the Wards' and Attached Estates in the Lower Provinces for the year 1894-95.

The Board submitted their report with commendable punctuality on the 31st of August.

There were 74 wards' estates and 72 attached estates under the management of the Court of Wards during the year under report, against 78 and 67 respectively in the previous year, the number of wards' estates showing a decrease of four and the attached estates an increase of five. Of the total number of estates, 9 wards' and 13 attached and encumbered estates were under management for part of the year only, having been taken charge or relinquished during the year. Besides these, the ward's estate of Latifa-khatoon in Chitta-gong was released on the last day of the year. As requested by Government last year, the Board have shown estates which were under management for part of the year only separately from others in the statements relating to management charges and to the debts due by the estates. They have also distinguished by italics estates under management for part of the year only in Appendix I.

The Lieutenant-Governor desires that, in order to judge of the success of Government management, the two classes of estates may be also separated in future in the statements corresponding to those given in paragraphs 6, 7, and 9 of this year's report.

Revenue and cesses due to Government.

2. The total amount due to Government from estates under management on account of revenue and cesses, both arrear and current, was Rs. 49,93,261. Of this sum, Rs. 49,85,574 was paid, Rs. 39,724 being on account of arrears and Rs. 49,45,850, or 99·8 per cent. on the current demand, being due for current payments. The outstanding balance was reduced to Rs. 7,627, and of this nearly Rs. 4,000 were actually paid before the close of the year, but not adjusted. In the estate Barutter Hingly, in Midnapore, which alone owed any considerable sum to Government, the default was due to the bad harvests of two successive years having prevented the realization of the rents.

Rent due to superior landlords.

3. The sum of Rs. 5,65,842 was due to superior landlords, Rs. 1,63,534 being arrears from the previous year. Of this sum, Rs. 4,26,577 were paid and Rs. 671 remitted, leaving a balance of Rs. 1,38,594. This apparently bad result was due to the default of three estates named in the margin, all of which were in arrears also in the previous year. The two last-named estates were taken over heavily involved in 1893, and there were no funds to pay these debts. In the case of Satkhira the payment of the greater portion is awaiting the settlement of accounts with some of the landlords, which, it is hoped, will be completed during the current year.

		Rs.
Khulna ...	Satkhira	36,158
Backergunge	Haturia	47,275
	Barana	29,776
		1,13,209

Rent and cesses due to the estates.

4. The following statement shows the demand, collection, and balances due to the estates during the five years ending 1894-95:—

Year.	Demand.			Collections.			Percentage of—		Remissions	Balances.
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Current collection on current demand.	Total collections on current demand		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			Rs.	Rs.
1890-91 ...	79,81,432	98,29,588	1,78,11,020	... ...	... ..	98,29,082	......	98·	7,57,403	74,24,535
1891-92 ...	77,67,017	91,53,100	1,69,20,117	30,69,365	60,69,371	91,38,736	66·3	99·8	12,12,179	65,69,202
1892-93 ...	62,03,663	92,99,637	1,55,03,300	29,04,156	61,96,739	91,00,895	66·6	97·8	3,05,695	60,96,710
1893-94 ...	66,78,027	97,32,203	1,64,10,230	29,84,402	64,12,911	93,97,313	65·8	96·5	4,35,740	65,77,177
1894-95 ...	65,50,095	92,85,008	1,58,35,103	29,83,914	61,69,326	91,53,240	66·4	98·5	5,67,884	61,13,979

It is unsatisfactory to note that in none of these five years have the total collections (current and arrear) equalled the amount of the current demand; so that, were it not for remissions, arrears must have gone on accumulating during the whole period. During the year under report the percentage on the current demand both of current collections and of total collections was better than in the previous year, but there is still room for improvement. In Orissa only was the standard fixed by Government, namely, 90 per cent. on the current demand, attained; the results were worst in the Presidency Division, where less than half the current demand was collected.

5. The percentage of collections of the total demand (current and arrear) was highest in the three following estates:—Kanika 93·, Rajkrishna Banerjee 92·5, Magun Das Rai 89·. The following showed the worst results:—Paigamberpur (16·1), Dhalbhum (29·6), Chandra Kumar (30·1), Kasimbazar (35·3), and Satkhira (37·5). Out of the total balance of 61 lakhs of rupees, 46½ lakhs are said to be good and in process of recovery, and the rest is doubtful or irrecoverable.

Debts due by estates.

6. As directed in the Resolution on last year's report, the figures for estates which were under the management of the Court for the entire year have been shown in paragraph 10 separately from those relating to estates which were managed by the Court for a part of the year only in the statement, which sets forth the result of the operations of the year on the debts due by the estates. The former class of estates owed at the commencement of the year under report Rs. 31,70,500, and incurred during the year further debts amounting to Rs. 3,12,874, so that their liabilities for the whole year amounted to Rs. 34,83,374. Of this sum, Rs. 6,82,860 were paid off during the year, and a further reduction of Rs. 86,123 was made by compromise, so that at the close of the year the aggregate debts had been reduced to Rs. 27,14,391.

Cost of management and the management rate.

7. In estates which were under the Court of Wards for the whole year, the cost of management proper averaged 7·9 per cent. on the current rent and cess demand. In the Burdwan Division it was 3·8 per cent. only, owing to the low cost in the Raj estate. In Orissa the cost was highest, viz., 16 per cent.; this is ascribed to the payment of Rs. 12,367 to the *mustajirs* or farmers in the Kanika estate for arrears of commission on collections made by them in previous years.

The amount payable on account of the general management rate leviable under Act X of 1892 was Rs. 1,44,785, besides arrears from 1893-94 amounting to Rs. 17,715. Of this, Rs. 1,35,515 was realized, leaving a balance of Rs. 26,985. In 1893-94 the amount payable was Rs. 1,37,401 besides arrears of Rs. 5,560, and the amount actually collected was Rs. 1,32,092. The Board should have compared the amount payable and realized now under Act X of 1892 with the figure before the passing of the Act. Under the rules framed under the Act, the rate is payable half-yearly in advance. The Board have drawn the attention of local officers to this rule, and it is to be hoped that there will be no arrears in future years.

The demand for the audit rate of estates with a rent and cess roll of Rs. 50,000 and upwards amounted to Rs. 25,652, of which Rs. 17,120 was for the current year. Of this sum, only Rs. 12,072 was realized, leaving a balance of Rs. 13,580. Of the 24 estates whose gross rent and cess demand amounted to Rs. 50,000 or more, it appears that the accounts of 19 only were audited. No reason is given to explain why five estates were passed over.

Survey and settlement.

8. The total expenditure on survey and settlement in wards' estates amounted to Rs. 1,64,705, of which Rs. 1,24,652 were for the larger operations under the charge of the Director of Land Records. Final reports have been submitted for the operations on the Talipabad, Kujang, and Kanika estates, and that for Dakhin Shahbazpur is expected shortly. The work in the Sarail estate has been completed, but errors have been found in the record, which is therefore being revised. Survey and settlement operations were in progress at the close of the year in the Burdwan khas mahals, in Tikari, and the Srirampur estate. Operations on a small scale—mostly under section 101 or 103 of the

Bengal Tenancy Act—were in progress in ten other estates. The wards' estates situated in Chittagong, Cuttack, Balasore, Puri, Saran, Champaran, Muzaffarpur, and Darbhanga will be dealt with in the course of the general operations in those districts.

Improvements.

9. The following statement shows the expenditure under the various heads of improvements during the last five years:—

Year.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings and other immoveable property.	Improvement of land and property for benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1890-91	59,241	32,255	2,13,178	58,404	1,26,523	4,89,601
1891-92	61,155	37,598	1,91,397	92,864	2,67,345	6,50,359
1892-93	64,059	36,524	2,16,870	1,57,782	97,104	5,72,339
1893-94	59,844	46,527	2,46,225	1,58,406	2,01,899	7,12,901
1894-95	50,217	38,564	1,68,808	1,43,208	1,64,705	5,65,502

The expenditure has fallen off under every head. The Board's explanation is as follows:—

"There has been a decrease of expenditure under all the headings, the decrease under the first four headings appearing especially in the Rajshahi Division on account of the release of the Dighapattea estates. There is also a marked decrease in the expenditure for the maintenance of buildings in the Burdwan and Chota Nagpur Divisions. In the former Division the Burdwan estates spent Rs. 64,360 on buildings, against Rs. 1,23,963 in the preceding year. In the Chota Nagpur Division the decrease is due to the release of the Jheria estate, which spent Rs. 15,373 in the previous year on the construction of a dwelling-house for the proprietor."

The large expenditure in the Burdwan estate during both years is for the construction of the Raj office building at Burdwan, which was completed during the year under report. The percentage of the total expenditure under the head of improvements on the net annual income (column 10 of Appendix II) was 15·06 in 1894-95 against 18·51 in the previous year. The most unsatisfactory feature in the statement given above is the decrease which is shown in the expenditure on improvements (column 5) in the stricter sense of the word, that is to say, in improvements to the estate of a remunerative nature. It is shown to be Rs. 1,43,208, or 3· per cent. on the annual net income of the estates, against Rs. 1,58,406, or 4·11 per cent., in the preceding year. The Board write—

"The expenditure of Rs. 1,43,208 is not so inconsiderable as it would appear at first sight, for it represents more than 10 per cent. of the surplus profits of the year."

But the Lieutenant-Governor would point out that it is considerably less than the sum invested (Rs. 2,01,171), and sinks into insignificance compared with the cash balance at the close of the year (Rs. 15,25,785). The Board in November 1894 drew the attention of local officers to the Lieutenant-Governor's remarks in last year's Resolution on the necessity of larger expenditure on improvements of this nature, and called for a programme from each estate of the works to be executed during the next three years. The programmes had been received from all districts except Gaya at the time of the submission of the Board's report. Sir Charles Elliott is glad to hear that action is being taken in the right direction, and hopes that his oft-repeated injunctions are at last to produce some result.

10. The following statement illustrates the working of the certificate procedure during the year under report and four preceding years in estates under management:—

Certificates and civil suits.

Division.		Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the certificates.	Total amount realized by certificates.
1		2	3	4	5	6	7	8	9	10
									Rs.	Rs.
Burdwan		4,708	1 974	6,682	3,927	1,739	1,017	2,755	1,81,975	40,012
Presidency		1,522	982	2,504	1,556	497	451	948	87,985	47,684
Rajshahi		194	1,150	1,344	828	176	340	516	19,863	8,569
Dacca		140	482	631	377	9	245	254	41,985	17,711
Chittagong		659	1,706	2,365	1,910	186	269	455	56,108	38,273
Patna		62	327	389	355	14	20	34	68,536	7,427
Bhagalpur		118	229	347	210	103	34	137	9,240	4,566
Orissa		82	235	317	271	30	16	46	5,889	3,672
Chota Nagpur		319	876	1,195	853	202	140	342	50,261	24,807
Total for ...	1894-95 ...	7,813	7,961	15,774	10,287	2,955	2,532	5,487	5,24,792	1,92,711
	1893-94 ...	10,281	7,477	17,758	11,663	4,334	1,761	6,095	6,71,210	2,17,706
	1892-93 ...	13,210	8,648	21,858	11,765	9,653	1,040	10,693	8,58,414	3,41,256
	1891-92 ...	13,704	13,299	27,003	17,148	8,107	1,748	9,855	4,75,663	...
	1890-91 ...	21,167	10,975	32,142	18,438	12,193	1,511	13,704	4,60,970	...

The number of certificates filed has increased, while the demand covered by them has decreased. The reduction in the number of certificates pending at the close of the year under report from 7,813 to 5,487 is satisfactory.

11. As requested in last year's Resolution, the Board have shown in a new Appendix (IV) the figures relating to civil suits filed in estates where the certificate procedure cannot be adopted.

The following are the figures for the year in regard to civil suits:—

Number of estates in which civil suits were instituted for the recovery of rents and cesses due to them.	Number of suits pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the suits.
1	2	3	4	5	6	7	8	9
								Rs.
Fifty estates	309	2,564	2,873	2,425	235	213	448	3,64,445

In future the statement should show in two additional columns the amount decreed and the amount recovered, so that the success of this procedure may be compared with that under the certificate law.

12. In Part II of the Report is given a short history of the management of each estate with a rent-roll of half a lakh or upwards during the year 1894-95. The great estate of the Burdwan Raj, with its rental of over 45 lakhs, was well and economically managed by Raja Ban Behari Kapur. The percentage of the management charges on the current demand was only 3·5, and of the cost of maintaining the proprietor and his family 9·26. In Tikari and Kasimbazar, the two next largest estates under the Court of Wards, the management charges were high, amounting to 16·1 and 16·7 per cent. respectively, on the current demand. The amounts spent on the proprietors was also high in both cases, being 16·72 in the Tikari estate and 18·5 in Kasimbazar. In the former estate Rs. 35,219 were spent on improvements chiefly for village irrigation.

The Lieutenant-Governor would take this opportunity to draw the Board's attention to the remarks which he made in August 1894 at the time of hi

inspection tour in Noakhali in regard to the Courjon and other estates in that district. His Honour then pointed out that it was the duty of the Court of Wards to conduct the management for the good of the estate, and not to screw every rupee out of the raiyats for the good of the disqualified proprietor. He drew attention to the fact that nothing had been spent on improvements, and that no list of improvements had been prepared; finally, that the ward in one case had been allowed to raise a loan of Rs. 25,000, the repayment of which would leave no surplus for improvements for years to come.

Speaking generally of the management of the larger estates, the Lieutenant-Governor would remark on the high rate paid for management, the large sums paid to the proprietors, the great cash balances, and the comparative smallness of the sum spent on improvements.

Estates taken in charge and released.

13. In Part III of the Report an account is given of "estates taken in charge or released during the year." But this heading is misleading, as the list includes nine estates which were taken in charge or released during 1893-94, but which could not be mentioned in the report for that year, and on the other hand contains no mention of certain other estates which were taken in charge during 1894-95, too late to be embodied in this report. It would be convenient if, in future, estates belonging to different years could be more clearly distinguished and separated from each other.

No large estates were taken over by the Court of Wards during 1894-95. Among the estates released, there was no case of signally successful management, while there were many failures. The administration of the released estates in Midnapore appears to have been particularly unsuccessful. The cases of Basudebpur (released on 20th March 1894), Beraberia, and Belki appear to justify fully the remarks of Mr. Romesh Chandra Dutt, which are quoted from the Burdwan Administration Report for 1894-95, as follows :—

"For some years past our administration of several estates brought under the Court of Wards in Midnapore district has not been as successful as it ought to be, and several estates have been released in a very involved or in a hopelessly insolvent condition. The administration of the year under report is not a bright exception to this rule."

No doubt nothing could have saved the three estates named above from ruin, but if this was so, the Court of Wards should not have undertaken a task destined only to bring discredit upon Government.

Encumbered estates in Chota Nagpur.

14. The number of estates managed under the Chota Nagpur Encumbered Estates Act, VI of 1876, was 58, as against 55 in 1893-94. Six estates were released during the year and five were brought under the Act. The following statement shows the demands, collections and balances for 1894-95 :—

District.	Arrear demand.	Current demand.	Collections.	Percentage of collections on current demand.	Remissions.	Balances.	Advance collections on account of ensuing year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.
Hazaribagh	29,671	1,00,472	95,438	94·9	6,358	28,347	34,271
Lohardaga	58,107	94,464	91,526	96·8	2,166	58,879	163
Palamau	2,730	16,073	14,881	92·5	286	3,636	......
Manbhum	41,234	97,964	92,965	94·8	3,340	42,893	18
Singhbhum	1,82,216	87,301	82,418	94·4	3,512	1,83,587	49
Total ...	3,13,958	3,96,274	3,77,228	95·1	15,662	3,17,342	34,501

In the statement showing the extent to which debts due by the estate have been liquidated, the Board have, as requested in the Resolution on last year's report, added a column to show what portion of the total debts fell due

within the year under the scheme of repayment prepared when each estate was taken in charge. The statement is reproduced below:—

DISTRICTS.	Due at the commencement of the year.	Ascertained and incurred during the year.	Total.	Payments.	Reductions by compromise.	Balance due at the close of the year.	Total amount provided in the scheme for payment of debts, as shown in the Commissioner's annual report.
1	2	3	4	5	6	7*	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh	4,21,681	2,67,832	6,89,513	44,725	8,524	6,36,264	46,041
Lohardaga	2,58,023	54,071	3,12,094	32,923	28,192	2,50,979	46,319
Palamau	1,12,054	2,617	1,14,671	6,733	... ..	1,07,938	11,717
Manbhum	1,98,570	12,812	2,11,182	49,953	2,900	1,58,529	28,398
Singhbhum ...	1,62,740	5,146	1,67,886	32,284	.... .	1,35,602	30,860
Total for 1894-95	11,53,068	3,42,478	14,95,546	1,66,618	39,616	12,89,312	1,63,241
Total for 1893-94	13,94,012	57,055	14,51,067	3,47,240	11,861	10,91,966	......

* The comparison of columns 5 and 8 is satisfactory, that is to say, the schemes for the repayment of debts have as a whole been more than worked up to. There was a deficiency in payments by some estates which is more than counterbalanced by excess payments in others. The deficiency is most noticeable in the marginally-noted estates. In Doranda it is due partly to the non-realization of anticipated increments in the rental of the estate owing to revisions of settlements, and partly to short collections. In Siri it is owing to the failure to sell a portion of the estate as had been contemplated. In Tundi a portion of the deficiency should have been paid during the year, as the estate had a cash balance of Rs. 2,322. In Dhalbhum the non-payment was due solely to delay on the part of the creditors in accepting payment.

Estate.	Deficiency.
1	2
	Rs.
Doranda ...	11,260
Siri ...	26,764
Tundi ...	4,944
Dhalbhum ...	12,684

15. The Lieutenant-Governor desires to acknowledge the careful supervision exercised by the Board of Revenue over the several classes of estates in their charge. The names of the officers mentioned by the Board for successful management will, with one exception, be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1894-95.

No. 2140Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 25th October 1895.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for the year 1894-95.

The consolidated debt due to the Government, which at the beginning of the year stood at Rs. 36,91,575, was reduced by Rs. 1,61,815, and a further sum of Rs. 1,29,500 was invested in their own debentures. The nett balance of debt of the Commissioners on the 31st March 1895 amounted, exclusive of that incurred on account of the construction of the Kidderpore Docks, to Rs. 99,90,760, and the total investments at credit of the sinking fund have increased from Rs. 11,74,500 at the beginning to Rs. 13,04,000 at the close of the year.

2. Against this debt, the Commissioners hold block to the value of Rs. 2,09,20,813 and reserve funds amounting to Rs. 22,82,352 in additon to the valuable Strand Bank lands extending from Chandpal Ghât to Aheereetollah, for which an annual rent of Rs. 37,292 is payable to the Government.

3. An addition to the block of Rs. 4,20,944 was made during the year, the chief items being an extension of shed accommodation in the Petroleum Wharf at Budge-Budge and a new dredger. On the other hand, Rs. 1,64,205 was written off, of which Rs. 1,09,095 was the value of two hopper barges sunk on the 8th September 1894.

4. The work of widening the Howrah foreshore road, which was commenced during the year 1893-94, was completed during the year under review, with the exception of the demarcating fence, a fourth of which only has been completed.

5. The total amount received from the Government on account of the Dock loan up to the close of 1894-95 is Rs. 2,87,70,566. Against this advance the expenditure has amounted to Rs. 2,87,65,232, of which Rs. 25,258 were spent during the year.

The Docks were completed during the year. On receipt of the final report, the Secretary to this Government, in the Marine Department, in company with the Vice-Chairman of the Port Commissioners, inspected the works, and found them to be in every respect complete and in thorough working order. At the time of inspection all the 12 berths were taken up by vessels.

6. In regard to the revenue account, the year opened with a balance of Rs. 4,42,413, and the income for 1894-95 amounted to Rs. 43,46,583. The expenditure, including sinking fund, renewals and improvements, amounted to Rs. 40,93,370, leaving a balance of Rs. 6,95,626. The income of the year exceeded the budget estimate by Rs. 95,218, and in place of a deficit of Rs. 31,091, as was estimated, there was a surplus of Rs. 2,53,213.

7. The income under the head "Jetties" amounted to Rs. 13,05,435, showing a decrease of Rs. 32,956, as compared with that of last year. The total receipts from imports amounted to Rs. 8,36,658, which is Rs. 3,656 in excess of those for 1893-94. The receipts from exports amounted to Rs. 1,41,972, or Rs. 8,088 in excess of those of the previous year, and are the largest since the formation of the Trust. The expenditure amounted to Rs. 8,38,605.

8. The income derived from the Petroleum Wharf at Budge-Budge shows a decrease of Rs. 35,556, the total receipts for the year having amounted to Rs. 1,98,527. The quantity of kerosine oil imported was 25,120,773 gallons, against an import of 49,203,905 gallons during the previous year.

9. The importation of oil from Russia, which was 16½ per cent. of the total importations for 1893-94, rose during the year under review to 40 per cent. of the total imported.

10. Although the imports of case oil during 1894-95 were only 59 per cent. of those of the previous year, the excessive importation during 1893-94 caused the stock to accumulate at Budge-Budge to such an extent that the shed accommodation proved insufficient to hold all the oil landed. To meet this increased demand for storage, the sheds, which accommodated 12 lakhs of cases were enlarged and raised during 1894-95, so as to increase their utmost capacity to 20 lakhs, but this also proving insufficient, new sheds are being erected, which will shortly raise the accommodation to a total of 30 lakhs.

11. The total number of packages of tea, which passed through the Tea Warehouse, amounted to 664,587 chests, against 637,084 chests during the previous year. The receipts amounted to Rs. 1,20,843, against Rs. 1,16,236 during the previous year.

12. During the year 216 vessels with an aggregate tonnage of 510,991 were berthed at the Jetties, against 217 with a tonnage of 515,477 during 1893-94. The average number of days each vessel occupied the Jetties was 10·4.

13. The income of the Harbour Master's Department amounted to Rs. 5,30,303, against Rs. 6,47,281 in 1893-94. The decrease was chiefly due to a falling off in mooring hire and Harbour Master's earnings. The expenditure amounted to Rs. 5,64,419.

14. During the year there were 25 casualties to vessels, against 16 in the preceding year. This gives a percentage of 2·43, calculated on the number of vessels which arrived in the port.

15. In accordance with the orders of the Government, every casualty, which occurred during the year, was duly reported, and the Deputy Conservator held the preliminary enquiry required by section 6 of the Indian Merchant Shipping Act, 1883. The results of the enquiries were reported to the Government, but in no case was a formal investigation under the Act considered necessary. Two Assistant Harbour Masters were, however, punished by the Commissioners, one of them severely.

16. The work of examining boats, while plying, was regularly attended to throughout the year by the Surveyors. During the year 314 cargo, and 167 passenger, boats were called in for resurvey. Of these 273 cargo boats and 143 passenger boats had become unfit for service through wear and tear, and 41 of the former and 24 of the latter had became so by meeting with accidents.

17. The total receipts under the head "Port Approaches" amounted to Rs. 5,99,777, towards which the port dues, re-imposed from the 1st of December 1892, contributed Rs. 3,93,532. The expenditure amounted to Rs. 4,83,948.

18. The several channels in the river, with the exception of the Dredge Channel, the Jellingham Channel, and the river bed between Kulpi and Mud Point, have remained fairly steady. At the Dredge Channel very large changes have occurred, owing principally to the Jellingham Channel, the rapid and variable changes in which were noted in the Resolution on the last Annual Report of the Commissioners, and still continue. This is a specially dangerous channel, and the Lieutenant-Governor desires that the Commissioners will continue to take efficient measures for surveying and publishing the changes that are daily occurring.

19. The receipts from Special Tolls, levied under section 108 of the Calcutta Port Act, 1890, amounted to Rs. 8,13,398, against Rs. 7,95,110 in the previous year.

20. The receipts of the Kidderpore Docks which were entered by 132 vessels during the year (against 39 in the year preceding) amounted to Rs. 3,15,466 as shown below:—

	Rs.
Receipts from graving dock	85,511
" " imports	74,220
" " exports	1,18,098
Rent and miscellaneous	29,319
Railway earnings	5,272
Receipts from towing vessels by hopper barges	3,046
Total ...	3,15,466

Against this, the expenditure has amounted to Rs. 12,27,048, details of which are given below:—

	Rs.
Traffic establishment	66,087
Working expenses	2,54,835
Repairs	11,254
Municipal taxes	1,44,080
Interest on capital	7,50,792
Total ...	12,27,048

The total deficit is therefore shown to be Rs. 9,11,582, and would have been greater by four lakhs of rupees had not interest to that amount been temporarily suspended. Apart from the municipal taxes, and the charges on account of interest and repairs, it is observed that the expenditure on "Traffic establishment" and "Working expenses" exceeded the income by Rs. 19,756. The Lieutenant-Governor believes that the Commissioners are fully awake to the importance of securing fuller utilization of the Docks and obtaining a larger return from them, so as to obviate the necessity of maintaining the special toll which cannot but be prejudicial to the trade of Calcutta.

21. The thanks of the Government are due to the Commissioners for their efficient management of the affairs of the Trust.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Lieut.-Col.*, R.E.,
Offg. Secretary to the Govt. of Bengal.

WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT, I OF 1893, IN THE HOWRAH MUNICIPALITY DURING THE YEAR 1894-95.

No. 3710*M., the* 29*th October* 1895.—The following Report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-Brigade Act, I of 1893.

H. H. RISLEY,
Secretary to the Government of Bengal.

No. 819M., dated Burdwan, the 12th October 1895.

From—J. A. BOURDILLON, ESQ., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit a printed copy of the Annual Report on the Working of the Jute Warehouse and Fire-brigade Act within the Howrah Municipality during the year 1894-95. A statement showing the demand, collections, remissions and balances in Howrah on account of contributions for the Fire-brigade during 1894-95 has also been prepared under my orders and is submitted herewith.

ANNUAL REPORT FOR 1894-95, UNDER THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACTS IV AND I, RESPECTIVELY, OF 1883 AND 1893.

Dated the 6th May 1895.

From—J. L. DUNBAR GARDENER, Secretary, for Chairman, Howrah Municipality,
To—The Magistrate of Howrah.

I HAVE the honour to report on the working of the licensed warehouses in this Municipality for the year 1894-95. There were in all 283 warehouses comprised of the following:—

For storage of	jute	...	24
Ditto	cotton	...	41
Ditto	straw	...	80
Ditto	wood	...	136
Ditto	rags	...	1
Ditto	hay	...	1

2. The income from license fees on these warehouses for the year under report amounted to Rs. 4,002, plus Rs. 343 on account of arrears for 1893-94, and in accordance with Municipal No. 57T.—M., dated the 11th of May 1894, the income from extra fees on account of the additional demand for arrears of 1893-94, amounted to Rs. 1,715. A statement appended gives details of the collections under the three different heads. A classified list of the licensed cotton and jute warehouses is given in Appendix A, these being the most important; while for the other numerous warehouses no list is given. Three new jute warehouses were added to the old list, together with five new cotton warehouses, making a total of eight new and additional jute and cotton warehouses established during the year.

3. In addition to the jute and cotton warehouses licensed during the year under the new Act, there were 218 warehouses other than jute and cotton, such as those for the storage of wood, straw, hay and rags. These warehouses, previous to the year 1893-94, were licensed under section 261 of Act III (B.C.) of 1884, but in July 1893 were brought under the provisions of Act I (B.C.) of 1893.

4. The amount of fines from prosecutions instituted during the year under section 14 of the new Act was Rs. 21, plus Rs. 173, a similar receipt under fines from prosecutions instituted during 1893-94.

5. The expenditure incurred in assessing and collecting the license fees, in supervising the Department in which this work was done, together with contingencies, amounted to Rs. 901; particulars in detail being given below:—

			Rs.	A.	P.
1.	Salary of General Supervisor and Assessor	...	600	0	0
2.	Ditto Clerk	...	240	0	0
3.	Ditto Peon for one month ...	...	7	0	0
4.	Contingencies	...	53	14	0
	Total	...	900	14	0

6. One payment alone, on account of a refund of an excess collection, was made during the latter portion of the year amounting to Rs. 60-1.

7. The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire-brigade Station in Howrah is most centrally situated, standing next to the Municipal Market, and so located as to admit of the watch overlooking the whole town and detecting all fires occurring. There were thirteen fires during the year. A statement in Appendix B shows the particulars of each fire, with the destruction of property in each individual instance.

8. The total amount remitted to the Commissioner of Police during the year was Rs. 3,279, as required by Municipal Department Municipal No. 57T.—M., dated the 11th of May 1894, against the demand for the year under report, but towards the subsequent additional demand of Rs. 1,682 for 1893-94, no remittance could be made for want of funds. It is proposed, however, to pay this demand during the current official year.

Statement showing in detail the current collections of the year under report, the collections of arrears for 1893-94, *and the collections on account of the additional demand for* 1893-94.

	Amount realized against demand for 1894-95.	Amount realized against arrears for 1893-94.	Amount realized against additional demand for 1893-94.

WEATHER AND CROP REPORT.

For the week ending the 28th October, 1895.

Burdwan.—Rainfall at Sadar nil. Weather cooler. Rain still wanted. Fodder sufficient. Common rice sells at an average price of 16 seers per rupee.

Midnapore.—It is drizzling the whole of today (28th). Weather changeable. *Rabi* crops are being sown. Sugarcane doing well. Common rice is selling at 17 and 15 seers per rupee at Sadar and Ghatal respectively.

24-Parganas.—Rainfall at Sadar ·27. Weather seasonable, but rainy in the latter part of the week. Prospect of *aman* paddy on high lands is not favourable. Steeping of jute not yet complete for want of water. Sowing of *rabi* crops going on. Fodder and water sufficient. No cattle-disease. Rice sells at—

	Srs.	
Sadar	12 to 14	per rupee.
Barasat	15	
Basirhat	16	
Diamond Harbour	17	

Murshidabad.—No rain. Weather seasonable. *Aman* suffering for want of rain; outturn estimated at eight annas. Indigo and *rabi* crops are being sown, but rain much wanted for those crops also in high lands. Sugarcane, *kalai* and mulberry are doing well. Fodder sufficient. Common rice sells at 16 seers a rupee.

Khulna.—Rainfall at Khulna ·22. Weather cooler. Harvesting of jute is over. Standing crops doing well; $\frac{1}{32}$nd of *aman* land in the Sadar subdivision and 22,000 acres in the Satkhira subdivision estimated to be still unplanted. Fodder and water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	c.	
Sadar	17 to 21	0	per rupee.
Bagerhat	22	2	
Satkhira	16	0	

Dinajpur.—Rainfall ·02. Standing crops good. Price of common rice 15 to 16 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Rainfall nil. Weather cloudy and cool. Washing of jute still going on. Land under preparation for cold-weather crops. Prospects of *aman* good, but rain is wanted. Price of common rice from 12 to 14 seers per rupee. Fodder sufficient.

Pabna.—Rainfall 1·07. Weather cloudy and rainy. Prospects of *aman* paddy good. Sowing of *rabi* crops has commenced. Common rice sells at 16 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather warm in day, cool at night. Prospects of standing crops good. Price of common rice 17 seers per rupee. No cattle-disease.

Chittagong.—No rain. Weather dry and cold. Rain needed for *aman* crop and *rabi* sowings. Water and fodder sufficient. Rice selling at 17 seers per rupee.

Patna.—Rainfall at Sadar ·02. Prospects of paddy fair. *Rabi* sowings in progress. Some more rain wanted. Condition of cattle good. Fodder and water sufficient. Common rice selling at 20 seers per rupee.

Gaya.—No rain except a drizzle. Winter rice and *rabi* both suffering much. Price of common rice at Sadar 14 seers against an average of 14¾ seers per rupee.

Champaran.—No rain at Motihari. *Rabi* being sown. Prospects of *aghani* good, but rain is needed for the high lands. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Latter part of week cloudy. Rice suffering on high lands and will be considerably injured if no rain falls within a week. Rain also wanted for the *rabi* crops. Prices almost stationary.

Bhagalpur.—Weather cloudy, but no rain worth mentioning. Early cessation of rain has materially altered the prospect of winter rice. Paddy on high lands, where it cannot be irrigated, is drying for want of rain. Other crops doing well. Coarse rice sells at 18½ seers per rupee. Fodder and water sufficient. No cattle-disease.

Purnea.—Rainfall ·01. *Rabi* sowings going on. Paddy on high lands drying up for want of rain. No cattle-disease.

Cuttack.—Rainfall ·82. Weather hot and cloudy. *Sarad* in ear and attaining maturity. Condition of cattle good. Fodder sufficient. Prices of common rice—

	Srs.	c.	
Cuttack	22	5	per rupee.
Jajpur	26	4	
Kendrapara	30	0	
Banki	31	8	

Hazaribagh.—Rainfall at Sadar 3·10. Paddy on high lands considerably injured by the long continued drought. *Rabi* prospects greatly improved by recent rainfall Fodder ample. Common rice selling at 13 to 15 seers per rupee.

General Summary.—There was rain on the 27th and 28th instant throughout the greater part of the province, except in Bihar and parts of North and East Bengal. This rain will benefit the rice crop and will be good for the *rabi* sowings. In Bihar the absence of the "Hathia" or October rain has been detrimental to the prospects of the rice crop. No cattle-disease is reported. The price of common rice is generally steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 29th October, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Results of the Meteorological Observations taken at the Alipore Observatory from 20th to 26th October 1895.

	Inches.
The mean pressure of the seven days	29·878
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·860
	Hours.
The total number of hours of bright sunshine	60·1
The maximum possible number of hours of sunshine	80·1
	°
The mean temperature of the seven days	78·2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	80·1
The extreme variation of temperature	20 0
The maximum temperature	88·7
	Miles.
The highest velocity of the wind in one hour	7
	%
The mean relative humidity	77
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	78
	Inches.
The total fall of rain from 20th to 26th October 1895	0·08
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·68
The total fall from 1st January to 26th October 1895	38·81
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·06

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermogra[…] and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All […] thermometers are verified and the readings have been corrected to a standard constructed and verified at […] Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four f[…] above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. […] formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; △, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 28th October 1895.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1895.

WEATHER during September was characterised by an absence of rainfall in all districts, and as this was accompanied by comparatively cloudless skies, temperature was considerably higher than usual, especially by day. The nights on an average for the whole month were warmer than usual, but not to such an extent as the days, excess in mean maximum temperature being nearly three times as great as that in the mean night readings.

A peculiarity in the rainfall distribution during August, indicating the weakness of the monsoon current, was the limited extent of country over which rain, when heavy and general, fell. The heavy rain referred to above, is what is caused by the cyclonic storms beginning over the Bay and moving across the province. This want of generality in the rainfall was even more marked during September than in August, on the two occasions when cyclonic storms occurred, that is, in the first week and about the middle of the third week. A third disturbance was developing in the south of the Bay at the end of the month, and ultimately caused stormy weather in the north of the Bay and in Lower Bengal, but as that was after the beginning of October, an account of it will be given later.

The cyclonic storm at the beginning of the month moved in a westerly direction across the Bay and passed over the Circars. The changes, however, which followed led to a strong inrush of moist winds into the north-east of the Bay, over East Bengal, and gave rise to very heavy rain in Assam and North Bengal. As indicating the irregular distribution of the rainfall during that period when general rain might have been expected over the whole province, I quote figures given in the report for the week ending on the 14th September. The mean rainfall for that week in North Bengal was 6·9, and in East Bengal 4·83 inches, each being about double the normal fall. For the same period the fall in Chota Nagpur was half an inch, less than a quarter of the normal fall; and in Orissa 1·45 inches, rather more than half the normal.

On the second occasion of disturbed weather between the 18th and 20th, when a cyclonic storm crossed the north-west angle of the Bay, passed over part of Orissa, Chota Nagpur, and South-West Bengal, and caused very strong winds in Bihar, very little rain fell in the eastern part of the province. The average rainfall in Orissa and Chota Nagpur for the week ending on the 21st was more than 4 inches, about double the normal, and in North Bengal it was just half the normal.

During September a very large proportion of the rainfall is caused by these cyclonic storms, and the scanty rainfall of the present year in this month is due to the fact that monsoon weather accompanying the two storms was not general over the province. At such times the rainfall should be in large excess, because during the breaks of fine weather, when practically no rain falls, there is an accumulating deficiency to be made up when storms occur.

One important feature of the storms of the present monsoon season has been the very quick recovery, so that the monsoon weather which followed the storms was of but short duration. In the case of the first storm of the month, a very rapid rise of pressure obtained in the north-west of the Bay, and the distribution over the area, including the Bay and the province of Bengal, underwent a complete change almost within a few hours. From being low in the Circars on the 6th, pressure changed, so that lowest readings were along the foot of the Himalayas on the 7th—an arrangement which remained for several days and led to the heavy rain in North Bengal and Assam. The peculiarity was even more marked after the second storm. On the 20th the centre of the depression was in the North-West Provinces, so that pressure within the province of Bengal was lowest in Bihar. Gradients were very steep from east to west, and the strong winds referred to above were then general in the west of Bihar. On the 21st pressure was unusually uniform, not only over Bengal, but also over the Bay, and instead of being strong and easterly in Bihar, winds were light and westerly.

When the rapid recovery was occurring in both cases, a double change was in action. Along with the rapid rise of pressure over the area chiefly affected by the storm, a fall was general in the east or north-east where pressure at that time was highest.

Had the changes in the rear of the storm been slower and the period of recovery more protracted, there would in all probability have been more general rainfall, because in that case the moist current would have had time to spread over the whole province.

The first disturbance had begun to develop before the end of August, but at the beginning of September it was still but slight. Pressure gradients were becoming steeper in the south of the Bay, and a fairly regular cyclonic circulation of winds obtained in the north and centre of the Bay. The changes during the first few days were very irregular, and the reports received from the coast stations gave little indication of what was happening where pressure was lowest. The depression while in the east of the Bay was diffused and shallow, but as it was moving in a westerly direction, there was some likelihood of its developing into a more serious disturbance before it reached the opposite coast. There was a rapid rise of pressure in Bengal on the 2nd, and a brisk rise over the north of the Bay, after which the differences from normal readings varied from excess of ·07 inch in Bihar and North Bengal to defect of ·1 inch in the south-east of the Bay. The rise continued with moderate rapidity

almost all round the coast on the 3rd, and readings were practically normal. The changes near the centre of the disturbance must have been large, as it continued to move steadily towards the west, and on the 5th was near the part of the coast between Coconada and Vizagapatam. The centre crossed the coast near Coconada on the afternoon of the 5th, and the storm was felt with considerable severity between Vizagapatam and Masulipatam. The lowest reported barometric reading was 29·28 inches at Coconada at 2 P.M., and the highest wind velocity 40 miles an hour. After the centre passed the coast, a rapid rise of pressure set in, and by 8 A.M. on the 6th the distribution in that part of the Bay was nearly normal. The stormy weather quickly moderated, but the after-effects of the disturbance were felt for some days in strong south-westerly winds in the north-west of the Bay and moderately strong winds in Bengal.

In consequence of the changes of pressure which followed, and which have already been referred to, the area of lowest pressure was soon transferred to the foot of the Himalayas, and the heavy rainfall began in North Bengal and Assam. Sibsagar reported 4 inches on the 7th, Dhubri 8 inches on the 8th, and a number of places more than 6 inches on the 9th. After that it was neither so general nor so heavy, but showers became more common in the west of the province, being caused by thunderstorms. Only scattered showers, usually light, fell from the 10th to the 17th, during which time a depression was slowly forming in the south of the Bay and moving towards the north.

The depression was very feeble till the 17th, when a change which had been going on in the south of the Bay for two or three days became more noticeable. This was a steepening of the gradients, not owing to a fall of pressure near the centre of the disturbance, but to a rise in the south. The change seemed to come from the extreme south of the Bay, and was accompanied by a strong advance of monsoon winds and very heavy rainfall probably over the wide sea area between the Tenasserim and Madras coasts, as Tavoy reported 5 and Cuddalore 3 inches of rain on the 15th. There was, consequently, a shallow diffused low-pressure area over the north of the Bay, while from the south was coming a strong advance of monsoon winds, due to some cause other than the depression. The slow to moderate fall of pressure went on over the north of the Bay on the 16th and 17th; and the slow northerly movement of the depression continued. But about this time, the two actions appeared to combine, the steep gradients having closed up towards the north. The disturbance concentrated chiefly owing to the rapid rise of pressure over an area extending from the south of Burma to the extreme north of the province, and the energy conveyed to it by the inrush of monsoon winds from the south caused a deepening at the centre which was most apparent after the depression was over the land.

On the 18th the centre was in the north-west angle of the Bay, about equally distant from False Point and Saugor Island, and before 8 A.M. of the 19th it had crossed the coast line between Saugor Island and Balasore, probably at no great distance from the latter station. Owing to the quick development of the disturbance on the 18th and the steep gradients over the whole Bay, weather became stormy in the north-west angle. It also changed quickly over the province. From being fine with only occasional showers, cloudy-rainy weather became general. As the storm moved over Chota Nagpur there was a rapid fall of pressure, and the depression deepened near the centre. Strong easterly winds prevailed in all districts except Orissa, and there was no loss of strength on the following day, as a gale of wind blew in Bihar after the area of lowest pressure had passed into the North-Western Provinces. The strongest winds recorded this season were at some of the extreme western stations of Bihar, and the highest average velocity for 24 hours was 42 miles an hour at Dehri.

From the 18th to the 20th rainy weather prevailed, the heaviest falls being in the western districts and at Darjeeling, where 12 inches fell in two days. The recovery was unusually quick. A rapid rise of pressure in the west on the 21st and a slow fall in the east gave a distribution of great uniformity over the whole area. The skies cleared and rainfall became light and scattered at all stations.

From the 21st to the end of the month fine settled weather prevailed over the province with only a few scattered showers. For the week ending on the 28th the average rainfall varied from a fifth of an inch in Chota Nagpur to ·9 inch in East Bengal.

During the last few days of the month a low-pressure area formed in the south of the Bay, and appeared, up till the 29th, to be moving towards the Madras coast. It began to show signs of intensifying on the 29th, when a rapid rise of pressure in Burma caused steeper gradients in the east of the Bay. That stormy weather was following the depression was shown by the wind velocity at Diamond Island increasing to an average of 26 miles an hour on that day, the highest recorded there during the present monsoon season. The depression was probably deepening near the centre, and the rapid rise in Burma was the indication that it had begun to move to the west. The direction of motion of the storm changed on the 30th more to the north, and the centre ultimately passed close to False Point and Saugor Island, and probably over Barisal and Comilla. Very stormy weather was experienced especially in East Bengal, where the barometer fell below 29 inches.

Pressure.—As weather was fine and settled during a larger proportion of the month than usual, pressure changes have as a rule been unimportant. Very large changes occurred during the two disturbances at the beginning and soon after the middle of the month, and the rise especially which followed the movement of the depressions was very rapid. The uniform distribution which precedes that characteristic of the cold-weather season was well

marked during the last week, and though interrupted for a few days by the storm at the end of September and the beginning of October, it was soon afterwards restored. The mean distribution for the whole month is considerably more uniform than usual, and readings are above the normal at all stations. The greatest excess is ·03 inch in the western districts from which it diminishes towards the north-east, being less than ·1 inch in Assam.

Temperature.—In consequence of the sky being less cloudy than is usual in September, temperature has been high, especially during the day. Notwithstanding the cool weather which was caused by the disturbances, the mean maximum temperature is much above the normal, and the nights also are somewhat warmer, except in Assam and at Mymensingh and Sirajganj. Excess in maximum temperature varies from a few tenths of a degree in the east of the province to 3° at Chaibassa and Balasore. Excess in mean minimum temperature is generally about 1°. For the large divisions mean excess varies from a little less than 1° in East Bengal, North Bengal, and Bihar to nearly 2° in Chota Nagpur.

Rainfall.—The storm in the early part of the month caused a strong burst of monsoon winds over the east of the Bay, East Bengal, Assam, and North Bengal, and the second one in the middle of the month gave moderately heavy rain in all districts, except East and North Bengal. On this second occasion the falls were heavy in Orissa and Chota Nagpur and moderately heavy in Bihar. At other times the rainfall was almost always scattered and light and much below the normal. The average rainfall for the month is below the normal in all the larger divisions. South-West Bengal received 6·08 inches, or 67 per cent. of the normal; East Bengal, Bihar, and Chota Nagpur from 75 to 78 per cent. of the normal, and North Bengal and Orissa about 90 per cent. The average falls vary from 6·08 inches in South-West Bengal to 12 inches in North Bengal.

In Assam, Silchar received 13·33, Sibsagar 21·31, and Dhubri 26·44 inches.

The actual falls have again been somewhat irregular owing to the scattered rain which fell during a great part of the month. Falls of more than 10 inches have been general in the south of Orissa, and over a strip of country extending up the eastern side of the province and along the foot of the hills, including Chittagong, the eastern half of the Sunderbans, Dacca, Mymensingh, the northern half of North Bengal, and the extreme north of Bihar. Elsewhere the falls are generally between 5 and 10 inches, but a considerable number of stations scattered over all these districts have received 4 inches and a few only 3.

These falls have been above the normal in the south of Orissa, at a few scattered stations in East Bengal, and in some of the northern districts, such as part of Kuch Bihar, Rangpur, Dinajpur, Darbhanga, Muzaffarpur, and Champaran, but over almost the whole province they are in defect by variable amounts. The defect is most uniform in the centre and south, and is largest in part of North Bengal, where the greatest irregularity occurs. The difference from the normal in that division varies from excess of nearly 8 inches at Darjeeling, Rangpur, and Dinajpur to defect of more than 10 inches at Jalpaiguri, Mickliganj, and Mathabhanga. The only other part where defect was more than 10 inches was Noakhali. Defect of between 5 and 10 inches occurred in part of Purnea, Malda, Birbhum, Bankura, Midnapore, Nadia, 24-Parganas, and Balasore.

The comparison of the actual rainfall of the various large divisions of the province during the month is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the following table under the heading of September. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1895 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	44	9	29	111	86	82	67	67	67	71
North Bengal ...	27	5	49	129	91	43	165	87	89	92

Bihar ...	71	88	34	129	70	72	120	102	77	94
Orissa ...	49	101	29	194	46	212	79	116	90	112
Chota Nagpur ...	66	52	71	418	70	109	98	67	78	89

The following table contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or actual average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage, and the fourth

column states as a percentage how much the district rainfall for the month varied from the normal:—

Percentage Table for September 1895.

Division.	District.	Normal district rainfall for September.	Actual district rainfall for September 1895.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns ... spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at le

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 26TH OF OCTOBER 1895.

WEATHER during the week just past has again been fine and settled over the province, and, except at the close, over the Bay also. The chief features, viz., the absence of rainfall, the light northerly winds in all districts except Bihar, the rather warm days and comparatively cool nights, have all been maintained, as in the previous week. The rainfall was even more scanty, as none fell in Chota Nagpur and Lower Bengal, and a few scattered showers in North Bengal and Bihar give an average over these districts of only a hundredth of an inch. The heavier fall in Orissa was due to the disturbed weather in the south-west of the Bay. It was attended by heavy rainfall, which began in the extreme south and advanced slowly up the west coast of the Bay, reaching Ganjam and the south of Orissa at the end of the week.

The changes of pressure and of the other meteorological elements were of little importance in Bengal, there being only the usual small oscillations. Towards the end of the week a very slight fall of pressure in the north of the province led to readings being lower there than in the south; and this arrangement caused the southerly winds, which had hitherto prevailed in Bihar, to extend over North Bengal. As the change occurred at the time when the disturbance in the south of the Bay was giving unsettled weather over a wide area, it is impossible to say how far the increase of cloud in the northern districts was due to it. The probability is that it accelerated the change by a day or two. To whatever cause it was due the sky became overcast first in the north of the province, and afterwards cloudy weather with a good deal of rain became general in the southern districts.

The disturbance in the south-west of the Bay probably commenced too far south to affect the weather at any of the stations on the Madras coast, and as it moved rapidly, the stormy weather was only of short duration. Heavy rain began on the 22nd as far north as Madras, and continued on the 23rd, Cuddalore reporting nearly 8 inches on that day. Squally weather began on the 24th, but was not felt to the south of Madras, the severity of the storm being chiefly confined to the part of the coast between Nellore and Cocanada. Within little more than twenty-four hours after the squally weather began at Madras, the centre crossed the coast between Masulipatam and Nellore. On the morning of the 25th the centre appeared to be about due east of Madras and to be moving in a north-westerly direction. On that day heavy rain was reported from Nellore, and a moderate fall had occured as far north as Masulipatam. On the 26th the centre was well inland, and weather was rapidly moderating. The heavy rainfall on the 26th was between Masulipatam and Gopalpur, and lighter amounts were reported from Puri and Cuttack.

There was a considerable increase in the strength of the wind in the north-west angle of the Bay and in South-West Bengal, but that was of little importance as compared with the heavy rain, which gradually advanced northwards and ultimately became fairly general in Orissa, Chota Nagpur, and South-West Bengal.

Pressure.—Readings have been practically normal throughout the week, changes having been very slow at all times. The mean difference from the normal is, as a rule, only a few thousandths of an inch.

Temperature.—As stated above, temperature conditions have been very similar to what prevailed during the previous week. Mean temperature has been high in Orissa and Chota Nagpur, almost normal in Bihar and South-West Bengal, and low in North and East Bengal and Assam, the difference varying from excess of 1°·4 in Chota Nagpur to defect of nearly 2° in Assam.

Rainfall.—Only a very few scattered showers have been reported, except from Orissa, towards the end of the week. None has fallen in Lower Bengal and Chota Nagpur, and only ·01 inch on an average in the north of the province. The fall in Orissa is 6 inch, almost the whole of which fell on the 26th, the last day of the week.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 26th of October 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1895.

RESOLUTION ON THE REPORT ON EXCISE ADMINISTRATION IN THE LOWER PROVINCES FOR 1894-95.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 28th October 1895.

RESOLUTION—No. 720T.—F.

READ—

The Report of the Commissioner of Excise for the year 1894-95, with the observations of the Board of Revenue.

Mr. Krishna Govinda Gupta was Excise Commissioner throughout the year. He had immediately under him three Deputy Collectors—one as his Personal Assistant and two as Inspectors of Excise—whose chief duty was to travel about and assist the Excise Commissioner in inspections of all kinds. In 18 districts, 14 of which have central distilleries, Special Deputy Collectors were employed exclusively on excise work, and their pay was debited to the Department, while in 25 districts ordinary Deputy Collectors were in charge of excise in addition to their regular duties. Nine Sub-Deputy Collectors and 27 kanungoes were employed as Superintendents and Deputy

Superintendents of the 31 distilleries open during the year, but owing to the closing of the Pakour distillery, the number has since been reduced by one. In future reports it should be stated which distilleries are in charge of Sub-Deputy Collectors; and these officers should only be appointed to the largest and most important distilleries. In the executive branch of the subordinate establishment, one appointment was abolished during the year, and two have been abolished since its close, bringing the numbers in this branch down to 201 on salaries ranging from Rs. 20 to Rs. 400. The old excise darogas are gradually being replaced by Sub-Inspectors who know English, and some of the men newly appointed are graduates of the University. Two clerks were added to the office branch, which includes 141 men, owing to the opening of liquor depôts at Vishnupur in Bankura and at Pirojpur in Backergunge. Some delay occurred in the submission to the Board of the Excise Commissioner's report owing to several District Officers not sending in their reports and returns punctually, and, no return at all having been received from the Deputy Commissioner of Angul, the Board authorised the Commissioner to omit the figures relating to that district from the statistics attached to the Report. The omission, which would have left the Provincial statistics for the year incomplete and would further have affected the accuracy of comparisons drawn in future years, has been supplied under the Lieutenant-Governor's orders, and the figures quoted in the Resolution differ to this extent from those given in the Report.

2. *Inspections.*—A sufficient amount of inspection was done by the Commissioner and the Inspectors of Excise, but in future every district and distillery should be inspected at least once during the year by the Excise Commissioner himself or one of his Inspectors, and the inspections made by Commissioners and District Officers should be reported. In Faridpur, Darbhanga, Patna, Bhagalpur, and Shahabad, it is stated that the central distilleries were insufficiently inspected by the Collectors, while in other districts the sadar excise office, the ganja golas, &c., were not inspected as often as the rules require. Fuller particulars should in future be given on these points, and the names of officers who disregard the standing orders on the subject should be reported. For Special Deputy Collectors the minimum number of days fixed for touring was raised from 120 to 150, and orders were issued directing that these officers were not to be employed on judicial work or placed in charge of treasuries. It is satisfactory to find that with a few trifling exceptions, these orders were everywhere observed. The prescribed standard of touring, however, was only attained in twelve districts out of eighteen. In Monghyr Babu Surendra Nath Mazumdar did no touring at all during the period of nearly three months for which he held charge; Munshi Dumri Lal of Darbhanga was out for only 35 days in seven months, and Babus Rakhal Das Chatterji (Muzaffarpur) and Bhabataran Chatterji (Gaya) did not travel as much as they should have done. For Deputy Collectors of the ordinary staff who are employed on excise work, the minimum period of touring was extended from 60 to 90 days, and they were exempted from being placed in charge of treasuries. In 15 districts out of 25, the prescribed amount of touring was done, and in three the deficiency was trifling. The short tours made in Nadia and Malda are attributed to constant changes of the excise officers, and it should be an object to avoid these in future. In Chittagong judicial work interfered with the proper performance of the Deputy Collector's excise duties; and in Jalpaiguri the excise work was given to the Deputy Collector who held charge during the touring season of the current duties of the district office—an arrangement which should not be repeated. The insufficient touring done in Dinajpur is explained by the ill-health of two officers, and by the fact that the Collector himself did most of the excise inspections during the cold weather. The Excise Commissioner complains that the efficiency of his Department is impaired by reason of Deputy Collectors reverting to the regular line after they have gained experience of excise work. So long as existing arrangements continue, this is a result which must be accepted as unavoidable; and as the term of service in the Excise Department is fixed at three years, six of the 18 Special Deputy Collectors employed exclusively on excise duties must on the average revert to regular administrative work every year.

3. *Revenue and charges.*—The following statement shows the gross excise revenue, the charges, and the net revenue for the last five years:—

Period.	Revenue.	Charges.	Net revenue.	Percentage of charges.
1	2	3	4	5
	Rs.	Rs.	Rs.	
1890-91	1,04,60,932	6,47,112	98,13,820	6·1
1891-92	1,11,29,813	6,67,792	1,04,62,021	6·
1892-93	1,16,00,621	6,53,715	1,09,46,906	5·6
1893-94	1,21,37,864	6,47,740	1,14,90,124	5·3
1894-95	1,25,71,971	6,37,793	1,19,34,178	5·07
Difference of the past two years.	+4,34,107	—9,947	+4,44,054	—·23

In order to get the true figure for the net Provincial Revenue derived from Excise, we must add to the charges as here given Rs. 11,051 on account of refunds, and Rs. 8,872 for the difference between fines collected and rewards distributed. This raises the amount expended to Rs. 6,57,716, and lowers the net revenue to Rs. 1,19,14,255. These departmental figures, it should be noted, do not agree absolutely with those of the Accounts Department, which show the receipts to be less by Rs. 9,621 and the charges Rs. 3,458 less, thus reducing the net revenue shown in the table above by Rs. 6,163. Greater efforts should be made in future to obtain agreement between the figures of the Excise Department and those of the Accountant-General.

Since the decline in the years 1889-91, consequent on the extension of the distillery system and the abolition of outstills in certain districts, the recovery of the excise revenue has been rapid and continuous. During the past year the gross revenue rose from Rs. 1,21,37,864 to Rs. 1,25,71,971, while the charges fell from Rs 6,47,740 to Rs. 6,37,793, and the net revenue shows an increase of Rs. 4,44,054 on that of the previous year. At the same time the total number of licenses sanctioned under all heads, excepting tari, poppy-heads, and druggists' licenses for opium, fell from 11,145 to 11,046, and the number of licenses actually settled from 10,896 to 9,377. Nearly three-fourths of the increase in receipts occurred under the head of country-spirits, and there was also a substantial rise under opium (Rs. 78,713), imported liquors (Rs. 48,426), and pachwai (Rs. 35,818). The revenue from ganja declined by Rs. 42,290, and that from tari by Rs. 18,870, and minor decreases occurred under the heads of rum and siddhi. The reduction of Rs. 9,947 in charges is distributed over a number of heads, the largest items of decrease being Rs. 10,155 under rewards and Rs. 11,114 under petty construction, while the charges for travelling allowance rose by Rs. 10,748, and for petty repairs by Rs. 5,614.

4. *Revenue by Divisions.*—Distributed according to Divisions, the gross receipts for the last five years are shown thus:—

Divisions.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1894-95 compared with 1893-94.

					Net increase ...	4,34,107	

* Revised figures.

The Presidency and Patna Divisions, which between them make up about half the revenue of the Province, contribute in very different proportions to the increase realised during the past year, the former showing a rise of Rs. 1,74,386, while in Patna the revenue was nearly stationary. The Chota Nagpur Division has the next highest increase to that of the Presidency, and Orissa shows a decline of Rs. 32,437.

5. *Revenue and consumption.*—The relation of the growth of consumption to the growth of revenue is illustrated by the following statistics of four chief articles of excise:—

	Revenue.		Percentage of difference.	Consumption.		Percentage of difference.
	1893-94.	1894-95.		1893-94.	1894-95.	
1	2	3	4	5	6	7
	Rs.	Rs.		L. P. Gal.	L. P. Gal.	
Distillery liquor ...	24,45,174	25,61,538	+4·7	416,938	455,595	+9·2
Outstill shops ...	28,07,724	30,04,100	+7·	......	......	......
Country rum ...	4,35,308	4,32,227	−·7	83,554	83,624	·0
				Mds.	Mds.	
Opium ...	21,34,867	22,13,746	+3·6	1,973	2,042	+3·5
Ganja ...	25,35,045	24,92,755	—1·6	5,116	4,828	—5·6

The fact that the consumption of distillery liquor increased more rapidly than the revenue is a consequence mainly of the reduction of duty in the Patna Division, and the change in the method of levying distillery fees. Both of these measures were adopted with the express object of lightening the taxation on distillery spirits, and of enabling it to hold its ground, within the area supplied from distilleries, against the cheap liquor produced at the outstills of the neighbourhood. The increased consumption of distillery spirit is therefore not necessarily an indication of the spread of drunkenness, but merely tends to show that illicit liquor is less largely resorted to; while at the same time the increase of revenue bears a slightly higher proportion to the increase of consumption than was the case last year. In the case of opium and ganja the difference in the ratios of revenue and consumption, though less marked than in 1893-94, is still somewhat in favour of the former.

6. *Sources of Revenue.*—In the following statement the gross excise revenue of the last five years is classified according to the articles from which it is derived:—

Articles of Excise.	Revenue.					1894-95 compared with 1893-94.	
	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Country-spirits ...	45,28,262	48,14,643	50,30,143	52,52,898	55,65,638	3,12,740	......

Miscellaneous	6,671	7,973	10,413	11,678	12,408	790	......
Total ...	1,04,60,932	1,11,29,813	1,16,90,621	1,21,37,864	1,25,71,071	4,98,360	64,253
					Increase ...	4,34,107	

The receipts from country-spirits, which make up 44·3 per cent. of the excise revenue, have advanced steadily throughout the period. Ganja and

its varieties, which in 1893-94 yielded 22·29 per cent. of the revenue, now contribute only 21·4. Opium and its preparations (18·5 per cent.) hold their ground, and show a slight increase since last year. Tari fell off slightly during the last year, but still contributes nearly 8 per cent. to the total revenue. Rum (3·4 per cent.) shows a small decline; and pachwai (2·4 per cent) an increase of 10·3 per cent. The revenue from imported liquors rose by Rs. 48,426, or 20·8 per cent., and now bears a proportion of 2·2 (against 1·9 last year) to the total excise revenue. Calculated on the population ascertained in the Census of 1891, the average incidence of the excise revenue was 2 annas and 10 pies per head, against 2 annas and 8 pies in 1893-94, while during the latter year the incidence in Bombay was 8 annas and 4 pies, and in Madras 5 annas and 10 pies. No allowance, however, has been made in this calculation for the natural increase of population, which is estimated to be 7 per thousand per annum, so that the true incidence is somewhat less than is here stated. The settlements for the current year show an increase in every Division except the Presidency, the total advance on last year's results being Rs. 3,95,403.

7. *Country-spirit.*—Map No. II, annexed to the report, illustrates the incidence of revenue from country-spirits on population, or, in other words, the comparative popularity of country liquor in different parts of the Province. Throughout a huge tract of country extending from Shahabad on the west to Monghyr on the east, and stretching southward so as to include the whole of Manbhum and Lohardaga, every ten persons contribute a rupee to the revenue. Singhbhum on the south and Saran and Champaran adjoin this tract, and pay a rupee per ten to twenty persons; while on the north-east, Bhagalpur, Purnea, and Malda attain the same standard, and adjoin Jalpaiguri and Darjeeling, where the maximum rate of consumption prevails. On the south-east, again, Burdwan and the 24-Parganas show an incidence of one rupee to twenty persons, and Hooghly an incidence of a rupee to ten. Speaking generally, it may be said that a line drawn from Calcutta to Darjeeling marks off the areas of maximum and minimum consumption of country liquor; the minimum prevailing on the east and the maximum on the west. There are of course exceptions to this rule. Thus on the west of the line, the consumption of Orissa is at the rate of a rupee to 50 persons and over; Birbhum and Bankura yield a rupee per 40 to 50; Midnapore and Darbhanga a rupee per 30 to 40; and Muzaffarpur, Howrah, and the Sonthal Parganas a rupee for every 20 to 30. On the east of the line, again, the districts of Jalpaiguri and part of Darjeeling are areas of maximum consumption; but Jessore, Rangpur, Faridpur, Backergunge, Tippera, Noakhali, and Chittagong have the minimum incidence. Khulna and Mymensingh closely approach the same standard, and Nadia, Murshidabad, Rajshahi, Pabna, and Dacca have an incidence of only one rupee per 30 to 40 persons. Dinajpur and Bogra alone rise to the scale of a rupee per 20 to 30 of population, and the higher rates which prevail so largely on the west of the line are practically unknown to the east. If Orissa be excluded from the comparison, it is clear that the area where the least country-spirit is drunk corresponds substantially with the tract in which Muhammadans form from 45 to 80 per cent. of the population recorded at the last Census, and it can hardly be doubted that their habits and traditions account for the fact that that area shows the minimum consumption of country liquor and the maximum or nearly the maximum consumption of ganja and opium. Even to this, however, there are notable exceptions, so far at any rate as drugs are concerned, for Noakhali pays less ganja revenue than any district in the Province, and Faridpur, Tippera, and Noakhali show the minimum consumption of opium. In Orissa the place of country liquor is supplied by opium, to which in Puri is added a substantial proportion of ganja.

8. The revenue from country-spirit rose from Rs. 52,52,898 in 1893-94 to Rs. 55,65,638 in the past year, being an increase of Rs. 3,12,740, or 5·9 per cent. Of the total revenue raised, Rs. 30,04,100 were contributed by outstills and Rs. 25,61,538 by distillery spirits, the latter under the three heads of license fees (Rs. 8,06,044), still-head duty (Rs. 16,98,642), and distillery fees (Rs. 56,852). The income from outstills rose by Rs. 1,96,376, and that from distillery liquor by Rs. 1,16,364. The statistics of licenses show

that the number of outstills sanctioned rose from 2,066 in 1893-94 to 2,096 in the year under review, and the number settled from 2,059 to 2,088, while the number of shops sanctioned for the sale of distillery spirits fell from 1,292 to 1,237, and the number settled from 1,255 to 1,217. In the case of outstills, however, the increase is only apparent. Up to last year the licensees of outstills in some districts were allowed to open branch shops without taking separate licenses for them. These shops bore no number, and were not separately shown in the returns. During the past year 23 such shops have either been converted into independent outstills, or have been retained as branch shops bearing separate numbers, while 11 branch shops in Muzaffarpur have been closed. The net result of these changes was a reduction of four in the number of outstills sanctioned and of five in the number actually settled. All the districts of the Burdwan Division show an increase of revenue, with the exception of Howrah, where the decline was nominal. The existence of illicit distillation in Bankura and parts of Hooghly had been suspected for some time, and in order to check this the duty in Bankura was reduced from Rs. 2-8 to Rs. 2 per gallon London-proof, and in the Jahanabad subdivision of Hooghly from Rs. 4 to Rs. 2, while at the same time a special preventive establishment was sanctioned. Good results are said to have been attained, and the sales of distillery liquor in Jahanabad are stated to have increased. As, however, the duty in the surrounding area is Rs. 5 a gallon, there is a danger of the cheaper liquor being smuggled into this tract, and the working of the new arrangements should therefore be carefully watched. In the Presidency Division there was an increase of nearly Rs. 86,000 in revenue, of which Rs. 73,844 was contributed by Calcutta, and of more than 17,000 gallons in consumption, of which Calcutta accounted for 13,609 gallons. The Dacca Division shows a decline of nearly Rs. 20,000 in revenue, the fall being highest in Dacca and Mymensingh and lowest in Faridpur and Backergunge. In the first two districts, however, the fall is said to be nominal, being due to the issue of separate licenses for the sale of imported liquor, the receipts from which show a corresponding increase. In Faridpur scarcity and a change in the licensing system, and in Backergunge the taste for country-made Eau-de-Cologne, are said to have affected the revenue from country liquor, but Faridpur also shows a small set-off under the head of imported spirits. There was a slight fall of revenue in the Chittagong Division, where the outstill system is in force, owing, it is said, to apprehensions of scarcity in Tippera. In the area under the dual system of central distilleries supplemented by outstills, comprising the districts of the Patna Division, Monghyr, Bhagalpur, and Hazaribagh, the revenue from country-spirit rose from Rs. 15,97,272 to Rs. 16,69,448, being an increase of Rs. 72,176, to which all districts contributed except Bhagalpur. Within the same area the distillery revenue rose from Rs. 3,82,401 to Rs. 4,16,647, the increase being largest in Monghyr, where it is put down to general prosperity, and in Saran and Gaya, owing to the reduced yield of the palm trees from which *tari* is derived and the popularity of the weak *khasia* liquor now issued from the distilleries. The Lieutenant-Governor is glad to see this good result of the policy which he has all along strongly advocated. He upholds the central distillery system, but only on the condition, which has only now at length been complied with, that it does not force into consumption stronger liquor than the people are accustomed to drink. The Orissa Division with distilleries everywhere, except in the wilder tracts of Cuttack, shows a small decline of revenue, while the Chota Nagpur Division, which has a small distillery area near Giridhi, had an increase of Rs. 76,808.

9. *Changes in management of Central Distilleries and Outstills.*—Nothing is said in the Report or in the Board's review about the effect of the substitution of a distillery fee of 2½ annas per gallon London-proof for the former fee of an anna per gallon irrespective of strength, but the figures in table V show that notwithstanding a rise of 16,401 London-proof gallons in the consumption of distillery liquor in the Patna Division, the revenue from this source fell from Rs. 23,188 to Rs. 19,693, and it may be inferred that the change has removed an artificial restriction which tended to induce the abkars to produce stronger drink than they would otherwise have done. The system of levying duty on certain fixed strengths which are multiples of 5°, so that where the actual

strength falls between two of such multiples, duty is charged on the higher, has been introduced everywhere except in a few districts, where duty is levied on the actual strength. Under the head of outstills the only change effected was the regulation of branch shops and the reduction of their numbers already referred to. The restrictions on vat and still capacities originally proposed by the Excise Commission of 1884 had been withdrawn during 1893-94, on the ground that it was impossible to enforce them. No evil results appear to have followed, and the change is reported to have relieved the distillers from the liability to harassment, and to have tended to raise the fees for licenses.

10. *Country rum.*—The supply of country rum has hitherto been derived from Sibpur near Howrah, from Shajahanpur in the North-Western Provinces, and from Aska and Arcot in Madras. During the past year a new distillery was opened in Darbhanga in connexion with the sugar refinery at Sakri in that district. The revenue from rum fell from Rs. 4,35,308 to Rs. 4,32,227, the decrease of Rs. 3,081 being due partly to the rum imported under bond being slightly weaker than in the preceding year, and partly to a nominal decline under license fees. The number of licenses sanctioned was 16, all of which were settled, the corresponding figure for last year being 15. The total quantity of rum passing into consumption during the past year was 83,624 gallons London-proof (63,285 gross-gallons), against 83,554 gallons London-proof (62,066 gross gallons) in the previous year. The bulk of the trade in country rum is done through Calcutta, and the following statement illustrates the great development that it has undergone since 1888-89 :—

Imports of rum into Calcutta.

Year.	Albion rum.	Shajahanpur rum.	Madras rum.	Sakri rum.	Total.	Duty.
1	2	3	4	5	6	7
	Gross gallons.	Gross gallons.	Gross gallons.	Gross gallons.	Gross gallons.	Rs.
1888-89	9,168	15,150	......	......	24,318	50,408
1889-90	15,446	28,770	319	......	44,535	78,940
1890-91	4,417	27,340	9,360	......	41,117	73,871
1891-92	16,755	42,790	17,184	......	76,729	2,05,601
1892-93	9,386	35,799	14,597	......	59,782	3,97,951
1893-94	16,780	32,826	11,410	...	61,016	4,13,734
1894-95	13,377	32,643	12,134	3,518	61,672	4,11,696

During the period covered by this statement the total imports have increased nearly three-fold and the revenue eight-fold, the latter result being due to the introduction in 1892-93 of the practice of importation under bond, which is found to be more convenient to the trade. In Calcutta and its neighbourhood rum is drunk mainly by up-country people and labourers in the mills; and the remarkable growth of the demand has not interfered with the consumption of country liquor. During the past year 61,672 gross gallons were imported into Calcutta at a strength of 32° over-proof, of which 14,754 gallons were exported after being diluted to 20° under-proof, or 24,345 gross gallons. The amount consumed in Calcutta itself may therefore be taken to be 46,918 gallons at 32° over-proof, or 77,415 gallons at 20° under-proof, the strength at which rum is usually sold. The export of rum from Calcutta to the mufassal districts of Bengal rose from 7,092 gross gallons in 1893-94 to 12,537 gallons during the past year, the chief demand being from Dacca (3,871), Darjeeling (2,005), 24-Parganas (1,245), Mymensingh (720), Faridpur (702), and Jalpaiguri (632). There was also a direct import of 1,613 gross gallons from Shajahanpur into districts other than Calcutta. The exports to Assam rose from 6,222 gross gallons to 11,468 gross gallons during the year, and these, taken with the exports to Bengal mufassal districts, make up nearly the whole of the exports from Calcutta referred to above.

11. *Imported liquor.*—The revenue from this source, which consists exclusively of fees for wholesale and retail licenses, rose from Rs. 2,33,162 to Rs. 2,81,588. The total number of licenses sanctioned rose from 680 to 707, and of licenses settled from 639 to 700. The number of wholesale licenses was reduced by 2, and that of hotel licenses increased by 2, while the number of retail licenses rose by 61. This, however, was only due to the abolition of the practice of issuing combined licenses for the sale of country-spirits and imported liquor. Of the net increase of Rs. 48,426 in revenue, Rs. 14,410 occurred in Dacca, Rs. 12,858 in Mymensingh, and Rs. 6,241 in the 24-Parganas. The decline of Rs. 2,038 in Calcutta is apparent only. It is satisfactory to observe that the increase in the rate of fees sanctioned in Calcutta in 1892-93 has worked well, and the revenue has risen since that year by Rs. 28,404, while within the same period there has been a marked decrease in the number of retail licenses. Attempts were made to check the traffic in cheap German spirit, mostly distilled from potatoes, which is coloured and flavoured locally and sold under fancy names as brandy, whisky, port or sherry, by requiring every bottle to bear a label showing where the contents had been manufactured and bottled. The dealers in these concoctions evaded the rule by printing the prescribed particulars in type so small as to be illegible, and revised orders were issued which could not be fully enforced during the year. Neither the Excise Commissioner nor the Board appear to expect much result from their efforts to let the public know the true character of the stuff some of them drink, and it is clear that so long as people are willing to buy spirits at Rs. 9 a dozen, without caring to ask what they are made of, there will be no lack of unscrupulous dealers to meet this demand.

12. *Tari.*—The revenue derived from the sap of palmyra and date trees fell during the year from Rs. 10,16,375 to Rs. 9,97,851, being a decline of Rs. 18,524, or 1·8 per cent. The increase of 329 in the number of licenses issued was due to a rise in the number of licenses for the sale of unfermented tari, which is not an intoxicant. The decline was heaviest (Rs. 22,156) in the Patna Division, which yields more than half of the tari revenue collected in the Province, and every district except Patna and Champaran showed a marked falling off, which is attributed by the Excise Commissioner to unfavourable climatic conditions, which caused a reduction in the yield of the trees. Unseasonable rain during the hot weather of 1894 is said to have led to the growth of a worm which destroyed the spadices of the palmyra trees, while the excessive cold of the autumn and winter caused the blossoms to wither. The Board think that the tari revenue was also affected by the reduction of taxation on country spirits in the Patna Division, and by the attempts made to introduce the Madras practice of taxing tari by means of a fee on each tree tapped, which were continued during the year without conspicuous success. The subject has since been fully reported on by Babu Abhilash Chandra Mukerji, 2nd Inspector of Excise, who was deputed to Madras for the purpose, and the Board have been instructed to introduce the tree-tax system into certain selected districts as soon as the law has been amended, so as to prohibit the tapping of trees without license. With reference to the inquiry made in the Resolution on last year's report, as to the relative alcoholic strength of tari and country-spirit, the Board explain that owing to the presence of saccharine matter in tari, its strength cannot be determined by the hydrometer. Experiments made by two different methods in 1892 point, however, to the conclusion that tari contains about the same proportion of alcohol as spirit at 95° or 96° under-proof, and is therefore about 5° weaker than the weakest kind of country liquor.

13. *Pachwai.*—The revenue under this head, which includes both the rice beer, which is consumed chiefly in the districts of Western Bengal, and the millet (*marua*) beer, drunk in the Darjeeling hills, rose from Rs. 3,46,518 to Rs. 3,82,336 —an increase of Rs. 35,818, or 10·3 per cent. The number of licenses for sale sanctioned fell from 1,790 to 1,736, and number settled from 1,680 to 1,668. At the same time there was an increase of 270 in the number of licenses granted for home-brewing, which are not included in the figures just quoted. The privilege of free home-brewing for domestic use has long been permitted to the aboriginal tribes in the greater part of the Chota Nagpur Division, and

has been extended since the close of the year to the district of Hazaribagh. In Darjeeling a system of allowing house-holders to brew *marua* beer for domestic use without limit of quantity, on payment of an annual fee of Rs. 2 per house, is being tried in Kalimpong during the current year. Both of these proposals have been approved by the Lieutenant-Governor as tending to promote the use of a harmless and wholesome beverage, and to discourage the consumption of country-spirit by people who have not yet acquired a taste for it. Experiments made during the year by the Deputy Commissioner of Darjeeling show that the alcoholic strength of rice beer is 94·8° under-proof, and that of millet (*marua*) beer about the same. Either drink, then, is about as strong as tari, and some 5° weaker than the weakest variety of country-spirits.

14. *Ganja.*—The following statement shows the main facts relating to ganja revenue for the last three years:—

	Licenses sanctioned.	Licenses issued.	Quantity consumed.	Revenue.
	No.	No.	Mds.	Rs.
1892-93 ...	2,708	2,672	5,451	23,86,066
1893-94 ...	2,736	2,715	5,116	25,35,045
1894-95 ...	2,725	2,702	4,828	24,92,755

The receipts from duty fell from Rs. 14,02,568 to Rs. 13,34,269, or by Rs. 68,299; and after allowing for a rise of Rs. 26,009 under license fees, the net falling off in revenue was Rs. 42,290. This was due to a reduction of 1,285 bighas in the area under cultivation, and to the deficient outturn of the crop of February and March 1894 caused by unfavourable weather and the attacks of a kind of red spider. For these reasons prices ruled very high until the close of the year, when the new crop of 1895 came into the market. The figures of consumption are highest in Calcutta (425 maunds), and Mymensingh (401 maunds), Purnea (230 maunds), Dacca (208 maunds), Bhagalpur (206 maunds), and Monghyr (171 maunds). In Orissa the consumption fell from 236 to 169 maunds, but there was no increase in the consumption of duty-paid Garhjat ganja, which declined from 18 maunds to 17 maunds, and it seems probable that large quantities of illicit Garhjat ganja must have been imported into those districts. The smuggling of this ganja was reported on at length by the Hemp Drugs Commission, and the experiment is now being tried of introducing into the Tributary States of Orissa the system which has been in force in Kuch Bihar for many years and has worked well there. Under this arrangement the Chiefs will get Rajshahi ganja at cost-price, and will issue it to the consumers after levying duty at the rates in force in British districts. As they will make a substantial profit on the transaction, it is hoped that it may induce them to suppress the cultivation of the ganja now grown, which is not a spontaneous product, and can without doubt be extirpated if the Chiefs take the matter vigorously in hand. The other suggestions made by the Commission are under consideration.

15. *Production and distribution of Ganja.*—The following statement illustrates the production of ganja in, and its export from, Rajshahi during the past year:—

	Mds.	Mds.
Production—Balance of previous years		2,324
Crop of 1894, less amount exported in 1893-94		2,489
Crop of 1895		7,000
Total to be accounted for ...		11,813
Export of crop of 1893-94	3,767	
„ of 1895	1,690	
Destroyed by order	113	
Total accounted for		5,570
Balance in hands of cultivators—		
Crop of 1894 and earlier years	933	
„ of 1895	5,310	
		6,243

The further distribution of the drug after it leaves Rajshahi may be illustrated thus—

	Mds.	Mds.
Balance in district golas on 1st April 1894		2,007
Imported from Rajshahi		5,457
Total to be accounted for ...		7,464
Consumed in Bengal	4,065	
Exported to North-Western Provinces	426	
" to Nepal	226	
" to Sikkim	1	
" to Kuch Bihar	62	
" to Assam	602	
" to Hill Tippera	2	
" to Orissa Tributary States	6	
" to Mauritius	85	
" to London	249	
Quantity destroyed	637	
Adjustments and wastage	125	
Total accounted for		6,486
Actually in stock on 1st April 1895		978

The quantity destroyed seems to be unduly large, as it amounts to nearly 10 per cent. of the total quantity accounted for, but this as well as the large balance in store on 1st April 1892, is explained by the fact that as the crop of February-March 1894 was a poor one, a large quantity of old ganja which would otherwise have been destroyed was retained under special orders to make up the deficient supply. Much of this, however, was not really needed, and was destroyed in March 1895, in addition to the usual quantity thus disposed of. The export of ganja to London is said to have been going on for over 30 years, and within the last five years the amount so exported has risen from 96 to 249 maunds. A small portion of this is retained in England for medical purposes, and the rest is transhipped to Demerara, Natal, and other colonies for the use of Indian coolies. Hitherto ganja exported to London has been free of duty, while the full duty has been levied on ganja sent to Mauritius. Orders have now been issued to charge duty on ganja exported to London.

16. *Bhang.*—According to Dr. Prain, whose definitions of the various products of the hemp plant have been followed in the report of the Hemp Drugs Commission—*bhang*, *siddhi*, *sabzi*, and *patti* "are different names applied to the dry leaves of the hemp plants, whether male or female, and whether cultivated or uncultivated." Although the consumption of this article rose from 943 to 1,064 maunds, and the number of licenses from 315 to 321, the total revenue fell from Rs. 55,752 to Rs. 55,394, owing to the surrender of several licenses in Calcutta and their re-settlement at reduced fees. Owing to the fact that the hemp plant grows spontaneously over a large area in Bengal, the illicit consumption of bhang cannot be effectively suppressed, and the revenue suffers. When the Excise Act is amended, power will be taken to prohibit the collection of bhang except under license, and it is hoped that this will be sufficient to protect the revenue without going the length of the suggestion made by the Hemp Drugs Commission, that occupiers of land should be made responsible that it shall not be found on their lands.

17. *Opium.*—The following statement illustrates the demand for excise opium during the last three years:—

	Licenses. No.	Consumption. Mds.	Revenue. Rs.
1892-93	3,031	1,934	20,85,635
1893-94	3,297	1,973	21,34,867
1894-95	3,066	2,042	22,13,746

The figures for licenses include permits to licensed druggists to sell opium and its preparations and poppy-heads for medical purposes only. The number of these was reduced by 199 during the year, the largest decrease (169) being in Noakhali, where it is stated that many village practitioners used to take out permits, not because they used any opium, but because it was supposed to add to their importance. Although the number of ordinary licenses issued was less by 29, the consumption rose by 69 maunds and the revenue by Rs. 78,879. The revenue from license fees shows an increase of Rs. 32,475, or 6·6 per cent., while the average fee per retail license was Rs. 303 as compared with Rs. 279

in the previous year. In Chittagong the receipts from license fees rose from Rs. 58,136 to Rs. 77,202—an increase of Rs. 19,066, while the consumption shows an increase of 1 maund 36 seers.

The competition for licenses which these figures indicate is believed to be due in some measure to the enormous profits to be made by smuggling excise opium into Burma, where, according to the Board, it sells sometimes as high as Rs. 100 per seer, but the last Burma report shows the Arakan selling price to be Re. 1-7 per tola, or nearly Rs. 130 per seer. This opinion is borne out by the fact that in several cases of opium smuggling recently detected in Chittagong, the drug seized was excise opium. The Commissioner of the Division states that in these cases an examination of the accounts of two rival shops showed that they received opium greatly in excess of the quantities accounted for or the balance in store. It is clear from this that the special Chittagong system of apportioning the supply of opium to the licensees of frontier shops according to the ascertained local demand is not an effective safeguard against smuggling, where the temptation is so great as is represented by the difference between the treasury price plus license fee, amounting together to Rs. 55 or Rs. 60 per seer, and the Burma price of Rs. 100 to Rs. 130 per seer, of a highly portable article, which can be smuggled into Burma across the 60 miles of land frontier or in the open boats in which much of the rice trade is carried on. The same cause is also said to account, at any rate in part, for the increase of 81 maunds 5 seers in the consumption of opium in Calcutta, and it is possible that much of this goes to Burma either direct or through Chittagong. The increase of 10 maunds 22 seers in the consumption of the Patna Division and the districts of Monghyr and Bhagalpur is thought to indicate a decrease in the supply of illicit opium through the cultivators. In Hooghly the increase of 6 maunds 33 seers is ascribed to the detection of some important cases of opium smuggling from French territory. The map annexed to the Report illustrates clearly the comparative prevalence of the use of opium throughout the Province. The area of maximum consumption lies along the coast from Puri to Chittagong, and the people of this tract contribute to the opium revenue at the rate of one rupee per one to twenty persons. To this, however, there are three exceptions, Noakhali, with the minimum incidence of one rupee to 120 persons and over, Backergunge (Re. 1 to 60-80 persons), and Khulna (Re. 1 to 40-60 persons). Next in order come the districts of Northern and Central Bengal, which pay a rupee of opium revenue per 20-40 persons, while the large tract of country, including the Patna and Bhagalpur Divisions, which pays the maximum revenue on country liquor, contributes to the receipts from opium at the minimum rate of a rupee to every 120 persons and over. Bearing in mind the popular belief that opium taken in moderation is a prophylactic against fever, it is of interest to observe that the area showing a high consumption of opium includes the fever-stricken tracts of Northern and Central Bengal, while in former years the coast districts are believed to have suffered severely from the same cause.

18. *Madak and Chandu.*—The revenue from madak rose from Rs. 78,379 to Rs. 89,409, while the number of licenses issued fell from 315 to 308. Chandu yielded Rs. 29,624, against Rs. 24,476 in the previous year, and 67 licenses were issued as compared with 73. The effect of the order issued in May 1892, prohibiting the smoking of these drugs on the premises of licensed shops, and reducing the limit of retail sale and private possession to one tola, which at first brought about a decrease of revenue, seems therefore now to have passed away, while the prohibition of private manufacture has compelled the ordinary consumer to procure his supply of the drugs from licensed vendors instead of making them up himself. Another result of the order has been to drive the consumers of madak and chandu to congregate in private houses near the shops for the purpose of smoking. These places are described by the Board, the Excise Commissioner, and several local officers as unlicensed smoking dens, and the expression seems to assume that there is something specially nefarious in the practice of resorting to them. It is, however, clearly not contrary to law, and the Lieutenant-Governor is not satisfied that any reasonable ground exists for taking special measures to interfere with it. The question of reducing the fee of Rs. 50 for the privilege of manufacturing madak or chandu for domestic use is discussed at length by the Excise Commissioner, who points to increased revenue and the fall in the number of prosecutions for unlicensed manufacture from 837 to 600, as indicating that the prohibition

of private manufacture, though possibly harassing at first to ordinary consumers, has brought about a rise in the revenue from madak and chandu. Mr. Gupta doubts whether any *bonâ fide* use would be made of any concession in this direction, though it might induce unscrupulous persons to start unlicensed shops, under cover of their permission to manufacture madak and chandu for private use. The Lieutenant-Governor agrees in this view. The intention of the orders of May 1892 was to prohibit private manufacture in all but very exceptional cases, which the special license fee of Rs. 50 is intended to meet. The main object seems to have been attained, people are beginning to learn that they may not make madak or chandu for themselves, and it is undesirable to introduce any further change.

19. *Methylated spirit.*—The customs returns show that during the past year the quantity of methylated spirits passed out of the Custom House increased by nearly 5,000 gallons. The greater part of the supply is derived from Germany and the Straits Settlements. Recent experience has proved that methylation by wood-naptha does not render spirit permanently unfit for human consumption, that such spirit can by adding essences be manipulated into a potable liquor which eventually passes into consumption as Eau-de-Cologne, and that, if mixed with water, it can be drunk or used to adulterate ordinary spirit. As methylated spirit pays a nominal duty of 5 per cent. *ad-valorem*, and is seldom less than 60° over-proof, it is obvious that, after its peculiar taste has been disguised, it can compete successfully with ordinary imported or country-made spirits. The question of what measures should be adopted for the protection of the revenue has recently been under consideration, and has been submitted for the orders of the Government of India.

20. *Offences against the Opium and Excise Laws.*—The number of licensees arrested for infringing the conditions of their licenses fell from 496 to 273, owing to the instructions issued to excise officers to prosecute only for wilful and persistent infringements and for fraudulent default in the payment of fees. As compared with last year, the number of other persons prosecuted shows a decline from 4,602 to 4,146, but it is higher than in 1892-93 or 1891-92. Taking both classes together, the number of persons prosecuted fell from 5,098 to 4,419, and of persons convicted from 4,352 to 3,824, while the percentage of convictions rose from 85·3 to 86·5, showing that greater care was taken in sending up cases. The amount of fines imposed fell from Rs. 89,209 to Rs. 69,056, but the proportion realised increased from 64·6 to 71·2. A sum of Rs. 58,195 was distributed in rewards to police and excise officers and informers, as against Rs. 74,540 in the previous year. In the past year, as in 1893-94, the Sonthal Parganas showed more than 100 cases of illicit distillation, Hooghly coming next with 41, and Midnapore and Bankura with 34 and 33 apiece. A curious account is given of the systematic fashion in which illicit distillation is carried on in the Damin-i-Koh by Sonthals and Paharias. Their craving for strong drink has led these people to form liquor clubs, which subscribe to pay the fines of any member who is punished for distilling. Organised frauds on the revenue of this kind cannot be adequately dealt with under the law as it now stands, and in the Bill which has been prepared by the Board to amend Bengal Act VII of 1878, power has accordingly been taken to punish excise offences by either rigorous or simple imprisonment. Singhbhum, which had 28 cases in the previous year, showed only 7 last year. The Sonthal Parganas also heads the list with 143 convictions for selling tari without license, against 11 cases in 1893-94. The decrease in arrests for the possession of foreign exciseable articles was due to the smaller number of such cases detected in districts bordering on Nepal. Mr. Colvin, Collector of Champaran, suggests that such cases should not be taken up, on the ground that the accused are mostly ignorant people; but in the Lieutenant-Governor's opinion this would be pushing leniency too far, and would tend to establish a regular contraband trade, which would soon become difficult to suppress.

21. The Lieutenant-Governor desires to thank Mr. Krishna Govinda Gupta for an excellent report, and for his successful management of the Excise Department during the year. Sir Charles Elliott hopes that Excise Administration in Bengal, after sustaining many attacks and undergoing many changes of policy, is now established on a fairly firm basis, and that in future a steady development of the revenue may be looked for without any undue increase in the consumption of either liquors or drugs.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY.

RESOLUTION ON THE GENERAL REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 2nd November 1895.

RESOLUTION—No. 428T.—G.

READ—

The Report on Public Instruction in Bengal for the year 1894-95.

Preliminary.

Sir Alfred Croft, K.C.I.E., was in charge of the Education Department, as Director of Public Instruction, throughout the entire year 1894-95, and has submitted the Annual Report in good time. This is the alternate year in which the report is confined mainly to statistical results, and the discussion of questions of general policy is avoided, so that it is justifiably 22 pages shorter than that for 1893-94. But its abbreviation has in no way diminished its completeness as a record, the value of its suggestions, or its utility to Government for administrative purposes.

Number under instruction.

2. The advance in the number of pupils under instruction is considerably larger than last year, when the total gain was only of 14,211 pupils and 613 institutions. This year the number of pupils in public institutions has risen by 87,422 from 1,413,737 to 1,501,159, and in private institutions by 4,830 from 135,530 to 140,360: there has been a total gain of 92,252 pupils. The institutions have also increased in number: public from 53,615 to 55,800, private or indigenous from 13,602 to 13,941: total increase 2,524. The gain has been shared by nearly all classes of institutions. Colleges increased by one; but as one of these furnished no returns, the number remains apparently stationary, with a slight reduction in the number of pupils. Middle vernacular schools are slightly fewer, but have more pupils. Among the schools classified as "public institutions" which adopt departmental standards, the number supported or aided by public funds has risen from 41,981 to 42,476, and the number of unaided schools has also increased from 11,634 to 13,324. Taking University and Secondary education together, the number of pupils under a higher class of instruction has risen from 208,453 to 216,527. The increase in the number of pupils at primary schools is from 1,130,551 to 1,206,285, the development having taken place in both upper and lower primaries, but more particularly in the latter. The figures for the lower primary schools are given below for the last five years:—

	Schools.	Pupils.
1890-91	43,998	942,244
1891-92	44,920	987,948
1892-93	43,829	983,271
1893-94	44,020	988,745
1894-95	45,897	1,055,253

Female schools continue to make satisfactory progress, as shown by the following figures for the quinquennial period—

	Schools.	Pupils.
1890-91	2,270	49,638
1891-92	2,743	58,801
1892-93	2,856	60,249
1893-94	3,042	65,011
1894-95	3,261	68,477

Unlike last year, Arabic and Persian schools have advanced from 1,225 with 14,688 pupils to 1,383 with 16,417 pupils, while Sanskrit schools have receded both in numbers and attendance.

3. In the population of Bengal which is included in the educational returns, there are, at the usual rate of 15 per cent., 5,461,912 male children and 5,494,642 female children of school-going age. The returns show 1,527,511 boys and 114,008 girls at school. Thus of all boys of a school-going age 27·9 per cent., and of all girls of a school-going age 2·0 per cent, are at school. The proportion of boys actually at school in the different districts, compared with the number of boys of school-going age, taken at the usual rate of 15 per cent. of the male population, varies from nearly 67 per cent. in Noakhali and 60 per cent. in Chittagong, Hooghly and Calcutta, and 57 per cent. in Midnapore and Howrah, to 11 per cent. in Palamau and Purnea, and 10 per cent. in the Chittagong Hill Tracts. The Bihar and Bhagalpur districts still send far fewer boys to school than they should send.

Ratio to population.

4. The income of the Department remained nearly stationary in the year, viz., Rs. 5,63,000 as compared with Rs. 5,71,000 in 1893-94. The gross expenditure charged in the accounts to the Department was Rs. 26,37,703 as compared with Rs. 25,72,107 in 1893-94. The net expenditure from Provincial revenues on education, according to the Accountant-General, was Rs. 20,67,074 as compared with Rs. 20,06,388, an increase of Rs. 60,686. Taking the departmental accounts, as distinguished from those of the Financial Department, the total expenditure on education in Bengal, including all disbursements from public and private sources, amounted to Rs. 98,29,572, an increase of Rs. 2,54,115 over the Rs. 95,75,457 of the preceding year. The net expenditure from all public sources, including District and Municipal Funds, increased from Rs. 34,69,664 to Rs. 34,91,020, *i.e.*, by Rs. 21,356, while expenditure from private sources increased from Rs 61,05,793 to Rs. 63,38,552, or by Rs. 2,32,759, of which Rs. 13,754 are due to the increased income of the University. Primary education cost more by Rs. 1,30,617: of this amount increased expenditure from District Funds, owing to additional grants made for the purpose from Provincial revenues, accounts for Rs. 54,260, while the expenditure from private sources increased by Rs. 71,973. The municipalities have continued, as was noticed last year, to devote less of their funds to secondary and more to primary education. The figures were—

Financial results.

		Secondary.	Primary.
		Rs.	Rs.
1892-93	...	37,000	24,000
1893-94	...	29,970	41,419
1894-95	...	26,838	48,344

5. The Director was on inspection tours extending over 51 days, and visited 53 institutions of all grades and kinds in 14 districts. Owing to his appointment as President of a Committee for the revision of the European School Code, he was unable to do so much touring as last year, when he and Dr. Martin between them spent 85 days in the mufassal and visited 114 institutions in 17 districts. The time spent on inspection by the inspecting staff of the Province, throughout the year, is exhibited in the following statement and compared with last year:—

Inspection tours.

	1893-94.		1894-95.	
	Number of officers.	Average number of days.	Number of officers.	Average number of days.
1	2	3	4	5
Inspectors	5	172	5	158
Assistant and Joint-Inspectors ...	9	152	9	191
Inspector of European Schools ...	2	95	1	68
Deputy Inspectors	44	182	44	172
Sub-Inspectors	200	212	204	198

It is unnecessary to repeat in any detail the Director's remarks, with which the Lieutenant-Governor agrees, on the amount of inspection done by individual officers. Among Inspectors, he gives the highest praise to Dr. Martin and Rai Radhika Prasanna Mukerjea, Bahadur. Among the Deputy Inspectors, the prescribed minimum rate of 150 days touring in the year was attained in all the districts except Hooghly, Midnapore, and Darbhanga, in which there was a change of officers. The Sub-Inspectors have on an average exceeded the prescribed minimum of 200 days touring in all the Divisions, but the number of Sub-Inspectors in the Dacca Division appears to be deficient and to require strengthening. Last year His Honour expressed his concurrence with the Director's opinion that 400 visits to schools was too high a minimum to fix, and that 500 visits implied perfunctory work. In the instances of hasty work mentioned by the Director of Public Instruction in his paragraph 29, severe notice should be taken and travelling allowance should be refused when tours are made in the manner described. The reduced standard of 350 schools visited has been attained in all Divisions except Rajshahi. In that Division the average number of schools visited was as low as 308, while in Patna it rose to 559.* His Honour trusts that due notice has been taken of the Sub-Inspectors whose conduct has been recorded as unsatisfactory. The "victim of a chronic lethargy" (from which he cannot be roused) should be dealt with strictly. The gradual substitution of inspecting pundits for chief gurus has been completed in all the Divisions, even in the urban area of the 24-Parganas. Last year 484 pandits paid 239,835 visits to schools, average 495; this year 483 paid 241,549 visits, average 499.

District Boards.

6. The Lieutenant Governor is glad to hear that the relations between the District Boards and the Education Department were on the whole harmonious. There has been some contention on the subject of the Boards placing their Sub-Inspectors at the disposal of the Deputy Inspector for the punctual preparation of the annual returns, and it is hoped that the District Boards will see the necessity of meeting the reasonable requirements of the Deputy Inspector in this respect. Most of the District Boards have Educational Sub-Committees, and the Deputy Inspector is generally a leading member, and in some instances the Chairman of these bodies. Complaints against the District Boards are diminishing every year. With few exceptions all the Boards sent in their reports to the Inspectors with punctuality, and little is said now of delays in passing bills and disposal of correspondence. The Director writes:—"The tendency to reduce educational expenditure, or to spend educational savings on objects other than education, appears to have well nigh disappeared. It was reported last year that the Burdwan District Board did not spend so much on education as had been spent by Government before the Local Self-Government Act came into force. Dr. Martin now notices that the Board has decided to restore to education the savings thus effected, and that Rs. 2,000 have been consequently provided this year for primary education in excess of the allotment. The Chittagong Board is reported to have raised its educational grant by over Rs. 5,000. Other Boards have shown similar liberality towards education. Every case in which I am not satisfied, on examining a Board's budget, with the proposed rate of educational expenditure, is promptly challenged, and it is seldom that after correspondence a satisfactory settlement is not arrived at." It is hoped that the principle laid down last year by Government, that educational expenditure should grow with the growth of the Board's ordinary income, will protect education against sudden and embarrassing fluctuations. Local Boards appear to exercise control over secondary education only in the Burdwan district, and in many districts they have no connection at all with educational matters. The Lieutenant-Governor's advice is that they should be limited to the control of primary education and such cognate matters as the payment of teachers on the authority of the Sub-Inspector, the appointment of teachers, and the selection of backward schools for stipends. The two Howrah Local Boards rarely consulted the Deputy Inspector, and worked independently of each other, with the result that decentralization produced disorder.

University Education.

7. The number of Colleges has increased from 36 to 37, divided into Government 11, Municipal 1, Aided 8, and Unaided 17, the new one (under the last category) being the

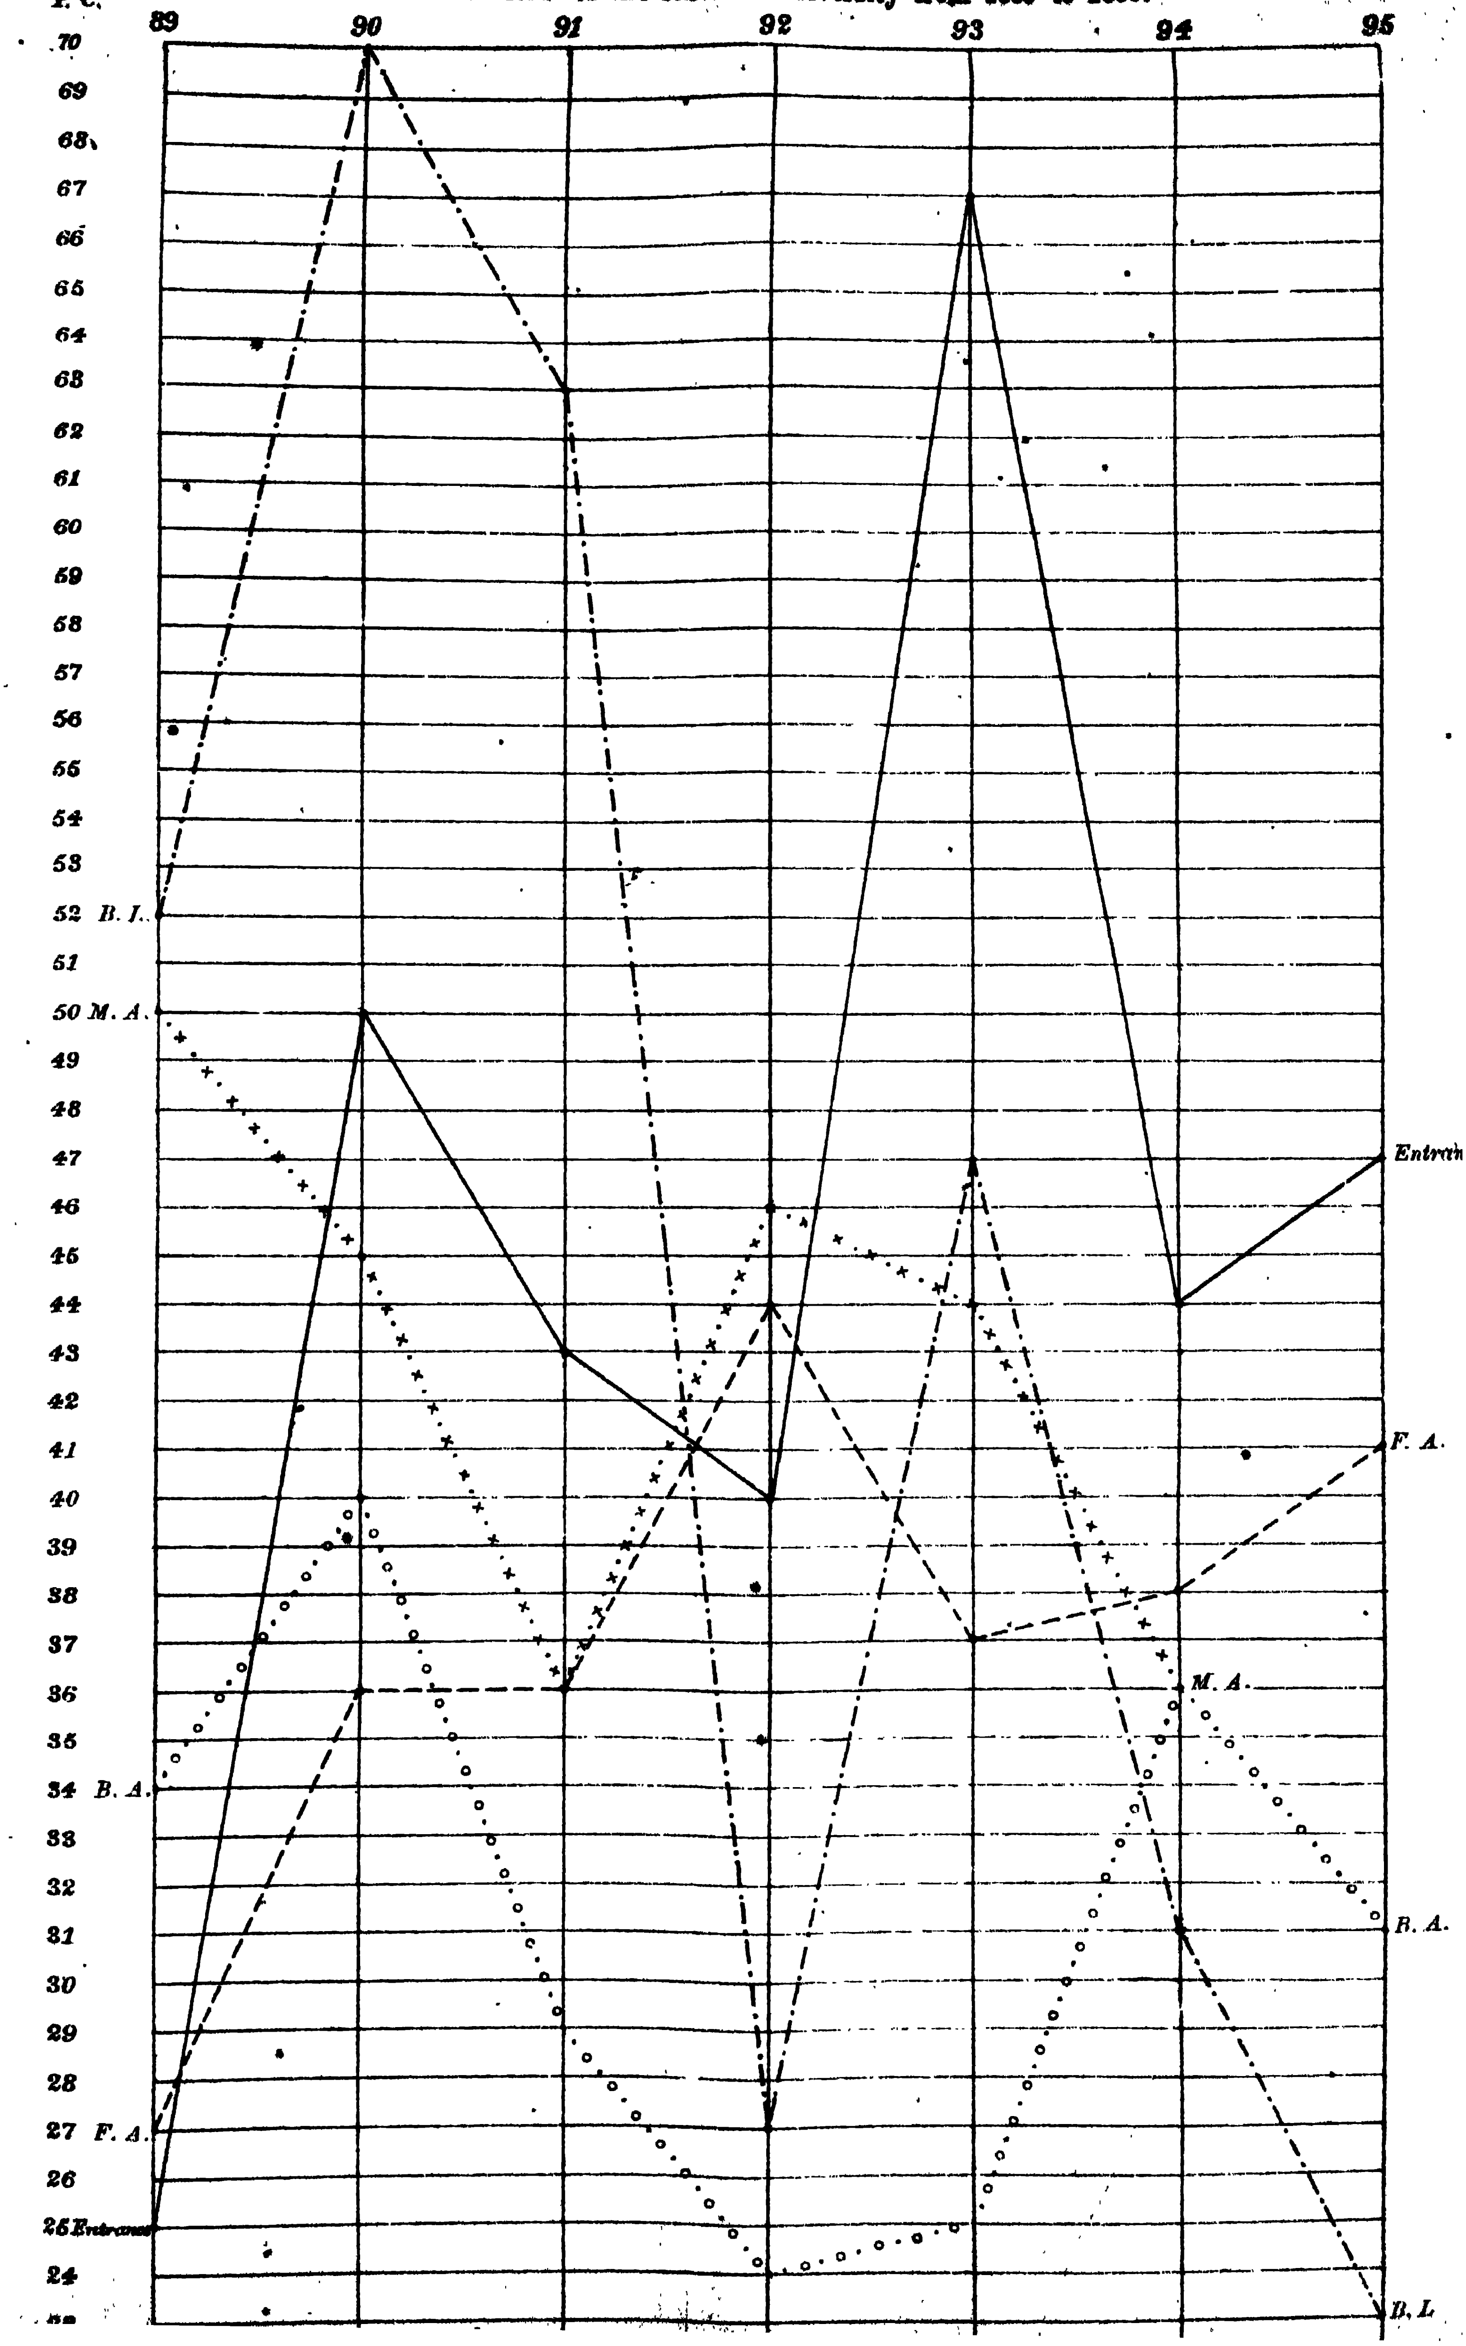
Central Institution at Calcutta: but Bishop's College furnished no returns. The total number of students on the rolls has diminished from 6,240 to 6,122, *i.e.*, by 118; this slight fluctuation is due to the smaller number who passed the Entrance examination in 1894. Of the total 6,122 college students, 3,999 read in the Calcutta Colleges and 2,123 in the mufassal, as compared with 3,892 and 2,348 last year. The importance, therefore, of providing adequate accommodation and supervision for the students in Calcutta is abundantly manifest. The variations in the numbers of the successful candidates at the University Examinations during the last six calendar years are shown in the following statement:—

	1890.	1891.	1892.	1893.	1894.	1895.
1	2	3	4	5	6	7
Entrance	2,156	1,710	1,643	2,915	1,863	2,194
Percentage of success ...	50	43	40	67	44	47
First Arts	996	693	1,011	830	826	1,162
Percentage of success ...	36	36	44	37	58	41
Bachelors of Arts	399	231	280	301	484	416
Percentage of success ...	40	29	24	25	36	32
Bachelors of Law	254	128	48	148	99	71
Percentage of success ...	70	63	27	47	32	24
Masters of Arts	57	46	54	57	52	...*
Percentage of success ...	45	36	46	44	36	...

* The examination is held in November.

The Lieutenant Governor has more than once drawn attention to the want of uniformity and the element of uncertainty which so largely affect the results of University Examinations. The fluctuations are graphically shown in the accompanying diagram. The University could confer no greater boon upon the cause of education than by ensuring equal success to equal proficiency in successive years.

Success in University Examinations.



8. There were 2,817 candidates, as compared with 2,179 in 1893-94, in the First Arts Examination held in February 1895. As 1,162 passed, against 826, the percentage of success rose from 38 to 41. In Government Colleges the percentage was 51, in Aided Colleges 40, and in Unaided Colleges 37. All the Government Colleges, with the exception of Patna and Rajshahi, passed more than half their candidates, the Dacca, Krishnagar and Chittagong Colleges standing highest with 63, 70 and 73 per cent. respectively. Among Colleges under municipal, missionary, or other private management, the most successful were the Midnapore College (72 per cent.), the Burdwan Maharaja's College (57), and the Barisal Braja Mohun Institution (61).

Among the candidates for the B.A. degree, the percentage of success (calculating on the candidates in both courses together) fell from 36 to 32; the number of candidates for the A course fell from 992 to 905, while those for the B course increased in number from 355 to 447, the total numbers remaining very nearly the same. Comparing the groups of Colleges, the ratio of success was as follows:—

	A Course.	B Course.	Total percentage.
Government	34	42	37
Aided	31	39	34
Unaided	24	37	28
Total ...	27	40	32

Last year greater success was achieved in the A than in the B course, and it was hoped that at last the two examinations had been conducted with nearly equal severity. This year the figures appear to show that the B course had a decided advantage. Whereas the ratio of success in the A course was 27 per cent. on the whole number of candidates and 39 per cent. in the Presidency

Diagram showing the Percentage of Success in the Entrance, F. A., B. A., B. L. and M. A. Examinations of the Calcutta University from 1889 to 1895.

College, in the B course 39 per cent. of the whole number of candidates, and 51 per cent. in the Presidency College, were successful. The figures of preceding years have been:—

	A Course.	B Course.	Total percentage.
1889	33	39	34
1890	39	49	40
1891	26	33	29
1892	20	47	24
1893	21	45	25
1894 ...	37	34	36
1895	27	40	32

The figures, however, previously returned are to a small degree inaccurate. It now appears that, in the University tables hitherto published, if a candidate passed with honours in two subjects he was entered in the tables as two candidates. This was an extraordinary error, and it is strange that it was not detected sooner. The mistake having been discovered, the correct number of candidates is shown for this year.

Of the 144 candidates for the M.A. degree, 52 passed, *i.e.* 36 per cent. as compared with 44 per cent. last year. The failure in Mathematics was remarkable. Last year 8 out of 14 passed; this year only one out of 14 was successful. The Lieutenant-Governor would be glad to know whether any explanation of this circumstance can be offered. The comparative success in the literary and scientific subjects is as follows:—

	A.	B.
1893	35	78
1894	33	48

These figures afford corroboration to the idea that the scientific course is the easier.

Cost of the Colleges.

9. The total expenditure upon collegiate education has increased from Rs. 7,19,354 to Rs. 7,20,875, or by Rs. 1,521: the expenditure from Provincial revenues has increased by Rs. 3,203: the fee-receipts are lower by Rs. 2,673, while the receipts from subscriptions and endowments show a rise of Rs. 991. The charge on Provincial revenues is over 40 per cent. of the total expenditure. The annual cost of each student in a Government College during the year rose from Rs. 236-14-5 to Rs. 238-11-8, and the cost of his education to Government from Rs. 142-15 to Rs. 152-2-10. The cost of collegiate education generally is Rs. 114. The cost of the whole number of collegiate students for the past five years may be exhibited as follows, showing that the hitherto descending scale of expenditure has been unchanged this year:—

	1891.	1892.	1893.	1894.	1895.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Average cost of each student in a college in Bengal	129	127	124	114	114
The Government share thereof ...	52	52	50	46	46

Auxiliary Societies.

10. In dealing with the subject of Collegiate Administration, the Lieutenant-Governor cannot omit to place on record his sense of the valuable aid afforded to Government in the education of the rising generation by two Societies, viz. the Society for the Higher Training of Young Men, of which Mr. Cotton is President, and Mr. C. R. Wilson Secretary, and the Indian Association for the Cultivation of Science, under the presidency and guidance of Dr. Mahendra Lal Sarkar, C.I.E. Both of these institutions have done good work in carrying on the education of young men outside of the University curriculum and the class teaching of the Colleges. They are based on sound principles and deserve cordial encouragement from Government and the public.

11. The main statistics relating to secondary schools for the last five years are contained in the following statement furnished by the Director in his 61st paragraph:—

Secondary education.

	Number of schools.	Number of pupils.	Expenditure.		
			Public funds.	Private funds.	Total.
1	2	3	4	5	6
			Rs.	Rs.	Rs.
1890-91 ...	2,393	199,105	6,11,046	20,62,859	26,73,905
1891-92 ...	2,285	194,178	5,94,816	20,87,904	26,82,750
1892-93 ...	2,326	198,270	5,90,493	20,92,642	26,83,135
1893-94 ...	2,373	198,736	5,94,328	21,33,751	27,28,079
1894-95 ...	2,397	206,989	6,09,740	21,85,658	27,95,398

Secondary schools of all classes taken together have increased from 2,373 to 2,397, or about one per cent., and their pupils from 198,736 to 206,989, or by ·41 per cent. The total expenditure has risen this year by Rs. 67,319. The expenditure from Provincial Revenues has increased by Rs. 13,848, and that from District Funds by Rs. 4,696, while Municipal Funds have contributed Rs. 3,132 less than in 1893-94. This is in harmony with the policy of Government to discourage municipal expenditure on secondary education.

12. The number of Government High Schools was unaltered, but the attendance of pupils slightly diminished. There were three fewer schools managed by District or Municipal Boards, but an increase of 11 in the aided High schools, the total number of High schools being 372 against 361 in 1893-94. The number of pupils rose from 75,682 to 78,227, an increase of 2,545, or about 3 per cent. At the University Entrance Examination 2,194 boys, *i.e.*, 47·3 per cent., passed out of 4,633 candidates, against 1,863 successful out of 4,268 candidates in 1893-94. The percentage of successful candidates for the previous six years has been 25, 50, 43, 40, 67, 44, so that the figure for the year under review represents a greater degree of leniency, which is shared by all the classes of schools. Government institutions passed nearly 67 per cent. of their candidates, while schools under private management, both aided and unaided, were successful to the extent of nearly 42 and nearly 40 per cent. While the general ratio of success was 47·3, the several Divisions varied from Chota Nagpur, 79 per cent., the highest, to Patna, 30 per cent., the lowest. In the Resolution on last year's report, when commenting on the system of merit marks (allotted to the different schools), which depended solely on the number of candidates passing at the Entrance Examination in the different Divisions, Government observed that, to be a satisfactory test of merit, some deduction should be made for unsuccessful candidates. This has now been arranged for by multiplying the marks as previously calculated by a fraction, the numerator of which is the number of successful candidates, and the denominator the number sent up to the examination. Judged by this adjusted standard, the Hindu, Hooghly and Dacca Collegiate Schools, and the Faridpur, Birbhum, and Mymensingh High Schools, distinguished themselves by the performances of their pupils in the examinations.

High Schools.

13. The Middle English Schools increased from 869 with 60,250 pupils, to 896 with 64,649 pupils. In the Middle Scholarship Examination, where the standard required is the full middle vernacular test, together with English language and composition as taught in the middle classes of High English Schools, 1,855 were successful out of 2,959 candidates (1,000 gaining the English and 855 the vernacular certificate), the percentage of success among the candidates being 63 against 58 last year and 66 in 1892-93. The examination for all the Bengali-speaking districts was again held with the same set of question papers for the whole Province; but the Boards of Examiners for the different circles continued to examine the answer papers under the supervision of the Circle Inspectors. It is understood that in the Hindi-speaking districts the practice of having one

Middle class schools.

set of question papers for all has also been adopted. The Middle Vernacular Schools have fallen from 1,143 to 1,129, practically the same as in 1892-93, but the pupils are more numerous, having increased from 62,804 to 64,113. In the examination, which is the same as the preceding, with the omission of the papers in the English language, the percentage of success was 54·2 against 52·9 in the preceding year, 2,106 candidates out of 3,888 being successful.

Drawing.

14. The record of the endeavours made to engraft drawing on the educational course is not altogether encouraging. Last year 40 pupils from 12 Government High Schools took up drawing as a subject at the University Entrance Examination, and 19 passed. This year out of 72 candidates, only 11 from 9 Government schools passed; and out of the total 307 candidates, who were examined in drawing by the University, only 24 qualified. Students have never taken kindly to this subject, which carries no marks at the examination, and the University has not favoured the idea of making drawing compulsory. To meet this difficulty it had long been proposed to assign marks for drawing in the award of junior scholarships, but the want of teachers prevented the adoption of this plan. Last year Government laid down that the time had arrived when the supply of qualified teachers was sufficient to justify the rule that the marks obtained in drawing should count in the award of junior scholarships, and a notification was issued during the year, specifying the number of marks so obtainable. In all Government High Schools which have a drawing master, the subject is to be compulsory in certain classes. In the last examination for vernacular masters, the result in drawing, as regards the qualification for special certificates, was very disappointing, but measures have been taken to secure greater attention to the subject and a steady and sufficient supply of qualified teachers.

Discipline and moral training.

15. The Lieutenant-Governor has perused with regret the list of cases of breach of discipline set out by the Director in his 79th paragraph. He does not suppose that any orders of Government will altogether change the nature of boys, and instances of outbreaks of youthful offenders still occur in England. But the cases of serious misconduct now reported are numerous, and show that the standard of discipline in this country admits of considerable improvement before it reaches the English level. The behaviour of the boys of the Krishnagar College at the annual athletic sports which were held in the circuit-house compound in the presence of the Magistrate and a large body of police is said to have been disgraceful: the Magistrate and other officials present were disregarded, and stones thrown at the police. The Lieutenant-Governor concurs with Sir Alfred Croft's expression of regret that the offenders could not be identified, and with the opinion that in such cases, where the actual culprits cannot be detected, the adoption of the system of general punishment, as practised in English public schools, is perfectly right and proper, either by the curtailment of holidays or the denial of some privilege or liberty for a definite time. Sir Charles Elliott is glad to read that the Noakhali Zila School, where unruliness had been reported for two years, has now a clean record, and that the good results are attributable to the punishment of the offenders and the strict discipline enforced by the head-master. The operation of the transfer rules has done much to improve the previous state of things, but instances still occur where they afford opportunities for fresh offences in the shape of forgery and mis-statements. In the case of these rules the co-operation of the parents and guardians is essential to their observance, and it is matter for regret that the Director should have to write that "guardians often exercise too little control over their wards, and instances have occurred in which they have been charged with complicity in their misconduct. Thus, in the case of junior pupils, in order to avoid the payment of the transfer fee, guardians have been found to send their wards to new schools with a declaration that they have not been in any school before."

Boarding-houses.

16. The Lieutenant-Governor has always attached the greatest importance to the provision of boarding-houses in connexion with schools as a means of enforcing discipline and developing scholastic life in some of its most cherished relations. He has read, therefore, with the greatest satisfaction the Director's report that this importance is now fully recognised, and that many public-spirited gentlemen

have come forward to help in the erection of houses for the accommodation of students. Sir A. Croft writes as follows:—"As instances of liberality in this direction, may be mentioned the gift of a pucka house and of the land on which it stands, by Rai Jotindra Nath Chaudhuri, M.A., B.L., for the benefit of the Taki School in the Presidency Division, and the erection of a house at his own cost by Babu Gobinda Nath Saha Chaudhuri of Parsadanga, for the use of boarders attending the Pabna Zila School. The Maharaja of Sonbursa in the Bhagalpur Division is also stated to have attached a boarding-house to his unaided high school for Rajputs. The members of the Oxford Mission House established a hostel in the Chorbagan quarter of the town of Calcutta, in which the management is left with the students themselves so far as concerns their boarding, their conduct and behaviour being closely supervised by a member of the Mission. But the benefit to be derived from boarding-houses cannot be fully realised so long as all non-resident pupils, or all those who do not put up with their *bonâ fide* guardians, are not compelled to live in them." Government has been able to make, during the current year, an important step in this direction, by undertaking the construction of a boarding-house for the students of the Calcutta Madrasa and the enlargement of the Eden Hindu Hostel, so as to enable it to hold all the students of the Presidency College, who are otherwise unprovided for. This long desired object has been deferred till now by financial considerations, but the present prosperous state of the Provincial revenues has enabled the Lieutenant-Governor to carry it out, and when the building is completed, residence in it will be compulsory on all who do not live with their parents or guardians, or in such a well-regulated establishment as that of the Oxford Mission. Sir Charles Elliott hopes that the time may come when the University will refuse to affiliate any school or college which does not make similar provision for its students.

Physical training and athletic pursuits.

17. The subject of the advantages of physical training for students has been fully dealt with in previous years, and the Director again refers to it, and gives a summary (in paragraphs 56 and 82) of the more interesting particulars. Athletic sports continue to grow in popularity, and the greater interest taken in football of recent years has attracted much attention. The Lieutenant-Governor's acknowledgments are due to the collegiate and school authorities, Government officers, and private gentlemen who have given encouragement to students in the pursuit of manly games by personal example and the offer of prizes. Friendly matches played at cricket or football between the residents at a station and the school-boys are calculated to produce good-fellowship and good temper, a kindly regard for opponents, and respect for skill and pluck. The allotment by the District Board of Balasore of a sum of money for the appointment of a peripatetic gymnastic teacher, who is to teach physical exercises in middle and primary schools controlled by the Board, seems to be a step in the right direction. It is hoped that Marcus Square, in the centre of Calcutta, may soon be opened as a playground for the use of the large number of students and residents in the neighbourhood who have not the time or the means to repair to the *maidan* for wholesome exercise.

Primary education.

18. The numerical fluctuations in primary education for native boys during the past five years are shown in the following statement:—

	Upper Primary.		Lower Primary.	
	Number of schools.	Pupils.	Number of schools.	Pupils.
1	2	3	4	5
1890-91	3,537	128,537	43,997	942,211
1891-92	3,661	135,371	44,918	987,876
1892-93	3,697	139,726	43,828	983,204
1893-94	3,763	141,483	44,020	988,745
1894-95	3,901	150,878	45,897	1,055,253

The number of schools in both divisions has increased by 2,015 and their pupils by 75,903, or 6·7 per cent., so that the average strength of a pathsala has advanced from 23·6 to 24·2. Upper primaries and their pupils continue to exhibit a constant increase: the lower primaries, which have sometimes shown curious variations in numbers, have now taken a decided step in advance. These devolopments in numbers are shared by almost all the Divisions in the Province. The variations depend more specially on local causes, and it has been assumed that the agricultural prosperity of the country during the last cold-weather was favourable to the growth of schools.

Cost of primary schools to Government.

19. The expenditure incurred by the Department (including the Provincial expenditure in municipalities) and by District Boards, on account of primary education for native boys and girls, is shown in the following table to have exceeded that for 1893-94 by Rs. 86,566, which indicates a satisfactory development during the year:—

Description of schools and expenditure.	From Provincial revenues.		From district funds.		Total.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stipendiary schools	1,03,701	1,06,269	1,56,003	1,70,079	2,59,704	2,76,348
Non-stipendiary	24,129	27,518	3,11,875	3,57,494	3,35,504	3,85,012
Subordinate inspecting agency ...	13,281	12,136	80,483	86,058	93,764	98,194

The ordinary departmental budget grant was swelled by the re-grant of a further sum of Rs. 31,000, being the amount of savings in the allotment for primary education in municipalities and cantonments for 1893-94. Another sum of Rs. 40,568, representing the unallotted balance of the grant for primary education in municipalities and non-Board districts for 1894-95, was also placed at the Director's disposal, with instructions to spend as much as possible of the amount on primary education in the mufassal during the year under report. He allotted Rs. 56,500 to 26 different District Boards, while the total of the Departmental grants on account of schools in non-Board districts, Government estates, and municipal areas in Board districts amounted to Rs. 1,85,664, and the expenditure therefrom to Rs. 1,74,437. Many of the Board districts failed to spend their additional grants, and their savings, amounted to Rs. 22,096, have been re-appropriated for primary education in the current year. The municipal expenditure on primary schools rose from Rs. 32,916 in 1892-93 to Rs. 51,630 in 1893-94 and to Rs. 58,672 in 1894-95. The Lieutenant-Governor trusts that the municipalities will continue to regard the promotion of primary education as one of the first calls on their income, until the standard of their duty in this respect, as explained in previous years, has been attained.

Systems of payment of grants to primary schools.

20. Of the three systems under which payments to primary schools are regulated, viz. (1) by stipends, (2) by rewards for pupils who pass in the fixed standards, (3) by a mixed system of small stipends supplemented by rewards, Government and the Director recommend the last as preferable to the two others, at least in the case of the Lower Primary schools, and discourage the adoption, except in Upper Primary schools and in special cases, of the plan of payment by stipends only. The subject has been treated at length in previous reports, and this year there is little to notice but the variations in the figures showing the payments made. The sum spent in rewards has risen from Rs. 3,49,634 to Rs. 4,05,199, while the expenditure on stipends has risen from Rs. 2,46,473 to Rs. 2,58,591. The increased expenditure on stipends is practically confined to the Burdwan and Rajshahi Divisions. The system of paying rewards in advance, that is, of
